No. 1182

One of the many popular numbers in the "Like-Mother's" line of Aluminum Toy Sets

HERE is a complete line of Toy Aluminum Sets that sell on solid VALUE . . . and never by mere ILLUSION.

VALUE is the reason why leading department and toy stores have found it so easy to build such worth-while repeat business through their sale.

They are safe, even for the tenderest fingers. Parents like them. Made of pure aluminum metal . . . correctly proportioned . . . beautifully polished.

The sale of these Sets is stimulated by "Like-Mother's" Stoves and Kitchen Cabinets . . . proportioned to go with the aluminum dishes and utensils, and increasing their play value and educational merit.

"Like Mother's" Toy Sets
will be shown
at New York's
Summer Toy Week, June 9-14
Hotel McAlpin

COMBINATION PEANUT ROASTERS AND POPCORN POPPERS

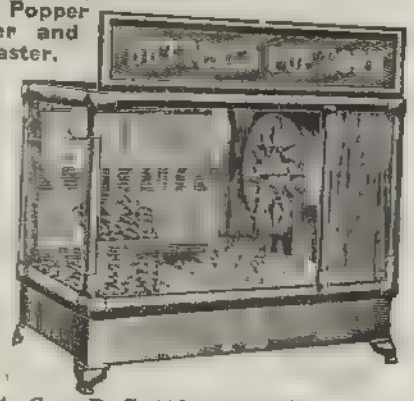
Double oak case and frame, with double strength glass and display shelf. Furnished with a peanut cylinder and a popcorn cylinder, either of which can be removed or replaced in a few seconds. Heat from popper keeps contents of case warm. Mounted on steel wheels and equipped with torch for illumination.

Capacity of popcorn cylinder, 8 quarts, each four minutes; capacity of peanut cylinder, two pecks each, twenty five or thirty minutes; capacity of popcorn case, 8 pecks; capacity of display shelf, 14 sacks; Height to top of base, 64½ inches; length over all, including wheels, 61 inches, width including wheels, 35½ inches. Each

No. 62—For gasoline; wt each about 260 lbs..... ✚$540 00

KINGERY, ELECTRIC

Continuous Corn Popper With Butter Coater and Cylinder Peanut Roaster.



Nickel silver base, mounted on nickel plated brass legs; nickel silver show case moulding; double strength window glass in case; furniture steel panels, mahogany finish. Front nickel plated copper with paneled nickel silver popper cylinder. Equipped with two electric light sockets on inside of case.

Note—Operates on A. C. or D. C. 110 to 220 volts. When ordering state whether A. C. or D. C. if alternating current give number of cycles. Each

No. 995—Length 34 ins; width 17 ins; height (not including sign) 80½ ins; ship wt each 125 lbs..... ✚$720 00

KINGERY

Continuous Corn Popper With Butter Coater And Peanut Roaster.

Cabinet of metal construction body and case made in one piece of heavy furniture steel with all joints securely welded; outside finished in mahogany, inside gray enameled. Metal doors and window frames with bevel plate glass, nickel plated decorations. Equipped with flash type electric sign flashing on and off at regular intervals. Corn popper designed that it may be operated independently of the butter coater, allowing an accumulation of corn permitting operator to prepare it specially for each customer.

Capacity of hopper 12 pounds; pop corn case 1 bushel, butter tank ½ pound; corn popper 16 to 40 quarts per hour; peanut roaster ½ bushel; peanut warmer 1 bushel.

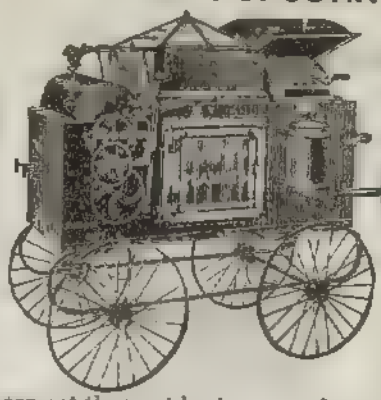
Note—Operates on A. C. or D. C. 110 to 115 volts. When ordering state whether for A. C. or D. C. if alternating current give number of cycles. Each

No. 994—Floor space 29x30 ins; wt each 750 lbs..... ✚$1657 50

✚ F. O. B. Ohio Factory Only.

COMBINATION PEANUT ROASTERS AND POPCORN POPPERS

D 6



Constructed of steel, cast iron, galvanized iron, copper, nickel silver and glass. No wood used except for holding the glass in the nickel silver frames at side of case and top of warmer, where the heat does not affect it.

The peanut cylinder is run by spring power and the popper by hand. Copper warmer heated by hot water and steam from pipes leading to the burners under peanut cylinder, and so constructed that the nuts on top get the most heat—a very important feature.

The nuts can be tested without stopping the cylinder. When roasting is completed the nuts are dumped into the warmer by a swinging frame, whereby the cylinder is lifted and the contents emptied. The popped corn rolls from the popper into the case. Equipped with a torch for illumination and a gong bell attached under machine, which by pulling a chain, attracts attention of the people.

Capacity of peanut cylinder, 10 quarts per roasting; capacity of warmer 3 pecks; capacity of popper, 4 bushels of popped corn per hour; capacity of popcorn case, 2 bushels of popped corn; height 51½ ins; height to top of tank 64 ins; length, including wheels, 52 ins; width, including wheels, 27 ins. Each

No. 95—For gasoline..... ✚$678 00

One in crate; wt each about 325 lbs.

One in cardboard box; wt per doz 12 lbs.

$100 Reward

$100 reward will be paid by The Kingsbury Mfg. Co., as a prize to the dealer with the best window display of Kingsbury *Silver Arrow* Flying Planes—or any other model airplanes. Any size window may be entered; small windows will be given equal consideration with large ones. No rules or regulations, nothing complicated. Simply have a good window display and send us a photograph of it not later than July 31st. The winner will receive our check for $100

You *can't lose* in *this* contest. For whether you win the prize or not, you are certain to increase your sales volume by tying up with the Big Kingsbury Advertising Campaign.

This campaign includes—

All Kingsbury Passenger Car Toys now actually designed and built with "Body by Fisher," just as real cars are so equipped—an exclusive Kingsbury feature and a real money-maker for you. . . . Two new model *Silver Arrows*, making six in all. . . . *Silver Arrows* are equipped with adjustable wings for setting in different positions to insure flying under all conditions. This wing flexibility is also a great factor in resisting smash-ups . . . motion pictures of Kingsbury Toys taken by Fox, Paramount and International, being shown in motion picture theatres all over the U. S. A. . . . *National* advertising *every* month in the year. . . . *more* advertising to a larger audience than ever through Child Life, Model Airplane News, Modern Mechanics, Open Road, Popular Mechanics, Popular Science Monthly.

Now, right now, is the time to put in your window display. The Kingsbury advertisement shown above goes into the American Weekly, *June 29th!* A reproduction of this ad together with the above easel-back, window display will be sent immediately upon request. Putting these in your window will help you win the prize. Send for them now so that you may run your window display *before* the ad appears. Remember that all this follows Children's Day, enabling you to cash in on Kingsbury's big summer advertising program.

See that you are fully stocked on *Silver Arrows* and other Kingsbury Toys. Order now—from Riemann, Seabrey Co. Inc., 215 Fourth Ave., New York City.

KINGSBURY *MOTOR DRIVEN* TOYS

NATIONALLY Advertised EVERY Month of the Year

On June 29th, immediately following Children's Day, this 4-color, half-page Kingsbury advertisement will appear in the Comics Section of the American Weekly—the magazine sold with the Sunday edition of newspapers with a total circulation of over six million, published in 17 large cities all over the U. S. A.

This striking 5-color easel back display will help sell the Silver Arrows. Place it in your window or on your counter to attract trade.

Act before

MIDNIGHT, May 1st

This is a hurry-up call to live dealers. Dealers who want their names and addresses published in the Kingsbury 4-color, half-page advertisement, reproduced above, in the Comics Section of the American Weekly, June 29th, must make arrangements at once. Names and addresses must reach us not later than midnight, May 1st.

Only a certain fixed number of dealers' names can be printed in the limited space of the special *"Where to Buy"* Section of this advertisement. And reservations already received now occupy most of the space. There is room for only a few more names, so you must act quickly.

Remember, this advertisement will reach more than six million readers. Thousands of these buyers live within shopping distance of your store. Your name and address in this advertisement tells them to buy from you. Remember, too, that this advertisement, immediately follows Children's Day, thereby enabling dealers to cash in on the summer toy interest already created. We also supply you with the striking 5-color window display shown above.

As little as $100 order will assure your name and address appearing in the special *"Where to Buy"* Section of the American Weekly ad. This size order has been arrived at to insure sufficient distribution of Kingsbury *Silver Arrow* Flying Planes in your territory, so that consumers can get them at your store. A July 1st dating on these goods enables you to sell them before paying for them.

In Addition

In addition to the Kingsbury Promotion Advertisement, the big Kingsbury campaign for 1930 embraces:

1. A 2 Kingsbury Passenger Car Toys now are us ly designed and built with Body by Fisher ... ust as real cars are so dipped—an exclusive Kingsbury f ature and a rea money maker f you.
2. Two new model Silver Arrows making a t o all ... dipped with ad ... able wi ... s for selling in different ... ces ... to ... ture flying ... a good thing. This wing detail l ... is also a great fact ... in reducing smash ups.
3. Motion pictures of Kingsbury Toys taken by Fox, Paramount and ... ional News Reel Organizations, being shown to millions in the theatres throughout the country.
4. National Advertising Every month of the year and more of it ... ng a larger audience than ever through Child Life, Model Airplane News, Modern Mechanics Open Road, Popular Mechanics, Popular Science Monthly.
5. And a big Window Display Contest for Dealers—details to be announced in the May trade papers.

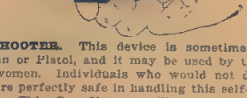
"Buco" Gas Shooter



GAS SHOOTER. This device is sometimes called Gas Gun or Pistol, and it may be used by the most timid women. Individuals who would not dare fire a gun are perfectly safe in handling this self-defense weapon. This Gas Shooter will not kill, but will disable anyone who comes within fifteen feet when it is shot off, and the attacker can be handled very easily after the charge is fired, for he is helpless and powerless. It is a sturdy built little device, easily loaded, and discharges with a small push button. It shoots by repercussion—the barrel springing backward over the shell which shoots the gas out forward, in a spreading cloud without a shock. The knurled end is removed and shell inserted from the back, cap then is replaced, barrel is pulled out and it is ready to shoot. Full instructions how to handle is enclosed with each. Made in 410 gauge, which in size contains about twice the charge that would be used in a 38 S. & W. Special Shell, and is more effective.

No. 5303 Gas Shooter, Each 3.50
No. 5304 Gas Shells for above.
Each ..... .30

NOTE: Fountain Pen Gas Pistols are listed on another page, which see.

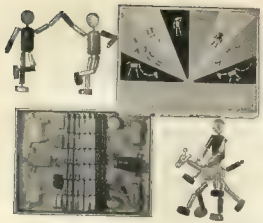
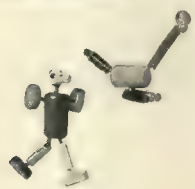
THE KNAPP LINE FOR 1930

KNAPP TOYS ARE NATIONALLY ADVERTISED



Send for a Sample Today . . . . .

KRAZY IKES, the most outstanding toy of 1930, sell on sight. ***And this we've proved!*** Without a line of advertising—solely by counter and window displays—dealers all over the country are selling Krazy Ikes in the hundreds.



National Advertising Starts in September

Now, with a ***proved seller,*** we are launching a nation-wide consumer advertising campaign to reach more than 5,000,000 parents. But—

Before we do this, we want to offer you a sample set of Krazy Ikes—so that you can see for yourself—so that you can "sell" yourself—so that you can see if you are justified in stocking big on this new sensation.

You be the judge! Look before you buy! Examine a sample set of Krazy Ikes. If you decide it's one of the biggest dollar values you can offer, order at once. The advertising begins in September and those who have ample stock at the start will naturally profit most.

Mail the coupon now.

WHAT IT IS

Krazy Ikes is the "1000 in 1" Builder Toy. The pieces of wood, colored in red, blue and yellow, push together and pull apart, making hundreds of funny things, all different and all from one set. Retails for $1.

Here are other Knapp Toys that Sell.

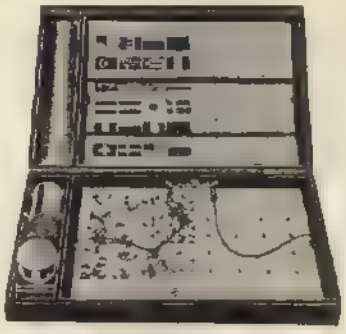
THE KNAPP LINE FOR 1930

The Steady Increase in Annual Sales Volume For the Past Several Years Assures Even Greater Sales During 1930

KNAPP MASTER MAGIC

The Knapp Magic Sets were first introduced in 1929
During the first year they outsold all other magic sets wherever shown
This unusual record had been anticipated, as the three popular-priced sets embody the most complete line of tricks ever offered, among which are many stage triumphs of famous magicians, never before exposed.
Evidence of the demand for the type of magic sets as found in the Knapp Master Magic collection is revealed by the unusual sales record made during its first year. The most conservative estimate indicates that the close of 1930 will show a marked increase in sales.

MASTER MAGIC SETS
No. 1—$1.00 each—Denver, West $1.15 ea.
No. 2—$3.50 each—Denver, West $3.75 ea.
No. 3—$5.00 each—Denver, West $5.50 ea.



KNAPP ELECTRIC QUESTIONER
No. 325. List price, $3.50; without battery, $3.40; Denver and West, $3.75; without battery, $3.65.

KNAPP ELECTRIC QUESTIONER

For 39 years this interesting educational toy has held and increased its popular appeal.
During that time it has been a most profitable and steady sales producer for practically every toy store and toy department in the country.
1930 will be no exception to this rule—except in greater sales.

KNAPP TELL-BELL

This companion to the Electric Questioner—will take its place this year, as usual, right next to the Questioner in sales. Again, you have the demonstration-selling feature. Three sliding knobs and the tinkling bell when the answer is correct. Instructive, amusing, mysteri o s

TELL BELL
No. 200. List price, $5.00. Denver, West, $5.50

PYRAMIDS

The idea for PYRAMIDS originated in the days of old Egypt and it still holds its appeal! The present demand for PYRAMIDS confirms the general opinion that this fascinating puzzle will enjoy a long and continued period of popularity. List price 50c.

All packed one-half dozen in a box.

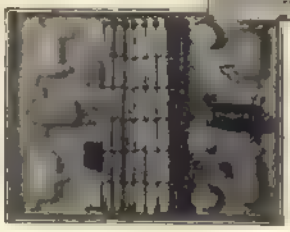
Most *sensational Toy* in Years



KRAZY-IKES

TRADE MARK REG. U.S. PAT. OFF.

The "1000-in-1" Builder Toy

BUYERS who saw KRAZY-IKES at the 1930 New York and Chicago Toy Fairs acclaimed it the toy success of the decade. And backed their judgment with orders!

KRAZY-IKES is new, novel, sensational. A "1000-in-1" Builder Toy and a toy in a thousand. The only toy of its kind on the market.

A set of KRAZY-IKES makes hundreds of funny things, all different—men, animals, donkeys. monkeys, gobblers, humpty-dumpties, dollies, birds, dogs, kittens, soldiers, etc. etc. etc. etc. There's no end to the fun! Easy, too! The pieces are simply pushed together: pulled apart for changing. Made in polished wood, *in colors*—red, blue and yellow!

Stock! Sell! Talk! KRAZY-IKES. It has *everything*—uniqueness, originality, amusement, instruction—appeal to all ages, to both sexes. And the price! Just a dollar bill! ($1.15 Denver and West) Where is there another dollar seller like this? There isn't!

KNAPP ELECTRIC

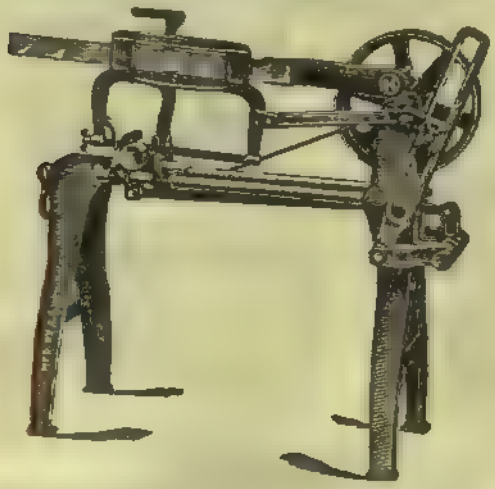
MONTGOMERY & CO., 105 FULTON STREET, NEW YORK CITY
(Consult Index) Mention this Manger No. 30 when ordering from this book

"Kwik-Kut" Power Hacksaw Machine



On strong mechanical lines—all wearing parts large and durable.

Because the *entire* blade is used from end to end. The only machine embracing this feature.

Because machine automatically adjusts its stroke to all sizes of cuts.

Because of the rapid "shot gun" return of the saw arm. The blade has a regular forward motion but returns *three times as fast*. Thus saving the time consumed by other machines which move forward and backward at the same speed. Ten strokes per minute more than any other machine without injury to blade.

Equipped with automatic attachment which throws clutch and stops machine as soon as cut is made.

On which the saw frame is mounted (with babbitted bearings) insures durability and a straight cut and prevents breaking saw blades.

May be thrown back if desired, leaving the vise absolutely clear.

May be used if desired.

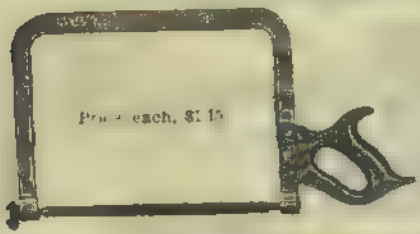
Clutch adopted is an efficient way of applying power and is new to Hacksaw Machines.

Made in three sizes as follows:

	Capacity	Length of Blades	Size Pulley	Speed	Weight	Price
No. 1	4 x 4 inches	12 inches	12 x 2¾	60	150 lbs.	$25 00
No. 2	5 x 5 inches	14 inches	14 x 2¾	50	180 lbs.	30 00
No. 3	6 x 8 inches	17 inches	17 x 3	45	250 lbs.	40 00

[illegible] SMITH & [illegible] [illegible] MUSIC WIRE is the best grade wire [illegible] and springs

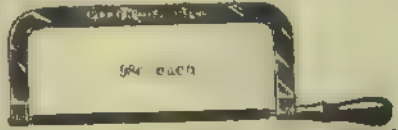
Star Hack Saw Frame No. 14



Frame No. 14 is adapted for large work such as cutting off rails, beams, etc. The back is polished and nickel plated, and the handle beech wood. Measurement between back and saw points, 10¾ inches. Carries 12 inch saws.
Price each... $1.15

Star Hack Saw Frame No. 15

For 12 inch blades only. The strength of this frame is made from heavy, stiff stock and will stand any necessary strain. Measurement between the back and points of the blades 9¾ inches. Size of the finished frame conforms to the dimensions of the Frame. Polished and nickel plated. Price... each, 98c.



Bench Hack Saw No. 1

A Bench Hack Saw is a device for which there has long been a place in every carpenter shop and similar stores. It can be readily adjusted to any length of saw that will pay for the time it takes to change it.

It is fitted with a swivel vise, which can be set to saw at an angle. This is a valuable adjustment that adds greatly to the usefulness of the machine as the saw may be set to saw on a bevel without the loss of time which would otherwise be spent in fixing.

One 9 inch blade is furnished with each machine, which should be strained on by the frame when in use. It is so constructed that 8 inch Blades can be used when desired. Vise opens 2 inches. Weight, each 15 pounds. Price ..... each, $4.35

SHOT GUNS

DOUBLE BARREL, HAMMERLESS

L. C. SMITH

The mechanical construction of all Smith hammerless guns is the same. Great care is taken in their production; in all grades they are of the highest standard that the best of material, improved machinery and skilled mechanics can produce.

Standard lengths of stocks 14 to 14½ inches; standard drops 2⅜ to 3¼ inches, but can furnish any length and drop of stock as desired from factory, without additional charge.

Long Range Wild Fowl Guns are built from regular models, designed to handle heavy charges of modern propellant powders, giving an increased effective range of 15 to 25 yards.

FIELD GRADE

Barrels—Armor steel, blued. Can furnish cylinder, modified or full choke bored.

Grip—Full pistol regular, half or straight to order.

Stock—English walnut; pistol checkered grip and fore-end.

LEFEVER SINGLE BARREL LONG RANGE FIELD AND TRAP GUN

LEFEVER SINGLE BARREL LONG RANGE FIELD AND TRAP GUN—The only inexpensive hammerless single barrel breech loading shot gun with an automatic safety device such as used on expensive double guns and an automatic ejector which kicks the shell out when the gun is opened. This new member of the Lefever Family is as shapely as ANY $1,000 00 gun; it has a genuine black walnut stock with full pistol grip hand checkered, hard rubber grip cap and butt plate. The forearm wood is black walnut hand checkered and like the walnut stock, highly finished with Duco $16 00

LEFEVER SINGLE HAMMERLESS TRAP GUN

LEFEVER SINGLE HAMMERLESS TRAP GUN –Here is the new Lefever single barrel hammerless trap gun with ejector, elevated ventilated rib, soft rubber recoil pad, ivory front and rear sights, a trap gun forearm which keeps the hand off the barrel, and the thick, fat cone experienced trap shooters demand. The specifications are 12 gauge 32 inch with a black walnut stock having the most popular trap specifications which are approximately 14½ inches long, a drop at the heel of 1⅞ inches, drop at cone 1½ inches, full pistol grip and a weight of about 8 pounds $35 00

Canvas Covers for Above Guns, Nos. 27-28-29. See Page 143 for Description.
Leather Cases, Nos 31-32. See Page 142 for Description.

Ten in wood case.

✚F. O. B. New York Factory Only.

SHOT GUNS

EXTRAS FOR REMINGTON REPEATING

For Remington Hammerless Pump Action, Take Down, Model Nos. 10 and 17 Repeating Shot Guns.

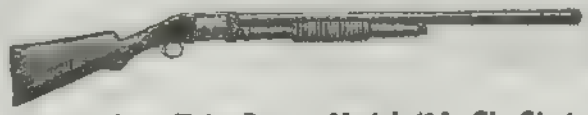
In all cases, extra barrels must be fitted at the factory. When ordering extra barrels for used guns, the complete gun, including the old barrel, must be returned to the factory, so that both barrels may be made to interchange on the same receiver.

	Each
Matting the top surface of plain barrels	✚$21 90
Solid Ribbed Barrels, add to plain barrel	✚ 21 90
Any length or drop of stock made to order at an advance of	✚ 39 72

*The solid ribbed barrel is particularly appreciated by shooters who have used a double gun and therefore are accustomed to a continuous line of sight. It also prevents the reflection of light on the top of the barrel from interfering with the shooters' sight. The barrel and rib are made in one solid piece, hence a rib can not be fitted to a plain barrel. Plain barrels, however, can be matted on the top surface, see extra charge for this operation under "Extras."

Note—Guns with special stock dimensions takes from six to eight weeks to manufacture, and all orders for such guns are positively not subject to cancellation.

MARLIN REPEATING



Hammerless, Take-Down, Model 43A, Six Shot.

Solid steel breech, solid top; side ejection; barrel matted on top entire length; press button cartridge release; automatic safety device; double extractors; quick-acting trigger safety.

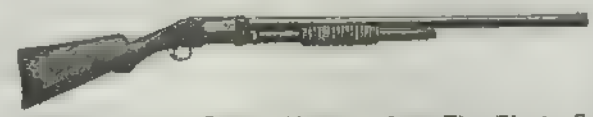
Barrel—Special rolled steel, matted, chambered to handle both 2¾ and 2⅝ inch shells.

Stock—Black walnut, pistol grip butt-stock and action slide handle; hard rubber butt-plate; length butt-stock 13½ inches; drop at comb 1⅝ inches; drop at heel 2½ inches; weight about 8 lbs.

	Each
No. 43A-30—12 gauge; 30 in. barrel, full choke	$117 75
No. 43A-32—12 gauge; 32 in. barrel, full choke	117 75
No. 43A-28—12 gauge; 28 in. barrel, modified choke	117 75

One in cardboard box; ten in wood case.

MARLIN REPEATING



Model 44A, Take-Down, Hammerless, Five Shot—Solid steel breech; solid top; side ejection; barrel matted on top entire length; press-button cartridge release; automatic safety device; double extractors.

Barrel—Special rolled steel, matted, chambered to handle both 2½ and 2¾ inch shells; specially bored for both black and smokeless powder.

Stock—Black walnut, pistol grip butt-stock and action slide handle; hard rubber butt-plate; length butt-stock 13½ inches; drop at comb 1 13/16 inches; drop at heel 2 11/16 inches; weight about 5⅞ lbs.

	Each
No. 44A-28F—20 gauge; 28 in. barrel, full choke	$117 75

One in cardboard box; ten in wood case.

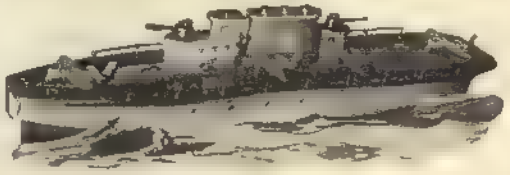
Sure Summer *Sales*

with Liberty Playboats

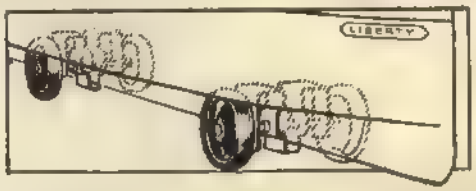
TO bolster summer toy sales, feature playthings with summer-time interest and usefulness. Here's a line of toys for summer sales—Liberty Playboats—the logical line to feature during warm weather months. Display them—preferably in the Liberty Action-Tank—and watch the youngsters stop and shout. Liberty Playboats' brilliant colors, irresistible play features, powerful motors, and their thrilling dash and realism go straight to the heart of every red-blooded boy—and straight to the purse of the parent.

Concentrate on these fast-selling playboats and boost your summer sales. Send for Liberty Playboat Catalog, showing eight other popular numbers in addition to models illustrated.

No. 80 *Destroyer*. . . Drop one of the four torpedoes in the tube of this low, racy destroyer, touch a lever, and swish . . . another enemy goes to the bottom. This irresistible action feature, coupled with rugged realism, power and speed, makes boys' fingers itch. All wood hull, and colors that sell. Length 25 inches.



No. 60 *Airplane Carrier* . . . Catapults flying planes from its deck! Two husky motors and twin screws. A realistic reproduction. All-wood, non-crushable hull. Length 27 inches.



Wheel device converts Liberty Playboats into pull-toys, for year-round sales. On all models except seaplanes and small numbers.

Discriminating Men Wear Locust Wrist Watches

THE prevailing style in Men's Watches decrees either the leather strap or metal band. The latter is designed either in a woven wire mesh, or a flexible link band bracelet, both of which are adjustable to size. A large variety of case designs, equipped with either leather or metal bands, gives opportunity for selection according to the buyer's preference.

The Locust movements, whether 15 or 17 Jewel, are sturdily constructed, and will easily withstand ordinary usage. Proper cleaning and oiling at frequent intervals will prolong the life of any watch

Illustrations are ⅞ actual size.

Because of impending changes in U. S. Customs duty, all prices are subject to change without notice.

Wrist Watches For Both Conservative and More Modern Tastes

EVERY man, whether ultra-conservative, or with ideas leaning to the more modern, eventually wears a Wrist Watch. The usefulness of this type of Watch has been proven, and any of these Locust Wrist Watches will be a pleasure to wear. The choice of designs is dependent on individual tastes; but the dependability of the movement is equally good in all models.

Particular attention is called to lower priced Watches, which are designed to fill the need for the young boy, who is buying his first watch. They are as dependable as the more costly ones.

Illustrations are ⅔ actual size.

Because of impending changes in U. S. Customs duty, all prices are subject to change without notice.

Mason & Parker Mfg. Co.

The Pool Table pictured is typical of a complete line of tables made by this company, from the little 15" x 23" number up to the big fellow that is 38" x 71". The manufacturer features the rigid construction of this line, heavy metal braces insuring a rigid playing surface. All tables include net pockets and numbered composition balls, with the larger tables having the added feature of striped balls and counting beads. Other items in this line, which had its Toy Fair display in the rooms of Riemann, Seabrey Co., Inc., were pianos, blackboards, trunks, tool chests, games, boats and juvenile furniture.

Janesville Products Co.

The Roly Rider, shown in the photograph, was one of the high spots shown by this company during the Fair. Buckee Horse is its name. It is noiseless, does not mar the floor and is made for children of from two to five years of age. Produced in two numbers, to sell for $4.75 and $5.75 each, it is distributed through all classes of the trade, and, like the line of coaster wagons, is produced under the trade name of "Janesville."

Owens-Kreiser Co.

From the many lines shown by this concern, the Jazz Band Outfit, made by the Hercules Toy Co., was selected. This outfit retails at $1.00 and consists of a bass drum, snare drum, cymbal, triangle and cow bell. On the front and reverse sides of the drum the face of a clown is painted in colors. This item is particularly suitable for wholesalers, chain stores and dollar stores.

Fuld & Co.

The cut shown here depicts the Valentine number called "Umakum," which represents a box of valentine material so that the user may make up for herself several juvenile items. In addition to this featured number, this exhibitor also showed a full selection of cut outs, movables, mechanicals, pulling cards, and honeycomb tissue, which covered all the popular price ranges.

Louis Wolf & Co., Inc.

From the many items of imported and domestic toys shown by Louis Wolf & Co., Inc., a new Soldier Set was selected. The set illustrated shows knights in armor with riders, horses and foot soldiers. These sets retail from 25c to $5.00. American and foreign armies, cow boys and Indians are to be had, as well as the knights in armor.

Direct Toy Sales Corp.

Pictured here is a newcomer entitled "Playit With Flowers," a green house in which youngsters can actually grow plants. It is made in four sizes, is attractively enameled in colors and has steel frames, steel sash and enameled planting trays. Accessories include iron flower stands, ferneries, garden baskets, garden tools, seeds, soil, etc. Other lines of American manufacture were shown in this display, and sales of all items bearing the trade mark, "Playit" are controlled by this company.

Illinois Seating & Metalcraft Co.

The pictured number is typical of a new line of juvenile breakfast sets being produced by this company. The base is steel, with tops and seats being made of wood. All parts are riveted and are produced in very attractive colors, some of which are now marbelized and crackled effects.

Corcoran Mfg. Co.

Illustrated below is "Black Beauty" the new galloping horse with the life like movement. A minimum amount of energy is required to operate this pedal propelled toy, which is handsomely decorated.

Making their Bow

Milton Bradley Company

Hoopl Pegs is one of the new pre-school toys brought out by the Milton Bradley Co. This toy retails at $2.00, and is designed for both wholesale and retail trade. The pre-school line has been carefully prepared under the supervision of experts, so as to embody many educational features for the purpose of developing young children while at play.

The Deeks Mfg. Co.

The "Fungun" Shooting Game, a newcomer at the Fair this year, includes guns made from Ebonite, with metal hammers and triggers. Six rounds of ammunition, comic animal targets, score pads and instructions—all are included in a six-color, handsomely lithographed box. The manufacturer features the fact that they supply dealers with counter display cards, which act as an aid in speeding sales. The "Fungun" is made in 25c, 50c, and $1.00 sizes, and sells through department stores, jobbers and chain stores.

Kenton Hardware Co.

Shown in the rooms of Riemann, Seabrey Co., Inc., was this Buckeye Ditch Digger. This newcomer in a line of cast iron toys is built exactly like the big numbers in daily use in road and construction work throughout the country, and the manufacturer features the sturdiness of its construction. Shown also under the trade name "Kententoys" was a complete line of iron toys, which included new numbers in vertical and horizontal steam-type engines, aeroplanes, dirigibles, concrete mixers in three sizes and a full assortment of iron trains, stoves, banks and kindred toys.

G. B. Lewis Co.

"Ark.toy" has been dressed up in bright green and red colors for 1930, in answer to the modern demand for color. The particular number shown is a reproduction of the G. B. Lewis Co.'s plant in miniature, all machines having been made with "Arkitoy" materials and operated from a line shaft driven by an electric motor. The "Arkitoy," which, incidentally, means Toy Architect, is made in sizes to retail from $1.00 to $10.00.

Hy-Sil Mfg. Co.

Featured by this manufacturer were the packaging refinements in which the products of this company are offered. This line, consisting of tinsel garlands, cords, ribbons, artificial snow, icicles and holiday decorations, has added sales appeal through the fashion in which these numbers are presented.

Grey Iron Casting Co.

Pictured here is the paint set Tint-Em-Toys, produced by this company and shown, with the rest of the line, by Riemann, Seabrey Co., Inc. Made in two sizes, to retail at $1.00 and $2.00, the sets consist of cast iron animals in plain finish, water color paints and two brushes, so that the youngster may paint the animals in their natural colors.

The Wayne Toy Mfg. Co.

The manufacturers of the Big Six Target Game emphasize its accuracy, point to the display features, which require no counter set-up and which eliminate any possibility of loose or lost parts. This is a $1 item and, together with the Jumping Jitney, Indian Archer and Wheel of Fortune made by this company, is designed to sell to all classes of the trade.

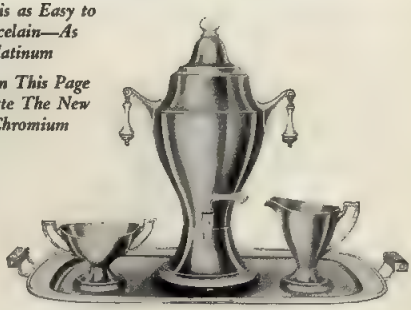
Structo Mfg. Co.

Among the new items shown by this company this year were the mechanical tractors, trailers and scrapers, Giant Climbing Army Tank and the number illustrated, which is the Giant Climbing Tractor and Trailer. This newcomer has a powerful, triple-spring caterpillar tractor, capable of climbing a 45-degree incline from a dead start. The tractor is finished in attractive orange and blue body, with red wheels and nickel trim.

Everlasting Aranium Plate—A Manning-Bowman Product

Aranium Plate is as Easy to Clean as Porcelain—As Rich as Platinum

Every Article on This Page is Aranium Plate The New Improved Chromium



PERCOLATOR URN SET

9-Cup Capacity

The handsome electric Percolator Urn Set illustrated above is perhaps the most popular high grade set ever put on the market. The design is rich and appealing in its charming simplicity. The appearance is embellished with a modern border decoration. The drop handles on the urn and the tray are trimmed in genuine Catalin, in either Jade, Agate or Onyx. The set is finished in Aranium, with a bright beauty of its own, and with the surprising feature that it will not tarnish. The set consists of the 9-cup urn percolator, the graceful sugar and creamer and the oblong tray. Sold complete as a set only.

7G56127 PRICE complete **$96.00**

All Manning Bowman Electrical Percolators are fitted with safety fuse. Shuts off if you let it boil dry.

COLONIAL URN SET

Capacity 9 Cups

Here is a service that is aristocratic and dignified in appearance. It is tall and stately, with its beauty enhanced by the genuine Catalin mounting on the tray and on all handles on the urn. The Catalin mounting can be had in Jade, Agate or Onyx finish. The set itself is plated in Aranium and will never tarnish, rust, stain or corrode. Set consists of 9-cup percolator, creamer and sugar and oblong tray. Sold complete as a set only. A beautiful creation a gorgeous gift.

7G56128 PRICE complete **$85.25**

Every home needs a Percolator Set. These sets are useful gifts of distinctive character.

HANDSOME NEW PATTERN

Hand Etched—Jade Mounts

All four pieces of this service are hand etched; the tray has etched meta, bottom. The design is modern yet restrained, and will harmonize with any other appointments in your home. The Catalin mounts of this service are in Jade molded with fatet traces of white which add individuality to the service. Being Aranium plated the service will not tarnish, and requires no cleaning or polishing. Set consists of 9-cup percolator urn, sugar and creamer, and 17-inch tray. Exquisitely perfect in every detail.

7G56129 PRICE complete **$116.50**

ELECTRIC URN SET—GREAT VALUE

Into this moderately priced electric urn set has been put the highest quality of materials and the most skilful workmanship. The service has the charm of sheer simplicity, the essence of good taste. It is finished in Aranium with a bright, sparkling lustre, which cleans as easily as chinaware. The set consists of the 9-cup urn, sugar and creamer, and tray.

7G56131 Set complete, specially priced **$59.00**

ELECTRIC URN SET—ARANIUM PLATE

When women know Aranium Plate they will accept no other. This delightful electric Urn Set is the new Canterbury pattern. It is made in the new Aranium plate that does not burn or tarnish. Consists of 9-cup Urn Percolator, 9-ounce gold lined Sugar and Creamer and 18-inch oblong tray. The tray and Urn are both beautifully designed and have Ivory finished handles. A most charming set.

7G56130 PRICE complete **$93.00**

Electric Percolator Sets are Splendid Gifts . . .

NATIONALLY ADVERTISED

All Manning-Bowman & Company Percolators and sets are nationally advertised in the most widely circulated magazines of the country. The Manning-Bowman high standard of quality is known by every housewife It is our suggestion that dealers keep a full supply of this merchandise in stock at all times to accommodate the requirements of their customers

FITTED WITH SAFETY FUSE LINK

All Manning-Bowman & Company Percolators are equipped with the new fuse link cutout, a protection that never fails. If the percolator boils dry, the current is automatically turned off. The fuse will not shut off while the percolator contains water, but works as soon as dry. Extra fuse included. Anybody can replace it.

MANNING-BOWMAN & CO. CANTERBURY PATTERN

CHILDREN'S AUTOMOBILES

STEELCRAFT

"A New Idea in Children's Automobiles."

The sturdy construction and handsome appearance of steelcraft Autos must not be confused with ordinary makes of children's automobiles. They are reproductions of real automobiles, in fact they are modeled from blue prints furnished by automobile Manufacturers. Steel sheets used are of same gauge as used in many real autos.

Strength is an outstanding feature as they easily accommodate up to 150 lbs. All models are built with Elliptic springs to afford greater comfort, this is quickly recognized by all children. Pedals are adjustable to accommodate different size children. Padded leather seats. Bumpers are of heavy steel. Radiator is of metal and very attractive. Wheels are double disc type made of heavy steel, riveted together, fitted with good quality rubber tires and nickel hub caps. Fenders, running boards, etc. are of heavy gauge steel. All accessories such as lamps, motometer, horn, brake, windshield, etc., are of heavy material. The finish of steelcraft autos is superb. Enamels are baked on (not painted) and of very handsome colors.

"I WANT A MAMA"

Isn't there a good little girl somewhere who would like to be my mama? I am such a good baby doll, all dressed up in my best party clothes. I have on a lovely pink bonnet with lace ruffles and a pink silk tie ribbon My dress is of pink organdie trimmed with lace like my bonnet. My undergarments are so dainty. I have white knitted booties with soft white slippers tied with a pink lace. I am always smiling, 'cause I like to show my dimples, but I close my eyes and go to sleep when you tell me to. I even cry when you turn my face down. I am a big girl over 2 feet tall

2G60168 PRICE... **$10.00**

WALKING "MAMA" DOLL With Real Blonde Hair

The most gorgeous doll you ever saw! With real blonde hair! She walks and she says "Mama" when you hold her face down Her dainty eye-lids close and she goes to sleep when you put her to bed She has the daintiest blue organdie frock with petticoat and bloomers to match Around her flaxen curls she wears a cute baby-blue silk ribbon She wears the prettiest white and blue knitted booties, with adorable slippers to match The slippers have real button straps and dainty fashionable shoe buckles. Lead her by the hand and she will walk with you. She is 26 inches tall.

2G60171 PRICE.....**$12.50**

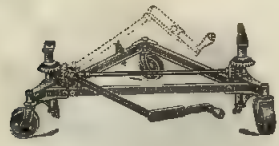
2G60151 10½ in tall **9.50**

GARAGE JACKS E

TWIN



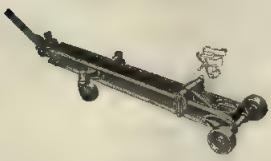
Weaver

As a lifting jack it is preferable to the ordinary type of jack, as the 34-inch wheel base offers an absolutely safe and dependable support for dismantled cars. Ball and roller bearing throughout. Only the best grade of material enters into their construction.

Capacity 4000 lbs.

NO.	Raise	Lgth Handle	Wheels	Wt. Each	EACH
WA10	9 in.	26 in.	4½ in.	50 lb	$25.00

TRUCK JACKS



Weaver

A powerful jack that will handle heavy trucks and buses with minimum effort and maximum speed. May be used in very small space. The lower end of the lifting arm is attached to a heavy screw which is threaded into a pipe to which the ratchet wheel and long lever handle are attached. Turning the ratchet wheel to the right or left by means of the long lever handle revolves the pipe and runs the screw forward or backward respectively, thus raising or lowering the arm of the jack which pivots on the jack frame. The dog on the socket into which the long handle fits can easily be adjusted to turn the ratchet wheel to the right or left to raise or lower the load. The long lever handle affords ample leverage to lift loads to 10,000 pounds. The screw principle of hoisting insures absolute safety and enables the load to be raised or lowered to the smallest fraction of an inch. The long body of the jack, 6½ feet, enables it to be inserted under either axle from the side, front or rear. The body of the jack is of heavy 4¾-in. Landside channel steel, half an inch thick. The load is supported by heavy roller bearings in the front wheels. Length of jack over all (exclusive of handle), 6½ ft.; width, 1½ ft.

NO.	Min. Ht.In.	Max. Ht. In.	Cap. lb	lb Each	EACH
WA22	6	21	10,000	250	$90.00

LIFT-A-CAR

Walker—One Ton

A short stroke service jack that clears all interferences. Handle 48 inches long, wood grip. The first lift 3¾ inches from the ground when lowered will grab any low slung car and make the lift to the desired height. Just the jack for making a quick lift for tire changing. Brake adjustment working wheels.

NO.	Hght. In.	Lift In.	Lift Ft. In.	Wt. Ea.	EACH
716	7¾	18¾	3¾ to 7¾	40	$25.00

GARAGE JACK

Weaver—Curb

The speediest and most efficient jack for changing tires, etc. on the curb due to the fact that both raising and lowering are controlled from the handle. One pull of the rear trigger on the handle causes ratchet sector to pivot immediately raising the saddle against load, which is lifted on first stroke of handle. To lower load merely pull trigger and keep on pumping and the load will be gradually lowered. When saddle is free it automatically drops to lowest position. Range lift, 4¾ to 17 inches.

NO.	lb Each	EACH
WA23	55	$25.00

E

GARAGE JACKS

ROLL-A-CAR

Walker

The frame of this jack is made of malleable iron, the handle is of heavy channel steel. The lifting pawls are made of high carbon drop forged steel, machined in jigs, which insures accurate fit, long wear and absence of service trouble.

Regular

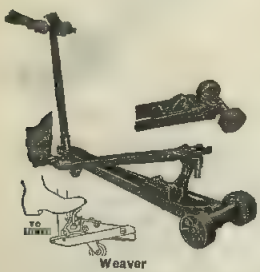
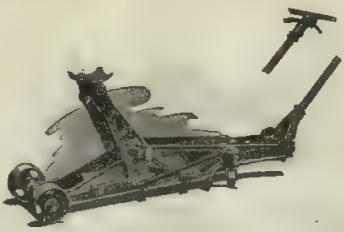
LO-WAY



Weaver

Built low for balloon tires. Ground clearance approximately 2-in. The front axle is pivoted by turning the handle right or left. Roller and ball bearings throughout. All parts can be replaced after long service with ease and without special tools. The construction of the jack is extremely rugged; the frame being of spring steel.

NO.	Cap. lb	Max. Lift In.	Min. Ht. In.	lb Ea.	EACH
WA20	5000	17	6	110	$45.00



Manley—Hydraulic

The frame of this jack is built on a true bridge principle, and is unusually rugged and durable. The cylinder containing the lifting piston lies in a horizontal position between the frames, and the motion of the piston is transmitted to a cantilever beam, on which the car is raised. This eliminates twisting and angle strains on the cylinder and piston. The oil reservoir is also mounted between the frames and motion is obtained by means of the plunger pump which is operated by the jack handle. This pump injects oil from the reservoir into the lifting cylinder, forcing the piston out and transmitting its motion to the cantilever beam. The lowering operation is accomplished by means of a valve controlled by a foot lever and when this valve is operated it permits the oil to run from the cylinder back into the reservoir, the lowering thus being accomplished quickly and without effort—no operation of the jack handle being necessary for lowering.

Manning-Bowman & Co. Electric Percolator Sets and Percolators in Nickel Plate

Endorsed by Good Housekeeping Institute

A protective device that never fails!

New Fuselink Cutout

1. If the percolator boils dry, the current is automatically "turned off" without arcing. The new device insures the percolator from melting
2. Its simplicity allows replacement of fuse without tools—no waiting for repairs.
3. Fuse will NOT "shut off" while percolator contains water. Works as soon as dry.
4. An extra fuse attached to the percolator makes it always available for replacement when needed
5. The only percolator that can be repaired and a new element replaced with a screwdriver

G365+1 Electric Urn Percolator Set. Four pieces, 7-cup percolator 7-ounce sugar and creamer 14-inch round tray. Performs as satisfactorily as the highest priced percolator. Richly nickel plated. Set Complete. **$27.00**

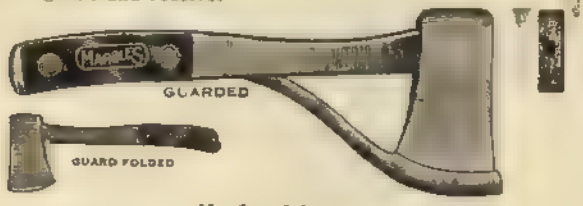
MARBLE'S SPECIALTIES

MARBLE'S SAFETY AXES

Are large enough to fell a tree and small enough to carry in a pocket. A perfect axe for "blazing," clearing a trail, setting a tent, and as necessary in the woods as a gun or knife. The standard axe for Boy Scouts. A necessity for the auto tourist and safety carried anywhere in the car.

The nickel-plated, spring-hinged guard is lined with lead and folds into the handle. The blade is made of tool steel, carefully tempered and sharpened. The metal handles are drop forged and never break. The side plates are of rubber. The wooden handles are of selected hickory with nickel-plated guard and receiver



No. 2 and 3

No. 2. Weight 20 ounces. Length 11 inches. Solid steel blade, 2⅜x4 inches.....$3 25

Tips, each $0 10
Middle Section 25
End and Handle Sections, each..... 50
Bags 25

MARBLE'S JOINTED STEEL RIFLE ROD

Cuts below show cross sections of joints and swivel.

The corrosive action of "Ammonia Dope" on brass rods is a source of much annoyance to the user of high velocity rifles. This is overcome by the use of our jointed steel rod. Sections are connected by steel cores snugly fitting recesses prepared for them. These make the rod as strong and substantial as a one-piece rod. Swivel in end section prevents joints from unscrewing when in the barrel.

Furnished complete with jagged and slotted tips, bag and attachements which make rods fit any make of cleaner

No. 9823. .22 and .25 Cal. Lengths 26, 30 and 36 in.. $1 25
No 9828. .28 Cal. and up. Lengths 26, 30 and 36 in... 1 25

For Extras, see "Marble's Jointed Brass Rod"

MARBLE'S SHOTGUN ROD

Light Metal

Made of solid light metal—⅜-inch diameter—three sections. Light as wood and stronger. Joints heavily threaded. Knob holds rag for cleaning and oiling 10 to 20 gauge guns. Knob is threaded to take all standard makes of cleaners. Wooden handle that fits the hand. In a cloth bag.

No. 400. 10 to 20 gauge, standard length.....$1 00
(Packed six in paper box. Weight, per dozen, 7 pounds.)

MARBLE'S ONE-PIECE RIFLE RODS

Made from solid brass or solid steel rod with wood handle. The swivel is a steel roller-bearing—at the end of rod. This accurately fitted bearing withstands hard pulls and thrusts. The wood handle projects beyond ferrule and prevents marring of muzzle. Furnished with jagged and slotted tips and attachments which make rod fit any size or make of cleaner

BRASS ROD

No. 622—.22 and .25 Cal. .204 dia. Lengths 26, 30 and 36 in..... $1 00
No. 628—.28 Cal. and up. .25 dia. Lengths 26, 30 and 36 in. 1 00

STEEL ROD

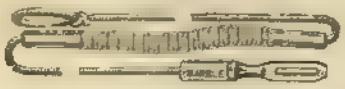
No. 632—.22 and .25 Cal. .204 dia. Lengths 26, 30 and 36 in..... $1 00
No. 638—.28 Cal. and up. .25 dia. Lengths 26, 30 and 36 in. 1 00

MARBLE'S RIFLE CLEANER

The sections are made of a number of discs cut from softest brass gauze and separated by small fibre discs.

Rifle Cleaner. State caliber.....$0 50

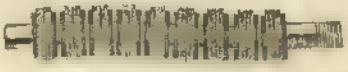
MARBLE'S FIELD CLEANER



The cleaner is the same as Marble's Rifle Cleaner. The loop can be put over some projection, the weight dropped through the barrel and held in one hand, while with the other the gun is moved back and forth.

Field Cleaner. State caliber $0 75

MARBLE'S SHOTGUN CLEANER



Made to fit all standard rods. Sections are made of discs cut from softest brass gauze and separated by fibre discs.

Shotgun Cleaner. State gauge.....$0 75

MARBLE'S SHOTGUN PULL-THRU

See Marble's Shotgun Cleaner for description of brushes.

No. 310. 10 Gauge. $1 00

No. 328. 28 Gauge.... ..... 1 00

MARBLE'S ANTI-RUST ROPES

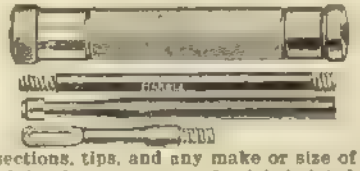
For Shotguns, Rifles and Revolvers

When saturated with oil these "ropes" exclude all air and moisture and make it impossible for the barrels to rust or become pitted. They are longer than the barrel and larger than the bore

For Shotguns and Rifles. $0 60
For Revolvers 30

When ordering, state Gauge or Caliber.

MARBLE'S REVOLVER ROD



The brass sections, tips, and any make or size of cleaner can be carried in the screw-capped, nickel-plated, hollow brass handle. It is ⅝ by 5 inches in size.

This makes a very complete, compact outfit which may be conveniently carried in the pocket.

The sections are made of brass. Will clean barrel up to 10 inches

No. 99. State caliber.....$1 00

MARBLE'S ONE-PIECE REVOLVER ROD

Brass rod, large and strong; large handle. The swivel is a steel roller-bearing in end of rod as shown in cut. Furnished with Jagged Tip.

No. 722—.22 and .25 cal.. .204 dia. 7 and 11 in. $0 50
No. 732—.32 cal. and up. .25 dia. 5 and 9 in... 50

GAME GETTER GUNS

MARBLE'S

Two Guns in One—One Gun for All Game

A more accurate .22 cannot be found. The shot cartridges for small furred and feathered game almost equal 28 gauge. The .44 ball is very accurate and powerful at medium range. Smokeless powder may be used with perfect safety and slight recoil.

1. Upper barrel .22 caliber, rifled; chambered for Short, Long and Long Rifle cartridges. Lower barrel, smooth for .44 caliber and .410 gauge (12 m/m) 2 inch brass or paper shot shells, also .44 and .410 ball cartridges (not conical bullet).

2. Upper barrel .22 caliber. Lower barrel for .410 gauge 2½ inch (only) paper shot or ball cartridges.

Important Features: Single trigger—striker is adjustable to either barrel instantly; hammer—rebounds to safety notch after firing; receiver lock—trigger guard is pulled back to open breech; ejector—partially ejects from both barrels at same time; folding stock—is held rigidly in position by sliding lock; sights—rear sight has stationary Buckhorn with large U notch, also Leaf with small U notch, and folding peep with 3/32 inch aperture; front sight has 1/16 inch gold bead.

Specifications: Frame, drop forged; finish, blued; stock, formed from sheet steel, nickeled; grip plates, walnut; holster, finest strap leather. Get Marble's Game Getter Gun catalog for complete information and record of results with cuts of actual targets.

HUNTING KNIVES

MARBLE'S

IDEAL

The thick, strong blade is relieved by hollow grinding which provides proper balance for weight and size. Strength of back is necessary for splitting kindling or digging holes in hard ground or ice. The hollows aid quick sharpening. Blade is adapted to sticking and skinning. Back of point is beveled for breaking small bones. The Ideal is an every-purpose knife. Knives No. 41 and 45 have a heavy tang onto which are driven washers made of sole leather, red and black fibre and brass. Bolster is brass. Tip is aluminum All parts held rigidly in place by a round brass nut sunk into tip, engaging the threaded tang. Handle is highly polished, forged from finest steel, expertly tempered, polished and honed

KNIVES

MARBLE'S

SAFETY HUNTING

Open.

Closed

These knives will appeal especially to that class of woodsmen and sportsmen who object to a sheath knife, and yet want a knife that is heavy, strong and rigid. However, we furnish with each knife a sheath to fit it when folded, so that it can be carried at the belt when desired. They have a long blade with a short handle—utilizing the extension guard as a safety lock when the knife is open. The hilt, bolsters and linings are of German silver; side plates are of staghorn. All parts are hand fitted with the utmost care, so that when knife is open it is as rigid as a one-piece knife.

No. 83. Blade, 4¼ in. Wt. ea. with sheath 5½ ozs. Each **$3 50**
No. 85. Blade 5 in. Wt. ea. with sheath 8 ozs... Each **4 00**

Three in a box.

SPORT KNIFE

For outdoor or indoor use by the camper, canoist, hiker, hunter or fisherman. Has the features of all Marble knives in compact form. Just the knife for those who have occasion to use a small one. It will accomplish much that a larger one will. Particularly adapted to the use of members of Boy and Girl Scout, Camp Fire Girl, and other similar organizations. A beautiful little knife to handle. Leather handle, 3½ inches, is of same construction as Marble's Ideal Knife. Blade forged from high grade cutlery steel, polished and honed.

No. 60. Blade 4 inches. Wt. with sheath, 4 ozs.. Each **$2 60**

Six in a box.

KENNEDY

All-Steel.

The Kennedy All-Steel Shell Box has a capacity of 150 shells; is exceptionally strong, yet because of its construction, light of weight; is guaranteed water-tight and in addition to a good lock, this box is equipped with two strong side catches to overcome any possibility of spilling your shells; the finish is the standard Kennedy brown baked enamel that will neither chip nor rub off when wet. It is an ideal shell box—sold at a very reasonable price; but it has other uses as well. It contains a false bottom which when inverted may rest on top ledges as a tray and will serve as a fishing tackle box, as a tool box, as a household kit, or as a strong box for your valuable papers.

No. K014. Size 14x6x6 inches. Wt. ea. 5 lbs. .....Each $3 25

No. 200. Holds 200 shells. Wt. doz., 10½ lbs. ....Each $2 50

Nail or *Screw?*

The advantages of both!

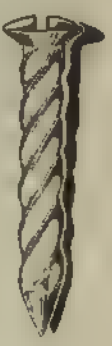
It drives like a nail and turns like a screw

It is driven easily and quickly. Once in, it cannot pull out or work loose. And if necessary to extract, it can be turned out like a screw.

The drive screw reduces assembly costs and brings increased production by giving screw service with nail speed.

We are prepared to make drive screws to your specifications. Furnished slotted or unslotted, in any metal, with any finish.

Mail us your specifications, stating metal, finish, size and quantity. Prices and samples gladly furnished.



Drawing of a Hassall drive screw.

We also make nails, rivets and escutcheon pins in all metals and in all finishes.

Wt each, lbs	2	2¼
Each	$9 45	10 20

One in heavy paper bag.

CRANK CASE FILLERS

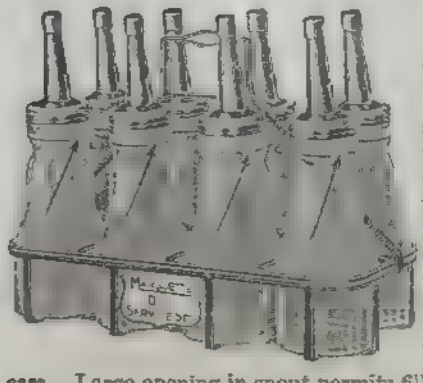
BROOKINS

24 gauge terne plate steel, copper finished. Flexible metal spout; metal strap handle on top for easy handling; cross member in top prevents over flowing when in tilting position. A convenient measure for refilling large car and truck crank cases without the use of funnels. Used by filling and service stations, garages, etc.

Nos.	A-37C	A-38C
Capacity, qts	6	8
Diam, ins	8¼	8½
Height, ins	8½	10
Length spout, ins	19	21
Wt each, lbs	3	3½
Each	$7 50	9 00

Packed loose.

OIL DISPENSERS



MARQUETTE

Aluminum finish, electrically welded cold rolled steel handle. Clear crystal, standard measure 1 quart capacity glass jars with durable copper finish spouts with gaskets to prevent leakage and dust caps of three different colors to distinguish light, medium and heavy oils. Slope of spout enables dispensing for all makes of cars. Large opening in spout permits filling without removing from jar.

Each

No. A-67—Complete as described; wt each 20 lbs..... $14 85

PARTS FOR OIL DISPENSERS

Per Doz

No. A-60—Tops only, including spouts, caps and washers (less jars); wt per doz 12 lbs $9 00

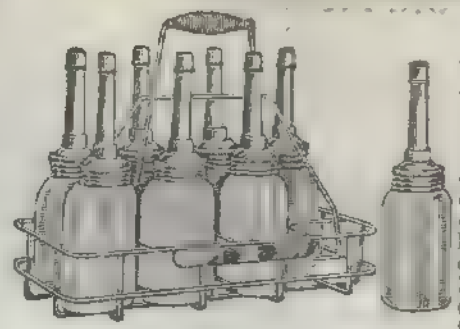
Packed loose.

OIL DISPENSERS



CHALLENGE

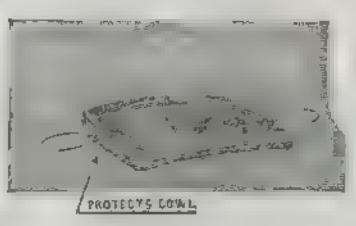
Set consists of black baked enamel, electrically welded, steel tray with coiled wire handle and 8 standard measures, 1 quart capacity, clear, white annealed glass containers each fitted with large opening, fast emptying screw top tin spouts.

Per Set

No. A-68—Wt per set 14 lbs..... $13 20

One set in carton

FILLING DRIP PANS



CHRISTEN

For Use When Filling Gasoline Tank of Model A Ford.

Rust-proof steel pan conforming to cowl shape, fits snugly over and around gas tank filler inlet. Bottom and sides covered with heavy soft felt cloth which prevents scratching the finish. Rubber ring around filler inlet covers and seals inlet completely so that gasoline cannot touch exterior of cowl. Rubber ring of inlet not affected by gasoline. Any gasoline spilled when tank is filled and nozzle removed, drips into pan or gas tank. When not in use can be hung by wire handles on pump.

Each

No. A-50P—Size pan 7x12¼ ins; depth 1½ ins..... $8 25

One in pkg, 24 in carton; wt each 1½ lbs

PORTABLE DRAIN TANKS

BROOKINS

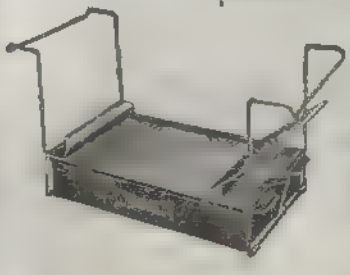
24 gauge terne plate steel, red enameled. Sloping cover catches the oil and conducts it through small opening into tank, fine mesh screen over top prevents oil splashing out. Rounded skids and folding handle makes it easy to place under all cars. Shaped end and handle on either end for emptying.

Each

No. A-37—Capacity 6 gals; length over all 27 ins; width 12 ins; depth 5½ ins..... $10 80

One in carton; wt each 9 lbs.

DRAIN PANS



WEAVER

Green enameled heavy galvanized iron container with sloping cover that drains oil into pan. Heavy steel hooks for hanging on lift or rack and hinged steel plate for use on cars having offset drain plugs. Shaped end for pouring oil into drum.

Adapted for use with Weaver auto lift or service rack, but can be used on practically any lift, rack or pit.

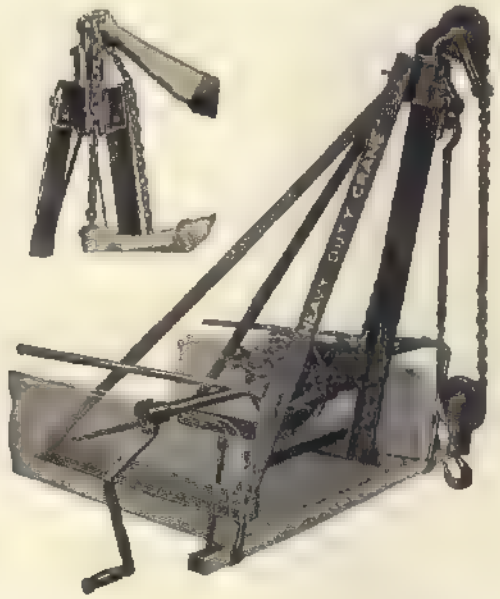
Each

No. A-WE13—Capacity 2½ gals; size 4x12x20¼ ins... $23 55

One in carton; wt each 14 lbs

WRECKING CRANES

MARQUETTE



A full swivel head that permits a pull from any angle. A clevis for attaching guy line. No extra winch needed. Chain can be dropped through the head, permitting a direct pull from the drum. Extra heavy steel construction assures absolute safety. A 3½ ton Crane. 50 feet of BBB chain furnished. Drum capable of holding 250 feet of ⅜ inch cable. Full floating roller bearing winch with all gears enclosed. Two speed drum—high and low. High speed for unspooling chain, low speed for actually lifting or pulling load. 12 teeth in mesh at all times. No breakage of teeth and consequent dropping of load. Boom adjustable to four positions. Easily handled by one man. Chain can be hooked to back frame spacer and tightened by turning crank. Remove bolts and boom can be raised or lowered to any position. Positive lock on drum prohibits load from slipping or dropping when being raised or towed. Easily operated on either side from the ground.

With a leverage ratio of 174 to 1 and the roller bearing construction of the winch, the Marquette Crane is the most powerful built. One man can bring in the toughest job. Easy to install and simple to operate. Ruggedly built for years of constant service. The capacity of the Marquette is limited only by the strength of the chain or cable used. The frame and gearing will support a load far in excess of the average chassis on which it is mounted.

Specifications.

The Crane is equipped with 50 feet of BBB chain.

Length of base ..... 42 in.
Width of base ..... 32 ins.
Vertical height of boom in upright position . . 61½ ins.
Vertical height of boom in lowest position.... 50¼ ins.
Height of winch from base of crane . ... 16 in.
Length of crank shaft ..... 60 in.
Lifting capacity ..... 3½ tons

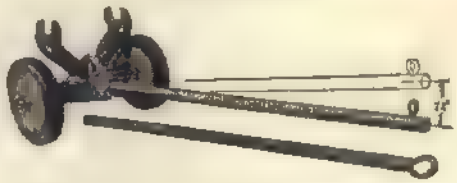
Complete. Shipping wt., 410 lbs..... Each **$97 50**

Winch only, complete with drum, shaft, handle and 50 ft. chain **$65 00**

Winch, as above, except less chain **59 00**

CAR AND TRUCK AMBULANCE

MARQUETTE



For Passenger Cars and Light Trucks.

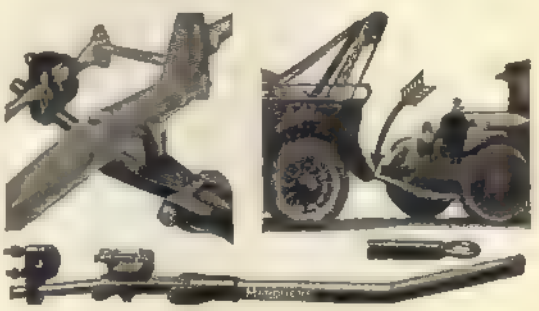
This dolly provides a quick, easy and safe means for towing any disabled passenger car. The saddle is made of electric steel. It accommodates truss rods and any differential housing. The saddle is supported on a heavy bolster plate and operates as a turntable. Carbon steel axle built into cross channels. Timken tapered roller bearings, two to each wheel, in dust-proof grease reservoir. Demountable Disc wheels, of heavy steel, permit the easy removal of rubber tires, without the expense and delay of having tires pressed on or off. Solid cushion rubbr tires. Pole of heavy 2 inch pipe, with 1¼ inch pipe inside providing length adjustment from 7 ft. 1 inch to 12 ft. 10 inches. The pole has two positions giving an angle variation of 12 degrees, so that the load may always be in vertical position, thus eliminating tipping or sliding of the dolly from under the load. The Marquette supports any car properly, provides a quick hookup and withstands the most severe strains.

Specifications.

Tread, from center to center of wheel.. . .. ..28 in
Height from ground to saddle support arms... ....21 in.
Width between saddle support arm centers . ....18½ in.
Depth from top of saddle arms to support pads .....3 in
Wheels, solid cushion rubber—16 in. dia. by 3½ in. face.
Shipping wt. 233 lbs ....Each **$105 00**

TOW POLES

MARQUETTE. ONE MAN

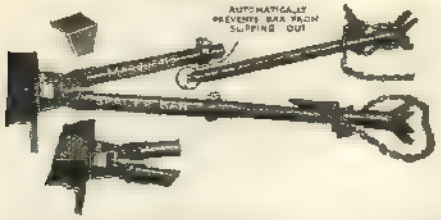


Steers the Car Being Towed.

One man can tow a car or two cars with this new Marquette Tow Pole. It saves the time of an extra man sent out to steer the car being towed. Requires no one to steer the car while towing. It steers one or two towed cars in the same tracks as the pulling car. It provides the most economical way for towing new cars. Hook-up made in a few minutes. Complete instructions for making hook-up furnished with each pole. The Marquette fastens to axle and tie rod of towed car. Full universal. When towing car with self-locking steering gear, remove drag links. Strong construction throughout, with ample safety allowances.

No. 1. .....Each **$20 00**

SPACER BARS
MARQUETTE

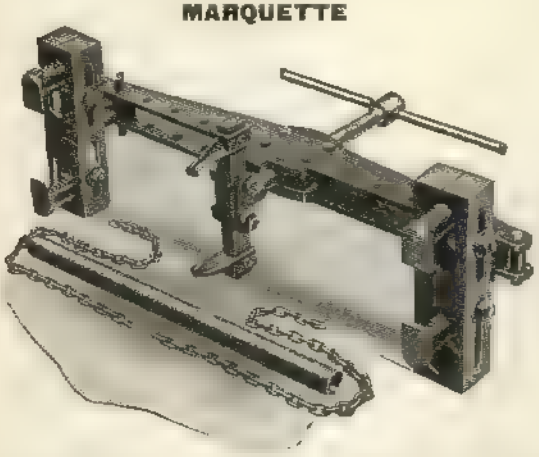


A most useful and efficient spacer bar. No service car is complete without one. While bringing in a wreck, the Marquette Spacer Bar keeps both cars properly spaced and under absolute control at all times. It makes the two cars travel as a unit, prevents their bumping together and stops all destructive jerking and sidesway. It permits wrecked cars to be raised any height from the ground while towing. Improved design makes them unbreakable. Note the new "safety end" preventing extension bar from slipping off and becoming lost. Quick connection is made by inserting pin in vertical position, which forms a common swivel point for both bars. The heavy coupling piece is bolted to the truck. Bars quickly removed for carrying in service car when not in use. Heavy compression spring in each bar absorbs all shocks. Chain grip locks provide quick, tight fastenings to the disabled car. Universal forks permit a wide latitude of fastenings.

Extended length of arms, 50 in.; contracted length of arms, 36 in.; range of adjustment, 14 in.

Spacer Bars. Shipping wt. 52 lbs.. .....Each $22 50

FRAME STRAIGTENERS
MARQUETTE

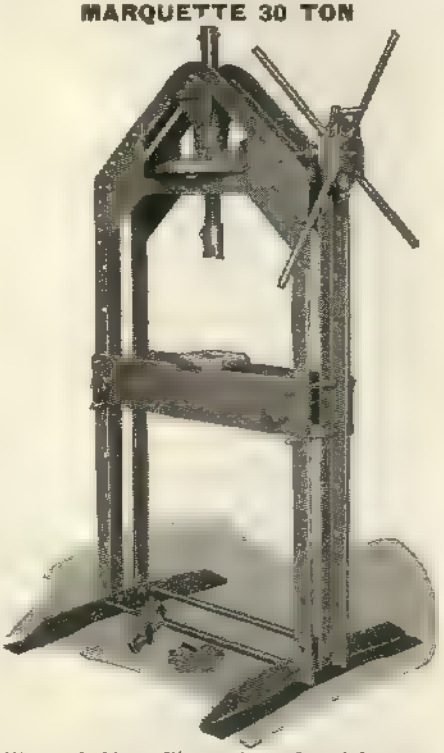


The difficult and often money-losing job of frame straightening is work that any shop can now do with exceptionally large profits—with the new Marquette Frame Straightener. This useful machine gives the garage mechanic a sure, safe, standardized method. It saves hours of time. Bent or twisted frames can be straightened perfectly without removing the body or engine, in practically all cases. Bent front axles can also be straightened without removing. With the Marquette one man can exert plenty of force, just where it is needed, to straighten a bent or twisted frame. No heat is required except in rare cases in which the frame has been severely twisted as well as bent. Even the most heavily built truck and bus frames are mastered by the Marquette. The heavy, detachable twisters can be used either singly, to straighten a simple twist or together, to straighten a double twist. Heavy steel construction throughout. Furnished with 1¾ inch pipe and two 5 ft. lengths of B. B. B. chain. Wt. 173 lbs. .....Each $55 00

STEERING GEAR TOW LOCKS
MARQUETTE

Now you can tow a disabled car backwards whenever necessary. The Marquette holds the front wheels in line and thus enables towing the car backwards as fast and as safely as forwards. It complies with all state laws regulating towing. Attached or detached in one minute, simply by turning the set screws. No nuts to lose; no keys to fall out. The Marquette consists of two crucible steel vices, heat treated and connected by a steel rod. Handy, time-saving, durable—a necessity for every wrecking car. Fits all cars.
Tow Locks. ....Each $4 75

PRESSES
MARQUETTE 30 TON



Built like a bridge. Strength and quick easy operation are combined in this new handy press for automotive repair shops. Self-aligning thrust head structure. Load is taken against a heavy-duty Timken Thrust Bearing. Bevel pinion of heat treated alloy steel running against a large bevel gear, thereby reducing friction to a minimum. Screw can be quickly run up or down to required height from bolster to suit work by spinning the cross shaft with the short handle on the spider. The spider cross shaft is mounted on roller Bearings. The frame is constructed of angle bar steel in two sections heavily riveted together with steel gusset plates like a bridge, where the stresses are the greatest, making a lighter weight, heavy duty structure. The bolster is easily and quickly adjusted by pin insertion and removal. Equipped with face plate and V blocks.

Width between uprights 32 inches, range of screw 10 inches, height with screw down 74 inches, floor space 38x 26 inches, adjustment range 3½ feet.
Marquette. 30 ton capacity. Wt. 480 lbs.....Each $112 00

REELS

MARTIN AUTOMATIC

FLY CASTING

This reel, called a creek whipper is especially adapted to trout fishing. It carries 75 feet of "G" line and will carry a greater amount of finer line. This reel is intended for small fish but it is strong enough for heavier work if desired

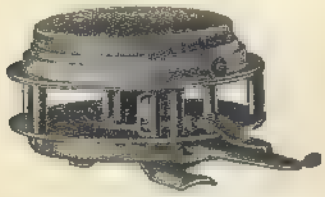
No. 1. Plain. Wt ea., 8 ozs. Each **$4 50**

No. 1. With Line Protector. Wt. ea., 8 ozs. .....Each **$5 50**

This is the most popular Martin Automatic. It is like No. 1, except that it has a capacity of 80 ft. of "G" line or a greater amount of finer line. Ideal for general fishing.

No. 2. Plain. Weight, each 8 1/10 ozs. .....Each **$5 00**

No. 2. With Line Protector. Wt. ea., 8 1/10 ozs. .....Each **$6 00**

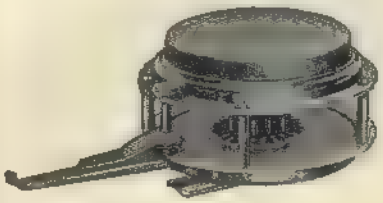


This reel is particularly adapted to bass and other game fish. This line carrying capacity is 150 ft, of "G" line. This greater length of line is a great advantage for heavier fishing. Good for all-around service.

No. 3. Plain. Weight, each 8 1/5 ozs. .....Each **$5 50**

No. 3. With Line Protector. Wt. ea., 8 1/5 ozs. .....Each **$6 50**

FLY CASTING

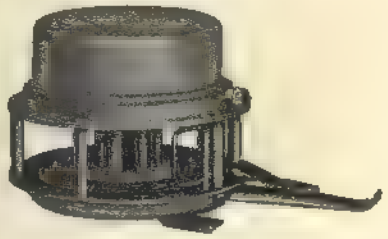


This is the largest regular Martin automatic reel. Holds 225 ft. of "G" line. Especially adapted to salmon and other large fish. Reliable and unusually strong, still it weighs only a fraction of an ounce more than the smallest reel

No. 4. Plain. Weight each, 8 3/10 ozs. .....Each **$6 00**

No. 4. With Line Protector. Wt. ea., 8 3/10 ozs. .....Each **$7 00**

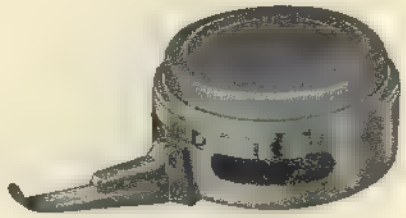
TROLLING



In addition to its regular automatic features, the Martin automatic trolling reel has greater line capacity and much greater winding power. It has a capacity of 250 ft. of light trolling line and will take in 150 ft. at one winding. The reel is sold completely equipped with a tungsten steel line protector.

No. 10. Trolling. Wt. ea., 12 ozs. .....Each **$10 00**

FLY-WATE



Here is the wonderful new Martin Automatic Fly-Wate—a marvel of speed, strength, compactness and lightness. It's just the reel for the "sporty" fly-caster. It is made in three sizes that will satisfy every one interested in casting, regardless of the size and weight of line used. All models weigh about six ounces—practically the only difference being in the size of spool The Fly Wate is so light in weight that it gives a perfect balance to light fly rods, yet it is strong enough to withstand hard usage. The strong winding spring will retrieve a great length of line—depending on the size used. An extra large hardened steel line guide; a new spring tension throw-off; a large efficient brake system—these are just a few of the exclusive features of this remarkable Fly-Wate model. Equipped with line guide and enclosed in a neat leather pouch. In individual cartons

No 26. Has a line capacity of 75 feet of "G" line.....Each **$8 00**

No. 27. Line capacity 90 feet of "G" line or a full 30-yard HFH double tapered line. Will retrieve the full double tapered line or 80 feet of "G" line with one winding of spring. .....Each **$10 00**

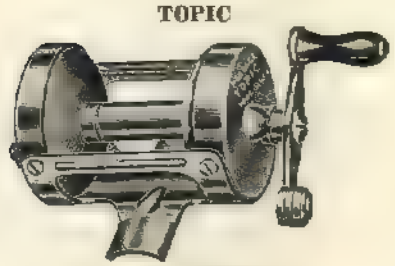
No. 28. Carries 150 feet of "G" line; 100 feet of "C" line or a full 30-yard HCH double tapered line. Will retrieve 80 feet of "G" line or the full double tapered line with one winding of the spring.....Each **$12 00**

All above, one in a box.

REELS.

FLY CASTING.

TOPIC



Double Multiplying
Bright Nickel Finish.

The Topic reel stands alone when price is considered and combines the three essentials, viz: simplicity, durability and line capacity. Adjustable click; balanced crank; rubberoid handle; bushed for bearings; oil holes provided for conveniently oiling both front and back pivots.

No. 123. 60 yd. 1⅝ in. pillar; 1½ in plate. Wt. ea. 5 ozs.....Each **$0 75**

One in a box

SIMPLICITY.

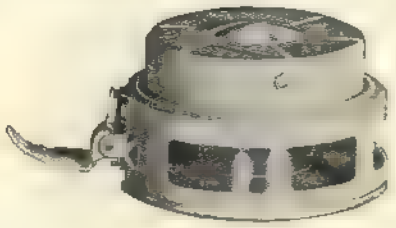
No. 33. 60 yd. 1 in. pillar; 2¼ in. plate. Wt. ea. 3⅛ ozs.....Each **$0 65**

Half dozen in a box.

MEISSELBACH AUTOMATIC



As light as a good automatic reel can be made. Embodies all the traditional Meisselbach strength of construction and is built to give the everlasting service which has made them famous; constructed of a special metal light as aluminum, strong as steel and most important of all, rustproof; the strongly constructed winding mechanism is completely enclosed. Paying out the line winds up the reel and a feather touch on the lever reels in the fish. If the angler wishes to wind up the spring without disturbing his line he has simply to turn the drum on top of the reel. Capacity, 50 yds. of "F" line.

No. 655. Wt. ea., 10 ozs...Each **$5 00**

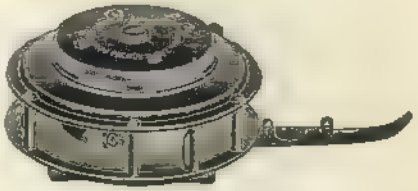
Every detail of construction has been carefully planned and tested by engineers experienced in designing fishing reels. The purchaser is therefore assured that he is not only buying a light automatic reel with ample line capacity, but one which will stand the punishment of landing the big ones. The spring is wound by paying out the line and the line rewound by a light touch on the spool release lever. The spring may also be wound by turning the drum on top of the reel and a spring release on the bottom of the reel permits the spring to be unwound without disturbing the line. Capacity, 35 yds. of "F" line.

No. 660. Wt. ea., 8 1/5 ozs..Each **$5 00**

All above, one in a box.

PFLUEGER AUTOMATIC

SUPEREX.



Satin Nickalum, Gun Metal Finish.

Has all the features to safely claim for it the best "Automatic" on the market. Made of Nickalum, a metal as light in weight as aluminum and as strong as steel. No projection to catch the line. Taking the line off (stripping) will automatically wind the main spring. Fasten the line to the lug in the crescent opening in the spool. Reel No. 778 is recommended for salmon, steelhead, trout, Rainbow trout, Muskallunge and other heavy fishing. Spool is of rigid construction and closely fitted; no danger of the line fouling between the spool and side plates; steel pivots running in long bearings; main spring, the power plant of the reel, is made of the very best steel suitable; winding cap furnishes a comfortable grip free from all fatigue; main spring release, an attachment for releasing tension on main spring and which can be conveniently operated with the same hand as operates the winding cap and while the fish is in play; tension relief device is located on the inside of the reel and protects the main spring from damage and allows the line to pay out when the main spring is fully wound. The tension is always on the fish, no matter which way it is headed and all "slack line" troubles are at an end; brake release is attached to the brake lever and makes the reel free spool when desired; brake lever controls brake on spool and does it without throwing reel out of alignment; hole for hook in the end of brake lever is a great convenience for securing the hook; swinging loop line guard is made of special Tungsten steel, as hard as flint and eliminates all wear on the line; specially treated to prevent rust; gears are all machine cut (not stamped) and are extra strong and free running. Oiling system is such that the reel can be oiled at every frictional point. Each reel is wrapped in silver tissue and anti tarnish paper.

No. 775. ¾ in. pillar; 3½ in. plate. Wt. ea. 8¾ ozs. .....Each **$6 00**

No. 778. 1¼ in. pillar; 3½ in. plate. Wt. ea. 11¼ ozs.....Each **$10 00**

All above, one in a box.

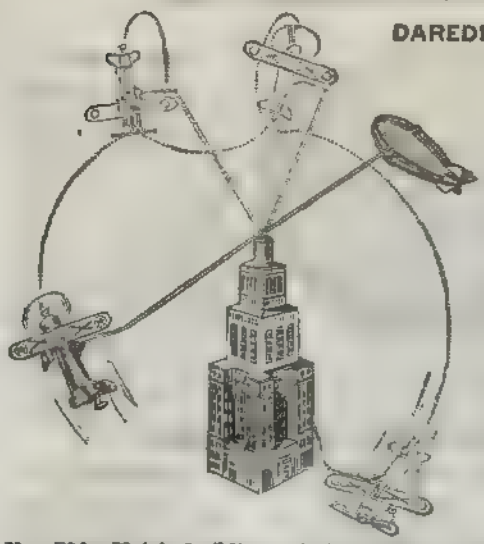
MECHANICAL TOYS

DAREDEVIL FLYER



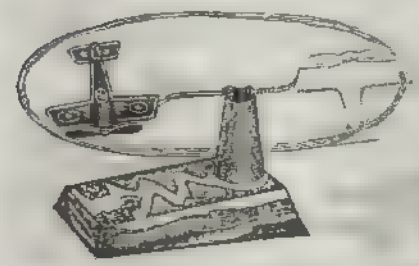
Sheet steel attractively lithographed in bright colors. Airplane rises, from the ground flies up on its own power, circles the top of the building, then loops the loop in the air, circles the tower again and then loops the loop several times more, finally gliding again to the ground.

Per Doz

No. 700—Height building 10½ ins; width 3½ ins; length beam 21 ins; airplane 6¾x6¾ ins; zeppelin 5½ ins long $30 00

One in cardboard box; wt per doz 14 lbs.

STUNT FLYER

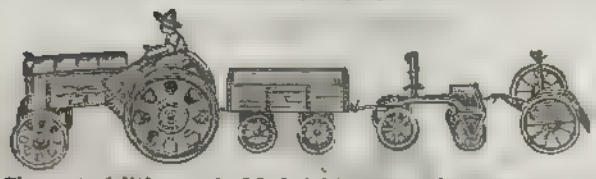


Sheet metal, attractively lithographed in bright colors. Airplane connected to tower revolves in circles and loops the loop. Height 4¼ ins; length 6½ ins; width 3⅞ ins Per Doz

No. 74 ..... $6 30

One in cardboard box; wt per doz 7 lbs.

TRACTOR SET



Sheet steel, lithographed in bright colors. Consists of tractor, four wheel trailor, disc harrow and rake. Per Doz

No. 500—Length over all 27 ins $27 00

One in cardboard box; wt per doz 18 lbs.

TRAIN SET

Sheet steel, very sturdily constructed, lithographed in bright colors. Consists of locomotive, tender and freight car, four sections of O gauge track, making an oval 60 inches in circumference.

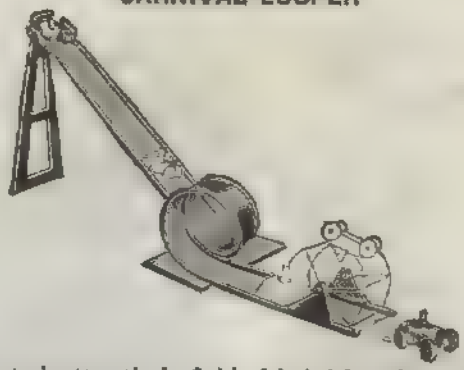
Per Doz

No. 360—Length over all 14 ins $16 50

One set in cardboard box; wt per set 16 lbs.

MECHANICAL TOYS

CARNIVAL LOOPER



Sheet steel, attractively finished in bright colors. Car goes down chute, loops the loop, and at the end of runway it strikes lever which releases automatically and car jumps over hurdle and then proceeds. Per Doz

No. 91—Length 16 ins; height 6½ ins; width 3 ins $6 45

One in cardboard box; wt per doz 8lbs

DOUBLE STUNT AUTO

Sheet steel, attractively finished in bright colors. Two cars are placed at top of runway and as lever is released, the cars proceed down runways striking lever which releases automatically and cars then jump over hurdle and proceed. The car that travels the farthest is declared the winner of the race.

Per Doz

No. 16—Length 11 ins; width 4 ins; height 2⅜ ins $6 45

One in cardboard box; wt per doz 7 lbs.

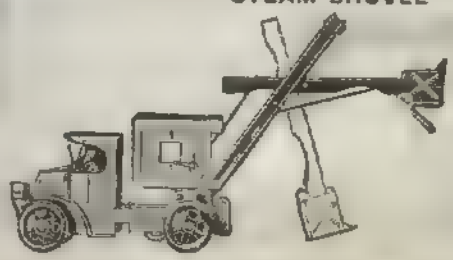
HY-AND-LO

Sheet steel, attractively finished in bright colors. Car glides from upper runway to lower runway and mechanism, through means of a lever, picks car up from lower runway to upper runway, same action continuing. Furnished with two cars, this makes the action continuous. Per Doz

No. 160—Length 13½ ins; width 4¼ ins; height 3 ins $12 75

One in cardboard box; wt per doz 10 lbs.

STEAM SHOVEL



Sheet steel, enameled in bright colors. Steam shovel combined with sturdy Mack truck; exact type of steam shovel that is used on construction work.

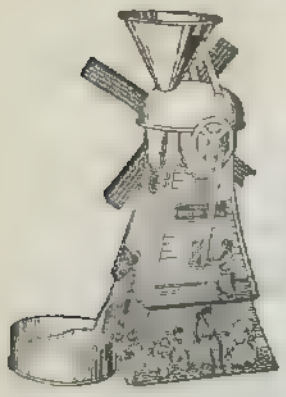
Per Doz

No. 510—Length 16 ins; height 8¾ ins; width 3¼ ins $12 75

One in cardboard box; wt per doz 14 lbs

MECHANICAL TOYS

DUTCH WINDMILL



McDOWELL

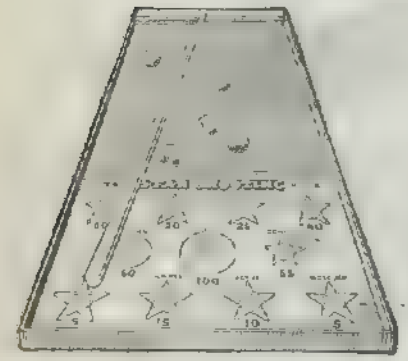
Sheet steel, beautifully lithographed in bright colors. Dumping sand through hopper into mill starts the little dutch man into motion, rotating the wings of mill. Complete with bag of sand and metal container.

Per Doz

No. 26—Height over all 12 ins; base 3½x3½ ins $24 00

One in lithographed cardboard box; wt per doz 25 lbs.

SHOOTING GAMES



McDOWELL

Sheet metal, lithographed in bright colors.

Furnished with five different colored balls and nicely finished cue.

Played by shooting the balls with the cue against the cushion and they bounce back into the hole or stars.

Per Doz

No. 52—Length 22 ins; width 10½ ins; 14 in. runway covered with green cloth $24 00

One in cardboard box; one doz in carton; wt per doz 28 lbs.

MACHINE GUNS

McDOWELL

All steel, finished in bright colors.

A slight pull and push of the handle blows a hole in the paper roll giving a sharp report like that from a rifle. Absolutely safe and harmless. Complete with four paper rolls.

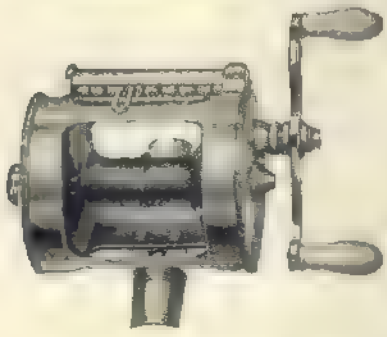
CASTING.

MEISSELBACH.

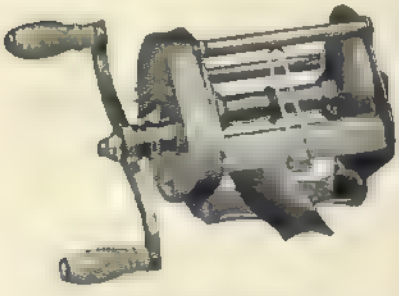
"RANGER" LEVEL WIND



Quadruple, Multiplying, Double Handle.

No. 125. 100 yard capacity; combines the advantages of the Bakelite spool with the famous Meisselbach "Takeapart" feature and tubular frame construction. Starts easily, stops easily and can be taken apart without tools in a few seconds. The beautifully nickel plated, one-piece, brass frame gives it strength and rigidity for lifetime service. Wt. ea., 10 ozs. .....Each $15 00

"FLYER" LEVEL WIND.



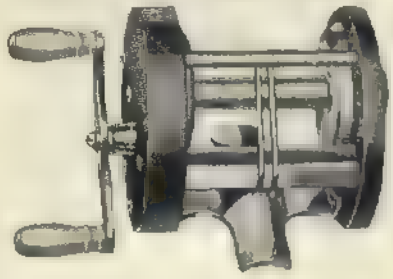
Quadruple Multiplying. Double Handle.

No. 645. 100 yard capacity; entire frame of heavily nickel-plated brass; pleasing in appearance; spool flanges nickel silver; brass arbor; nickel steel pivots running in phosphor bronze bearings; adjustable end bearing; can be oiled without disassembling. Pin which travels in groove of level wind shaft is made of long-wearing hardened steel, copper-coated to prevent rust. Wt each, 8 ozs.....Each $7 50

All above, one in a box.

MEISSELBACH

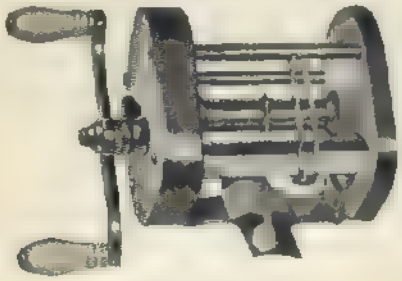
"BULL'S EYE" LEVEL WIND



Quadruple Multiplying Double Handle.

No. 100. 100 yard capacity; the end plates are made of black "Permo," a tough tenacious (not brittle) material It is light, strong, highly polished and unaffected by water or oil. The level winding arrangement has been proven to successfully stand the wear and tear of years of actual use and is protected from sand and water by a hood-shaped guard. The nickel steel, rust resisting pivots run in phosphor bronze bearings which are both adjustable and removable, enabling the user to take up any play which may develop in the spool through season after season of use and to oil the reel without disassembling it. Frame heavily nickel plated brass; brass arbor and nickel silver spool flanges. As lively and free running as a level winding reel can be made. This is the result of accurate workmanship and an exceptionally rigid inspection. Wt.ea.7½ozs..Each $5 00

"TARGET" LEVEL WIND



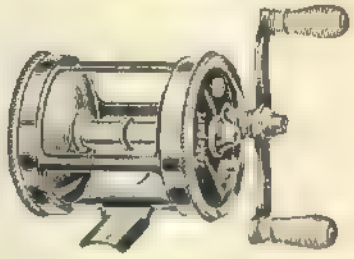
Quadruple Multiplying Double Handle

No. 105. 80 yard capacity End plates of black Permo, a moulded composition give it a rare combination of strength, lightness and beauty. Nickel steel pivots run in phosphor bronze bearings A hardened steel pin carries the level wind guide across a bronze shaft. A wearing combination that cannot be equalled. Left end bearing is adjustable enabling the angler to keep the spool free from end play at all times. Wt ea. 6 ozs. ....Each $3 00

All above, one in a box.

MEISSELBACH

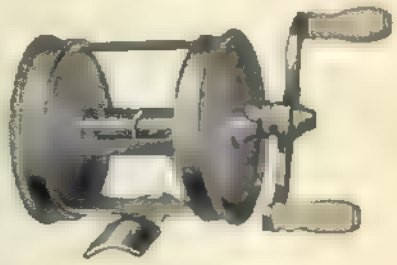
TAKAPART.



Quadruple Multiplying.

No. 480. 100 yards capacity; the entire frame is made from a solid piece of tubing, with flat pillars or cross bars, with no screws or rivets to work loose. The head and end plates can be adjusted so that the handle and click can be placed in four different positions; the click is on the rear plate; by adjustment the click button can be placed in any position; there is a friction device to prevent back-lashing; can take apart without tools by simply unscrewing capacity ring at either end; spool 1¾ inches diameter, by 1⅝ inches long; regular click; quadruple action. Wt. each 7¾ ozs. .....Each $6 00

TRIPART.



Quadruple Multiplying.

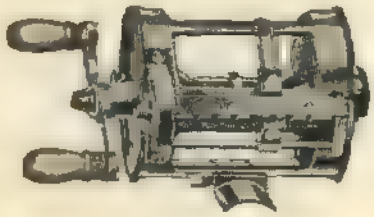
No. 580. 80 yards capacity; frame and reel seat made from solid piece of brass plate, finely finished and beautifully nickeled; spool of Liberty silver; bearings, steel and bronze. Adjusting cap has friction device, preventing back-lashing which also overcomes any looseness or wearing in bearings, preventing rattling after years of use. Can be taken apart without tools by simply unscrewing ring of head plate. Spool 1¾ inches diameter by 1½ inches long; regular click; quadruple action. Wt. each 6¼ ozs. ....Each $6 00

All above, one in a box

REELS

CASTING

THE SYMPLOREEL

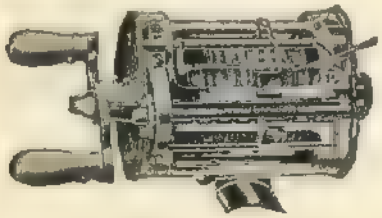


Level Wind.

No. 252. 100 yards capacity; a level wind reel, with double handle, that is achieving nation-wide success. Like every other member of the Symploreel family, it is sturdy, well made and well-designed. With care it is a reel that will last a life-time. The adjustable reciprocating snaft bearing, giving greater and smoother service. This feature is found in no other level-winding reel. Chromium plated. Holds 100 yards of standard bait casting line. Wt. ea. 10 ozs. .....Each **$10 00**

No. 552. Same general description and size as No. 252 but has two rubber side plates instead of metal. Wt. each, 10 ozs. .....Each **$9 00**

No. 752. Same description and size as No. 552 but has one metal and one rubber side plate. Wt. each, 10 ozs..Each **$7 50**

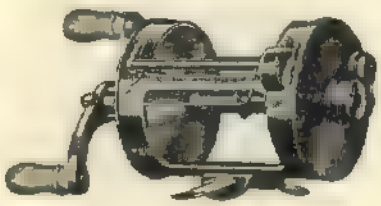


Non-Back-Lash. Level Wind.

No. 257. 100 yards capacity; this Level Wind Non-Back-Lash Symploreel is the only reel of its type with a practical, simple come-a-part feature for cleaning and oiling. The tubular construction of the frame enables the angler to actually put at least 100 yards of standard bait casting line on the reel. The level winding feature is well and strongly designed and of positive operation. The reciprocating shaft is made on a machine of the manufacturer's own special design, insuring absolutely accurate worms—one of the difficulties of many level winding reels. The patented non-back-lash device embodied in this reel is perfectly controlled by its fine adjustments, which varies the pressure on the spool. Every weight of bait, every wind condition and any length of cast can be met by this reel. Wt. each, 12 ozs..Each **$12 50**

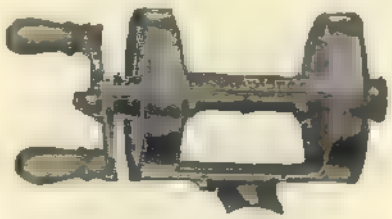
All above, one in a box.

THE SYMPLOREEL



Non-Back-Lash.

No. 255. 100 yards capacity; the ideal reel for the beginner. Its adjustable non-back-lash feature enables the beginner, as well as the more experienced angler, to cast without the worry of backlashing. We recommend it unreservedly and know that any angler following the simple instructions attached to each No. 255 reel will achieve success in using this particular model of the Symploreel line. Full 100 yards capacity. Wt. each, 10 ozs. .....Each **$6 50**

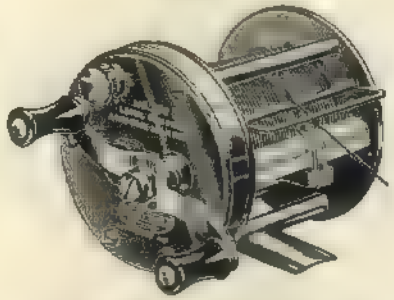


Plain Spool, Double Handle.

No. 250. 100 yards capacity; a plain spool reel with a double handle, combining beauty, strength, and an unusual amount of thumbing space. Made by the same reel mechanics that made the higher priced Symploreels, of the same high grade material and designed by the same master reel mechanic. A most serviceable reel for the angler who does not desire the level wind, non-back lash or free-spool features incorporated in the higher priced reels. Wt. each, 8 ozs. .....Each **$6 50**

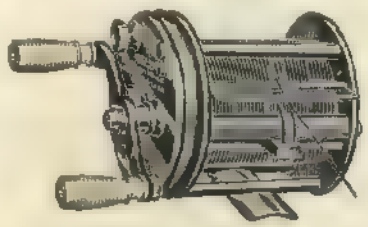
All above, one in a box.

ORENO



Level Winding, Anti-Back-Lash

No. 550. Never before have we offered the angler a reel that included the original anti-back-lash and level winding features at so attractive a price. It is just a plain, good, substantial reel, without any frills or embellishments whatever. It is priced so that even the occasional angler can afford a reel with these two desirable features. Frame is highly nickel-plated brass with double-grip of black ivoroid riveted to crank. Quadruple multiplying gears of hunting-tooth train type, that equalizes the wear on all teeth. Spool bearings run in bronze bushings. Adjustable spool caps. Capacity, 100 yards, 15 pound test silk casting line. Spool diameter, 1½ inches and width, 1¾ inches. Wt. 8½ ozs. .. ..Each **$5 50**



Level Winding, Anti-Back-Lash.

No. 1000. Capacity, 100 yards 16 to 20 pound test silk casting line. This reel is the same in every respect in so far as action and operation are concerned, as the South Bend Level-Winding Anti-Back-Lash. It is so priced that every angler can now own a Level-Winding Anti-Back-Lash of South Bend construction.

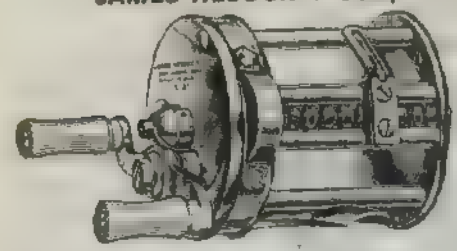
Thumbing and spooling are entirely eliminated. It cannot back lash, snarl or tangle, and it automatically spools itself, winding the line smooth and even. Like the Oreno Anti-Back-Lash it is of dual use and by a very simple adjustment can be converted into a straight level-winding reel.

Highly silvered finish with double grip; new improved rod clip of substantial construction; quadruple multiplying gear; jeweled spool caps. Spool diameter is 1½ inches and 1⅛ inches wide. Wt., 9 ozs. each....Each **$8 50**

All above, one in a box.

FISHING REELS

JAMES HEDDON & SON, Level Winding.



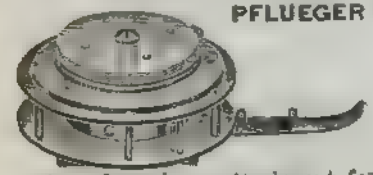
Quadruple Multiplying.

Hard drawn nickel silver, nickel finish; stud shaft; pivots and pinion of drill rod, oil tempered, ground and polished. Double hard rubber handles. Equipped with level winding device of non-rusting material making it especially desirable for salt water fishing. Each

No. 3-25—Capacity 100 yds, diam outside 2 ins; length of spool 1⅝ ins; diam of spool head 1⅛ ins 74 25

One in cardboard box; wt each 8 ozs $30 00

PFLUEGER SUPEREX, Automatic.

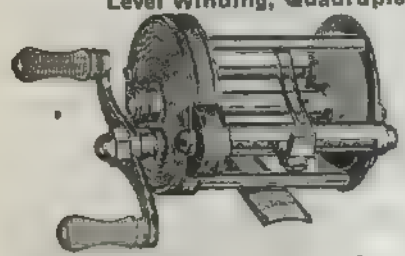


Nickalum satin gun metal finish. Machine cut gears extra strong and free running, fitted with steel pivots running in long bearings; main spring release is an attachment for releasing tension on main spring; tension release device located on inside of reel protecting main spring from damage; brake release attached to brake lever making free spool when desired; brake lever controls brake on spool without throwing reel out of alignment. Special tungsten steel loop line guard eliminates wear on line. Each

No. 775—Capacity 100 yds; ¾ in. pillar, 3 ½ in. plate .. $13 20

One in cardboard box; wt each 7 ozs.

PFLUEGER SUMMIT
Level Winding, Quadruple Multiplying.

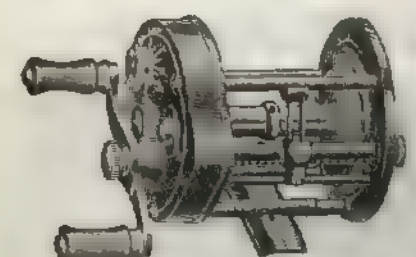


Non-tarnishable nickel silver. Tempered bronze gear; steel pinions; phosphor bronze bearings; polished steel gear post; one piece tempered bronze double thread shaft housing; phosphor bronze line guide block with extra long bearing surface that travels full width of spool laying the line close to each flange avoiding back lashes. Amber pyralin double handle crank. Sliding click. One piece phosphor bronze click spring. Cross plate conforms to and fits on the reel seats of any standard rod. Stainless steel tempered wire line guide loop. 1⅞ inch pillar; 2 inch plate. Capacity 75 to 200 yards according to size of line. Each

No. 1993J—Jeweled; wt each 8 ozs $22 05

One in chamois bag in cardboard box.

PFLUEGER SUPREME, Level Winding.



Anti-Back-Lash Casting. Quadruple Multiplying.

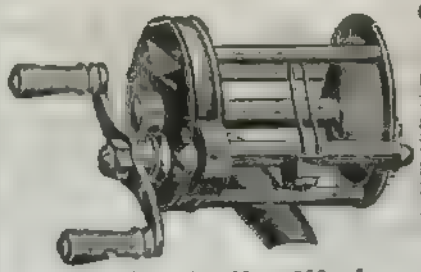
Nickalum, satin finish tempered phosphor bronze gears with generated spiral teeth; tempered steel pinions and pivots; phosphor bronze bearings; Pyralin ivory handles; 1⅞ in pillar; 2¼ in disks. Has anti-back-lash and automatically thumbs the spool and stops the instant the bait strikes the water. Each

No. 1573 Capacity 75 to 200 yds $54 75

One in Chamois leather bag packed in cardboard box; wt each ½ lb.

FISHING REELS

PFLUEGER, Akron Level Winding.



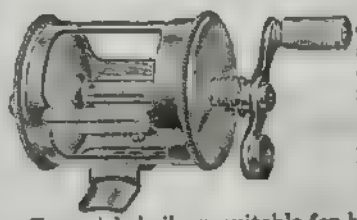
Quadruple Multiplying.

Combination satin and polished nickel finish. Selected tool steel pivots and pinions; tempered bronze gear and pivot bearings. Double white ivoroid handles, 1⅞ inch pillar; 2 inch plate. Each

No. 1893—Capacity 60 to 100 yds according to size of line used $13 20

One in cardboard box; wt each 7 ozs.

—BLUE GRASS—SIMPLEX



Gears are cut from hard drawn brass rod and pinions are of the finest stub steel drill rod, tempered and polished.

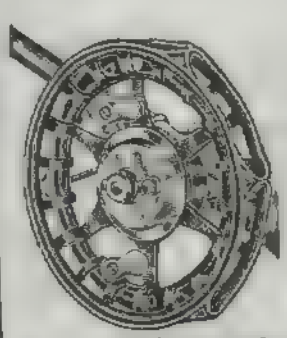
Has handle forward of the bottom and sliding click located on back end of reel. Both click and spring are of finest oil tempered steel.

Best nickel silver, suitable for bait casting, bass fishing and for trolling pike, muskalonge and other large fish. Capacity 120 yards of No. 5 Kingfisher line. Each

No. BG33—Diam of spool 1⅝ ins; length of spool 1⅝ ins; wt each 12 ozs $26 25

One in cardboard box.

WINONA



The spool is moulded in one piece, of Redmanol (a glossy black material similar to hard rubber, but much stronger); It runs on tool steel shaft. The guard is of bronze, nickel plated. Other parts are aluminum; Ivoroid handles, securely fastened; adjustable drag and regular click, can be taken apart by removing one screw. Capacity 100 yds. of 15 lb. test silk line; diameter spool 5 inches. Each

No. 105—Without guard $10 95

No. 108—With guard 16 50

One in cardboard box; wt each 6 ozs.

MARTIN, Automatic, with Line Protector.

Aluminum, and duraluminum all working parts are of brass, highly polished. Equipped with special line protecter made of tungsten steel, mounted beside one of the reel posts. Spool is of rigid construction and closely fitted, eliminating all danger of line fouling between spool and side plates. Each

No. 1LP—Cap 75 ft of G line $12 45

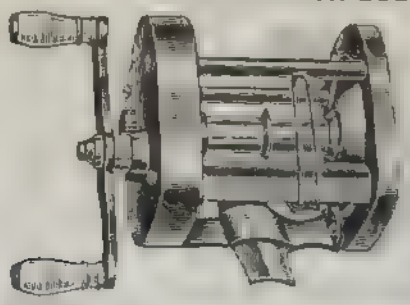
No. 2LP—Cap 90 ft of G line 13 50

No. 3LP—Cap 150 ft of G line 14 70

One in cardboard box; wt each 8 ozs.

FISHING REELS

MEISSELBACH BULL'S EYE



Level Winding, Quadruple, Multiplying.

Nickel plated brass frame with brass arbor and nickel silver spool flanges; Permo end plates (a tough tenacious) material, light, strong and not affected by water or oil.

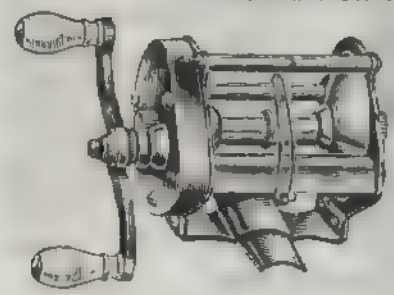
Nickel steel rust resisting pivots run in phosphor bronze bearings which are both adjustable and removable, enabling user to take up any play which may develop in spool. Adjustable click and drag.

Double crank handle with white ivoroid grips. Each

No. M100—Capacity 100 yds; diam spool 1¾ ins; length spool 1⅞ ins.....$10 95

One in cardboard box; wt each 7½ ozs.

MEISSELBACH FLYER



Level Winding, Quadruple, Multiplying.

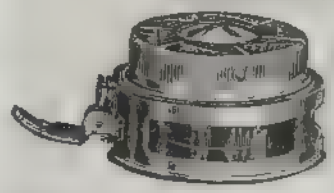
Nickel plated brass frame and end plates with brass arbor and nickel silver spool flanges. Nickel steel rust-resisting pivots run in phosphor bronze bearings which are adjustable and removable, enabling user to take up any play which may develop in spool.

Adjustable click and drag. Double crank handle with white ivoroid grips. Each

No. 645—Capacity 100 yds; diam spool 1¾ ins; length spool 1⅞ ins.....$16 50

One in chamois bag in cardboard box; wt each 7½ ozs.

MEISSELBACH AUTOMATIC



Rust-proof light weight metal case with a strongly constructed winding mechanism fully enclosed.

Paying out the line winds up the reel and a feather touch on lever reels in the fish.

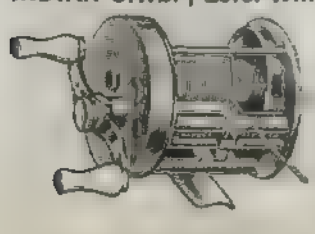
If angler wishes to wind up the spring without disturbing his line, he has simply to turn drum on top of reel. Each

No. 656—Capacity 50 of F line yds; diam case 3⅛ ins; width 1⅞ ins.....$10 95

One in cardboard box; wt each 7 ozs.

JAMES HEDDON & SON

INDIAN CHIEF, Level Winding. Quadruple Multiplying.



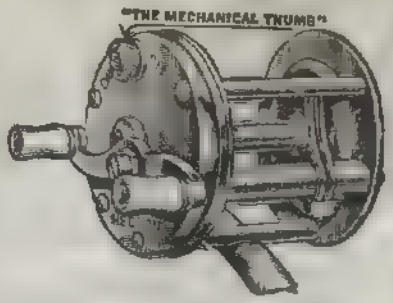
Duraluminum frame; tempered steel shaft, running on nickel silver bearings; reversing screw of level wind device is of phosphor bronze to prevent rust; line carriage is of special alloy and reinforced by patented steady bar; nickel silver alloy bushings; white ivoroid double crank handles. Each

No. 3—Capacity 100 yds; length 1⅞ ins; diam 1½ ins..$18 45

One in cardboard box; wt each 7⅛ ozs.

FISHING REELS

JAMES HEDDON & SON—CHIEF DOWAGIAC ANTI-BACK LASH, LEVEL WINDING



Nickel plated and highly polished head and rear plates; nickel silver spool. Hardened steel click on tail plate with phosphor bronze spring. Screw caps covering spool pivots are adjustable, and have genuine agate jewel bearings. Level winding mechism plated with chromium, the hardest wearing metal known, non-rusting and non-tarnishing. The mechanical thumb anti-back lash device is adjustable to any weight of bait, relieving the constant thumbing. Double crank handle with white ivoroid grips. Each

No. 4—Capacity 100 yds; diam spool 2⅛ ins; length spool 1¾ ins.....23 70

One in cardboard box; wt each 8 ozs. *$10 75*

The Modern Screen-Grid Nine-Tube A. C. Electric Radio

MINERVA

PRACTICAL GIFTS THAT BRING HAPPINESS

"Remember the Tone"

Humless Operation
245 Tube-Push-Pull Audio

MINERVA MODEL No. 7J36

Minerva Console with cabinet of selected Walnut and enriched with overlay of Curly Maple. Exquisitely figured and beautifully grained. Effective in contrast and very attractive and charming in appearance.

Eight tubes including one rectifier, two 245 in Push-Pull and five 227. The popular Magnavox Dynamic Speaker is used in this model. Height, 38½ inches. Width, 26¾ inches. Depth, 17½ inches.

It is of very finest workmanship and finish throughout. Quality considered it is priced very low in this selling. Makes a highly acceptable Christmas or Birthday Gift.

No. 7J39. Minerva Model less tubes. List Price $178.70
No. 7J32. Tube Equipment. List Price 27.90

THE NEW MINERVA RADIO

Just Plug in the Electric Light Circuit and Enjoy Real Radio Reception

Minerva A. C. Stage Shielded Radio Receiving Sets at Factory Prices

For Operation on 50–60-Cycle, 110–120-Volt Alternating Current

The New Minerva Radio is the result of long exhaustive tests with the best materials available on the radio market. It is unlike many other receivers.

It is a brand new set built to fit the new improved A.C. tubes, not merely a redesigned chassis to allow the use of these new and startlingly efficient tubes. The Minerva radio is sold solely on its performance and stability, which after all is the one requirement for perfect radio satisfaction. Only the very best of everything is used in its construction. The tone quality is beyond comparison except with the best. You will marvel at the fidelity with which the programs are brought to you.

All Minerva Radio Receivers are single dial control, merely a knob to turn the dial, and a volume control so simple a child can tune it with ease.

The Minerva Radio has been designed by the best engineering talent available and extensive tests of every nature have been applied to it to prove that it is the outstanding value on the radio market.

THE MINERVA 9-Tube
Screen-Grid Chassis
Completely Shielded

THE MINERVA NINE-TUBE SCREEN-GRID CHASSIS
Completely Shielded

The Minerva Chassis pictured above is a marvel of mechanical and radio engineering skill. It is expertly built of solid steel giving it strength far beyond demand. Every circuit is completely shielded to prevent interstage coupling of any kind. Maximum sensitivity and selectivity are assured. There are four stages of radio frequency amplification, three of which are very sharply tuned, a power detector, a first audio stage, and push-pull 245 tubes in the last or power stage. These tubes insure the wonderful tone quality that make you

"REMEMBER THE TONE"

227 type heater tubes are used throughout giving HUM LESS, trouble free reception at all times. This radio operates on any 110-volt 50-cycle lighting circuit and supplies all power to the 2800 "Ohm" dynamic speaker with which it is used.

Selectivity	Range
Tone	Volume
Ease of Tuning	Quality
Appearance	Exceptional Value

are the salient features which characterize the construction of this popular make.

GREAT SAVING

There's a great saving to be effected in purchasing a MINERVA RADIO, as it is jobbed through Wholesalers only at a slight advance above factory cost. This SAVING is passed to you.

MINERVA MODEL No. 7J31

The Minerva Model No. 7J31 is portrayed to right in both the open and closed models. It is a design of stateliness and unusual charm. The symmetrical and well-balanced cabinet is made of choicest Walnut, exquisitely grained and beautifully figured. The overlays and trimmings, which immensely enhance appearance of cabinet, are of genuine wood carvings.

Nine-tube Receiver, using two screen grid, two 245 in Push-Pull Audio, four 227 and one 280 Rectifier. Powerful Magnavox Dynamic Speaker is used in this model.

Height, 50 inches; Width, 27½ inches; Depth, 17 inches.

In this model you have richness of design, faultless construction and perfect reception—a radio with a rich musical mellow tone which will delight you.

No. 7J31. Minerva Model, less tubes. List Price $202.80

Excellent Values in Correctly Designed Radio Cabinets

The Radio cabinets portrayed in the interesting display below are designed for installation of practically all makes of receiving sets. They are manufactured of carefully selected woods and veneers, yet popular in price. Each is equipped with a baffle board for dynamic speakers. Dial panels will be machined to fit your set. Just advise style and model number when ordering and state you want panel bored. These designs are not only artistic, but embody every advanced feature which fosters convenience and service.

Inc. 1889 1930

No. 7Y/1000 RADIO CABINET

You will be proud to possess this attractive radio cabinet at the remarkable low price it is offered at this time. It is sturdily constructed, excellent grade and nicely finished throughout. Width 25¼ inches, depth 15½ inches, height 35½ inches. Speaker compartment 24¼x11¾x13⅜ inches. Chassis compartment 24¼x11¾x13⅜ inches. Walnut veneered cabinet with solid parts fashioned from select gumwood. Slot veneer overlays. Equipped with baffle board, speaker vent decorated with fancy wood scroll and grill cloth and panel which will be machined to fit your radio. Just mention style and model number. Finished in American Walnut dull lacquer.

No. 7Y/1000 Each $30.25

No. 7Y/1001 RADIO CABINET

Same as above except equipped with two-way matched Satinwood veneered sliding doors. This feature changes inside dimensions as follows: Speaker compartment 24¼x11¾x13⅜ inches. Chassis compartment 24¼x11¾x13⅜ inches.

No. 7Y/1001 Each..... $35.75

No. 7Y/1400S RADIO TABLE

This is a most unique Radio Table in that it is manufactured with a speaker compartment. This compartment is equipped with a speaker vent artistically decorated with fancy wood scroll and grill cloth, and a baffle board to accommodate dynamic speakers. Panel will be machined to accommodate your set. Just specify style and Model number. It is a pleasing design with nicely turned legs, of substantial construction and excellent finish. Height 31 inches. Top measures 35¾x15 inches which affords ample room for large or small radio set, especially constructed of American Walnut veneers beautifully grained and cleverly decorated with carvings. Solid parts from select gum cabinet wood. Artistically finished in American Walnut dull lacquer. It is a popular model and very supportive and appropriate as an ideal gift item.

No. 7Y/1400S Each $12.45

No. 7Y/1003 RADIO CABINET

A very unusual charming design of pleasing proportions, the overall size and finish. Width 25½ inches. Depth 15¾ inches. Height 42¾ inches. Speaker compartment measures 24¼x11¾x13⅜ inches, the chassis compartment 24¼x11¾x13⅜ inches. This is a Walnut veneered cabinet with sliding doors faced with two-way matched Satinwood veneer and overlays of straight laid rosewood. All parts are of gum cabinet wood. Equipped with baffle board, speaker vent decorated with fancy wood scroll and grill cloth, and panel which will be machined to accommodate your radio. Just mention style and model number. Finished in American Walnut, dull lacquer. The factory price prevailing is interestingly low.

No. 7Y/1003 Each $41.25

No. 7Y/1002 RADIO CABINET

Same as above except it is of open panel front construction similar to No. 7Y/1000 illustrated to left and does not have the sliding doors. This feature changes inside dimensions as follows: Speaker Compartment 24¼x12¾x13⅜ inches. Chassis Compartment 24¼x12¾x10 inches.

No. 7Y/1002 Each $36.75

PRACTICAL GIFTS THAT BRING HAPPINESS

Ideal as a Christmas or Birthday Gift

No. 7Y/1402C RADIO OR RADIO-PHONOGRAPH CABINET

An artistically designed cabinet of dual purpose. The phonograph drawer measures 25¾ inches in width, 14 inches in depth and 8 inches in height. It rests over and hidden by the doors is the radio chassis compartment which measures 25¼x13¾x10 inches. Directly above the chassis compartment is the speaker space which measures 16¼x13¾x9¾ inches. On either side is a record compartment each of 6¼x13¾x13¾ inches. Phonograph and radio when installed can both be easily connected to your dynamic speaker. Cabinet measures 30¾ inches in width, 14 inches in depth and 44¾ inches in height. Veneered with American Walnut with special figured Walnut doors. Solid parts are gum cabinet wood, finished in American Walnut, dull lacquer. Equipped with baffle board, speaker vent decorated with artistic wood scroll and grill cloth panel which will be machined to fit your radio. Just mention style and model number. The Montgomery Lathe

Eight Inch Swing

THE NEW MONTGOMERY LATHE has been designed to meet the wants of a large class of customers who want a good Lathe at a reasonable price. It is made entirely of steel and cast iron. Will turn a piece sixteen inches in length by eight in diameter. The head spindle runs in adjustable bearings, so that it can at all times be kept tight, and is bored with the dead center, and has a ¾ inch hole through it. The new section cone pulley is made to run at one inch *flat belt*, giving much more power than the ordinary step belt run in grooves, as given in all Lathes on sale. The face plate screws on the end of the spindle and the centers are fitted to each. Four steps of belt. Each Lathe is furnished without extra charge with one face plate, two pair centers, one center for turning wood, one step center or drill pad, one bark chuck for holding a small chuck and two T rests. The foot power can be had at any time by ordering the same that we use on our large high-price Lathes. The bearings of the wheels are hard polished and the crank is counterbalanced. The table is of hard wood well seasoned, the edges rounded so that it is easy to move, and the whole is finished in the most thorough manner, and is strong and elegant in design and forms a handsome ornament to the room of the student or the workshop of the mechanic.

Lathe weighs 60 lbs. Stand weighs 130 lbs.

Prices

Foot Lathe, complete, as cut	$35.00
Lathe without the table	14.00
Table alone	7.00
Countershaft	

We are prepared to furnish all kinds of Tools and attachments at the best market price.

Send a list of what you want and we will quote prices promptly.

We charge $2.00 each for fitting chucks to this Lathe.

Slide Rests

No. 8 for Tools ¾ in. x ⅜ in.
Price each $10.00

A well made tool adapted to 8 inch swing Lathes only. Longitudinal motion 5 inch, transverse motion 2¾ inch.

No. 6, for Tools ¼ in. x ⅜ in.
Price each $5.35

Suitable for any Lathe 6 inch to 8 inch swing, as it can be raised or lowered in its socket. Longitudinal motion 3 inch, transverse motion 1¾ inch.

[illegible] Rods, strips or made into wheels.

105 FULTON STREET, NEW YORK CITY
When ordering from this page, mention "MONTGOMERY & CO., 105 Fulton St., New York City."

LATHE TOOL RACKS

This is a very handy and useful appliance to put on any lathe. It is not necessary to drill holes. Just clamp it to the side of the bed. A monkey-wrench is all that is needed to do the job. It provides a place for the tools, wrenches, oil cans, waste and blue-prints. It saves them from being knocked on the floor and they are where you can always find them.

"A PLACE FOR EVERYTHING AND EVERYTHING IN ITS PLACE."

Price, $4.75 Net. **Weight, boxed for shipment, 60 lbs.**

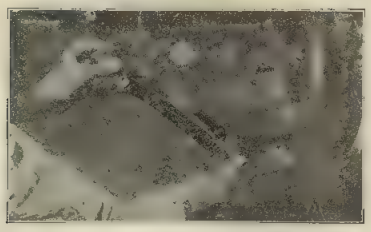
AUTOMOBILE JACKS L

VEE GEE SPRING JACKS

For the Model A Ford

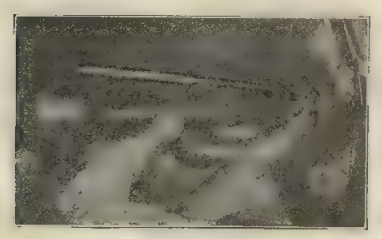


Rear Spring Jack

One-inch case hardened nut operating on three-quarter threaded shaft. Lifter lug is of special gray iron. Tube is seamless and case hardened steel.

The Rear Spring Jack is designed to simplify the removal of and rebushing of the spring shackles without necessitating the use of a hoist. Simply place the wedge on the axle housing with the inclined surface resting against the under side of shackle with the end of tube placed over the top center housing screw head. The nut on the tool shaft is then turned in such a direction as to force lug wedge under shackle, raising it to an exact height and placing the lug shoulder against the shackle, jacking the draw strain so that the shackle can be easily removed with the fingers. This is by far the most efficient and quickest way of doing this operation and requires very little effort.

NO.		EACH
Rear Spring Jack	.....	$5.00



Front Spring Jack

The Front Spring Jack is designed for the same purpose as the rear, only that it operates on a draw and can be used on both Model T and Model A Ford cars. Is quick and efficient for removing shackles, rebushing, etc., without hoisting. To operate remove pin from lug, place on top of axle with inclined surface resting against under side of shackle. Place fork of tool astride axle from underneath, slip rear bar of fork through U in front of front radius rod, align holes in end of fork with hole in lug and insert pin. Point of screw is then turned against radius rod boss underneath as shown in cut until shackle is in position to be removed.

NO.		EACH
Front Spring Jack	.....	$3.75

MOON BROS. ALL STEEL JACK

Here is a sturdy, neat and light all steel jack that is typical of Moon Bros. quality products. Its exclusive features make it stand out as the "Jack of Jacks"—and best of all it is priced right; just the kind of "buy" the average car owner wants. You'll like it.

WINDSHIELD WIPERS

McCONNELL—ELECTRIC

Operates from battery, assuring uniform speed under all driving conditions.

Requires no more current than headlight bulb.

A powerful electric motor operates an extra long wiper, cleaning an arc 21 inches wide approximately two-thirds of the windshield, giving the driver ample vision to observe traffic approaching on his right.

Mounted above windshield frame, wiper stays up out of range when not in use, preventing obstruction of driver's vision.

The only type that can be operated while the car is parked with engine idle.

Easily installed. One-hole installation. No holes to drill in windshield frame.

Model C—Inside Mounting

Fits all cars where offset above frame of windshield does not exceed 1½ inches.

M. REDGRAVE'S NEW IMPROVED ORIGINAL

PARLOR BAGATELLE

Made in Seven Sizes

Pegatelle

Redgrave's Bagatelle is one of the few games that you played as a boy that continues to keep pace with today's best selling games. It is as necessary to the game department as sugar and coffee to the grocery store. Each game is individually packed in eye-catching display boxes and retails at prices well within the reach of everybody.

And an Entirely New Game Hit

"PEGATE LLE"

To Retail at $3.00

Here is a new hilarious fun producer consisting of a large red, white and blue clown with an opening in his throat to admit balls skilfully tossed by the players. A series of wooden pegs down the entire front of the figure introduces the element of chance in determining the amount scored. Any number can play. Packed in individual display boxes.

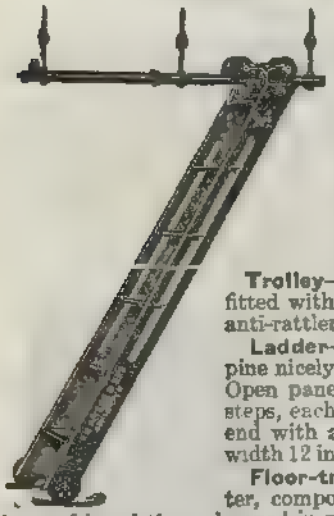
STORE LADDERS

MYERS'



Track—double angle steel rail, suspended from ceiling by means of lag screws, either jointed or rigid, or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble and without any blocking or bridging.

Trolley—self-adjusting, malleable iron, fitted with turned steel bearings, 3 inch anti-rattler wheels with rubber tires.

Ladder—constructed of clear Georgia pine nicely finished, filled and varnished. Open panel sides 5 inches wide, 5 inch steps, each step being supported at each end with a special malleable dowel-tee; width 12 inches.

Floor-travelers—5 inches in diameter, composed of metal sides with rubber cushioned tires, clamped in such a position as to be impossible to come loose or work off. They are laced on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor.

In ordering, observe the following instructions:
1st.—Give exact perpendicular height from floor to ceiling.
2nd.—Give entire length of track required.

	Each
No. 1ML—Ladder and hanger, complete without track; for ceilings 14 ft or less in height; wt each 60 lbs	✦$66 00
	Per Ft
For each additional foot of ladder or fraction there of for ceilings in excess of 14 ft	$3 60
	Per Ft
No. 1MT—Track and hanger bolts; wt per ft 2½ lbs	✦$0 93

Shipped wrapped with castings protected by cleats.

MILBRADT'S

Made to order, any shape and length necessary to fit shelving, of good oak lumber, in the best possible workmanlike manner, finished in first class style. They are made in various styles to suit all kinds of shelving.

Bent Shelf Ladders.

Runs on steel track; has rubber rollers attached near the lower end that run against the edge of base shelf; nickel plated malleable iron trimmings.

The track should be fastened to a shelf that is about 3 feet from the top.

In ordering, observe the following instructions:
1st.—Give the exact height from floor to top of ledge.
2nd.—Give the exact width or projection of base shelf.
3rd.—Give the exact perpendicular height from the top of ledge to the top of shelf to which track is to be fastened.
4th.—Give entire length of each run of track and number of uprights for each run.
5th.—Give dimensions of uprights, also distance of uprights from center to center.
6th.—State if uprights are straight faced or turned spindle.

	Each
No. 1—Complete with fixtures; wt each 50 lbs	✦$66 00
Steel Track.	Per Ft
No. 8—Steel track for brackets not over 4 ft apart; complete with brackets and screws; wt per ft 1 lb.	✦$1 14

Ladders and track crated.

✦Myers—F. O. B. Ohio Factory Only.

STORE LADDERS

MILBRADT'S

Trolley Ladder.

Has a suitable fixture with wheels at the top that run on a track, fastened to the ceiling. It also has attached at the bottom cushion tired wheels that run on the floor. This ladder is very strongly built and is especially adapted for hardware stores or any place of business where heavy goods are handled.

This ladder can be made to operate on any possible kind of curve by using special swivel wheels and track curves.

In ordering, observe the following instructions:
1st.—Give exact perpendicular height from floor to ceiling.
2nd.—Give entire length of track required.

	Each
No. 15—Complete with fixtures; wt each 50 lbs	✦$66 00
Steel Track.	Per Foot
No. 11—Ceiling or trolley track; complete with brackets and screws; wt per ft ½ lb	✦$1 14
	Per Ladder
Extra For Swivel Wheels	$8 25
	Per Curve
Extra For Track Curves	$6 75

Ladders and track crated.

MILBRADT'S

Bent Ladder.

Intended for shelving that is not very strong, as most of the weight rests on the floor. This ladder runs on a hardwood track fastened to shelving near the top to guide it and has attached at the bottom cushion tired wheels that run on the floor, but no track is used on the floor.

The track should be fastened to a shelf that is about 3 feet down from the top.

In ordering, observe the following instructions:
1st.—Give the exact height from floor to top of ledge.
2nd.—Give the exact width or projection of base shelf.
3rd.—Give the exact perpendicular height from the top of ledge to the top of shelf to which track is to be fastened.
4th.—Give entire length of each run of track and number of uprights for each run.
5th.—Give dimensions of uprights, also distance of uprights from center to center.
6th.—State if uprights are straight faced or turned spindle.

	Each
No. 2—Complete with fixtures; wt each 50 lbs	✦$66 00
Wood Track.	Per Ft
No. 7—No brackets needed; complete with screws; wt per ft ½ lb	✦$0 99

Ladders and track crated.

✦F. O. B. Missouri Factory Only.

STEWART RINGERS

Malleable iron, reinforced at all points. The adjusting screw is equipped with a lock nut which enables the user to lock the screw after it is properly adjusted.

Per Doz

No. 57—Length 7¼ ins $7 20

One doz in cardboard box; wt per doz 7½ lbs.

STEWART RINGS

Standard.

Coppered steel wire; triangular shape when closed. On the front of the ring is welded at right angles a piece of same size wire which is of sufficient length to cover the snout. When the animal lifts on a wire it slides down the snout and engages the cross piece, or in rooting comes in contact with the ground, which causes temporary pain.

Per Doz Boxes

No. S1—Pig Rings 24 in box $6 30

No. S2—Shoat Rings 20 in box 6 30

No. S3—Hog Rings 12 in box 6 30

One doz boxes in pkg; wt per doz 3 lbs.

Special.

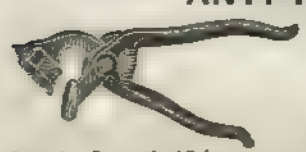
This ring differs from the standard ring in having the bar bent outward and standing parallel to the ground in place of horizontally when attached in the snout. The only device that will sucessfully stop hogs from catching chickens.

Per Doz Boxes

No. S4—Hog Rings 12 in box $22 50

Three doz boxes in shipping case; wt per doz 3 lbs.

ANTI-ROOTERS



NEW IDEAL

Blades are of oil tempered steel, with copper base or anvil to cut on; aluminum finish.

Does not injure the nerves of the snout or rooter.

One doz in cardboard box; wt per doz about 1½ lbs.

✣No. 10—F. O. B. Illinois Factory Only.

✣No. N5—F. O. B. Indiana Factory Only.

STRIKING BAG PLATFORMS

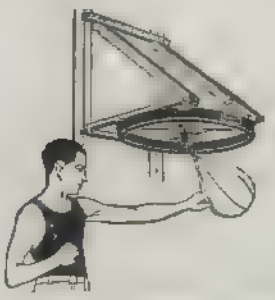
TEX

Walnut frame, with hardwood rim; natural finish. Rim attached to frame by strong metal japanned stirrups; fitted with springs between frame and rim, which eliminates much of the jar and vibration and makes the platform practically noiseless.

Price Does Not Include Bag.	Each
No. 90—Diam rim 23 ins	$15 45

Packed loose; wt each 10 lbs.

NONPARIEL



Hardwood frame, securely bolted, finished in a medium dark oak stain.

Rebound ring made of a flat band of steel, black enameled; lower end formed into a rounded angularly disposed in-turned flange, which possesses the necessary resiliency to effect a rapid rebound of the striking bag. Especially suitable for home use; platform can be attached to any wall or post.

Price Does Not Include Bag.	Each
No. 2—Diam of rim 23 ins	$11 25

One in carton; wt each 13 lbs.

H. & R. HANDY

.410 Gauge

The new H. & R. "Handy Gun" is offered as a weapon of defense for the home, office and bank and as a small game gun for the hunter. Also for the automobilist for protection against "hold-ups." When shooting in the dark or from a moving vehicle, making aim difficult or impossible, the spreading charge of shot has several chances of scoring as against one chance for a single bullet. A second shot can be fired very quickly, the automatic ejector throwing the fired shell clear of the gun. Whether or not accustomed to firearms, any person can use the "Handy Gun" because of its extreme simplicity of operation. The hammer is rebounding, therefore always in the safety notch, the safest "safety" yet devised.

.410 Gauge. Chambered for 2½ inch shells; 8 and 12¼ inch barrel; will also take without change .44 W. C. F. shot cartridge. Wt. each, with 8 in. bbl., 37 ozs....Each $12 00

REPEATING SHOT GUNS
WINCHESTER

MODEL 12. HAMMERLESS TAKE DOWN STANDARD

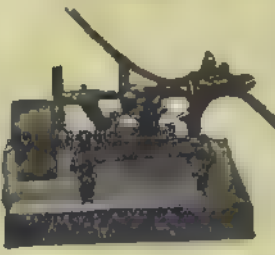
NOTE. Model 97 guns can be furnished with modified choke or cylinder bore barrel also with 26 or 28 inch barrel without extra charge, for shipment from factory only.

*For factory shipment only.

"New Reliable" Automatic Band-Saw Sharpener



If you have a band-saw, it requires sharpening twice a week or perhaps more. Every time it is filed it costs you 25 cents or $26.00 per year at the very lowest. Now just add $10.00 more to that amount, and you have the price of a machine which will do this work for a lifetime with practically no repairs. Gross weight, 75 lbs. Price, $36.00 net.

"Ideal" Band-Saw Sharpener

This machine, which is similar to the New Reliable power machine, is adapted for filing band saws, ranging in size up to and including saws with teeth 7/16 inch from point to point and 1¼ width of blade.

This machine can be run either by hand or power, and occupies only a small space, the saws being hung on a peg overhead, thus dispensing with filing wheels and all other such apparatus, which in many machines occupy at least six square yards. Gross weight, 35 lbs. Price, $16.50 net.

"Reliable" Band-Saw Setter

It accommodates saws from ⅛ to 1½ inch width. Can be operated by hand or power, and sets 200 teeth a minute.

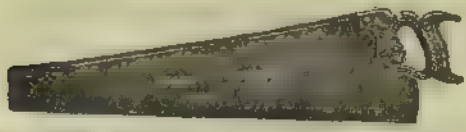
Simplicity

A great feature of this machine, and which no other machine possesses, is that on old saws the teeth of uneven height or length all get the very same amount of set. Any one who can turn a crank can set a saw in a few minutes more perfectly than could be done by hand in an hour. Gross weight, 25 lbs. Price, $16.50 net.

Can be returned after 10 days trial if not entirely satisfactory.

(Consult Index). Mention "Tool Monger" No. 30 when ordering from this book

Montgomery & Co.'s "Leader" Saws



A first class All Saw. If it had the name of a prominent maker it would sell for nearly double what we ask. It is the best value for the money that we know of.

All Leader Saws are made from extra refined spring steel, polished blades, taper ground, thin back, full bevel filed, apple handles, five improved brass screws on all sizes above 26 inches. Smaller sizes four screws.

Can furnish straight or skew back as desired.

16	18	20	22	24	26	28	30 Inches
$0 85	0 97	1 06	1 19	1 27	1 33	1 47	1 69 each

We have

18-inch and 20-inch rip [illegible], 6, 7 points to inch
22-inch and 24-inch rip [illegible] 5, 5½, 6 points to inch
26-inch rip [illegible] points to inch
28-inch and [illegible]-inch rip [illegible], 4½, 5, 5½ points to inch
16-inch 18-inch 20-inch 22-inch crosscut 8, 9, 10, 11, 12 points to inch.
24-inch crosscut 7, 8, 9, 10, 11, 12 points to inch
26-inch crosscut 6, 7, 8, 9, 10, 11 points to inch
28-inch crosscut, 6, 7 points to inch

Leader Saws Are Absolutely Warranted

Hand Saws

The teeth of a crosscut saw should be filed so true that on holding it up to the eye and looking along its edge, it will show a central groove down which a fine needle will slide freely the entire length; this groove must be angular in shape and equal on each side or the saw is not filed properly and will not run true.

The proper amount of bevel to give the teeth is very important, for if too much bevel is given, the points will score so deeply that the fibres severed from the main body will not crumble out as severed, but be removed by continued rasping, particularly in hard woods, as they require less bevel as well as pitch, than soft wood.

SETTING SAWS.—This is an important part of the work of keeping a saw in order and should always be done after the teeth are pointed and before filing. In all cases the set should be perfectly uniform, as the good working of the saw depends as much on this as on the filing. Whether the saw is fine or coarse the depth of set should not go, at the most, lower than half the length of the tooth, as it is certain to spring the body of saw if not break the tooth out.

[illegible] stock [illegible]

New "Speed Models" Tennis Rackets

A feature of outstanding merit in the Wilson line of rackets is the use of moisture-proof stringing in all numbers, from the top numbers down to the most moderate priced models. Moisture-proof stringing as its name implies, is not affected by dampness or climatic conditions and is stronger and more durable than gut at the same prices. All Wilson rackets strung with moisture-proof stringing carry a metal tag specifying the kind and tensile strength of the strings used

G426+1 Geo. Agutter Forest Hills Model. Geo. Agutter featured Forest Hills Country Club Pro designed and made each of these rackets. Has the new, improved, new open throat model. Second growth ash, strongly re-enforced with cable cord and rawhide. Strung with moisture-proof stringing. A fine fast racket giving maximum speed with all possible strength..... **$21.30**

G426+2 Laminated "Speedwood" AAA racket. This represents our very latest development in tennis rackets. Laminated throughout of carefully selected second growth white ash and dogwood. Strung with 140% Crest purple waterproof strings, improved with a center square of white lock strings. Frame is attractively trimmed at shoulders with white celluloid and blue and white cable cord, making a very attractive appearance and substantial tennis racket **$21.30**

G426+3 Super Stroke. Three-piece frame construction. The racket with the perfect feel and balance. Finest second growth white ash. Duco finished. Triple reinforced and bound at throat and shoulders. Four-sided white basswood handle. Strung with moisture proof strings **$19.20**

G426+4 Wimbledon. A very beautiful racket, frame of three piece construction, laminated throughout with white celluloid bow, white interlocking trim, harmonizing beautifully with the trim on the frame **$16.25**

G426+5 Onwentsia. Has a full beveled one-piece frame of hickory, tastily constructed, reinforced at shoulder. Ash grip with laminations of walnut veneer. The cable cord trimming of blue and orange at the shoulder accentuates beautifully with the red silk stringing and white interlocking trimming **$11.50**

G426+6 Golden State Racket. High grade type of second growth white ash. Upper half of the bow is beveled both inside and out, reinforced at throat and shoulders and top of grip with green fibroloid wrappings at shoulders. **$9.25**

G426+7 Wilson Indestructo steel racket. The new Wilson Indestructo Steel frame racket, being the most modern steel racket at a popular price. Sturdy tubular steel frame, perfect balance. A special waterproof cork grip steel stringing that has the feel of gut and will not become loose from dampness or atmospheric changes. Can be supplied in light medium and heavy weights **$9.10**

G426+8 Premier. This is the first wood racket ever offered at this price with the new improved construction. Laminated throughout, white ash frame, shoulders are reinforced with white celluloid and trimmed with green cable cord. Strung with good quality oriental strings. A full sized racket suitable for beginners or juvenile tennis players. **$4.25**

G426+9 Phoenix. A durable, popular priced racket, fine quality, white ash with laminated bow, reinforced with purple celluloid and white cable cord trimming at shoulders, purple cable cord at throat, strung with good grade waterproof gut. The new feature of this racket is the method which secures one of the bow cords to the grip, thus holding it in place and preventing it from slipping. This is a very handsome racket for the money **$7.50**

NOTICE

All our tennis rackets are now finished in a clear, colorless **Duco** that enhances the beauty of the natural wood in a natural finish. Duco is especially adapted for tennis rackets as it is tougher than ordinary varnish, stands up better, is not affected by moisture and climatic conditions than ordinary varnish and thus is more preserving to the racket than ordinary varnish

PLAYSKOOL—The Home Kindergarten is the key product of PLAYSKOOL INSTITUTE. Make it the "key" product of your educational department

Pacific Coast Representatives
ERLACH-LEE CO., 24 California Street
SAN FRANCISCO, CAL

These Features Will Sell Playskool Sandie:

1. It combines the educational benefits of the old fashioned sand pile with the modern Playskool idea of pre-school training in the home.
2. Blocks and Pegs, in the shape of trees and houses, are used with the sand to make kiddies sand play more colorful . . more imaginative . . more creative.
3. With cover on, Sandie makes an ideal play table or desk.
4. Cover also provides a large smooth writing surface which children can use independently.
5. Can be used indoors, outdoors, on the porch, in any room in the house. Sand cannot leak out.
6. When not filled with sand, the box may be used as a storage place for other toys.
7. Is sturdily built. Legs are bolted on to assure rigidity. Finished in pale green enamel . . . easily kept clean.

Playskool SANDIE is being exhibited at the Chicago Toy Fair along with the other "Learning While Playing" playthings which comprise the complete PLAYSKOOL line.

If you miss the Chicago Fair, write for information.

COMMUNITY PLATE

GUARANTEED FOR 50 YEARS

Fine enough for the most elaborate homes, or even mansions, yet low enough in price to permit those of ordinary circumstances to posess a complete set of this beautiful Silverware. Oneida "Community Plate" is guaranteed for 50 years of service.

The beautiful shapes, finish and patterns of "Community Plate" enrich the table setting and add much charm and individuality to the home atmosphere.

Paul Revere *Adam* *Grosvenor* *Bird of Paradise* *Patrician Moderne*

PAUL REVERE

The delicate floral treatment, lovely pricked engraving are all that is distinct and beautiful. . Named for the patriot whose celebrated midnight ride has by a quirk of fate obscured his reputation as a leading silversmith.

ADAM

This simple, yet lovable, outstanding design with its unusual grace and refinement continues to grow in popularity. It embodies the very essence of that delicate beauty for which the work of those two great Masters, Robert Adams and his brother, James were noted.

BIRD OF PARADISE

Especially designed for those who prefer a more delicately designed tableware—not too elaborate—not too severe—just tasty enough to make it attractive. It's use in the finest homes is just, and overwhelmingly welcomed.

PATRICIAN MODERNE

A design in the modernist manner for which has suddenly developed such an astounding demand. Sweeping planes, stunning simplicity and contrasting finishes. This design has an instant appeal to everyone.

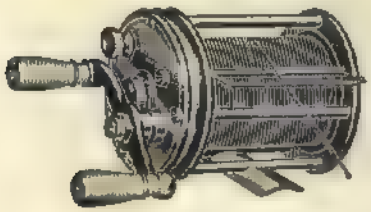
GROSVENOR

This beautiful pattern with it's well proportioned floral design is reproduced from tableware used during the early centuries. It's popularity continues to grow because of its supreme beauty and charmingly attractive design.

REELS

CASTING

ORENO



Anti-Back-Lash.

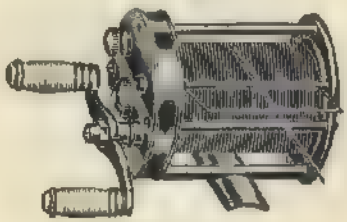
No. 900. Capacity, 100 yards 16 to 20 pound test silk casting line. Of the same general design and operating principles as the famous original South Bend Anti-Back-Lash Reel which has been proven in the hands of anglers for over 17 years, and is priced at a figure that will enable everyone to own a reel of reliable performance.

Like the South Bend Anti-Back-Lash it is of dual use, and can be operated as an Anti-Back-Lash, or by a simple adjustment it is converted into a reel of the ordinary type for those who prefer it. Either way it has a smooth, easy, free-running action.

Highly silvered finish with double grip; new improved rod clip of substantial construction; quadruple multiplying gear. Spool diameter is 1½ inches and 1⅞ inches wide. Weight each, 8 ozs. .....Each $6 50

CASTING

SOUTH BEND



Anti-Back-Lash.

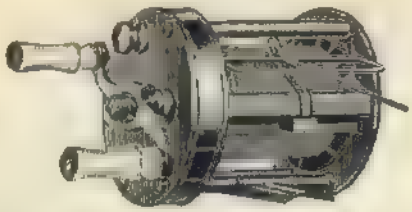
No. 113IA. Capacity is 100 yards, measured by 16 to 20 pound test silk casting line. The original Anti-Back-Lash Reel, which has been proven in the hands of anglers for over 17 years and is guaranteed not to back-lash. The instant the bait hits the water the spool stops running. There are no back-lashes, snarls or tangles—you just start reeling in.

Every cast is perfect; it enables the beginner to cast with the precision of the seasoned angler. The veteran angler experiences the pleasure of casting without thumbing, as the South Bend thumbs itself.

Two reels in one; may or may not be used with the Anti Back-Lash feature. A simple adjustment makes it into a reel of the ordinary type; either way, it has a free, smooth, easy running action. The brake action applies itself only for that fraction of a second when bait hits the water—there is no continuous drag to retard cast or distance.

Made of Liberty Silver, with double Ivoroid grips, and jeweled spool caps, one of which is adjustable. Has quadruple multiplying gear. Spool diameter is 1⅛ inches wide. Wt. each, 8 ozs. .....Each $10 00

SOUTH BEND



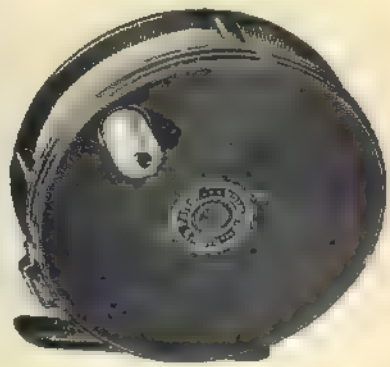
Level Winding, Anti-Back-Lash.

No. 1200. Capacity, 100 yards, measured by 16-to-20 pound test silk casting line. A mechanically perfected combination of the original Anti-Back-Lash device of the South Bend Anti-Back-Lash reel, which has been proven in the hands of anglers for over 17 years, with a perfect level winding device. Thumbing and spooling are entirely eliminated; cannot back-lash, snarl or tangle, and upon reeling in, it automatically spools itself, winding the line perfectly smooth and even. The brake action applies itself only for that fraction of a second when bait hits the water; no continuous drag to retard cast or distance. No attention need be given the spool which permits casting with greater precision than with the ordinary reel. Beginners can cast without previous practice. Liberty Silver, Ivoroid double grip; agate jeweled spool caps, one of which is adjustable. Has quadruple multiplying gearing. Spool diameter, 1½ in., 1 11/16 in. wide. Each reel in genuine chamois bag. Wt. ea. 9 ozs. .....Each $20 00

All above, one in a box.

FLY CASTING

HARDY'S



Ball Bearing. Single Action

PERFECT.

The most perfect form of reel for fly fishing ever devised. The original reel, from which the whole of the present series has been evolved, was made by Hardy Brothers in 1885 and from that time, it has been at various periods altered and improved, until now it stands on a pedestal of fame unapproached by any other.

3 in. Diameter. Line capacity, 40 to 50 yds. Wt. each, 6 ozs. .Each $15 00

3¼ in. Diameter. Line capacity, 50 to 60 yds. Wt. each, 7⅛ ozs. Each $15 50

3½ in. Diameter. Line capacity, 60 to 80 yds. Wt. each, 10½ ozs. Each $18 00

3¾ in. Diameter. Line capacity, 80 to 100 yds. Wt each,12½ ozs. Each $22 00

SPECIAL PERFECT.

Single Action

A type of reel specially designed to meet the wants of those who require a trout reel very light and yet capable of carrying 35 yards of fly line and 60 yards of No. 2 silk backing, making in all 95 yards. It is made on the lines of Hardy's Patent Perfect reel with ball bearings and regulating check.

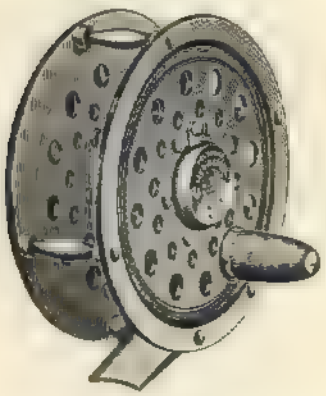
3¼ in. Diameter. Line capacity, 60 yds. Wt. each, 7 ozs.....Each $19 50

All above, one in a box.

REELS

FLY CASTING.

PFLUEGER MEDALIST



Single Action

The Medalist reel is beautiful in design, strong, efficient and free from sharp edges, which would injure the enameled line. The new and novel features of the Medalist make it exceptionally desirable.

Take-A-Part: The spool can be instantly detached by pressure of the finger on a lever which operates a simple latch mechanism on the front flange. All parts are attached so that they cannot be lost or mislaid

Weight of Reel: Less than any other known reel of same line capacity.

Line Dryer: Free ventilation and circulation of air to dry the line while on the spool, is provided through perforated back plate and spool flanges assembled with a pillar hub

Oiling System: Every working part is conveniently accessible for proper oiling

Click Mechanism: The tongue, pin and ratchet are made of polished tool steel, highly tempered to withstand maximum friction.

Axle: Made of tempered phosphor bronze, with a projection of hardened tool steel which acts as a bearing for the latch lever

Handle: Made of mottled Pyralin amber secured to the reel by a nickel-silver cupped bushing, providing a firm anchorage for the handle rivet.

Finish: Satin nickalum, gun metal.

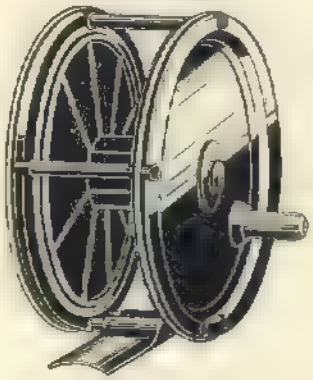
Each reel is wrapped in silver tissue and anti-tarnish paper; one in a fancy card box.

No. 1392 13/16 in. pillar; 2⅞ in plate. Wt. ea 5 ozs. .....Each **$5 00**

No. 1394. 13/16 in. pillar; 3¼ in. plate, Wt. ea. 6 ozs. .....Each **$5 50**

All above, one in a box

SYMPLOREEL.



Single Action.

Made of a composition, practically indestructible: green handles. Spool is specially constructed to allow an air space all around the line, thus drying it better than a reel with air holes on only one side. To take reel apart use a dime, take out center screw and lift out the spool. Click wheel is replaceable by removing one screw and taking the click wheel off by sliding it a bit to the side. No other front reel has this important feature.

No. 370. Size ¾x3 in. Wt. each. 5 ozs. ..... Each **$5 00**

No. 372. Size ¾x3¼ in Wt. each. 6 ozs .....Each **$6 00**

No. 374. Size ¾x3½ ins. Wt ea. 7 ozs ..... Each **$7 50**

No. 376. Size 1⅛x3¾ ins. Wt. ea 8 ozs. ..... Each **$8 50**

MEISSELBACH RAINBOW

Single Action.

A most perfect single action fly reel, exceptionally light, yet strong enough to stand the hardest usage; compact in size, yet gives good line capacity: quickly and easily taken down, spool simply slips off the spindle; made of aluminum alloy

"PARCHTEX"
LAMPS OF ENDURING BEAUTY

SPECIALS THAT SELL

We ask that you kindly remember that each and every shade listed on this page is of regular parchtex quality and is in no manner inferior to our regular quality line of parchment shades. The very attractive prices we have placed on this merchandise makes it possible for you to have a fast-moving special that is certain to get a rapid turn-over.

NO TWO ALIKE—PRICKED TO SELL

We illustrate below a group of six most attractive occasional table lamps ever manufactured and there has been a decided trend the past season for table lamps of medium size. The very attractive group of six quality lamps is equipped with brass plated bases approximately 15 inches high and are distinctively new designs. The shades on these lamps are approximately 12 inches in diameter and 8 inches high. The entire height with shade attached being 23½ inches.

9Z-707
$24.00

Bridge Lamp No. 9Z-707 is a striking number exemplifying the semi-modernistic spirit. The six panel leatherette faced 12-inch bridge shade has a stunning transparent design. The colors are brilliant but blend well. The base is a beautiful modern style number of the combination of steel with brass high-lighting and a touch of polychrome color

9Z-603
$7.50

9Z-604
$7.50

9Z-602 **$7.50**

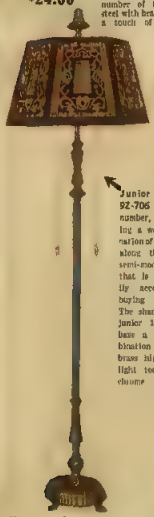
9Z-600
$7.50

9Z-601
$7.50

9Z-605
$7.50

Bridge Lamp No. 9Z-703 is a dainty bridge lamp exquisitely designed. The brass plated base is of the new pedestal type so pleasing to the eye. The oblong curved end four-panel leatherette faced shade is an individual creation of beautiful design.

9Z-703
$19.00

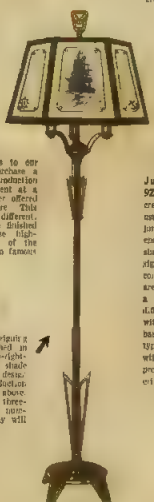


Junior Lamp No. 9Z-706 is a beautiful number, the shade having a wonderful combination of colors designed along the lines of a semi-modernistic idea that is being so readily accepted by the buying public today. The shade is of regular junior lamp size, the base a beautiful combination of steel with brass high-lighting and light touches of polychrome

9Z-706
$26.50

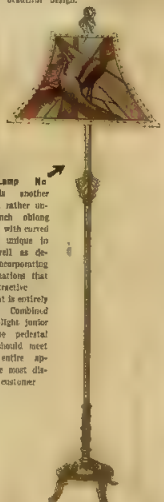
Bridge Lamp No. 9Z-751 offers to our customers an opportunity to purchase a lamp of this type using a reproduction of a genuine etching on parchment at a cost many times below than ever offered on a lamp of this quality before. This lamp is distinctively new and different. The base is a beautiful creation finished in English bronze with bronze high-lighting. The design being one of the most attractive ever produced by a famous designer of lamp bases.

9Z-751
$22.50



Lamp No. 9Z-750, an intriguing three-light floor torchere finished in English bronze with brass high-lighting. The sixteen-inch junior shade of this lamp is of the same design and construction as the reproduction of etching shade described above. There is a decided demand for three-light torchere lamps, and this number added to your floor display will be an especial attraction.

9Z-750
$28.50



Junior Lamp No. 9Z-702 is another creation . . rather unusual 18-inch oblong junior shade with curved ends . . . unique in shape as well as design . . incorporating color combinations that are very attractive a lamp that is entirely different. Combined with a two-light junior base of the pedestal type, this should meet with the entire approval of the most discriminating customer

Parker G. H. E. With Automatic Ejector

A moderately priced gun, designed to meet the requirements of the sportsman who wants a hard shooting well made gun, of good finish. A Parker product of increasing popularity. The steel of which these barrels are made is specially selected by us for its high quality. These barrels are strong, well built and of lasting service. The stock is made from figured American walnut, nicely checkered and equipped with best quality hard rubber butt plate Furnished with full pistol grip. Stocks on this grade, outside of our regular prescribed limits of drops and lengths, must be hand stocked, for which an extra charge will be made. The engraving while not as elaborate as found on the higher priced Parker guns is tastefully done.

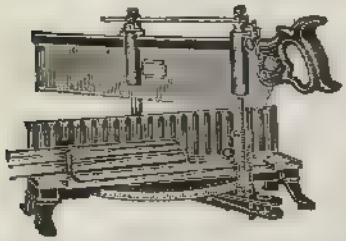
MITRE BOXES



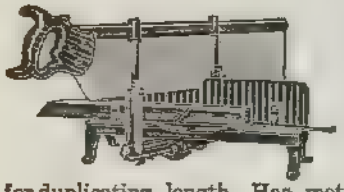
STANLEY
With Saw.

One piece cast iron frame. Swing lever is automatically locked at any angle and a flat spring catch when set, holds the spring lever unlocked. Steel rod saw guides. The uprights, front and back are graduated in sixteenths of inches and are provided with adjustable stops for regulating depth of cut. Has guides for holding work in place for or length gauges in duplicating short pieces, saws at any angle from 30 to 90 with work lying parallel to back of box. The peculiar shape of butt or heel in the mitre saws makes the toothed edge about 2 inches shorter than the full length of the blade.

Nos.	246	358
Size saw, ins	26x4	28x5
Width at right angle, ins	8¼	9½
Width at 45° angle, ins	5½	6½
Wt each, lbs	30	36
Each	$52 50	60 00

One in wood box.

LANGDON ACME



With Saw.

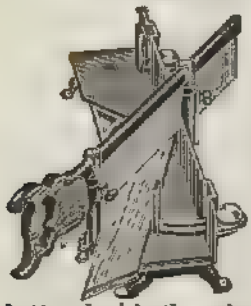
Cast iron frame; all polished parts nickel plated; graduated arc with various degrees marked on; saw can be secured at any angle. Supporting guides for holding work and length gauge for duplicating length. Has metal index plate with degrees marked thereon with each machine.

Has extension posts to give greatest width. Saw at any angle from 7½° to 90°; capacity 10¼ inches at right angle and 7 inches at mitre. The peculiar shape of butt or heel in the mitre saws makes the toothed edge about 2 inches shorter than the full length of the blade.

Nos.	73	74	75
Size	2	2½	2½
Size saw, ins	26x4	28x5	30x5
Length frame, ins	19⅛x4¼	19⅛x4½	19⅛x4½
Wt each, lbs	39	40	41
Each	$51 00	57 00	61 50

One in wood box.

IMPROVED NEW LANGDON



With Saw.

Cast iron frame, painted dark brown; malleable iron legs; corrugated back; polished steel uprights; cuts by using the circular arms or guides, from right angles to 75 degrees on 2½ inch stuff; also cutting from right angles to 45 degrees. The only box adjustable for mitreing circular work to patterns, emery wheels and segments of various kinds.

Capacity 9⅜ ins at right angle, 6¾ ins at mitre. The peculiar shape of butt or heel in the mitre saws makes the toothed edge about 2 inches shorter than the full length of the blade.

Nos.	32	34
Size	2	2½
Size saw, ins	24x4	28x5
Length frame, ins	19⅛x4¼	19⅛x4¼
Wt each, lbs	32	35
Each	$42 75	51 00

One in wood box.

MITRE BOXES

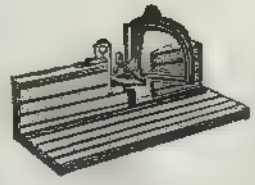
NEW LANGDON, With Saw.

Cast iron frame, painted corrugated back. Malleable iron legs; adjustable saw guides with spring lever clamping device to hold at any angle, notched to lock at regular angles from right angle to 45°; capacity 9⅜ ins at right angle and 6¾ ins at mitre. The peculiar shape of butt or heel in the mitre saws makes the toothed edge about 2 inches shorter than the full length of the blade. Each

No. 23—Size with 24x4 inch saw; length frame 19⅛x4¼ ins $39 00

One in wood box; wt each 27½ lbs.

PERFECTION



Without Saw.

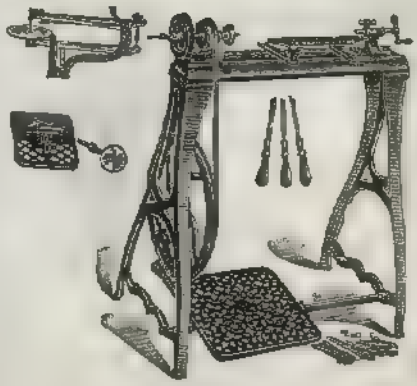
Japanned malleable iron frame; polished cast steel post; varnished inlaid hardwood base, tongued and grooved. Guide is held at any desired angle by sliding key and depth of cut is controlled by clutch on guide post; saws at any angle from 9° to 90° with work lying parallel to back of box. Detachable from wood base and takes hand, panel or back saw. Each

No. 10—Length base 16 ins; width 6 ins; 4x¾ in back $9 00

Two in wood box; wt each 5½ lbs.

LATHE, WITH SCROLL SAW ATTACHMENT

MILLER FALLS CO.



Japanned iron frame, drive wheel and treadle; 7½ inch iron tilting table, 20½ inch hardwood arms, with blower attachment; 13 inch drive wheel, round leather belt. Height 39 inches. Base 25x15 inches, bed 24 inches long; has 2 inch face plate, one spur center and one screw center. The scroll saw can be taken off by loosening one bolt. The tailstock has a screw feed center which is secured at any point desired by a clamping device.

Driving wheel is made with two grooves of different depths to give change of speed, as the belt runs from it to the cone pulley. 4x¾ inch solid emery wheel.

No. 320—Complete with lathe attachment; 12 saw blades, wrench, sheet of designs, long tool rest, short tool rest, 6 drill points, 1 straight turning chisel, 1 skew turning chisel, 1 turning gauge and screw driver (no circular saw attachment included) ..... $72 00 Each

One in wood box; wt each boxed about 75 lbs.

No. 319—Circular saw attachment only ..... $4 05 Each

One in wood box; wt each 3 lbs.

PEPPY PALS

The Dancing Marionettes

The biggest retail value ever offered to the trade.

Snap them together and they dance—separate them and you have two individual dolls for regular play. Just hold the "Dancing Marionettes" by the string so their feet touch the floor, turn on the radio or phonograph and you'll see all the latest dance steps, with a few original ones thrown in for good measure. And—for regular play purposes, the dolls can be unsnapped in a jiffy. Light in weight and strongly made with unbreakable heads. The "Dancing Marionettes" are dressed in a wide variety of children's costumes cut in the prevailing mode.

One doz bottles in carton; wt per doz 4¼ lbs.

NEVERLEAK TIRE FLUID

By injecting a four ounce tube of Neverleak Tire Fluid into a bicycle tire, it will be made leakproof.

The moment a tire containing "Neverleak" is punctured, the air pressure within forces the fluid into the aperture, and exposure to the outer air coagulated it and instantly closes the vent.

The thread end of the opening of the tube is exactly the right size to screw into the valve stem.

	Per Doz
No. 4T—4 ounce tubes	$5 85

One doz tubes in paper counter display case. We do not break pkg.

TIRE TAPE —BLUE GRASS—

High grade tape, possessing exceptional adhesive qualities; does not dry out easily, is capable of withstanding extreme heat much longer than is required by the most severe tests; ¾ inch wide; there is on an average of about two yards of tape in a one ounce roll.

Nos.	BG-D-1T	BG-D-2T	BG-D-4T	BG-D-8T

Packed loose; wt per doz 40 lbs.

BICYCLE TIRES

GENUINE G. & J.
Casings Only, Double Clinch, Corrugated Tread, Road Weight.

Extra quality thread fabric and a high grade friction with an extra high grade tread stock. Casings are made with a double bead and will fit either a single clinch steel rim or a double clinch wood rim. The beads that engage the grooves in the rim and the lap, that goes on the interior of the casing, are a number of plies of fabric, properly frictioned and as the correct hardness to make a perfect joint with the rim. Guaranteed.

Gray Sides, Red Center. Per Pair

No. 1—1¾x28 ins. $11 25
No. 2—1⅝x28 ins. 11 25

Packed loose, average wt per pair 5 lbs.

HOW TO ORDER BICYCLE TIRES, WHEELS, RIMS

You can easily find the correct size tire for your bicycle by measuring the distance from the ground to the top of the tire, when the tire is on the wheel and fully inflated. Or you can measure the diameter in inches between outside edges of the rim and add three inches, which gives you the tire size. For example: Take a rim measuring 25 inches from edge to edge, which takes a 28-inch tire—the standard size on men's and women's bicycles. Juvenile bicycles with 23-inch rims take 26-inch tires or with 21-inch rims take 24-inch tires. The 17-inch rims take 20-inch tires.

INNER TUBES

—BLUE GRASS—

Highest grade Para rubber and are so constructed that the walls consists of several plies of rubber laid on top of another and all vulcanized together, this makes tube stronger in the same way that a laminated rim is stronger than a one piece rim. Is unusually heavy and is very tough and strong.

Gray. Per Doz

No. 8BG—M & W. style cemented butt end, 1¼x26 ins. $27 00

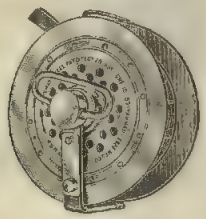
AUTOMATIC REELS J

Automatic reels are designed for the purpose of controlling the tension of the line in such a manner that no slack is given, no matter how swiftly a fish may turn. And that's the idea of the automatic—just to take in the slack, not to reel in the fish or, in the slightest degree, lessen the sensation of fighting.



Y & E—Combination

Made of aluminum with tool steel bearings. Throw off button makes spool free for casting. Has carbon steel line guide.

Capacity 125 feet of No. 5 silk line; winds automatically 50 feet without re-winding.

NO.		EACH

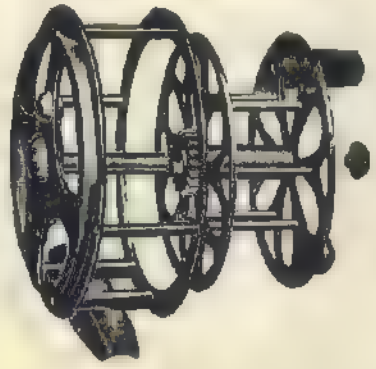
PFLUEGER SAL-TROUT



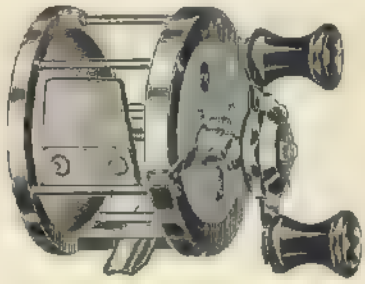
Single Action.

One of the few single action fly reels that will hold a large quantity of line; built especially for Rogue river fishing where a great deal of good heavy line is needed; substantially constructed; perforated, one-piece back plate which adds strength and decreases weight; has a perforated removable spool; steel axle; adjustable back sliding tempered steel click and black celluloid handle; satin gun metal finish; 100 yards capacity. Pillar measures 1⅝ inches; disk, 3½ inches. Packed one in a fancy box

No. 1555. Wt. ea. 9 ozs. ..Each **$4 00**

TROLLING

PFLUEGER TEMPLAR



Free Spool—Double Multiplying

Satin Nickel Silver

The Templar is constructed to withstand the terrific strains of all salt water fishing. Designed with many improved features. Handle drag (Williams patent) a locking washer firmly secures drag to reel. Any degree of tension can be obtained while fish is in play by adjusting the star wheel. One set of extra friction washers and one combination screw driver and wrench included with each reel.

Drag Stop: Controlled by a shifting lever, operated on the edge of front plate.

Leather Thumb Brake: Substantial construction and swings freely.

Tension Oil Cup: Permits of quick adjustment of all spool end play.

Oiling System: Whereby every part can be oiled and greased without removing a screw.

Cross Plate: One piece with shoulder extensions into both front and back plate.

Nickel silver is treated to prevent tarnish; generated spiral tooth phosphor bronze gears; hard rubber plates, reverse metal bound; phosphor bronze bushed, for bearings; adjustable back sliding click; steel pivots, highly polished, end bearing; bakelite handle, not wood enameled; rust proof line hole. Each reel is wrapped in silver tissue and anti-tarnish paper. One in a fancy card box.

No. 1419. 300 yd. 2¼ in. pillar, 3½ in. plate. Wt. ea., 26 ozs. Each **$33 00**

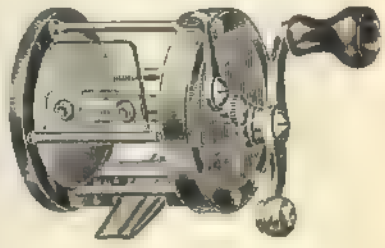
TROLLING

PFLUEGER OCEANIC



Free Spool—Double Multiplying

Polished Nickel Plated

The Oceanic is designed to meet all the requirements of a strictly high grade free spool surf-casting reel. The throw in and out of gear mechanism is controlled by a shifting lever which comes up and over the edge of front plate and operated without any possibility of injury to the hand. By throwing this lever up full distance the gears are firmly locked in mesh. Throwing the lever down full distance the gears are held firmly out of mesh thereby avoiding stripping and all other damage to the gears. Constructed as follows: Improved one piece cross plate with extension shoulders which pass into both front and back plates, thus preventing all possibility of the cross plate screws shearing off. End play of the spool can be taken up with the patented adjustable tension oil cups. Leather thumb brake except No 2815. Nickel silver is treated to prevent tarnish; generated spiral tooth gears, hard rubber plates, reverse metal bound; adjustable back sliding click; patented adjustable tension oil cups; steel pivots, highly polished, end bearing; fancy crank, balanced; bakelite handle; rust proof line hole

No. 2816. 150 yd. 1⅞ in. pillar; 3 in. plate. Wt. ea 17 ozs.....Each **$7 50**

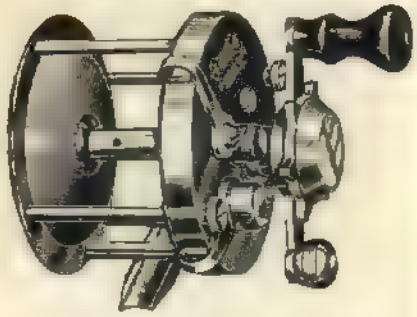
REELS

TROLLING

RUBBER CITY



Free Spool—Double Multiplying—Drag Handle—Nickel Silver.

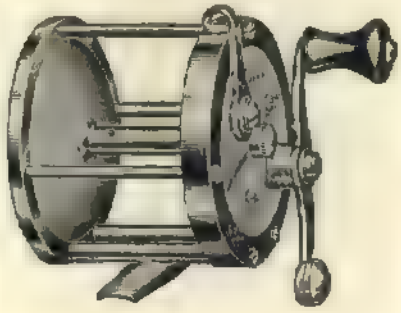
The "Rubber City" fills a long-felt need for a dependable reel combining Free Spool with a practical Handle Drag, and at a price within the reach of all anglers. Made of nickel silver to withstand salt-water conditions—has ample strength for ordinary sea-fishing. Equipped with a Handle Drag and Stop with which any required degree of drag tension can be secured by a Star wheel and which can be operated while the fish is in play or not. Drag will exert a very powerful and even tension. A set of extra Friction Washers and a Combination Screw Driver and Wrench included with each reel. To make the reel "Free Spool" or not, throw in and out the gear mechanism as controlled by a shifting lever which comes up and over the edge of the cap and operated without any possibility of injury to the hand. By throwing the lever down full distance the gears are held firmly out of mesh thereby avoiding stripping and all other damage to the gears. By throwing the lever up full distance the gears are held firmly in mesh. All end-play of the spool can be taken up with our Patented Adjustable Tension Oil Cup. Will fit both light and heavy tackle salt-water rods. Reel can be easily taken apart for cleaning by removing two thumb screws. Generated spiral tooth gears; steel pivots, polished; end bearing; bushed for bearings; single handle drag; adjustable back-sliding click; Rubberoid handle.

No. 2758. 250 yd. 3½ in plate. Wt. ea., 24 ozs. ..... Each **$10 00**

No. 2759. 300 yd. 3¾ in. plate. Wt. ea., 28 ozs. ..... Each **$12 00**

One in a box.

PFLUEGER BOND



Free Spool—Quadruple Multiplying, Polsihed Nickel-Plated.

A well-made free spool, surf-casting reel with a throw in-and-out gear mechanism controlled by a Shifting Lever which comes up and over the edge of front plate and operated without any possibility of injury to the hand. By throwing this lever up full distance the gears are firmly locked in mesh. Throwing the lever down full distance the gears are held firmly out of mesh thereby avoiding stripping and all other damage to the gears. Phospher bronze spiral gears; hardened steel spiral pinion and cog post with oil hole in crank nut. Cross plate is of a strong and sugstantial construction and will properly fit any of the standard rods. End play of the spool can be taken up with the patented adjustable tension oil cups. Nickel silver is treated to prevent tarnish; hard rubber plates, reverse metal bound; adjustable back sliding click; steel pinion; plates bushed for bearing; Akron cross plate; patented adjustable tension oil cups; steel pivots, highly polished—end bearing; fancy crank, balanced; rubberoid handle.

The New Petite "Baguette" Watch

A Watch to Grace Milady's Wrist

IN presenting this new small and charming watch movement to the jewelers of America we do so with full confidence in the accuracy of the movement, the universal appeal of its small size and the excellent values offered by these cases especially made to house this movement.

The diamonds used in these watches are all fine quality blue white, selected and matched by experts.

This is an actual life-size photograph of this remarkable new watch movement.

The Baguette movement is something entirely new. Its construction and design are patented. The extended center construction permits the use of the larger 8¾ ligne wheel train and escapement, making for the greater accuracy of larger watch movements. Its rectangular shape and general appearance give it all the grace and charm of the smallest movements. Of course, only the finest materials are used, entitling the movement to be stamped "Geneva Quality." The quality of the materials is guaranteed and the movements are timed in the cases before shipping. Breguet hairspring, 17 jewels, adjusted to temperature and position.

This watch has been referred to as the "Chef d'Oeuvre" of Swiss watch experts.

Illustrations show actual size.

Prices are list, subject to wholesale discounts.

PIANOS

-:-PLAYWELL—TONE SUPREME-:-

THE first demand of everything musical is tone. Above all, tone has been considered first in the Playwell Piano. When the first Playwell Piano was finished the benefits of more than half a century of investigating and experimenting to produce a true tone had been inaugurated in this instrument. Every principle of tone-building then known was observed and applied, since we have never ceased in our efforts to improve wherever possible. The results have been a tone unsurpassed for its richness, smoothness, fullness, purity—brilliancy.

The materials used throughout are the very best, conforming to the demands essentials to the production of a Piano of highest quality. Each part, whether of metal or wood, is subjected to a minute examination for defects.

Sounding boards are of thoroughly aged straight grained silver grain spruce. Keys are of Ivorene mounted on pine.

The Playwell Piano as it stands, a finished product is a beautiful and durable instrument. It possesses a clear, exquisite tone, dignity and refinement of case design, and a touch responding to any and every demand of the player. Each instrument fully meets the requisits of the exacting musician and commands hearty appreciation and enthusiastic endorsement. When one listens to the Playwell he is immediately impressed with its rich, mellow tone.

—PLAYWELL GRAND—ARISTOCRAT

The Playwell Grand is the ideal instrument for the home. It is ever the subject of the music lover's admiration. Nothing adds to the charm of the home such a note of distinction and atmosphere. It is the insignia of musical appreciation, the attribute of cultural discernment of the better thing of life, an instrument commanding the respect and admiration of those of musical judgment.

The beauty of Playwell tone is the result of mechanical superiority of many features of construction and it is tone and durability which have made the Playwell Grand particularly noted. Playwell standards of construction are maintained to the highest degree.

The splendor of the Grand Piano has ever been the source of universal admiration. Its grace of form and elegant tone is a constant inspiration. The Playwell Grand excels in artistic beauty and musical quality.

In the tone of the Playwell Grand is revealed distinguished musical qualities. Inimitable timbre and resonance proclaim Playwell superiority. The most delicate touch of the keys calls forth melody rich and colorful; the passage of a crescendo bring forth a tone of depth, richness and sonority of marvelous beauty.

THE prestage of the Playwell Pianos holds the world over is the inevitable result of the determined policy and standard to produce the very best in piano construction. The Playwell Piano embodies every quality that means lasting service and satisfaction —the natural result of years of fine piano building.

The tone is rich, pure and musically perfect. Every case is artistically proportioned, beautifully finished, staunchly built and mechanically correct. As either a Straight Piano or Player they are musical masterpieces. Guaranteed and backed by an organization of over half century's musical experience.

PLAYGROUND EQUIPMENT CO.
82 DUANE ST. NEW YORK

THE HIT OF THE YEAR

Play the Winning Hand

Pokerette is selling wonderfully—no need to wait for any particular season

YOU GET ACTION WITH

POKERETTE

Simple to operate. Just a spin of the dials and you have ten poker hands. Two to ten people can play. Pokerette can also be played in conjunction with a regular deck of playing cards.

Substantially made of steel. Beautiful Duco finish on base, polished nickel spinning device. Each of the five discs runs on ball bearings. These discs display a regular deck of cards printed in three colors. The game is mounted on four rubber feet, so that it will not scratch the table. Individually boxed.

Showing at the

TOP POLO

Children take to this new game instantly

The new, popular Top Polo is a contest game—Polo played with a top. Ordinarily played outdoors, it quickly attracts attention and few kids can resist its appeal. After the first few sets of Top Polo are sold, the rest move surprisingly fast.

Write for prices, further details and a sample set.

The Standard model retailing at 25c includes, in a cardboard box, one spring-wound wooden top as the polo ball, two whips for mallets and a twenty-game score pad. The Junior set retailing at 15c includes one top and one whip.

A Complete and Splendid Representation of Kitchen Wall Clocks in Bright, Cheery and Attractive New Colors

To brighten up a dark corner or to harmonize a clock with other furnishings is the inherent desire of every woman. Portrayed herein are quality clocks of the "BETTER GRADE" to radiate the charm and attractiveness so prevalent in the well appointed home. These clocks are so admirably suitable for gift purposes and acceptable for most any occasion it makes a practical serviceable and thoughtful gift. Prices comparatively low, quality considered

PRACTICAL GIFTS THAT BRING HAPPINESS

COLORED PORCELAIN WALL CLOCK
Kitchenette Model
Eight-Day Apple Green

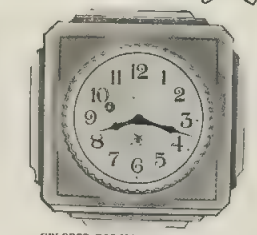
This model is especially popular for kitchenettes. Very attractive for those who also have a small kitchen. This style has a finely shaped porcelain plate, which measures 9 inches in diameter, hence wide. Has a rich beautiful green border effect with apple design. Effective and pretty in coloring. Fitted with a fine and reliable and very dependable 8-day American make movement in wood mantel container. Table model, also wall model. Made a most practical gift item.
No. 3147 Each $5.60

COLORED PORCELAIN WALL CLOCK
Fits Flush to the Wall
Eight Day Sunshine Yellow
Modernistic Design

At a glance one quickly recognizes how modern and up-to-the-minute this MODERNE design clock, portrayed above, is. It measures 9 inches wide and 9¼ inches long. The entire case is of attractive Sunshine Yellow colorful porcelain, except the figures, which are white faced and with black hands, beautifully finished. Fitted with a very reliable 8-day movement of the wood and fibre mantel type, with guarantee slip enclosed. Our selling price is very low.
No. 3148 Each $7.00

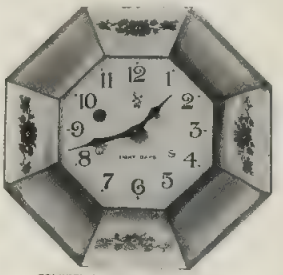
COLORED PORCELAIN WALL CLOCK
Dark Blue
Eight Day Movement Dresden Pattern

An attractive octagonal porcelain wall clock fitted with a dependable 8-day movement of the wood and fibre mantel type, with guarantee slip enclosed. Attractive shades of blue and white decorated floral design in natural colors gives the plate of this exquisite clock. Diameter of plate, 9½ inches. Priced very low.
No. 3150 Each $5.90



COLORED PORCELAIN WALL CLOCK
Ivory and Green
Century Design
Eight Day

Pre-eminently designed after the Grandfather's clock, as symbolized in the accurately executed dials, and is executed in the form of the popular Grandfather's clock. Beautiful two-tone green and ivory enamel effect. An exquisite green and pretty ivory enamel are the major colors, while dial and numerals are in black clearly defined. Dimensions 9¾ x 9¾ x 3¼ inches. Fitted with an accurate and dependable 8-day American make movement in metal container, with guarantee slip enclosed in clock, which is packed in a corrugated carton. It is a pretty and attractive clock at the market price.
No. 3149 Each $4.75

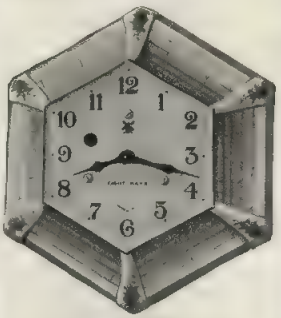


COLORED PORCELAIN WALL CLOCK
Apple Green
Eight Day Movement Limoges Pattern

Appealing in appearance, this clock has a pleasing quality of tone and will harmonize with any kitchen. Has a rich apple green border with white decorations in natural floral and leaf effects. Fitted with a dependable 8-day movement of the wood and fibre mantel type, with guarantee slip enclosed. Made of metal, encased in a metal container, absolutely dust proof. A guarantee slip accompanies this clock as well as the other designs shown hereunder. It is a splendid value at this low price.
No. 3152 Each $7.35

EIGHT-DAY IMPORTED KITCHEN WALL CLOCK

At such an attractive low price and from the standpoint of service and attractiveness, no kitchen should be without one of these charming kitchen clocks portrayed in this showing. This number has a porcelain plate, which measures 9 inches in diameter, enriched with beautiful delft blue decorations of Holland scenes, artistically decorated. Fitted with the genuine "Becker" 8-day time imported pendulum movement, hand-grived enclosed pendulum. Reduced in price this season.
No. 3145 Each $5.75



COLORED PORCELAIN WALL CLOCK
Fits Flush to the Wall
Eight Day Tile Effect
Apple Green and Natural Flowers
Octagonal Shape

A design of exquisite harmony, of original pattern, tastefully decorated in a most beautiful apple green color, enhanced with a pretty floral design, executed in natural colors. Size of plate 9¾ inches. Will readily be noted with many clearly defined points of excellence. Fitted with 8-day Lenzkirch American make movement, in wood and fibre mantel container, which fits flush to wall. Each clock comes complete with guarantee slip enclosed. Excellent value, made and finished throughout. Attractively priced. Makes a most practical and right acceptable inexpensive gift item.
No. 3151 Each $7.00

EIGHT-DAY IMPORTED KITCHEN WALL CLOCK

Set-tistics is the watchword in all kitchens today. Furnishings to a marked degree are in the gloss enameled finishes, such as, kitchen cabinets, gas ranges, tables and chairs. This is where this clock is a completing unit and fulfills every requirement.

The plate of this clock is made of Porcelain with rich blue and white decorations of Holland scenes. Diameter 9¼ inches. Fitted with the "Becker" imported 8-day time movement, encased in metal container, making it absolutely dust-proof. Guaranteed an accurate timekeeper.
No. 3154 Each $5.95

THESE GLOSSY PORCELAIN WALL KITCHEN CLOCKS MAKE HIGHLY ACCEPTED GIFT ITEMS.
THESE CLOCKS ARE OF THE "BETTER GRADE"
EACH CLOCK IS ACCOMPANIED WITH MANUFACTURER'S GUARANTEE SLIP ENCLOSED IN CLOCK.

FIRE EXTINGUISHERS

PYRENE

With Hand Pump.

Pure copper sheet tanks, strongly seamed, riveted and soldered, bright polish finish.

Fitted with hand operated double acting liquid pump with cast brass pump head and handle, the flexible metallic hose is capable of ejecting a continuous stream from the nozzle of 1/12 inch bore for approximately 40 feet.

Effective for fighting such fires as electric arcs, gasoline, kerosene, grease, varnish, etc. For use in power-houses and sub-stations, on electric locomotives, electric cranes, and in industrial plants where there are large installations of electrical equipment, will also be found very efficient for use in extinguishing highly inflammable liquid fires of all kinds.

Each

No. 70FE—Capacity 2 gals; height over all 24 3/8 ins; diam 7 ins. ✦$147 00

One in wood case; ship wt each 75 lbs.

PYRENE 5 GALLON PUMP TANK WATER TYPE EXTINGUISHER

This extinguisher is intended for fires that can be extinguished with water, it contains no acids nor chemicals and acts only as a hand pump for spraying water, outfit is very simple and will throw a steady stream approximately 50 feet, can be made freeze proof by use of solution listed below. Inspected by and bears label of National Board of Fire Underwriters.

24 gauge galvanized iron tank, coated with asphaltum to resist corrosion, painted red on outside with attractive instruction plate.

Pump is made of brass with a screen to keep it from becoming clogged.

Each

No. 1PT—Capacity 5 gals; height over all 27 1/4 ins; diam 9 1/2 ins ✦$42 00

One in carton; wt 52 lbs.

PYRENE

Non-Freezing Solution.

For Use In No. 1PT Extinguisher Only.

Each

No. 1FP—Charge contains 10 lbs Pyrene Freeze-Proof; prevents 5 gallon pump tank freezing at 10 degrees above zero ✦$3 75

No. 2FP—Charge cantains 15 lbs Pyrene Freeze-Proof; prevents freezing at 10 degrees below zero ✦ 5 55

No. 3FP—Charge contains 20 lbs Pyrene Freeze-Proof; prevents freezing at 40 degrees below zero ✦ 7 50

✦F. O. B. Illinois Factory Only.

FIRE EXTINGUISHERS

PYRENE "GUARDENE" INVERTABLE, CHEMICAL REACTION SODA AND ACID TYPE

Approved By The National Board OF Fire Underwriters.

Affective only on fires not involving oils, greases, or other inflammable liquids, should not be used on electrical fires until after current has been turned off. Cold rolled copper, heavily plated inside with tin to prevent corrosion, will throw a stream 40 feet, tested to 350 lb pressure.

Should not be exposed to freezing temperature, as this type is not freeze proof.

Each

No. 50G—Complete with hanger and brackets; capacity 2 1/2 gals; height 24 ins; diam 7 1/2 ins $41 25

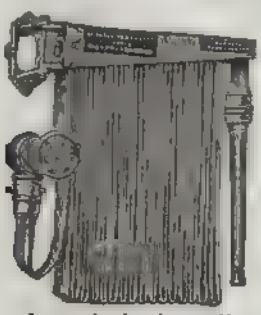
Packed loose.

HOSE RACKS

WIRT'S, NATIONAL



Body of the rack is so constructed of pressed steel that it forms a cover, thus preventing the accumulation of dust on the hose.

Hose hangs vertically, with sufficient space between the folds to permit a free circulation of air, preventing mildew and rot. The loops of the hose are supported on large rustless pins, avoiding any possible injury to the hose due to corrosion. These pins do not drop to the floor when the hose is withdrawn but remain hanging to the rack, ready for immediate use when the hose is returned.

One fold of hose drops from the rack at a time as rapidly as needed, thus preventing a tangled mass on the floor. Approved and labeled by the Underwriters' Laboratories.

WIRT'S, NATIONAL
Semi-Automatic.

Prices include wall brackets or pipe clamps, up to 4 inches in diameter.

Prices for pipe clamps over 4 inches in diameter quoted upon application.

	Each
No. 8A—For 50 or 100 ft of 1½ in. unlined linen hose	✚$24 75

Packed loose; wt each about 7½ lbs.

WIRT'S, NATIONAL
Non-Automatic.

Designed for use of firemen and those trained in handling heavy fire streams, and is for use where ordinances require 2½ inch hose. With holder for standard underwriters play pipe.

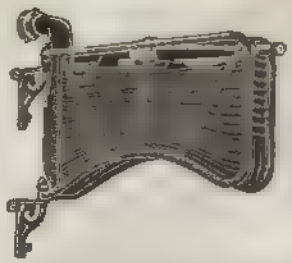
Prices include wall brackets, or pipe clamps, up to 4 inches in diameter.

Prices for pipe clamps over 4 inches in diameter quoted upon application.

	Each
No. NA—For 100 ft of 2½ in. unlined linen hose	✚$27 75

Packed loose; wt each about 10 lbs.

✚F. O. B. Pennsylvania Factory Only.



HOSE RACKS

HUMP WALL

Malleable iron castings, red tubular steel frame unless otherwise ordered. Hump center takes weight off ends, saving the hose. Front partly enclosed prevents hose falling to floor when drawn off.

Furnished with wall brackets unless otherwise specified. Furnished with pipe clamps instead of wall bracket at an extra charge of 30 cents net per pair of 4 inch pipe or smaller.

FIRE EXTINGUISHERS

"Also Dept. 10, Page 2673."

PYRENE

For use in factories, homes, public buildings, on steam or electric railways, yachts, etc., and above all for carrying in bracket on dash board or any convenient part of automobiles. Operated by turning handle to left and working like pump.

Fires having their origin in such materials as oily wastes, shavings, turpentine, benzine, gasoline can be readily extinguished with this extinguisher.

Each extinguisher is inspected, tested, and approved by and bears the label of the National Board of Fire Underwriters.

Will not freeze at a temperature of 50 degrees below zero.

Fire insurance companies allow a 15% discount on premium where installed on automobile.

Polished Brass.

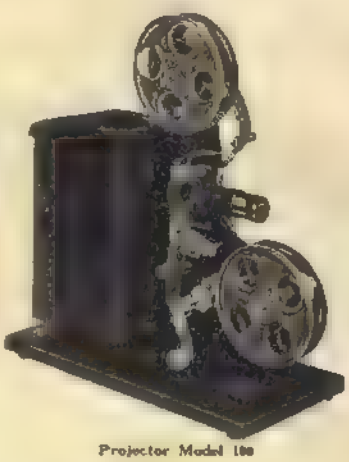
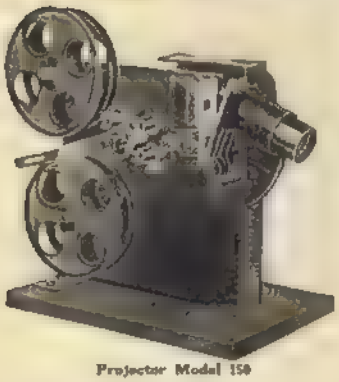
REAL MOVIE PROJECTORS AT TOY PRICES

Projector Model 75

Q R S PROJECTORS use the HOME STANDARD NON-INFLAMMABLE 16 mm. film, one foot of which is equal to 2½ feet of 35 mm. theatre film in both length of showing and subject matter. This is the film used by practically all home movie cameras. These projectors, altho manufactured primarily for children, and priced as low as toys, will satisfactorily take the place of many high priced projectors. They project movies perfectly, steady pictures being insured by their precision film claw movement, which is similar to those on high priced machines. All machines have the spring film gate that holds the film firmly in position. All machines provide for rewinding film.



Projector Model 100



Projector Model 150

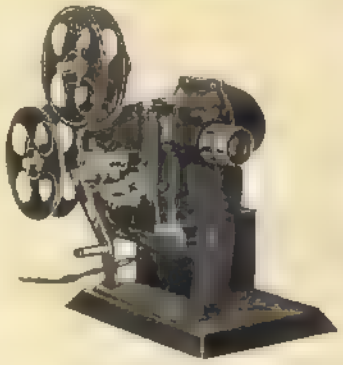
NO. 75 PROJECTOR—Illumination furnished by a 110 volt 50 watt General Electric Milltype or equal Mazda. Lamp. Unlike most low priced projectors this machine has a set focus lens—spoils the eye thus giving 100% illumination. Projector finished in plain black.

NO. 10 PROJECTOR—Uses same lamp as No. 75 projector but with addition of reflector which increases illumination 30-40%. 4: 1 geared film rewind, black crackle finish.

NO. 15 PROJECTOR. Gearing and feeding sprockets on this model are similar to those installed on higher priced machines. A high grade projection lens together with an improved system of lamp adjustment makes this projector a real value. Black, crackle finish.

NO. 22 PROJECTOR—A projector with a sturdy casting frame constructed so that it permits the addition of a 400 foot reel arm accessory, which will hold a film that runs for 15 minutes.

A superior projection lens and optical system makes this machine one that will project extra large pictures. A motor can be had for this projector at an additional price.



Projector Model 225

KIDDIE FILMS

Movies for the youngsters made on the HOME STANDARD NON-INFLAMMABLE 16 mm. MOVIE FILM. These subjects are complete movies, each one having a leader, title, movie and "End Title." The film is the same as that used in all home movie cameras, each foot being equivalent to 2½ feet of 35 mm. theatre film. That is, a 10-foot 16 mm. subject will project as long as 25 feet of 35 mm. film.

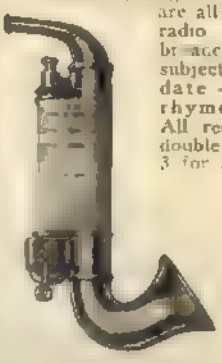
There are no "accessories" in Kiddie Film, each subject is completely new. Each is packed in a tied box. Movies are in 10, 25, 50 and 100 foot lengths. Price 6c per foot.

TWO MUSICAL NOVELTIES

The QRS Playasax and Clarola

Popular with everyone—from youngsters to grandfathers. These toys play real melodies with 16 note music rolls. Over a hundred selections are available for these **Q R S Playasax** rolls. **Q R S Playasax** is a sturdy all metal gold finished toy. Its shape is similar to that of the Saxophone, length over all about 12 inches. Price **$3.00**, includes one music roll. (Patent No. 1752978)

The **Q R S Clarola** has the same mechanical construction as the **Playasax** but is partially constructed of black enameled wood in imitation of the **Clarinet.** All metal parts have the gold finish. Price **$2.00**, includes one music roll.



JUNIOR RECORDS

A new type of phonograph record for the youngsters. These records are all made by famous radio children's Broadcasting stars. The subjects are all up to date — no nursery rhymes are included. All records are 7-inch double faced, and retail 3 for **50c.**

Jefferson Transformers Keep Them "Sold"

Jefferson Transformers conform to requirements of the Underwriters' Laboratories

A GOOD transformer . . . one that will withstand rough usage and give long service . . . goes a long way toward keeping the toy "sold".

Fully aware of this fact, expert toy buyers for big stores standardize on Jefferson Toy Transformers both for sale with new electric trains and toys and for replacement. They know Jefferson Transformers are designed by small transformer specialists . . . sturdily built to stand up under rough handling . . . guaranteed to operate the trains for which they are designed. A regulating switch delivers the secondary voltages in small and uniform steps, entirely eliminating the necessity of a rheostat to prevent track jumping.

Such features, these expert toy buyers know, insure customer satisfaction.

Besides these characteristics of quality, Jefferson Transformers have other advantages. Four models are all you need stock to take care of all makes and models of electric train and toy motors. This means a minimum stock and small investment. Yet you can supply every toy transformer need.

And to make it easy for the sales person, each transformer comes in a box which has a label telling which trains the transformer will operate. No chance for mistakes and disgusted customers.

Supply Jefferson transformers with all the electric trains and toys you sell and you will keep them "sold". Write for descriptive matter and prices.

You Will Surely Want the Electric LaVenus Facial Also the Hair Rejuvenator

"A NEW SKIN IN A FEW DAYS"

Get Rid of your Pimples, Blackheads, Acne, Oily Skin, Wrinkles, Tan, Freckles, Unsightly Blemishes and Marks of Age This New Way.

Patents Pending

THE ELECTRIC HAIR REJUVENATOR

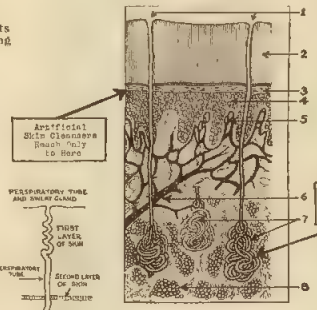
A few minutes use of this wonderful electrically heated Skull Cap will convince the most skeptical that it penetrates, nourishes and disinfects, keeping the hair in its natural, healthy condition. It restores to the hair the proper amount of that vital natural oil. It opens all the pores, which gives you a healthy feeling. It leaves the hair soft, silky, fluffy and beautifully lustrous.

For regrowing hair, banishing dandruff and bringing out an attractive sheen, the Hair Rejuvenator is unsurpassed, the heat of the resistance unit brings the blood rushing to the scalp, revives and energizes the hair cells to renewed life. Dandruff disappears in a few treatments and where hair is thin, new hair can be observed in a few weeks. Some of the most successful hair growing specialists use the Electrical Hair Rejuvenator.

Description: Skull cap, oval shape, six inches deep, aluminum shell with bakelite lining. Rubber banding, two handles, one on each side. Eight feet of silk cord and two-piece plug. It is well insulated, sanitary and **fully guaranteed.**

No. 9K/25 Hair Rejuvenator Each $11.90

MICROSCOPIC DRAWING OF SECTION OF HUMAN SKIN



1 = Pores of the skin.
2 = Epidermis, or top layer of skin.
3 = Corium, or second layer of skin.
4 = Sub-cutaneous, or third layer of skin.
5 = Nerve Prolongations.
6 = Blood vessels.
7 = Sweat glands.
8 = Cells of tissue.

"A NEW SKIN IN A FEW DAYS"

The above microscopic drawings illustrate very clearly that Nature's way to beauty is the cleansing of skin through its pores. Nature's natural cleansing way has, however, through modernism, been partly defeated.

Patents Pending

THE LaVENUS FACIAL Will Do This For You

The ELECTRIC LaVENUS FACIAL will in twenty minutes give you a complexion that is more beautiful than can be obtained through any other method! Because it is the only facial application that thoroughly cleanses the pores of the skin, and at the same time invigorates the thousands of delicate tissues and blood corpuscles. Such treatment is positive complexion insurance.

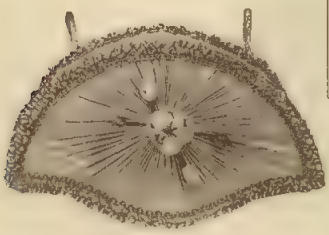
The ELECTRIC LaVENUS FACIAL is different from any other facial massage appliance, and therefore performs differently. Instead of applying hot towels and vapor baths which barely penetrates and cleanses beyond the surface of the skin—the HEAT from the scientific LaVENUS FACIAL penetrates to the farthest depth of pores and thus, it brings to the surface all the impurities, etc., that are never reached by other methods. It removes pimples—blackheads, freckles and wrinkles, clears the complexion, and will relieve colds in head.

No. 9K/25 Facial Rejuvenator Each $11.90

This and many other facial conditions are caused by the fact that the cleansing cosmetics even with their attendant massaging or powerful absorptive properties, reach only through the top layer of the skin. When any of these surface cleansers are used, blackheads or whiteheads may be broken and the appearance of the pore may be improved, but the pores have been cleaned. However, the pores have clogged the bottom of the pores and have prevented the natural secretion of perspiration and bodily oils, and nature can do naught else but set up an infection to rid herself of them. The LaVenus Facial, however, is a scientific safe cleansing way that cleanses the pores thoroughly and that will not irritate the tissues. There are no discomforts in the application of the LaVenus Facial—no scalding hot towels etc. Thus, at your service a way to beauty that rivals nature.

ANY DEGREE OF LIGHT

MULTI-LITE—The Lamp with Many Lights (Patented). Multi-Lite Lamps shown herein are equipped with a dimmer that gives six degrees or changes in light rays. Highly acceptable Wedding, Christmas or Anniversary Gifts.



No. 9K/020 BED LAMP—PATENTED

SILK BED LAMP

A beautiful and artistic Shade that has a special feature. You can DIM your light to any degree—from full candle-power to the very lowest. A low light at night is everyone's delight. This is entirely new and no bedroom is complete without this convenience. The shade, measuring 12 inches in length and 7½ inches in height, is a gem in itself. Fashioned from a very good quality of silk, trimmed with decorative flowers and braid. It captivates your admiration on sight. Available in the following lovely colors: Blue, Orchid, Rose Green and Tangerine. Will not get hot or burn out in any light up to and including 40 watts. Convenient, serviceable and ornamental. (Specify color preference when ordering.)

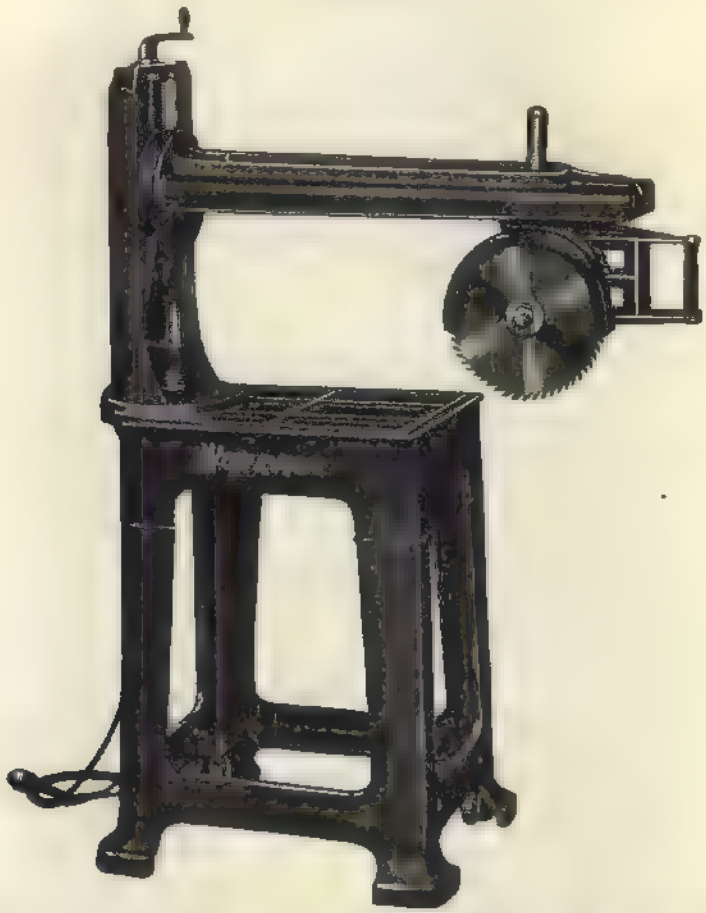
RADIAL SAWS

WORKACE



The Workace Radial Saw is a general purpose saw which will handle practically every kind of cut as required by the carpenter and builder, lumber yard, maintenance department, shipping department, cut-off department and in a great number of circular saw operations. The Workace Radial Saw will cut to any angle, compound mitres, cut-off and rip, dado, tenoning, routing, shaping, fluting, boring, sanding. It's an overhead saw, direct drive unit, the saw travels thru the work—stock lies flat on table. It is quickly adjustable, easily portable; it is accurate, steady and powerful. It will operate on either A. C., any cycle, or D. C., furnished for 110 volt lighting circuit operation.

A universal motor, 110 volts, especially designed for the work of this machine by the General Electric Company, is used. The motor is geared to the saw arbor insuring ample power. It is air-cooled and ball-bearing on the drive end. The gears and mandrel run in grease entirely enclosed in lubication chamber

The motor drive unit is mounted on turn-tables 6 inches in diameter, which slide on two ⅞ inch steel rods located in the radial arm. A pin is provided to locate motor, parallel with or at right angles to the radial arm. Two handles are provided for convenient operation. The radial arm is mounted on turn-table to adjust saw at angles. The back pedestal is also mounted on a turn-table which is 10 inches in diameter for adjustment of saw to various angles. The radial arm and saw raise at any convenient height by means of a screw

A safety saw guard is provided which covers the saw blade. A special guard is needed when using larger than an 8 inch blade

The Workace Radial saw is equipped with cast iron table and legs, ring base and vertical column, radial arm, motor drive unit, saw guard 8 inch combination rip and cross-cut blade crank wrench, ten foot of cable, with separable plug.

Specifications.

Depth of cut, with 8 in. blade, 2½in.;with 9 blade with dado heads and moulding heads	3 in. 1 in. wide
Distance of horizontal travel of saw	19½ in.
Rise of radial arm on vertical column	5¾ in

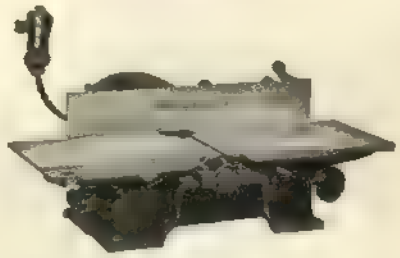
ELECTRIC PLANER

WORKACE 4 INCH



The Workace 4 Inch Planer can be supplied with directly connected motor or without. It is a tool that should be at the elbows of every pattern maker, assembly man and carpenter. It saves expensive trips to the big mchines and saves expensive hand work.

Joints stock 4 inches wide, edges or rabbets 3/16 inches deep. High speed, three knife head accounts for its beautifully finished work.

Special General Electric motor built in directly connected to cutter head. Maintains uniform speed of 3600 R.P.M. under varying loads. At this speed the 3-knife head gives 11,000 cuts per minute. Motor is connected to cutterhead by flexible coupling. 110 volts, A. C. 60 cycle.

Workace 4 Inch Planer is available with 2 inch "V" grooved pulley for belt drive or assembling into Workace Electric Woodworker unit.

Cutterhead runs in large size bronze bearings, lubricated by convenient oil holes. Motor, bronze bearings. Circular safety type cutter head is supplied; made of high grade steel, carefully balanced. Head is one piece slotted for knives.

One set (3) high speed knives are furnished and set in head ready for use. We recommend buying a Wallace jointing device to touch up knives. Gives more permanent cutting edge and assures all knives cutting equally.

Cast iron tables, ribbed to prevent warping, each mounted on carefully machined inclined ways to regulate depth of cut. Tables ground within .005 inch of perfect. Rear table provided with rabbetting ledge. Tables quickly adjustable by means of convenient hand wheels.

Fence is fastened to front table by a bracket permitting adjustment to any point on the table. Fence adjustable to 45 degrees locked into position by a lever; no wrenches are necessary to set fence. Stop is provided to bring fence back to right angle with table.

The Workace 4 Inch Planer is easily started or stopped by a lamp socket switch from which the machine is operated.

The Workace 4 Inch Planer is equipped as described, with or without motor; three high speed knives inserted ready for operation; 10 feet of cord, and plug.

The Workace 4 Inch Planer is a product of J. D. Wallace & Company, the largest manufacturers of portable woodworking machinery, and is guaranteed by them against defects in material and workmanship. To be assured of best results be certain the electric line to which machine is connected is delivering full rated voltage; avoid connecting light gauge wire (10 to 12 gauge best).

Specifications.

Length of knives	4 in.
Number of knives	3
Depth of cut (maximum)	3/16 in.
Length of each table, 10 inches—overall	20 in
Size of motor	¼ H.P.

No. 4

HEAD HELMETS

	Each
No. YHG. Built exactly to Yost specifications which demand thorough protection, close, comfortable fit, no excess weight and maximum wearing qualities. Made of fine quality tan strap leather. Padded throughout with white felt and lined with soft, smooth leather. The crown and ear pieces are molded to shape and reinforced with fibre. A suspended web inner crown acts as a perfect shock absorber. Wide strapping over crown affords extra protection. A special inner elastic head strap (patent applied for) holds the helmet firmly in place. Adjustable head piece with soft leather sweatband. Also fitted with the regular adjustable elastic chin strap for those who prefer that method of fastening. The back fits low and snugly to the head and neck. The ear pieces are low and wide and thoroughly protect the cheeks	$10 00
No. H5 Head Helmet. Made of black strap leather with russet leather crown straps. Molded crown reinforced with fibre and straps. Molded fibre ear pieces. Padded throughout with white felt. Deep back extension. Adjustable head piece with soft leather sweat band. Adjustable elastic chin strap	5 00

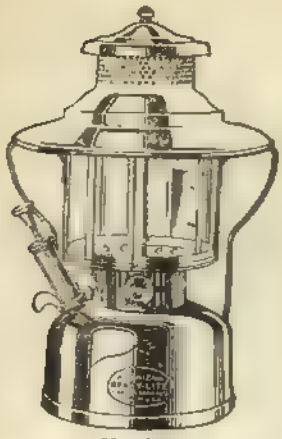
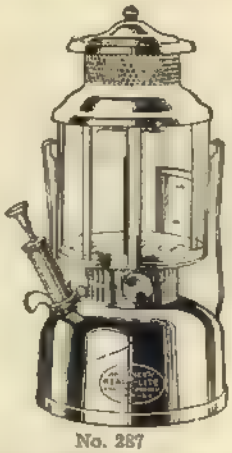
READY-LITE LAMPS AND LANTERNS



No. 288

Ready-Lite Generators

are simple and inexpensive. Having no cams to obstruct impurities in the gasoline, they give unusually long service. Generators are easily and quickly replaced without danger of breaking mantles.



No. 287

Ready-Lite Lamp No. 254

Besides a more pleasing design, superior material, workmanship and finish, American Ready-Lites have two outstanding improvements which place them far ahead of all others. The first is the generator. It is a straight tube allowing a free flow of gas, hence it does not readily clog and gives longer service. Ready-Lite generators are inexpensive and are easily replaced without breaking mantles.

The second notable improvement is in the burner casting and mixing chamber, which is constructed so that it equalizes the gas pressure, eliminates flickering and insures equal brilliance of both mantles.

Ready-Lites are built of heavy gauge brass, nickel-plated and polished. Lamps have ebonized hard wood standard. Shades are of attractive design and high heat resisting qualities. Lanterns are wind and storm proof, equipped with mica globe fitted with lighting door. Top is blue porcelain enamel, won't rust or burn out. Each lamp and lantern is packed in individual carton with pump, wrench, tip cleaner, mantles and one extra generator.

No. 288. Lantern with shade and built-in pump and automatic lighter ... $9 00

No. 287. Regulation lantern with built-in pump and automatic lighter ... 8 50

READY-LITE LAMP No. 254

Gives a brilliant white light of 300 candle power, softened and diffused by the opal shade, making it restful and pleasing to the eyes. The best lamp to read, study or work by and an ornament in any room. Height 20 inches, diameter of fount 8½ inches, capacity 3 pints, burns 18 to 20 hours on one filling. Packed in corrugated box with pump, wrench, tip cleaner, mantles and one extra generator. Shipping weight 12 pounds.

Price complete ... $9 00

AMERICAN READY-LITE MANTLES

American Mantles have become famous because of the "pucker" at the bottom which is largely responsible for their great durability.

American Inverted Mantles are made by hand, by skilled operators from the best quality of materials it is possible to buy. Inferior material and cheap labor are usually poor economy and this is especially true in the manufacture of mantles. That is why American Mantles are made in one grade only and while they are made expressly for use on American Lamps and Lanterns, any gasoline lighting device will give more light and better service if American Mantles are used. Made in two sizes:

	Per Dozen
No. IX. A large mantle for American Ready-Lites and all other single mantle lamps, lanterns and fixtures	$ 1 25
No. IXB. A smaller mantle for all two mantle lamps and lanterns	1 00

We maintain an engineering Department for the purpose of furnishing technical advice to those planning to install motors, Generators and machinery of all kinds.

We will gladly furnish advice, estimates and prices upon request. Tell us your problem and we tell you your requirements.

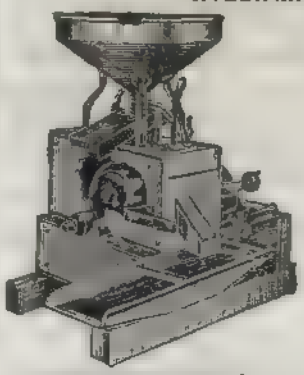
BURR GRINDING MILLS

Designed to give large capacity without heating the meal, ball thrust bearings at end of shaft allow adjusting burrs with the least possible friction and prevents heating of bearings.

The mill stones or burrs used are of the pearl flint grit which is the best burr known for grinding grain for table use.

WILLIAMS IMPROVED

With Blower.



Designed to clean, grind and sift corn into the finest quality of either table meal or grits, or wheat, buckwheat, or rye into flour, as well as any grain or mixture of grain into feed.

The grain cleaning system removes all trash, dust and faulty grains, as the grain passes from hopper to burrs. A high speed cleaning fan, belt driven from main shaft, is standard equipment on all sizes except the 12 inch size mill. Trash and dust from both cleaning shoe and fan is blown out through a single spout from which it can be piped through floor or wall without danger of being blown back into meal.

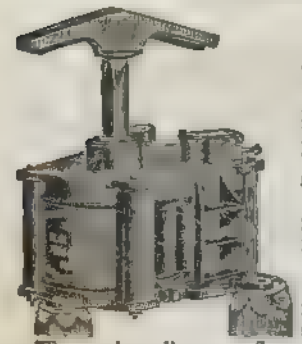
D 3

CANE MILLS

—BLUE GRASS—Three Roll.



Held together by four main bolts, which make them more rigid than a mill with three bolts.

The cog gearing is cast separate from the rollers, and is very heavy, with two clutches on each wheel, which fits into two corresponding ones in each roller.

Both top and bottom journals run in brass boxes, making the mill work smoothly and easily.

All steel shafts with turned bearings, rollers turned with serrated faces, enabling a regular and constant feed to be maintained.

The main rollers are flanged at top and bottom, preventing the cane from passing either up or down. Feed-guide furnished with each mill, made so that the full length of the roller can be used.

The gearing is encased preventing it from being clogged, and making it entirely safe.

Angle or incline yoke can be supplied as desired. With the angle yoke bolts are furnished to attach to sweep. Bows are furnished for the incline yoke.

The oiling is done by means of horizontal oil ducts for the lower journals, avoiding the mixing of oil with the juice.

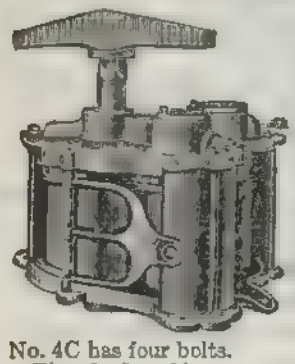
—CYCLONE—Three Roll.



Steel shafts. All boxes have brass linings of ample thickness, and when properly oiled should last for years.

Top plates are made with a wide flange, which strengthens the plate and covers the gear. This effectually prevents cane, etc., from getting between the cogs and insures safety to the operator. The cog wheels can be oiled through a small hole in the top plate, and there is no danger of oil getting into the juice.

Nos. 0C, 1C, 2C and 3C are held together by three bolts, No. 4C has four bolts.

The feed guides are reversible to be worked on either side of the mill.

The main shaft is very heavy and strong, and there is no danger of it twisting or bending.

330	5⅞	7⅜	1	1⅛-⅜	4¾	$1.90
340	7	10	1	1⅛-⅜	5¼	2.00

41" Folding Crank Handle

The 515 Walker Jack meets the constantly increasing demand for a double extension screw jack for light cars equipped with balloon tires. The convenience of the long handle in placing the jack under the car, the ease in lifting due to the ball bearings, and the range provided by the double extension makes No. 515 adaptable for smaller cars. Weight each, 7½ lbs.

NO.	Ht. In.	Raise In.	Cap. Ton	Dia. Screw In.	EACH
515	7⅛	8⅛	1	1⅛-⅜	$4.00

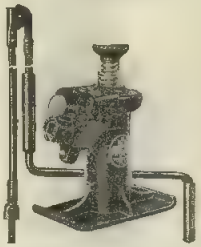
SINGLE SCREW TYPE

15" Handle—Walker

Thousands of drivers of speed wagons and small trucks swear by the No. 216B. They like the easy action and steady lift that the single screw with one-to-one gear ratio provides. Handle is just the right length and the broad base gives sure footing on any kind of road surface. Precisely machined wearing surfaces and sturdy all 'round construction. Weight each, 8 lbs.

NO.	Ht. In.	Raise In.	Cap. Ton	Dia. Screw In.	EACH
216B	10	6	2½	1	$4.60

DOUBLE EXTENSION SCREW TYPE



47" Folding Handle—Walker

Recognized as the finest double extension-screw jack made. Virtually no effort is required to operate it under the largest cars.

No. 525 can be positioned under axle or spring clip instantly. The skid base aids securing a firm foundation on gravel or dirt. Double reduction gear drive is completely enclosed and packed in grease. Ball bearings give still greater ease of operation.

Gears are of best malleable, screws are cut from steel bars, the smaller one being vanadium steel; cap is milled steel, case hardened. The saddle type cap is made to fit securely under spring clips and has sharp heat-treated teeth to grab the axle in case the lift is made from that point.

To bring jack to proper lifting height, inner screw may be raised quickly by turning cap with fingers. Outer screw may be raised or lowered with knurled knob. Long turning type handle with turning hand grips is ample to get past bumpers and the obstructions and permit operator to make lift comfortably from a standing position. Semi-universal joints give greater flexibility and clearance. Handle folds for storage in tool box or under seat.

Beautifully balanced and of the sturdiest construction and finest quality throughout. Weight each, 12 lbs.

NO.	Ht. In.	Raise In.	Cap. Ton	Dia. Screw In.	EACH
525	7⅛	8⅛	1½	1⅛-⅜	$6.60

A double screw aluminum cased jack. Light, compact. Will lift weight of any passenger car or light truck.

NO. 29S TRAP SPECIAL GRADE. MATTED BARREL

12 Gauge

***12 Gauge.** 30 or 32 inch, Remington steel full choke barrel. A six-shot repeater designed especially for trapshooting purposes. The stock and fore-arm are American walnut, the stock being furnished in but one dimension, which is 14 inches in length, drop 2 inches at heel, and 1½ inches at comb; straight grip, checked. The majority of trapshooters have found these dimensions to be the best adapted for trapshooting purposes; top of receiver matted. The top surface of barrel is neatly matted its entire length, which prevents the reflection of light that might interfere with the shooter's sighting. Wt. ea. about 7½ lbs. Ea. **$58 60**

***12 Gauge with raised solid rib.** 30 inch barrel otherwise same as above. Wt. each, 7¾ lbs.....Each **$66 90**

SHOT GUNS

MARLIN REPEATING

Model 42A, Take-Down, Hammer, Six Shot.

Solid top receiver; closed in breech bolt that sheds all the rain, snow and sleet, side ejection; double extractors; automatic safety device; compensating device, barrel always fits tight on receiver.

Barrel—Special rolled steel, matted; chambered to handle both 2¾ and 2⅝ inch shells.

Stock—Black walnut, pistol grip butt-stock and action slide handle; hard rubber butt-plate; length butt-stock 13½ inches; drop at comb 2 inches; drop at heel 2½ inches. Weight about 7½ lbs.

	Each
No. 42-30—12 gauge; 30 in. barrel, full choke	$102 30
No. 42-32—12 gauge; 32 in. barrel, full choke	102 30

One in cardboard box; ten in wood case.

STEVENS REPEATING

Field Grade.

Take Down, Hammerless, Pump Action, Six Shot.

Receiver—Drop forged, solid breech.

Barrel—High pressure compressed steel, full choke modified or cylinder bore.

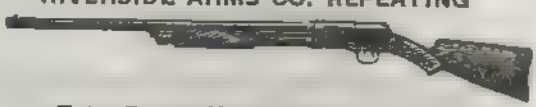
Action—Hammerless, visible locking bolt, safety firing pin, independent safety, side ejection.

Stock—Checkered walnut, pistol grip, checkered slide handle, rubber butt plate, length 13¾ inches, drop 2¾ inches.

	Each
No. 620—12 gauge, 30 in barrel; wt each 7¾ lbs.	$94 50
No. 620-16—16 gauge, 28 in. barre.; wt each 7½ lbs	94 50

One in cardboard box; five in case.

RIVERSIDE ARMS CO. REPEATING



Take Down, Hammerless, Six Shot.

Take down feature is simple, and gun can be taken apart and put together in eight seconds. Can be fired without clogging as fast as it is possible for a shooter to work the slide handle. In opening the gun, the firing pin is drawn back and locked and stays locked until it is closed. Hammer cannot possibly touch firing pin until action is completely closed and locked.

Receiver—Solid drop forging, same finish as the barrel. Fitted with extra long tangs, and gives strength to the stock at the weakest point. Shells are ejected from the side.

Barrel—Stevens high pressure compressed steel, finished black oxide, which gives it a beautiful and permanent coloring. Full choke bored.

Stock—Plain walnut, with pistol grip, checkered; rubber butt plate, checkered forearm; length of stock 13½ inches; drop 2¾ inches at heel and 1⅝ inches at comb.

Can furnish in cylinder modified and full choke bored.

	Each
No. 520—12 gauge, 26, 28, 30 or 32 in. barrel	$97 50

Wrapped separately in paper; ten in case, wt each 7¾ lbs.

SHOT GUNS

BROWNING AUTOMATIC

Combines all the good features to be found in any gun. Improved safety, magazine cut-out, double extraction and light weight. A simple movement locks the cartridges in the magazine, permitting the cartridges in the chamber to be ejected without disturbing the others.

Double extractors insure positive extraction and feed. Barrel guide ring forged in one piece with the barrel.

No. 1 Grade, Six Shot.

Barrel—Special cockerill steel of unusual high tensil strength.

Half pistol grip, length 14¼ inches, drop at heel 2¼ inches, at comb 1¾ inches.

Matted receiver, English walnut stock and fore-end.

12 Gauge.

	Each
No. BA12F—30 and 32 in. barrel, full choke; wt each 8 lbs	$153 75

Ten in wood case, wrapped separately in paper.

Factory will not furnish any length or boring other than those mentioned above.

+F. O. B. Utah Factory Only.

SHOT GUNS

REMINGTON AUTO-LOADING

They combine all the good features to be found in any gun and more; they are a hammerless, auto-loading, ejector, repeating gun. After a shot has been fired, the recoil opens the breech, ejects the empty shell, inserts a new one, cocks the hammer, closes and locks the breech and leaves the arm ready to be fired again by simply pressing the trigger. The receiver is solid on top and finely matted. The breech bolt does not slide out, nor is there any kind of opening in the rear.

Full choke barrel will shoot 70% of the load or over in a 30 inch circle at 40 yards.

Model No. 11, Take Down, Solid Breech, Hammerless, Standard Five Shot.

Barrel—Remington steel, full choke, modified or cylinder bore.

Stock—American walnut, with half pistol grip, checkered fore arm and grip; rubber butt plate; length of stock 14 inches; drop 2½ inches at heel and 1⅝ inches at comb. Extra charge for any variations from these dimensions.

When ordering, specify length of barrel.

	Each
No. 11A-30—12 gauge, 30 in barrel; wt about 8 lbs	$149 85

Extra Barrels for No. 11C gun	✦ 51 90

Ten in wood case.

EXTRAS

For Remington Model No. 11 Auto-Loading Shot Guns.

In all cases, extra barrels must be fitted at the factory.

When ordering extra barrels for guns already in use, the complete gun, including the old barrel, must be returned to the factory, so that both barrels may be made to interchange on the same receiver.

	Each
***Solid Ribbed** barrel, add to price of plain barrel Raised Ventilated Rib	✦$21 87 ✦ 38 65
Any length or drop of stock made to order at an advance of	39 72

*The solid ribbed barrel is particularly appreciated by shooters who have used a double gun and therefore are accustomed to a continuous line of sight. It also prevents the reflection of light on the top of the barrel from interfering with the shooter's sight. The barrel and rib are made in one solid piece, hence a rib can not be fitted to a plain barrel.

✦F. O. B. New York Factory Only.

PEARL STOCKS

Pearl (properly speaking, Mother of Pearl) is cut from the inside of the shell. A portion of the pearl is yellow and a portion is blemished, balance fair to fine. We use for our pearl stocks only the best selected material, and for this reason our prices cannot be as low as you may find quoted on inferior grades. Our prices, however, are in keeping with the quality.

RIFLES

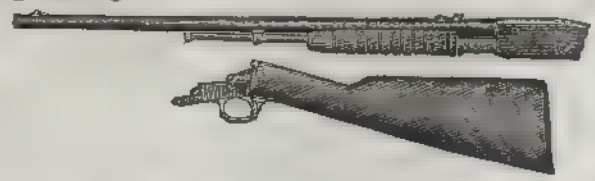
REMINGTON REPEATING

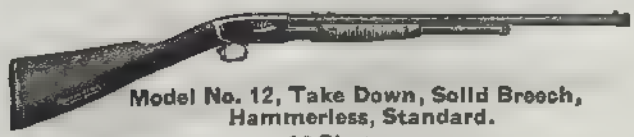
The Remington solid breech hammerless take down 22 caliber repeating rifle is the latest addition to the modern Remington idea. It is modeled after the lines of the Remington pump gun, which has established the reputation of having the most graceful lines of any repeating arm.

The action is strong and simple. The positive extraction and feeding of cartridges and the absolute locking of the action when cocked, together with other excellent features, places this rifle far in the lead.

Safety—The safety which is absolutely positive, is conveniently located just back of the trigger, and when set securely locks the trigger, thus preventing accidental discharge.

Side Ejector—The ejected shell is thrown out the side, away from shooter, and in no way interferes with the aim in rapid shooting. The ejector slot is of sufficient size to readily admit of single loading.





Model No. 12, Take Down, Solid Breech, Hammerless, Standard.

16 Shot.

Remington steel, round barrel, 22 inches long, straight grip; walnut stock; fitted with rubber butt plate; weight 4½ lbs.

Chambered to take without any adjustment, 22 short, long and long rifle cartridges. Magazine capacity 15, 22 short, 12 long or 11 long rifle cartridges.

Ten in wood case; wt per case about 70 lbs.

REMINGTON REPEATING

High Power, Take Down, Solid Breech, Hammerless. Six Shot.

This rifle has the famous solid breech. A thick wall of solid steel between the firing chamber and the shooter's face, affording absolute protection against injury from blow-backs or defective ammunition, and also prevents dirt, snow and other foreign substances from entering the mechanism.

A new form of magazine is provided which holds the cartridges end to end, and at the same time absolutely prevents any bullet in the magazine from coming in contact with the primer of the next cartridge ahead.

Special ordnance steel round barrel, 22 inches long; patented quick adjustable No. 1 buck horn rear sight, and new design; white metal front sight; American walnut stock, with half pistol grip, fitted with rifle steel butt plate. Weight 6¾ lbs.

Each

No. 14A-25—25 caliber; shoots Nos. 25RMC and 25RSP center fire cartridges ..... †$117 00

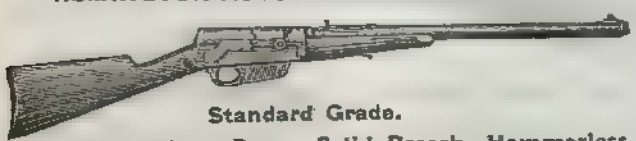
No. 24A-22LR—Shoots 22 long rifle cartridges..... 67 20

Ten in wood case; wt per case about 80 lbs.

REMINGTON AUTO-LOADING REPEATING



Standard Grade.

Model No. 8, Take Down, Solid Breech, Hammerless. Five Shots.

The breech is locked by a turning bolt which locks close up against the head of the cartridge, as in the latest designs of military rifles. This reduces the liability of breaking shells, when firing, to a minimum, and gives great strength and security. Furthermore, this locked breech allows the use of high power cartridges with perfect safety.

Special ordnance steel, round barrel, 22 inches long; straight grip, walnut stock, rifle style; steel butt plate; blued finish. Half pistol grip furnished to order; no additional cost. Weight about 7¾ lbs.

Each

No. 8A-25 -25 caliber; shoots Nos. 25RMC and 25RSP center fire cartridges..... ✦$153 45

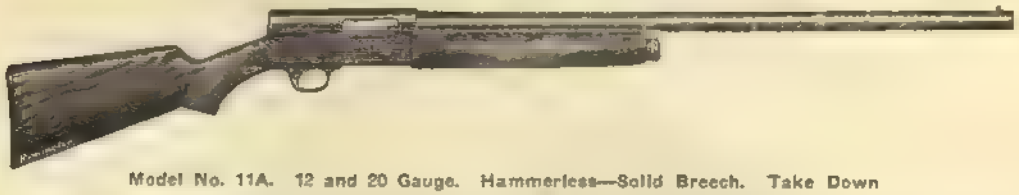
No. 8A. Standard Grade, 22 inch Barrel, Straight Grip, American Walnut Stock, Rifle Style Steel Butt Plate. Blued Finish. Weight about 7¾ pounds. Number of shots, 5. Adapted for 30-30 Rem., 32 Rem., 35 Rem., and 25-35 Central Fire Rimless Cartridges	$ 58 10

REMINGTON 12 AND 20 GAUGE AUTO-LOADING SHOTGUN



Model No. 11A. 12 and 20 Gauge. Hammerless—Solid Breech. Take Down

The Remington Autoloading Shot Gun is entirely automatic in its action excepting only that the trigger has to be pulled and released for each shot. All the operations opening the breech ejecting the empty shell, inserting a cartridge and cocking the hammer are performed by the recoil leaving the gun ready to be again fired as fast as the trigger can be released and pulled

The magazine holds four cartridges, which with the one in the barrel, makes five shots at the shooter's command. Cartridges remaining in the magazine while any number of shots are fired do not become "headed" at the crimp so they will not enter the chamber freely.

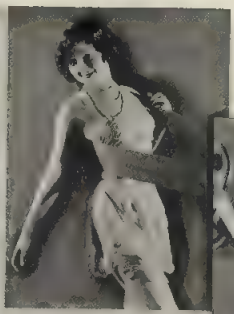
KEEP YOUR YOUTH

without tiresome effort

This sturdy, Mechanical Masseur is easily installed in a closet, in your bath room, bed room or gymnasium, and requires but very little space. It requires no attention whatever, and the 1/4 horse-power motor operates quietly on current from any light socket or plug.



Mechanical vibratory massage has been demonstrated to be much more effective than either vibrator or massage alone. Perfect control gives either a soothing caress or [illegible] exercise

Two straps are provided with this device, a narrow one and a broad one, for effectively treating the parts where exercise or reduction is most desired

You will be amazed to find this pleasant, easy exercise reinforming your figure to youthful proportions. Applying vibratory massage to the spots most desired, will produce amazing correct ve results

Illustrated above is our sturdy Mechanical Masseur, rightfully called "The Fountain of Youth". It is made extremely strong, and is guaranteed absolutely trouble-proof. All you have to do is press the button.

Ten to fifteen minutes' daily exercise is enough instead of the tiring effort of vigorous effort, you will experience relaxation and the glow of health

The Mechanical Masseur is shipped from the factory in Indiana. It weighs about 75 pounds, and should therefore be shipped by freight. Comes complete with instructions and all necessary attachments.

"The Fountain of Youth"

Keep your youthful vigor
Keep your youthful figure

No longer need you envy radiant, youthful vigor and a supple, attractive figure. It is yours for the asking, if you are willing to spend ten or fifteen minutes a day, while this Mechanical Masseur does its pleasant work.

In construction, this electrical device leaves nothing to be desired. It is extremely rugged and built so that it requires absolutely no attention. It is made to fit any type of electrical current. (While it costs a little less in the standard, alternating current, 110-volt model, other types may be had on request, as quoted below.) This model comes to you complete in every respect, with two belts, a narrow and a wide one, a long cord for attaching to plug, and a switch for shutting it on or off that you may hold while you are taking the exercise. Complete instructions are included.

This Mechanical Masseur Is Scientifically Correct

The health-giving effect of this marvelous machine can be duplicated by vigorous exercise and a scientific massage thereafter. This, however, takes time, and what is more, a great deal of will-power. Our scientifically built, Mechanical Masseur gives you energetic exercise and vibratory treatment where and when you want it. This Mechanical Masseur solves the problem of getting correct exercise, in these days, so crowded with business and social obligations. It supplies the needed physical stimulation, improves circulation, adds vigor and strengthens muscles all without effort on your part. Excess fat and its dangers disappear with the steady use of this device. Over-weight and under-exercise bring on that dull, weary feeling and rob you of your joy of living. A trim figure, health and vigor are at your command for a sum that is insignificant, when compared with the benefits that you receive. A Mechanical Masseur should be in every home

9G56197 For Standard, 110-Volt Alternating Current **$79.00**

9G56198 For other types (kindly specify current desired) **99.00**

MAWAPHIL DOLLS

The 1930 line of Mawaphil Dolls not only includes many new numbers but it is the finest and most attractive we have ever shown.

New numbers in stockinette, plush and mohair plush—every one hand made and hand painted and every number individually wrapped in cellophane which greatly enhances the sales appeal and prevents soilage from handling.

Chicago Toy Fair
Room 630 - Hotel Morrison

The New Brinkman
DOLL HOUSE

is just what you have been waiting for!

For years there has been a tremendous unfilled demand for a modern, durable and attractive Doll House at a sensible price. With characteristic ingenuity, Brinkman has created a brand new line of Doll Houses that fills this demand to perfection.

You'll quickly realize why the New Brinkman Doll House was one of the hits of the New York Toy Fair when you see it. Made entirely of steel, handsomely finished in bright colors. Every part is carefully and accurately made, easily put together. Brinkman Doll Houses offer many features in construction and quality that are absolutely new and exclusive.

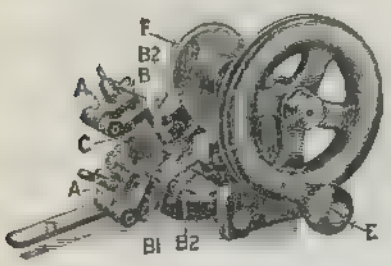
BACON AND BAINBRIDGE STS., DAYTON, OHIO, U. S. A.

KEY CUTTING MACHINES

RUSSWIN



Cuts duplicates of all makes of pin tumbler cylinder, flat, double bit, solid and hollow ground keys by changing the cutter and gauge accordingly.

Equipped with two types of cutters, one milling cutter (F) and gauge for cutting pin tumbler keys and two cutting saws and gauges for all other types of keys.

Hinged vice (A,A) holds both original key and blank to be duplicated in rigid and correct position; a shelf on the vice supports the bow on cylinder key. On each vice there is a hinged stop which screws both as a top shoulder stop (B1) and a setting stop (B2); the shoulder is indispensible when cutting cylinder keys, all cutting from original cylinder key should be started from the top shoulder. Stop (B1) insures accurate reproduction of the original key; the setting stop (B2) gives the correct distance from the cutter to the gauge (C) by resting the shoulder of one stop (B2) against the cutter and the shoulder of the other stop (B2) against the gauge (C).

Two gauges (CC) one for cylinder and one for other types of keys are furnished with machine. After original key and blank to be cut are placed in position, raise lever (D) turning handle (E) until cutter engages and cuts into blank to be duplicated. Equipped with .035 and .062 inch saws.

Operates by hand or motor.

Note—Cutting saws furnished in two thicknesses .035 and .062. Specify thickness wanted.

SAGER AXES

The Sager Axe is the highest grade axe manufactured and fully warranted against flaws or any fault of manufacture. This axe is made from the best grade of crucible steel entirely by old-fashioned hand process, bits are forged by hand and thoroughly hammered refining the steel as can be done in no other manner, and ground before tempering, avoiding all danger of drawing the temper; it is not polished for the same reason the color is natural just as it comes from the temperer dipped in transparent lacquer to prevent rust; there is nothing covered up by paint or fancy polish—the axe is just what it appears—the best axe made today; each bit is tempered separately, as this is the only successful way to produce an axe that will give service; this is more expensive than the usual way of tempering a large number of axes at one time, but the quality produced by the hand process much more than makes up for the increased price.

CALIFORNIA REVERSIBLE PATTERN

DOUBLE BIT

Sometimes called **Suiping**, are used for butting off ends of logs, and for general chopping purposes, in logging and wood camps, land clearing, etc.

THE MAIL PLANE
(Choice of two Models)
"Pioneer" Aeroplane No. 8L 899 Illustrated
High Speed Drive

What boy, in this day of air mindedness, does not entertain future thoughts of emulating the exploits of that now famous air mail pilot Col. Lindbergh and how manifest keen interest and quickly display unusual knowledge of aeronautics when they have a vehicle of this type. This model is designed primarily as a vehicle for those seeking the very best. Every provision for ease of operation comfort lasting service and ultimate satisfaction has been provided. It is a vehicle the boy will want and one of which he will never tire. The high grade materials and the fine workmanship are very evident in the attractiveness of this splendid model. The factory price is interestingly modest. Ideal as a Holiday or Birthday Gift

Note Specifications and Equipment

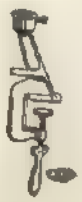
SHEET METAL WORKERS' MACHINES

PEXTO

BENCH STANDARDS

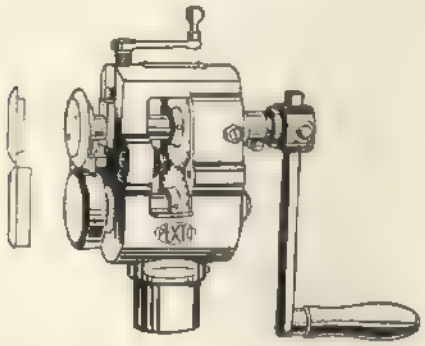
Regular Offset
No. 975.



Wiring Offset
No. 976.

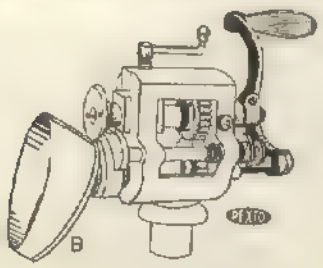
Nos.	975	976
Size hole, inches	1⅝	1⅝
Height, overall from bench, inches	9¾	9¾
Shipping wt., each, lbs.	10½	11
Each	$2 75	2 75

WIRING MACHINES



No. 525. With standard. Diameter of rolls, 3 inches. Will receive wire up to No. 0 gauge. Furnished complete with offset bench standard No. 976. Shipping wt., 31 lbs. .....Each $30 00

ELBOW EDGING MACHINES



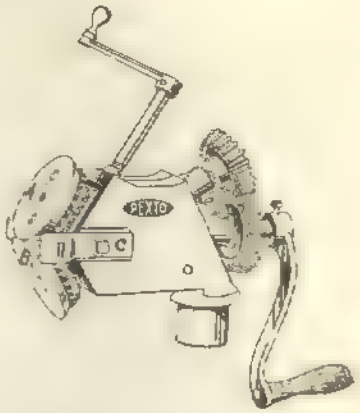
Columbian.

Capacity 24 Gauge Iron and Lighter.

For a small output of elbows this pattern will answer the purpose, but for a large elbow manufacturer we suggest a more rigid machine. Furnished with No. 975 standard.

No. 551. Diameter of rolls 2⅛ inches. Shipping wt., approximately 25 lbs. .....Each $26 00

SETTING DOWN MACHINES



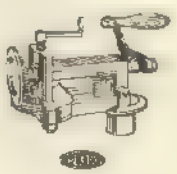
Pexto.

Capacity 24 Gauge Iron and Lighter.

The improvements in this setting down machine adapts it for setting down the seams on differently shaped vessels to better advantage than any other design. The inclined position of both upper and lower faces allows work to be held up or down and seams to be started inward while setting down, thereby facilitating the operation of double seaming. Adjustable gauges with idler rollers are fitted. Furnished with No. 975 standard.

No. 561. With standard. For seams up to ⅜ inch wide. Shipping wt., approximately 60 lbs. .....Each $32 00

SETTING DOWN MACHINES



Columbian.

Capacity 24 Gauge Iron and Lighter.

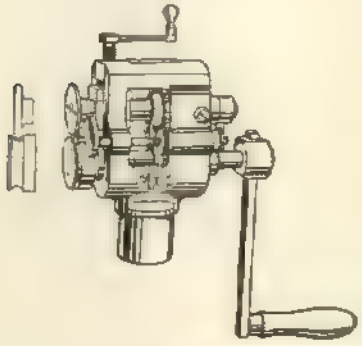
The extra small faces on this machine make it possible to burr or flange very small can bottoms and bodies. This feature adapts the machine to work where a machine with larger rolls would prove impracticable. Furnished with No 975 standard.

No. 556. For seams up to 3/16 inch. Shipping wt., approximately 23 lbs. .....Each $26 00

SHEET METAL WORKERS MACHINES.

PEXTO

TURNING MACHINES



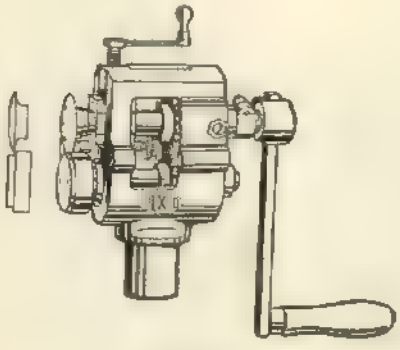
Columbian.

A highly serviceable turning machine with solid open frame of the highest grade of excellence The tinsmith or sheet metal worker will find in these patterns every modern improvement combined with the highest quality materials. Furnished complete with No. 976 standard.

No. 541. Small; with standard. Diameter of rolls 2 1/16 inches; smallest diameter of wire that can be used, 10 gauge; largest, 7 gauge. Shipping wt., 25 lbs...Each **$26 00**

No. 542 Large; with standard. Diameter of rolls, 3 inches; smallest diameter of wire that can be used, 9 gauge; largest, 4 gauge. Shipping wt., 31 lbs..Each **$27 00**

BURRING MACHINES



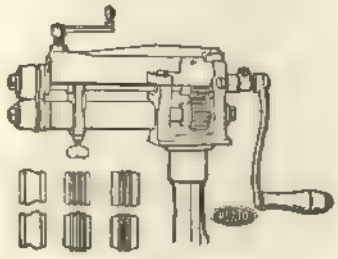
Columbian.

Burring machines in open pattern with solid frame of improved design well known for their splendid wearing qualities, accuracy and ease of operation. The rolls are forged from special high grade material giving extreme wearing qualities to the fine edge in the rolls necessary to produce a satisfactory uniform flange on a number of blanks. Furnished complete with No. 976 standard

No. 576. Small; with standard. Diameter of rolls, 1½ inches; widest flange or burr that can be turned, 3/16 inch. Shipping wt., 21 lbs. .....Each **$24 00**

No. 577. Large; with standard. Diameter of rolls, 2⅛ inches; widest flange or burr that can be turned, ¼ inch. Shipping wt., 25 lbs.....Each **$25 00**

BEADING MACHINES



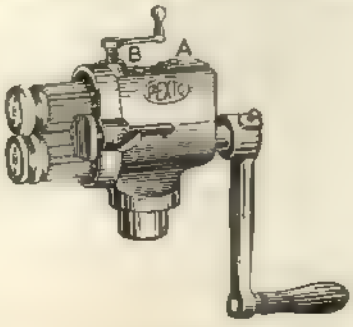
Light.

Capacity 24 Gauge Iron and Lighter.

Furnished with four pairs of rolls—one pair each ogee, ¾ inch; triple, ⅝ inch and single, ¼ and 3/16 inch. Furnished with No 975 standard.

No. 620. Depth of throat to frame, 6¼ inches; tc gauge, 5½ inches; diameter of rolls, 1 15/16 inches; width of rolls, 1 7/16 inches; distance between shaft centers, 1⅞ inches. Shipping wt., approx. 50 lbs. boxed....Each **$46 00**

CRIMPING AND BEADING MACHINES



Common Sense.

Capacity, 24 Gauge Iron or Lighter.

A common-sense, direct-acting, crimping and beading machine recently made from new patterns. It fills a long-felt want for a compact, well-constructed, simple but durable machine that may be depended upon to perform with precision and accuracy for making a uniform crimp and bead or crimp only in pipe of black or galvanized iron. It has been designed for serving every requirement of the large or the small sheet metal shop and will prove an inexpensive, desirable addition to the stove pipe department of the hardware store. Beading and crimping rolls are countersunk and are held with round nuts which leaves the face of the rolls flush with the arbors. A pair of steel blank collars accompany each machine and when these collars are substituted for the beading rolls the same machine is converted into a plain cornice makers' crimper. Furnished complete with one pair of steel blank collars and offset bench standard.

No. 0581. Straight crimp; width of crimping rolls 1¾ inches, width of beading rolls 1 inch, diameter of beading rolls 1 15/16 inches, diameter of crimping rolls 1 13/16 inches, size of ogee bead ½ inch. Shipping wt., approximately 30 lbs. boxed .....Each **$15 00**

Four Working Parts Double Worm Gear Drive

Rees—Journal

The introduction of Rees double worm gear drive jacks has filled a long-felt want in the jack field. They have been enthusiastically received and found highly efficient for the purpose intended wherever they have been used.

Rees Journal Jacks are particularly adapted to car inspection and the removal and replacement of journal brasses in railway equipment.

The Rees is the only jack using the patented Double-Worm-Gear-Drive principle.

It is built in a factory devoted exclusively to making Rees Jacks, a factory that knows but one kind of product—the best.

It has four working parts, all of them strong, substantial, built to stand the strains for which they are intended, with a wide factor of safety.

There are no pawls, no springs, no intricate mechanism to get out of order.

There is no end thrust or side strain to cause friction and excessive wear. The steel gears and carefully cut worm will last indefinitely.

In every respect the construction and workmanship of Rees Jacks are on par with the exceptional features of its design.

Every operator will want the Rees Journal Jack, once he knows the convenience and ease with which it operates. Not limited to a notch at a time. No hard pumping up and down—nothing but satisfaction to the user of a Rees Jack.

NO.	Capacity	Ht. In.	Lift In.	lb Each	EACH

Rees—Industrial

The same type of construction in the Journal Jacks is carried out in the 25A Industrial Jack. The difference being in the capacity, height, lift and weight. The 25A Jack is made to meet the demand for an all around high type and high lifting style jack. Will be found useful in all industrial work. No chance to drop, no back kick, automatically locked in either direction, secure at any height, are features found in all Rees Jacks.

329T	15	39	23	185	$70.00

For pulling or straightening electric light, telephone or telegraph poles, the Simplex Pole Jacks have established wonderful service records.

Thousands of large and small public service companies in this country and abroad will attest with pride to the efficiency and utility of their Simplex Pole Jack equipment.

The No. 329 is designed for pulling and straightening poles of any size. Furnished with 5-foot steel lever, 8-foot steel chain, and steel I-beam base.

No. 325 is a smaller model—for 25-foot and 30-foot poles—and for tightening guy lines. The No. 325 is also used for pulling underground cable, timbering in mines, pulling mine supports, taking up slack in trolley wire, tightening guy wires, etc., and is furnished with 4-foot steel lever bar, 52-inch steel chain, portable steel formed bar, and 8 foot pipe with forked cap.

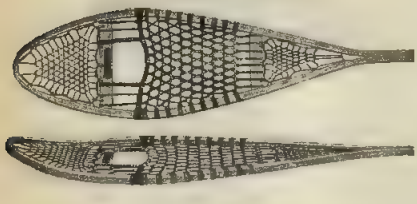
J

SNOWSHOES

MAINE



Tubbs—Model for Men

The conservative shape and spread of this type shoe makes it exceptionally desirable for general service over long trips. The slightly curved toe makes it equally practical up hill and on the level. This model was selected by the British Government in 1918 and 1919 for the use of their troops at work in Northern Russia. More Tubbs' Snowshoes were used in war service than were those of all other manufacturers combined.

NOTE—Snowshoes are furnished without attachments

NO.	Size In.	Wt. of User	PAIR
70	12x48	115 to 140 lb	$13.50

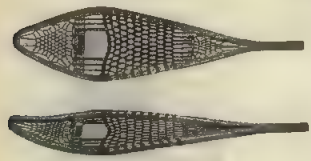
76	12x60	140 to 165 lb	16.00

CHILDRENS



Tubbs

This style is in reality a Junior "Maine" model shoe because it is designed on the same general shape. It is made up like a ladies' model though of still lighter materials and smaller dimensions. Every active girl or boy will be delighted to own and use this expertly finished snowshoe.

NOTE—Snowshoes are furnished without attachments.

NO.	Size In.	Wt. of User	PAIR

SNOWSHOE FOOT RIGGINS

Tubbs

Tubbs' foot riggins are made from carefully selected, first grade hides. These have been thoroughly tanned for hard service in all kinds of weather. Straps are extra wide and buckles are securely riveted into place. Every precaution is taken in advance to insure a safe journey.

Made of russet strap leather. Has three straps passing over top of foot into corresponding buckles at outside of slipper, and is fastened to foot by means of a long strap that passes around back of heel into buckle on outside. Ties to snow shoes by means of thongs.

NO.		PAIR
AM	(Men's size)	$2.25
AL	(Ladies' size)	2.00

STEERING SLEDS

Stamped steel knees; crucible steel runners, T shaped and so curved in front as to give a maximum length of steering surface; sled responds instantly without loss of speed, to the slightest bend in the steel runner made by the steering bar; gear and runners finished red enamel; tops of rock elm, beautifully painted and decorated.

SALT WATER BAIT

SOUTH BEND TUN-ORENO

A salt water trolling lure. Molded from pure tin. Both eyes swivel in the body, preventing the line from kinking and twisting and also preventing the fish from getting a leverage. The tube runs the entire length of the squid. The eyes are much harder to break off than the eyes on the ordinary squid or even on other types of loose-hook squids. Patented swivel socket. Used successfully for Tuna, Bonita, Albacore. Weight approximately 5½ ounces, length 5 inches. Equipped with one extra strong special double hook. Furnished in natural polished tin body with enameled red head.

NO.	DOZEN
988	$18.00

SOUTH BEND FLY ROD SURF-ORENO

The South Bend Fly Rod Surf-Oreno is a light surface lure. In action it looks more like a bug than a bug itself. Rides the surface and has an easy pick-up. Fishermen prefer to use with a Bass weight fly rod. Substantial in construction, yet light, lure rides high in water. Spinners are loose, giving wounded minnow effect. Practically weedless. Body is 1¾ inches long. Packed one in a box

NO		DOZEN
961RH	White Body Red Head	$9.00

961F	Frog Back	9.00

HEDDON-STANLEY SILVER KING

Specially designed for salt water fish and muskellunge. Made with No. 10-0 Victoria Bright hook with round needle point. Note the flexible hook, which prevents the fish from shaking loose from the bait. Used successfully for Tarpon, Barracuda, Sailfish, and other similar salt water species. Has 7-inch phosphor bronze wire leader with revolving spoon.

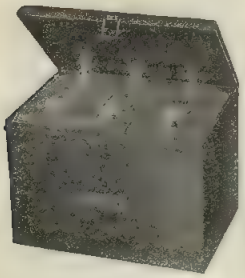
L CANTEEN HOLDERS AND SERVICE UNITS

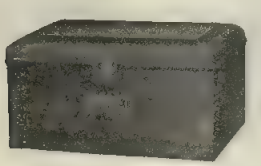
AUTO CABINETS



Bear

In this elegant cabinet set the gasoline, oil and water canteens are enclosed in a handsome metal case of heavy steel, which is japanned and baked and will withstand all weather conditions. The cabinet does not project beyond the edge of the running-board. It is secured to the running-board by bolts and plates made especially for this purpose or wood screws and it is impossible to remove it from the running-board unless you demolish the cabinet. 2 gallons water, 2 gallons gasoline, 1 gallon oil.

NO.	Size Cabinet	Wt. Each	EACH
1	10½x15x11 in.	20 lb.	$12.70



Bear

The canteens in the Bear Brand Auto Cabinet No. 2 are exactly the same as the canteens in the Auto Cabinet No. 1, except the canteens are smaller. 1 gallon water, 1½ gallons gasoline, 1 gallon oil.

NO.	Size Cabinet	Wt. Each	EACH
2	10½x15x8 in.	16 lb.	$11.90

ELECTRIC FLASH LIGHTS

EVEREADY

All flash lights are fitted with new patent Mazda metallic filament incandescent lamp, which gives a brighter light and longer life to the battery.

The vest pocket batteries will give from 3000 to 4000 flashes, and the tubular sizes from 5000 to 6000.

The pocket sizes will burn continually from two to three hours; the tubular will burn from 4 to 5 hours, but if used half an hour or an hour at a time, they will give considerably longer service. They're for flashes of short duration, and not for continuous burning.

EVEREADY—Tubular.

Black ribbon designed metal case, nickel plated trimmings; with non-short circuiting feature; extra large beveled lens; extra large silver plated reflector; with off and on switch and permanent contact.

BASS BUGS

Heddon—The Bug with the Hackle

The new Heddon bass bug has solid cork body, perfect hook with turned down eye. Hook is firmly imbedded in the cork and tied securely, the whole body finished with Heddon's superior enamel. The wings, hackle and tail are securely tied. When in the water, the hackle spreads and serves to conceal the hook point. It also helps support the wings. Will light on the water in the proper position with the hook down. For fish-getting qualities these bass bugs stand supreme.

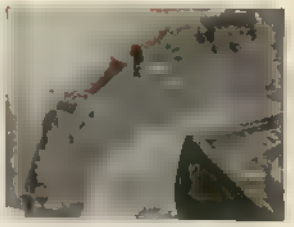
MAY TIME... PLAY TIME... PROFIT TIME

IT'S true! May time is Profit time for enterprising toy shops...if stocks and displays are up to the minute. For this is the gay season, when youngsters are out of doors...old playthings are laid aside...new toys, timely toys are needed. Are you helping their Mothers and Dads "deliver the goods"?

Many numbers in the Kilgore line of Year 'Round Toys for Girls and Boys are "made to order" for May and June and summer play. Attractive furniture sets for the girls . . . interesting motor toys and planes for the boys. All Kilgore toys are colorful, durable, and inexpensive. It's a profitable line to handle. Ask your jobber about Kilgore toys or write direct for literature.

This is the SALLY ANN Nursery Set...a great number for little girls . . . five interesting toys.



And this is the BILLY-BOY Railroad Toy Set...Engine ...Tender...Tank Car...Passenger and Caboose.

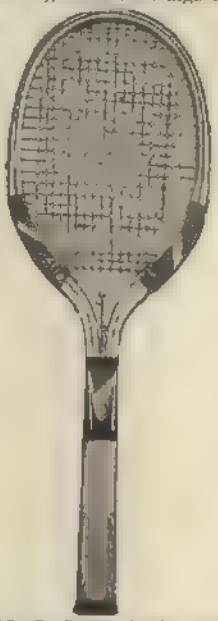
New "Speed Models" Tennis Rackets

A feature of outstanding merit in the Wilson line of rackets is the use of moisture-proof stringing in all numbers, from the top numbers down to the most moderate priced numbers. Moisture proof stringing as its name implies, is not affected by dampness or climatic conditions as it is stronger and more durable to begin with at the start; moreover W. Wilson rackets strung with moisture-proof stringing carry a metal tag specifying the wind and tensile strength of the strings used

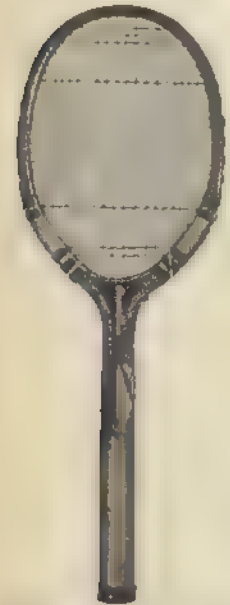
G426 1 Geo. Agutter Forest Hills Model The Agutter Forest Hills Model is the result of the latest and most modern ideas in racket construction. It has a new open throat model. Strung with special waterproof strings, it is a racket that will stand up under the hardest kind of play. Strung with waterproof strings. A fine fast racket giving maximum speed with the greatest strength **$21.30**

G426 2 Laminated "Speedwood" AAA racket The very latest development in tennis rackets. Has a one-piece laminated frame. Frame extends around shoulders and down well into the handle. Strung with 140s Crest purple waterproof strings, [illegible] a center square of white lock stitch. Lyon & Healy trademark on shoulders with blue fibreloid and blue and white cable cord, making a very attractive and substantial tennis racket **$21.50**

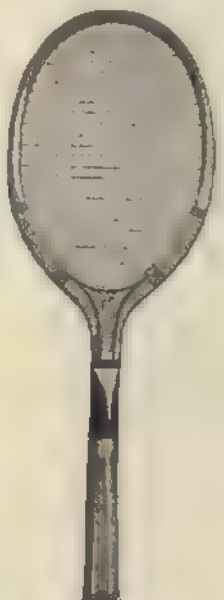


G426 3 Super Stroke The racket with the perfect "feel" and balance. Finest possible quality second growth white ash. Duco finished. Triple reinforced and bound at throat and shoulders. Four-sided white basswood handle. Strung with [illegible] waterproof strings **$19.20**

G426 4 Wimbledon A very beautiful racket [illegible] three-piece construction with laminated [illegible] Strung with maroon [illegible] white interlocking [illegible] beautifully with the trim on the frame. **$16.25**



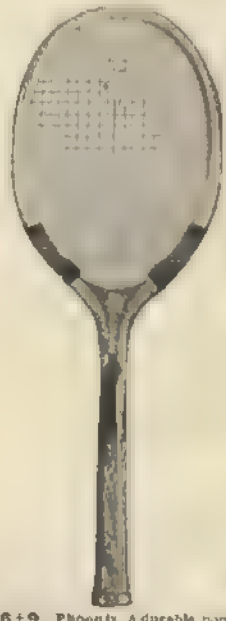
G426+5 Onwentsia Has a full [illegible] a racket of balance, [illegible] and grip with [illegible] The cable cord stringing of the [illegible] with silk stringing and white interlocking [illegible] **$11.50**



G426 6 Golden Star Racket The [illegible] with green fibreloid wraparound shoulders **$9.25**

G426+7 Wilson Indestructo steel racket. The [illegible] steel [illegible] a balance [illegible] Strung with [illegible] A special [illegible] feel of gut and will not become [illegible] be supplied in light, medium and heavy weights **$9.10**

G426+8 Premier. This is the first season during which we [illegible] steel with [illegible] colored cable cord. String with [illegible] A full [illegible] beginners or juvenile tennis players. **$4.25**



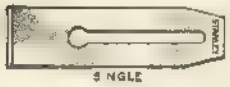
G426+9 Phoenix A durable, popular priced racket. The quality which [illegible] inside beveled bow reinforced with purple [illegible] The new feature [illegible] the bow is cut away so that the silk strings [illegible] This is a very handsome racket for the money **$7.50**

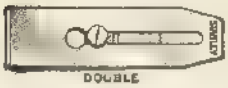
NOTICE

All our tennis rackets are now finished in a clear, colorless **Duco** that enhances the beauty of the natural wood in a natural finish. Duco is especially suitable for tennis rackets [illegible] and is many times more durable [illegible] climatic conditions than ordinary varnish and thus is more preserving to the racket than ordinary varnish.

PLANE IRONS

STANLEY





For Bed Rock and Bailey Iron and Wood Planes

The proper bevel for grinding the cutter is at an angle of about 25°. This angle should be observed when re-grinding or re-honing the cutter.

The single irons of the same size are identical; thus a 1¾ inch single iron fits all planes that take a 1¾ inch plane iron. The cap iron (which combined with single iron makes the double iron), however, is not the same in all cases on the iron, wood and circular planes and is therefore not interchangeable. In ordering be sure to give the number of the plane, size of iron and state whether single or double irons are required.

	Single, Each	Double, Each

STANLEY PLANS

ASSORTMENT K

Assortment K includes the attractive display card shown, and 42 plans listed below. The card is produced in three colors and is printed on heavy cardboard. A pocket is provided for holding a few of the plans. Each plan contains information on the materials needed, complete directions for making the object shown, as well as a list of the tools needed to do the work. The plans have been carefully laid out, with numerous illustrations so as to make the work easy. There is an increasing number of people who are finding real pleasure in making things with their own hands. Stanley Plans have been designed to help them. This display ties your store in with Stanley National Advertising to the boy, homeowner, handy-man and general public.

BOOKS
STANLEY WOODWORKING

A complete woodworking guide with over 150 illustrations and diagrams.

No. 157. Bound in blue cloth, 185 pages. Wt. ea., 1⅓ lbs....Each **$1 00**

CABINET SCRAPERS
STANLEY

Japanned

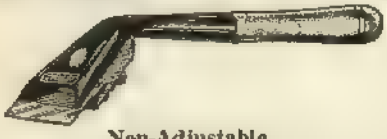
Has a blade that may be sprung to a slight curve by means of a thumb screw, giving ease of operation and quickness of cut. Handles are raised to protect user's hands, and pierced so that tool can be hung up out of the way. Body and handles cast in one piece.

No. 80. Length 11½ in.; 2¾ inch blade. Wt. each, 1¾ lbs...Each **$1 55**
Extra Blades. Wt. ea., 1 oz.Each **$0 30**

Nickeled

Has a rosewood face for use in finest cabinet work. Handles are raised to protect hands, and pierced so that it can be hung up out of the way. Body and handles cast in one piece.

No. 81. Length 10 inches; 2½ inch blade. Wt. each, 2¼ lbs....Each **$2 40**
Extra Blades Wt. each 1 oz Each **$0 30**
Extra Bottoms.....Each **60**



Non-Adjustable.

While this scraper can be used for all kinds of scraping, it is especially recommended for scraping floors on account of its strength and form. The body is ground smooth and japanned. The handle is of hard wood, securely fastened. The blade is sharpened at both ends. Japanned.

No. 282. Blade, 3 inches wide; length, 13 in. Wt. 1⅔ lbs...Each **$1 50**
Extra Blades. .....Each **30**

CABINET SCRAPERS
STANLEY

Adjustable.

Has an adjustable single handle which can be tilted to give blade any angle desired. Special blades of different forms and widths can be securely held in any position required, thus permitting tool to be worked in many places inaccessible to other scrapers. Handle and knob of hardwood.

Japanned. Nickel Plated Trimmings

No. 82. Length 14½ inches; 3 inch blade. Wt. each, 1¾ lbs....Each **$1 75**
Extra Blades. Wt. each, 1 oz.Each **$0 30**

One in a box.

STARRETT'S UNIVERSAL

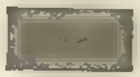
Adjustable.

All edges ground perfectly square, which, by using both sides, gives eight sharp cutting edges; adjustable to any angle.

No. 194. Wt. each, 1¼ lbs. Each **$1 50**
Extra Blades. Wt. ea., 4 ozs. Each **30**

One in a box.

DISSTON



Cast Steel.

Sizes, in.	2½x5	3x6	4x6
Wt. doz., lbs.	2	3	3¾
Doz	$1 80	3 00	3 60

STANLEY

No. 0. 2⅜x6 inches. Made of high grade English steel, and great care is taken to give them a special temper for this work; for use in No. 12 Stanley scrapers. Wt. doz., 3 lbs. Dozen **$6 00**

Half dozen in a box.

SCRAPER BURNISHERS
STANLEY

No. 176. Used for turning edges on cabinet scraper blades. Blade oval shaped, forged from finest tool steel and is glass hard; blade is held firmly in the handle by extending nearly through it and is pinned at the end; hardwood handle, shellac polished; 8 in. overall, blade 3½ in. Wt. doz., 2½ lbs.....Dozen **$9 00**

Half dozen in a box.

BOX SCRAPERS

Malleable Iron Frame. Wood Handle

No. 70. Adjustable, 2 inch steel cutter; maple handle 13 inches long. Japanned. Wt. doz., 12 lbs. Dozen **$13 50**

Extra Blades .....Dozen **$3 60**

Half dozen in a box.

Drop forged curved blades, polished on the outside; smooth handles

No. 74. Width of blade 4 ins., width between handles 3 ins, length 7 ins. Wt doz., 8 lbs.....Dozen **$12 00**

Warrented steel; heavy ferrule; shank is extended half way through the handle and held by rivet; removable blade; rosewood finish handle.

No. 6. Width of cutting edge 2¾ inches, length of handle 7½ inches; length overall 12 inches. Wt. doz., 8½ lbs. .....Dozen **$15 00**

Half dozen in a box.

EXTRA BLADES

For No 6 Box Scrapers..Dozen **$9 00**

STEELCRAFT MINIATURES G

MARION STEAM SHOVELS

All parts constructed of heavy stamped automobile steel. Black enameled body, boom, shovel and base; red roof and wheels Will automatically release sand at any height, as body swivels on the base the bucket can be emptied in any position. Large casters make pulling easy.

NO.	Size In.	lb Each	EACH
75	71x14x21	12	$3.75

ARMY TRUCK

Built entirely of steel. Body in fawn, wheels in red baked enamel. Double disc wheels with large solid rubber tires.

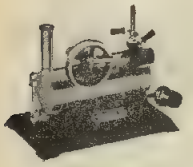
MINIATURE ENGINES

STEAM

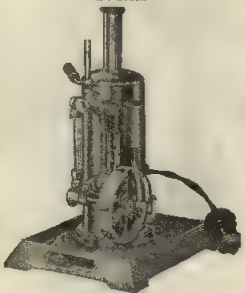


Empire—Electric

A regular steam engine, horizontal type, with an electrical heating element to create steam. Equipped with throttle for varying speeds and a real steam whistle. Safety valve and water gauge prevent excess steam pressure. Its assembly is a seamless drawn copper boiler, a heavy cast base, strong brass running parts and steel connections and highly nickel plated. Operates on any standard light socket without transformer.

NO.	Size In.	Watts	lb Ea	Std. Pkg.	EACH
B30	9¼x5¾x7½	300	7	3	$13 00

STEAM

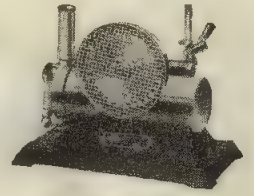


Empire—Electric

This model is exactly like B30 the horizontal type. The only difference is found in the vertical construction. See Model B30 for mechanical construction.

NO	Size In	Watts	lb Ea	Std. Pkg.	EACH
B31	7x6x10	350	6	3	$12.70

STEAM

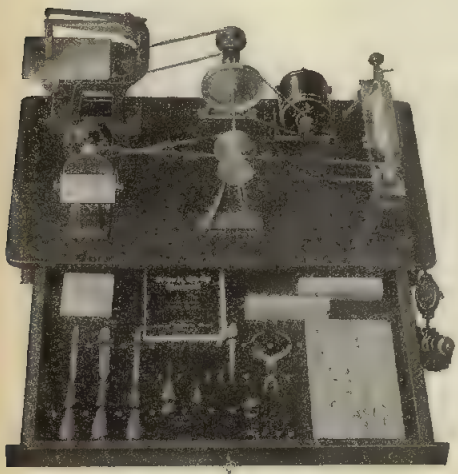


Empire—Electric

Miniature duplicate of large single phase steam turbines. Equipped with throttle, whistle, safety valve, water gauge, seamless drawn copper boiler with heavy cast base, strong brass running parts and steel connections, accurately machined and nickel plated.

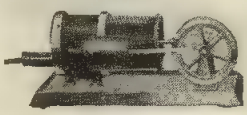
NO.	Size In.	Watts	lb Ea.	Std. Pkg.	EACH
B35	9¼x5¾x7¾	400	6½	3	$12.00

KNAPP WORK SHOP



One in a wooden box.

HOT AIR



Empire—Electric

Driven by hot air expansion. Operates on a standard electric light socket, develops unusual power and will run for hours. Assembled on a heavy cast base with brass running parts and steel connection. Finished in bright red color and nickel plated trimmings.

NO.	Size In.	Watts	lb Ea.	Std. Pkg	EACH
B38	12x6x5¾	350	11	2	$17.50

KNAPP WORK SHOP

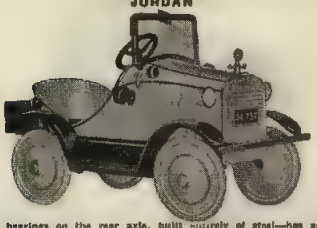
Consists of motor, jig saw, lathe, sander and grinder transmission, special steel cutting tools, one set centre drills. Jaw chuck drill attachment for lathe, calipers, 12 sheets sand paper, bottle of glue, awl screw driver, complete set of belts; already connected, 2 wood blocks, one jig saw board plain, one work shop manuel; one instruction sheet for assemblying etc. Board marked for exact location of tools. Packed knocked down, to prevent breakage.

NO.	Size In.	lb Ea	EACH
895	26x14½	45	..... $40.00

One in a carton.

STEELCRAFT VEHICLES G

JORDAN

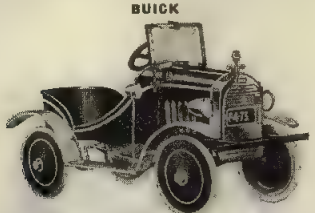


Ball bearings on the rear axle, built entirely of steel—has adjustable pedals, bright radiator, motometer, horn, windshield with rear vision mirror, headlights, parking lights and tail light, front bumper, seat cushion, and trunk on rear; also license plate and designed instrument board. Double disc wheels.

Finish—Body blue baked enamel with cream striping, wheels in red baked enamel, fenders, running boards, and undergear in black baked enamel.

NO.	Lgth. In.	Wd. In.	Wheels In.	Pedal Adj. Yrs.	Lbs. Ea.	EACH
16	41½	20⅝	10½x2	3 to 7	75	$22.00

BUICK



As illustrated, equipment includes:. Adjustable pedals, ball bearings on rear axle, carbon steel springs, motometer, horn, steering wheel, windshield with rear vision mirror, bullet type headlights, running board spotlight, parking lights, tail light, designed instrument board, front bumper, license plates, heavy steel fenders and running boards, and seat pad. The radiator is nickel plated. Double disc wheels.

Finish—Body, seat and wheels in lustrous black baked enamel with orange striping. Fenders, running board and chassis in orange baked enamel.

NO.	Lgth. In.	Wd. In.	Wheels In.	Pedal Adj. Yrs.	Lbs. Ea.	EACH

WRENCHES

BRACE SOCKETS

These wrenches are made of malleable, hardened so as to give the greatest durability together with maximum strength. They are nicely finished. A shoulder prevents the nut working far up into the wrench and the open shank prevents clogging with dirt, also enabling the user to handle the wrench in places where a brace would not go

WRENCHES

WATER PUMP PACKING NUT

Bonney—Chrome-Vanadium Nickel Plated

30° Angle of Opening

One of the hardest adjustments on a water cooled motor is the water pump packing nut. This nut is usually of brass and very thin. It should be tightened only with a wrench and never with a drive punch and hammer. Wrenches to do this work must be very thin yet short to fit into the narrow space in which the pump is located. These wrenches are designed especially for this work and their use for other classes of work or with added leverage is not recommended.

NO.	Milled Opening	Lgth.	Thickness of Hd.	Oz. Each	EACH
1232	1 "	7 "	1/4"	4 1/2	$1.75
1240	1 1/4"	7 "	3/8"	4 1/2	1.75

All Ingersoll Watches must be returned direct to factory by consumer or retailer for repairs.

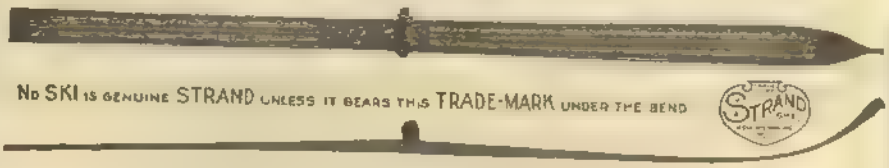
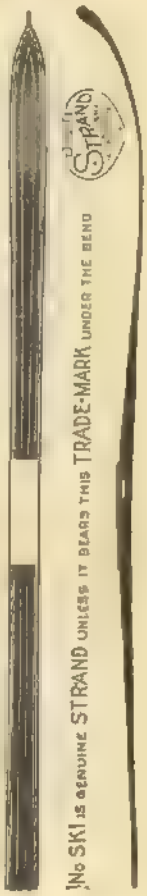
SKIS, SKI POLES, SKI WAX





NORWAY PINE SKI, "STANDARD" MODEL, NATURAL FINISH

These Skis are made from the highest grade quarter sawed Southern Yellow Pine. This material is sawed for our special purpose and every ski is guaranteed CUT EDGE GRAIN, which makes them absolutely SLIVER PROOF. The material is strong and hard, making a very smooth running surface, and these skis are not to be compared with ordinary Pine Ski. They are finished with two coats of spar varnish in the natural color and attractively decorated with grooved stripes.

		Per Pair
No. 4 P 4	ft. long.	$1 25
No 5 P 5	ft. long.	2 00

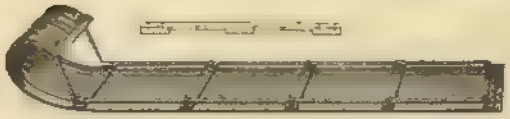
STRAND TOBOGGANS



STRAND RE-ENFORCED TOBOGGANS

These are made of Hardwood finished in natural wood with one coat of shellac on top. As the cross section above the toboggan cut shows the middle and two outside slats are thicker than the other four. This adds greatly to the strength of the toboggan, and as it decreases the running surface on an iced slide it will increase the speed and also make it a great deal easier to steer in the snow. Note the long graceful bend, which enables it to take a bump without a jar and also makes it run easy in deep snow. They are supplied with heavy rope, fastened with leather loops. STRAND TOBOGGANS are made in lengths 6, 8 and 10 feet, or longer.

6 ft. Toboggan, each.....$10 50 8 ft. Toboggan, each.....$14 00

10 ft. Toboggan, each.....$17 50

TOBOGGAN CUSHIONS

These Cushions are made of Brown Canvas, stoutly stuffed and tufted and equipped with laces for fastenings. The length should be one foot shorter than the toboggan. Sold by the length.

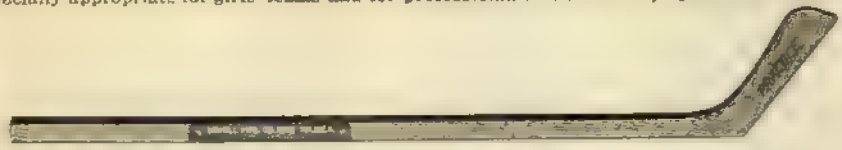
For 6 ft. Toboggan, each.....$4 50 For 8 ft. Toboggan, each.....$6 00

For 10 ft. Toboggan, each.....$7 50

HOCKEY STICKS

Per Dozen

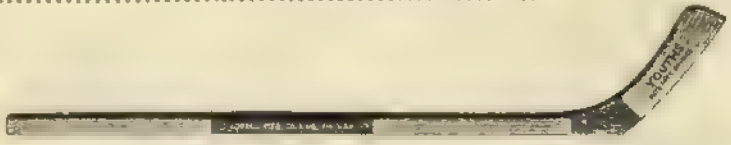
DOMINION — This is one of the most popular patterns made and is a high grade stick, is somewhat lighter in weight. Especially appropriate for girls' teams and for professional and amateur players who demand lightness $24 00



PRACTICE — A stout stick—very strong and rugged. Serviceable for practice or general play. Made of good quality Rock Elm 20 00

COLLEGE — Description practically same as Practice. One of the most popular sellers for all round use. Will give best of satisfaction..... 16 80

SCHOOL — Regulation size stick. Plenty of material to permit hard usage. Black paint at heel. Very popular design 12 00



YOUTHS — A decidedly good stick for young fellows. Blade painted a rich blue. Made of good quality lumber .. 8 00

BOYS — Made to suit the younger lads. Natural wood finish; very strong and serviceable..... 4 80

Invincible Wood and Iron Clubs

FOR beginners and those who wish serviceable clubs at a moderate price, Invincible Golf Clubs offer a very satisfactory purchase. Two wood clubs and six irons, all with standard, large size heads are included in the line. Shafts are of first grade hickory. Grips are of smooth leather.

G1250—DRIVER. Large, well proportioned head with glossy black finish. Lengths, 43 to 44 inches ..... Each 2.50
G1251—BRASSIE. Similar to No. G1250 Driver, except in loft. Lengths, 43 to 44 inches 2.50

G1252 G1253

Chromium Plated

G1252—DRIVING IRON. Lengths, 38 to 39½ inches ..... Each 2.50
G1253—MIDIRON. Lengths, 37½ to 39 inches 2.50

G1254 G1255

Chromium Plated

G1254—MASHIE. Lengths, 36 to 37½ inches ..... Each 2.50
G1255—MASHIE NIBLICK. Lengths, 35 to 36½ inches 2.50

G1256 G1257

Chromium Plated

G1256—NIBLICK. Lengths, 35 to 36½ inches ..... Each 2.50
G1257—PUTTER. Lengths, 33 to 35 inches 2.50

N-Line Special Woods and Irons

A popular price line of golf clubs, especially suitable for beginners. Wood clubs are of the popular large size patterns with attractive and durable finish. Iron clubs are large size, standard models, nickel-plated to give a bright finish and to resist rust. Heads carry distinctive marking, showing the range of the important clubs. Shafts are of good hickory. Grips of red embossed leather, topped with aluminum caps.

Special Wood Clubs

G1222—DRIVER ..... Each 2.70
G1224—BRASSIE 2.70

Nickel Plated Irons

G1288—DRIVING IRON ..... Each 2.70
G1289—MIDIRON 2.70
G1290—MASHIE 2.70
G1291—MASHIE NIBLICK 2.70
G1292—NIBLICK 2.70
G1293—PUTTER 2.70

Hollywood Clubs

These clubs are designed especially for beginners. Their quality is excellent considering their remarkably low price. The wood clubs have stained persimmon heads; the irons have hand-forged steel heads. Shafts are of hickory with calfskin grips.

G1858—DRIVER ..... Each 1.80
G1859—BRASSIE 1.80
G1860—MIDIRON 1.80
G1861—MASHIE 1.80
G1862—PUTTER 1.80

Lo-Skore Matched Irons

Lo-Skore matched irons are made by hand of selected materials carefully fashioned to provide graduated and related clubs. Heads have a chromium steel finish for protection against rust. Shafts are black steel or select second growth hickory. Well wound calfskin grips with aluminum caps.

The following sets all contain five irons: Mid-Iron, Mashie, Mashie-Niblick, Niblick and Putter

Hickory Shafted Matched Sets

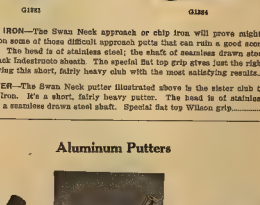
Steel Shafted Matched Sets

G1801—Lo-Skore Men's Matched Set ..... For set 36.65
G1803—Lo-Skore Ladies' Matched Set 36.65

Swan Neck Chip Iron and Putter

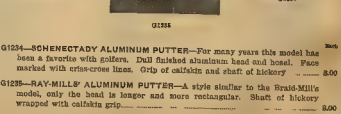


G1383 G1384

G1383—CHIP IRON—The Swan Neck approach or chip iron will prove mighty valuable on some of those difficult approach putts that can ruin a good score so easily. The head is of stainless steel; the shaft of stainless drawn steel with a black Indestructo sheath. The special flat top grip gives just the right feel to swing this short, fairly heavy club with the most satisfying results.....Each 11.50

G1384—PUTTER—The Swan Neck putter illustrated above is the sister club to the Chip Iron. It's a short, fairly heavy putter. The head is of stainless steel with a seamless drawn steel shaft. Special flat top Wilson grip.....11.50

Aluminum Putters



G1234 G1235 G1236

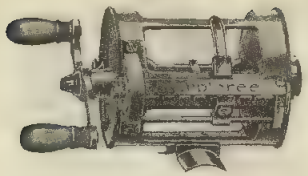
G1234—SCHENECTADY ALUMINUM PUTTER—For many years this model has been a favorite with golfers. Dull finished aluminum head and hosel. Face marked with criss-cross lines. Grip of calfskin and shaft of hickory ..... Each 8.00

G1235—RAY-MILL'S ALUMINUM PUTTER—A style similar to the Braid-Mill's model, only the head is longer and more rectangular. Shaft of hickory wrapped with calfskin grip 8.00

G1236—BRAID-MILL'S ALUMINUM PUTTER—A well molded head of solid aluminum metal. Fitted with heat of selected hickory shaft 8.00

FISHING REELS

SYMPLOREEL

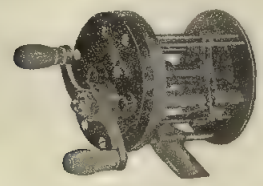


Level Wind

Chromium plated level wind reel, double handle. Well made and designed. Adjustable reciprocating shaft bearing, a feature found in no other level-winding reel.

Packed in our special anti-tarnish jeweler's bags, one in a box.

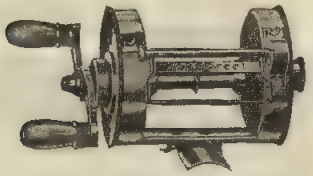
NO.	Cap. Yards	EACH
252-S	100	$10.00



Level Wind

Similar in mechanism to 252 but with bakelite (black) sides plates.

NO.	Cap. Yards	EACH
752-S	100	$7.50



Level Winding—Non-Back-Lash

Chromium plated level wind non-back-lash Symploreel with a practical, simple come-apart feature for cleaning and oiling. Tubular construction. The level winding feature is of positive operation. Every weight of bait, wind condition and length of cast can be met by this reel. This combination of non-back-lash and level winding prevents snarled line.

One in a box—in an anti-tarnish jewelers bag.

NO.	Cap. Yards	EACH
257-S	100	$12.50

BRONSON MODERN

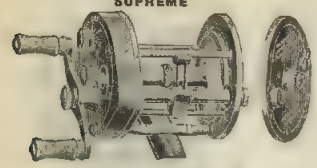
FISHING REELS

SUPREME



Pfluegers—Level Wind

Anti-Back-Lash mechanism is contained within the reel, automatically thumbs the spool and stops the same the instant the bait strikes the water, thus preventing all possibilities of backlashing. The adjusting screw with dial regulator is so constructed that any tension desired can be secured by simply turning the adjusting screw right or left and can be thrown off altogether, thereby making an open Level Winding Reel—Anti-Back-Lash made of nickel silver, light and strong.

Elektrische Eisenbahnen

nach dem neuen unübertroffenen „Märklin"-System für 20 Volt. Zum Anschluß an Lichtleitung unter Verwendung eines Transformators bei Wechselstrom und eines Emanker-Umformers bei Gleichstrom, durch die die Spannung der Lichtleitung auf ein Maximum von 20 Volt reduziert wird

Electric Railways

The new matchless "Märklin" Safety High Current Electric Railways. Run from the house supply of electricity, the current being reduced to a maximum of 20 Volts, by means of Transformers in the case of Alternating Current, and a Motor Generator in the case of Direct Current

Trenes eléctricos

segun el nuevo insuperado sistema «Märklin» para 20 voltios. Para conectarse a las canalizaciones de luz, empléase un transformador si hay corriente alterna, y un convertidor rotatorio, si hay corriente continua, por los cuales el voltaje de la canalización de luz será reducido a un máxima de 20 voltios

1 R12970/61/3

Elektrischer Zug mit 3 Wagen Spur 0, vor- und rückwärtsfahrend durch Handschaltung, Lokomotive mit Stirnlampe. Schienenoval.
Electric Tram with 3 cars, Gauge 0, reversing by hand, loco with headlight, oval set of rails
Tren eléctrico con 3 vagones, marchando hacia adelante y hacia atrás, lámpara frontal, carriles ovales. Via 0

REVOLO

das neuartige verblüffende Freiluftspiel und Sportgerät. Der Revolo-Rotor wird auf den Wurfstock gelegt und durch hiebartige Handhabung über dessen Ablaufbahn in sausende Umdrehungen versetzt. Durch die starke Rotierung hält sich der Rotor in der Luft und schwebt je nach Luftströmung bis die Umdrehungen nachlassen und kommt dann der Rotor zum Abwurfstand wieder zurück

128/601 35×33 cm

REVOLO

the novel startling open air play and sport implement. Place the Revolo rotor on the throwing staff and put it to whizzing revolutions by handling the staff in a switchlike manner, when the rotor will fly off the staff. Due to its strong rotation the rotor will keep in the air, soaring there until the revolutions diminish, according to the current of air, when it will return to its starting place

REVOLO

el nuevo y sorprendente juego al aire libre y aparato de deporte. Se coloca el rotor Revolo sobre la vara de tiro, y se le da rotaciones zumbantes por manejar la vara en manera de espada. Debido a la gran rotacion el rotor se mantendra en el aire, pasando allí segun la corriente de aire hasta que las rotaciones disminuyan, cuando el rotor volvera a su lugar de partida

Die lebenden Puppen und Bären, mit Luft gefüllt, federleicht, lebenswahr, mollig und raumsparend. Gesetzl. gesch. Neuheit 'Snuky'
The living dolls and bears, filled with air, feather-weight, life like, snug and space-saving. Legally protected. Novelty: Snuky!
La muneca y oso viviente rellenadas con aire, livianitisimas, llenisimas de vida, suaves y economizadoras de espacio. Protegidas por patente
Novedad · Snuky!

Baby aus Papiermachee.

Bär unaufgeblasen
Bear unfilled
Osos vacios

Innenhülle aus Gummi
Interior of rubber
Interior de goma

Die Artikel werden in unaufgeblasenem Zustand geliefert und nehmen bei geringem Gewicht nur einen Bruchteil des Raumes ein, der für ausgestopfte Artikel nötig ist. Erstklassiges Material und spezielle sorgfältige Verarbeitung garantieren auch in den Tropen eine lange Lebensdauer

All Snuky articles are delivered in emptied condition, occupying, apart from their extremely light weight, only a fracture of the space required by stuffed articles. First class material and specially careful manufacture warrant a long life to these articles also in the tropics

Todos los articulos Snuky se suministran en condición no soplado, ocupando, fuera de su muy poco peso, solamente una fracción del espacio necesario para los articulos estopados. Material de primera clase y una fabricación especialmente cuidadosa garantizan longa duración tambien en los paises trópicos.

Steiff

STEIFF

KNOPF IM OHR.

Weichgestopfte, unzerbrechliche Spiel- und Reittiere aus feinstem Filz, Mohair oder Wollplüsch in weltberühmter Schönheit und Qualität, wirklichkeitsgetreu und ausdrucksvoll. Alle Tiere haben volltönende Stimme, meist beweglichen Kopf und Glieder, sowie farbige Seidenaugen oder Leder mit Braun. Fahrtiere haben stabiles Eisengerippe, klimabeständige Metallräder mit Gummi und Lenkung. Die beiden letzten Ziffern jeder Nummer bedeuten Höhe in Zentimetern.

Verlangen Sie farbigen Hauptkatalog durch Ihr Einkaufshaus

STEIFF / Button in Ear.

Spiel-Automobile + Serie 2400

Pull Automobiles · Line 2400

Automóviles-juguetes · Serie 2400

So schön kann ich nur mit „Cebaso 2400" spielen!

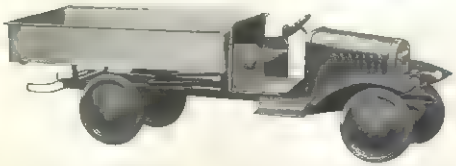
Selten hat ein Spielzeug einen gleichen Anklang gefunden als unsere Automobilserie 2400. Diese Automobile besitzen eine unübertroffene Haltbarkeit, ihr Untergestell ist so stark gebaut, daß sie 100 Kilo tragen, ohne den geringsten Einfluß einer solchen Belastung zu spüren. Die Schutzbleche sind aus starkem Eisenblech gestanzt, schwarz emailliert und im Ofen getrocknet. Die Karosserieen sind aus Holz oder Stahl, die Scheibenräder mit Gummi überzogen. Die Automobile können mit zwei elektrischen Scheinwerfern ausgestattet geliefert werden. Jedes Auto ist in einem Kasten aus starker, weißer Wellpappe verpackt.

Seldom a toy proved to be such a big success as our Automobile Line Nr. 2400. These automobiles are of an unsurpassed durability: their chassis are very strongly constructed and can carry more than 200 pounds. They have been designed as replicas of actual automobiles and are correct in every detail. The fenders are of pressed steel and black enameled. The body work is made of wood or steel, the disc wheels are covered with rubber tires. The automobiles can be equipped with two electric head lights. Each automobile is packed in a strong card-board box.

Raras veces un juguete ha encontrado una aceptación igual al nuestro automóvil serie 2400. Estos automóviles tienen una durabilidad sin rival, su chassis es de construcción tan fuerte que soportan 100 kilos, sin sentir la más mínima influencia de tal carga. Los guarda-barros están estampados de fuerte palastro, esmaltados de negro y desecados en el horno. Las carrocerías son de madera o de acero, las ruedas de disco revestidas de goma. Los automóviles pueden ser equipados de dos proyectores eléctricos. Cada auto va empaquetado en una caja de fuerte cartón ondulado blanco.

My most enjoying toy is my „Cebaso 2400"

Tan bien solamente puedo jugar con „Cebaso 2400"



No. **10/2424 L x Kippautomobil.** Der Kasten ist aus starkem Eisenblech und öffnet sich beim Kippen automatisch. — Dump Truck. Body of steel. The box opens automatically when operated. — Automóvil volquete. La caja es de fuerte palastro abriéndose automaticamente al volcar

Die welthekannte Kartoffel-Pistole

The famous Potato Pistol entirely undangerous!
With this pistol small stoppers are shot off. Cut the latter out of orange-peel or of a slice of a raw potato (¼ inch thick) by means of the nozzle fitted at the mouthpiece of the pistol and pull the trigger. Distance of shot 45 – 50 feet.
Excellent target pistol for children. Every piece in a coloured folding-box.

La afamada Pistola de Patatas sin peligro alguno!
Con esta pistola se disparan pequeños tapones labrados estos de cáscaras de naranjas o de ruedas de patatas de 5 a 6 mm de grueso con la tobera, que se halla en la boca de la pistola.
El alcance de tiro es hasta 15 m.
Excelente pistola de juguete para niños. Cada pieza en una cajita colorada.

METALLBAUKASTEN MÄRKLIN

Construction games

All Main outfits, Supplementary outfits, and the Supplementary outfit for constructing machines and bridges can be delivered now if desired in coloured instead of in black as before at the same prices. The coloured boxes are designed with an additional F to the number and therefore box Nr 14.2 in coloured must be ordered as Nr 14.2F

In schwarzer und farbiger Ausführung. Sämtliche Grundkasten, Ergänzungskasten und der Zusatzkasten für Maschinen- und Brückenbau werden außer in der bisherigen schwarzen Ausführung jetzt auch noch zu denselben Preisen in farbiger Ausführung geliefert. Die Nummern der farbigen Kasten haben die Zusatzbezeichnung F, ein Kasten Nr 14/2 z. B. hat in farbiger Ausführung die Nr. 14/2F

Cajas de construcciones metalicas

Todas las cajas principales, las cajas de ampliación y las cajas de suplemento para construcción de máquinas y puentas pueden suministrarse en ejecución colorada negro conocida y ahora también a los mismos precios en ejecución en colores. Los numeros de las cajas reciben entonces el añadido de la letra F, por ejemplo si se desea recibir la caja núm 14/2 colorada entonces se pide bajo el numero 14/2F

120 212B/52 52—62 cm | **120** 211B 38 32—70 cm | **120** 260B 42 32—52 cm | **120** 267B 42 32—52 cm | **120** 265B 42 32—52 cm | **120** 268B/42 32—52 cm | **120** 268B 42 32—52 cm | **120** 262B 42 32—70 cm

Sico — the prize-crowned wonder-doll, protected by patent, with self-acting, adjustable walking-contrivance

Sicora — the modern wonder-dolls, which walk while moving their head to the right and left, protected by patent

Sico- and Sicora-dolls, are soft-stuffed and unbreakable, have an excellent lasting voice. Wigs can be taken off. By means of the running-shoe, protected by law, the dolls are walking on the smoothest linoleum or inlaid floor. — Deliverable in sizes 38, 42, 52 and 70 cm

Sico la muñeca premiada milagrosa, protegida por patente, con el dispositivo automático, graduable de andar

Sicora — las muñecas milagrosas, que andan mientras mueven la cabeza a la derecha e izquierda, protegidas por patente

Las muñecas Sico y Sicora están de relleno fofo e inquebrantables, y tienen una voz excelente y duradera. La peluca puede ser quitada. Mediante el zapato andador protegido por ley, las muñecas andan sobre el linóleo o tablado embutido más lisos. — Hechas en tamaños 38, 42, 52 y 70 cm

MADAME HENDREN DOLLS

ANNOUNCES

✧

MORE new features have been incorporated in the Madame Hendren line this year than have ever been attempted by any one line before. There are new ideas in babies, girl dolls and also exclusive novelties.

During the Toy Fair, the new line was very favorably commented on by all buyers.

A complete showing will be made in Room 329, Morrison Hotel, during the Chicago Toy Fair. Mr. Nathan Redlich, Jr., and Mr. Adam George will be there to welcome you.

Your inspection and opinion are invited.

An Interesting Showing of Popular Tenor Banjos and the Regular 5-String Banjos

Carefully made of selected materials, prepossessing in appearance, of snappy tone, and priced reasonably low in this important selling.

THE TENOR BANJO has four strings and is tuned A.D.G.C. reading downward. The standard scale of this instrument as adopted by most manufacturers is 23 inches. The music is written in the treble cleff, an octave above the real pitch

No. 7F1403 TENOR BANJO

An excellent model for the money. While low in price it is constructed with skilled hands and merit prevails throughout. 11-inch solid maple rim, veneered with three-ply maple. Solid maple neck with wonder finger board 19 fr. German silver frets and position dots. Headpiece and face of neck covered with walnut. Genuine calfskin head. Nickel-plated top hoop 3/8, 16 nickel-plated brackets. Patent pegs. Furnished in 4-String Tenor Banjo or 5-String Regular Banjo.

No. 7F1403 Tenor Banjo (4 Strings)
Each, ... $14.80
No. 7F1403 Regular Banjo (5 Strings)
Each 16.80

"REGAL" TENOR BANJO No. 7F100

Absolutely reliable and high grade in every respect. Offered in two qualities, as quoted.

Heavy 11-inch rim of 7-ply construction with 22 hooks and large flange type brackets. Resonator is the built-up amplifying type of 5-ply construction, bound on both edges with white celluloid. Center of back neatly inlaid with colored wood blocks. Finished in two tone shaded walnut and hand rubbed and polished. Three-piece hard wood neck and fine ebonized fingerboard with 23-inch scale. Covered calfskin. Good friction pegs. Fine plush lined strings.

No. 7F100 Regal Tenor Banjo (4 Strings)
Each, ... $60.80
No. 7F3100 Regal Regular Banjo (5 Strings)
Each 60.80

"REGAL" TENOR BANJO No. 7F120

Heavy 11-inch rim of fine figured Mahogany hand polished. Twenty-three nickel flange type brackets, nickel-plated and highly polished. Five-ply amplifying resonator with beautiful mahogany back inlaid with colored wood. Bottom edge inlaid with same inlay to match back and both edges are bound with white celluloid. Fifteen inch, French cut-to-a-feet neck, hand rubbed and polished. All leather covered rail is fine. Fine maple bridge with ebony saddle. Nickel plated arm rest. Good friction pegs. Genuine mahogany neck of three-piece construction. Ebonized hand grained finger board with pearl position figures. Very good grade calfskin head. Finest workmanship and finish.

No. 7F120 Regal Tenor Banjo, 4 Strings. Each $48.80
No. 7F3120 Regal Regular Banjo, 5 Strings
Each $48.80

"TONK" SPECIAL TENOR BANJO No. 7F1412 (4 Strings)

Of excellent workmanship, attractive appearance and very reliable throughout.

Bird's-eye maple, 11 inch diameter and of 7-ply laminated construction. Black and white line inlay on side. 20 professional brackets. "L" loop and good quality calfhead.

Neck of maple having an ebonized fingerboard accurately fretted and true in tone. Pearl dot and diamond position indicators. Good grade of Patent Non-Slip Pegs.

Resonator of 5-ply construction. Back and sides of bird's-eye maple. Resonator back has desoleomania design, nickel-plated engraved and perforated flange. Entire instrument is finished in a natural finish, hand polished and rubbed. Nickel-plated extension tailpiece.

No. 7F1412 "Tonk" Tenor Banjo, 4 Strings. Each $26.20
No. 7F3412 "Tonk" Regular Banjo, 5 Strings. Each 26.20

Ideal as Christmas, Birthday or Graduation Gifts

THE "BOSTON WONDER" BOEHM SYSTEM FLUTE
Moderate in Price—High in Quality

Beautiful tone, perfect intonation and ease of blowing are the all unusual features of this new "BOSTON WONDER" model flute. The proper tonal quality combined with the sufficient volume in this celebrated make of instrument, is valued highly by professional musicians who have tried this flute. And as there is no ever increasing demand for a Boehm flute, especially since the adoption of this instrument for use in schools, we highly recommend the "BOSTON WONDER" flute as the most satisfactory and serviceable on the market.

Cylinder bore, silver plated satin finish. Either closed or open "G" sharp key. (Specify which is wanted when ordering.) Furnished complete with cleaner in fine and sturdily constructed keratol covered case lined with velvet. Very desirable for Orchestra or Band work.

No. 7F1007 In "C" for Orchestra

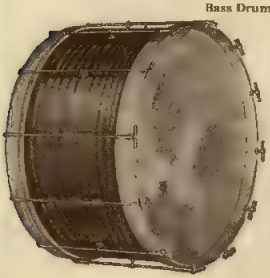
Standard Center Support Model
Bass Drums



This is the most popular model for general professional work. No other drum is so adaptable for general conditions and it has come to be regarded by drummers as the standard type. The center support with tympani handles is a practical improvement that combines easy tensioning with a square cut tools to fine up rods and lower head flesh, also and rods. Mahogany shell.

Solid tympani handles permit easy tensioning. This drum is beautifully hand-rubbed finished and equipped with finest calf heads. A general favorite with the professional drummer. For 14x28 inch size is extra hard to get at times.

Single Center Support

No. 7F199	12x 8 inches	$51.20

Four New and Original Numbers in Juvenile Vehicles

At the Chicago Toy Fair Room 661 Palmer House

Black Beauty

At the Chicago Toy Fair Room 661 Palmer House

Playmates for the kiddies— Profit Makers for you!

This cut shows Black Beauty in motion—a life-like galloping movement with the least amount of energy necessary to create that action

The Red Hawk provides a most realistic action body of plane moves gently upward and downward when driven forward. Speedy, but low and safe.

This new Corcoran line created a sensation at the 1930 New York Toy Fair. It is unparalleled—nothing comes near approaching these wonderful juvenile vehicles that provide joy and exercise to the little rider. The unique mechanical action affords a new thrill that will appeal to every boy or girl. Here is an all around profit making line ready to bring increased business to you. The exceptional business opportunities made possible by handling the Corcoran Green Arrow Line are revealed in the first catalog edition—write for your copy today—Dept. P-4.

Juvenile Vehicle Division

THE CORCORAN MFG. CO.

Cincinnati, Ohio

The Red Bird for the younger girl or boy—safe and gentle planing action develops when in motion. Low to the ground.

The Red Eagle is for the "real" boy. Contains "joy stick" that throws plane into climbing position—after limit has been reached, plane hits "air pocket" and drops back to neutral.

The Foley Automatic Saw Filer

Model F-5 "3-Way"

One Machine Files Band, Circular and All Hand Saws

This machine, with the various attachments described below, files all kinds of hand saws, band saws ⅛" to 4½" wide and cross-cut circular saws 3" to 16" in diameter. Files every tooth exactly the same height, size and spacing, so that every tooth cuts. Band saws can be filed with the desired hook and cross-cut saws with any bevel. Uses standard 3-cornered taper files. Files saws with teeth from 3 to 16 points per inch.

Files all cross-cut and rip circular saw teeth that can be filed with a 3-cornered file. Keeps saws perfectly round. Puts any bevel on cross-cut saws with an accuracy and speed that cannot be duplicated.

Foley-filed saws cut better, faster, cleaner, truer and stay sharp longer. They are far superior to the most expert hand filed saws.

Model "F" on Pedestal

Filing a Band Saw

With band saw attachment furnished with machine, saw is fed through the filer at exact slant needed to give the desired hook to teeth. Band saw wheels can be dismounted when not in use.

Price, $280.00

Model "F-5"

Filing a Circular Saw

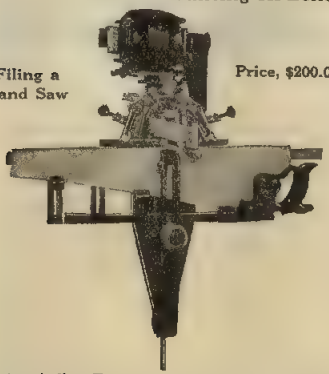
Furnished with one hand saw carrier for straight edge saws, all hand saw attachments, meat saw attachment (for use where blades are removed from frames) band saw attachment, cone arbor for circular saws up to 16" dia. and special rocker arms for band and circular saws. ¼ H.P., G.E., A.C., 110 volt, 60 cycle motor, equipped with switch and 10 foot cord and plug.

Price	$200.00
Pedestal	40.00

Model "F-5" For Mounting on Bench

Filing a Hand Saw

Price, $200.00



Jounts as it files. Every tooth is made exactly uniform at the same time it files. Easily adjusted for all size teeth.

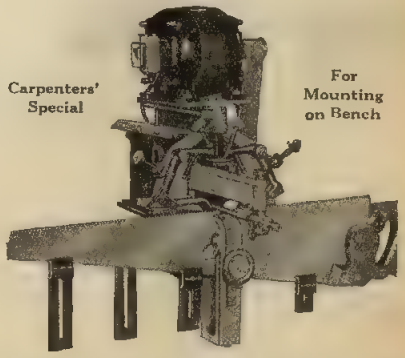
A saw carrier is used in filing and retoothing hand saws, which is easily adjustable to any size cross-cut, rip, back or mitre box saw. Carriers for crown saws can also be furnished.

Motor for direct current or special voltage, extra charge.

Model "F-4"

Carpenters' Special

For Mounting on Bench



For Hand Saws Only. This model files exactly the same as model F-5, except that it sharpens hand saws only. Can be furnished with pedestal, or for mounting on bench. Comes equipped with hand saw carrier for straight edge saws, and all attachments for hand, back and mitre-box saws.

Price $160.00

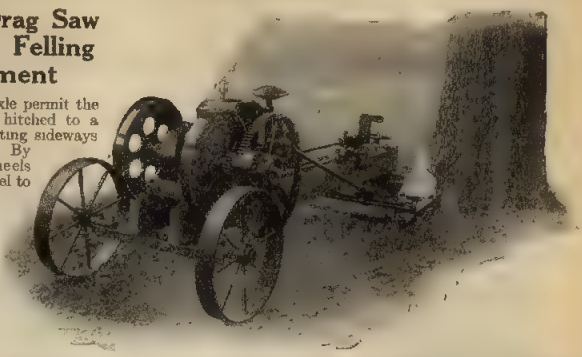
NOTE. Because of Impending Tariff Changes These Prices Are Subject to Change Without Notice.

Log and Drag Saw With Tree Felling Attachment



Reversible spindles on the axle permit the rig to be pushed forward or hitched to a wagon for transporting or shifting sideways from cut to cut when sawing. By simply removing one bolt the wheels can be reversed from road travel to log travel or vice versa. It is unnecessary to carry the logs to the saw. Move the rig to the logs, start the engine, and rest while the saw does the job. With the reversible spindle feature the wheels can be placed in a parallel position so that after the cut is finished the rig can be moved the desired distance to the next cut. With the wheels in this position it also helps materially to steady the rig and hold it in position. After the log is finished the wheels can be reversed if desired and the rig carted to the next log, when cut after cut can be made as before described.

The Tree Felling Attachment cuts the tree off close to the ground in any position or location, and cuts the trunk into the desired length without the necessity of moving the log, and can be easily converted from a tree felling unit into a log saw.

Specifications

Engine—2 H. P. with Magneto ignition.

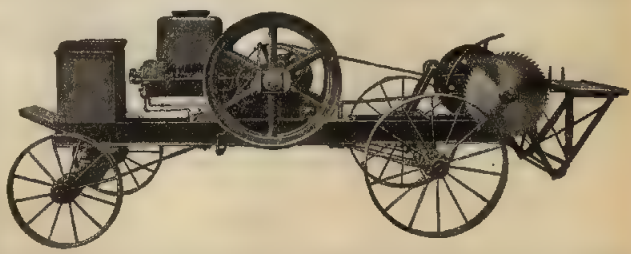
Approximate Shipping Weight 645 lbs.

Price..... $230.00

Channon Portable Wood Sawing Outfit

Horizontal Hopper Cooled Engine, Hit and Miss Type for Gasoline or Throttling Governor for Kerosene



The truck is of steel construction throughout and equipped with a substantially constructed steel tilting saw table. This rig has an additional I-beam extending from the center of the truck to the rear end, thus giving the sawing table a three-point bearing, making a very rigid support. This is an exclusive feature of these outfits and one to be carefully considered by the purchaser. This outfit is shipped completely assembled as illustrated above, including saw, belt, belt tightener, pole, neckyoke and doubletrees. The above illustration shows the hit and miss gasoline type of engine. The throttling governor type is identical with the exception of the engine proper. When ordering, use style numbers given in tables.

BULLS EYE STEEL AIR RIFLE SHOT

The Best Way to Sell Air Rifle Shot

DON'T sell air rifle shot in bulk—it is too untidy and wasteful. The most profitable way is to sell Bulls Eye Steel Shot, in the handy nickel tube, convenient for you and the customer. BULLS EYE Steel Shot now recommended for use by makers of lead air rifles. Order from your jobber or for full particulars write

JEFFERSON TRANSFORMERS keep train customers satisfied

EXPERIENCED toy buyers know that every complaint not only eats into the sales profit but often loses a good customer. Take electrical trains for instance. Their satisfactory operation is assured by the consistent reliability of Jefferson Toy Transformers.

Jefferson Toy Transformers are made by specialists in small transformers, and guaranteed to give complete satisfaction with any train outfit. They provide the highest degree of safety—are ruggedly built to give long service under rough usage—deliver the secondary voltages in small uniform steps, controlling the speed of trains perfectly without the use of a separate rheostat.

Four Jefferson Transformer models operate all makes of electrical trains. This reduces the amount of stock necessary to carry, and to simplify matters for salespeople each carton tells which train outfits that transformer will operate. Stock Jeffersons for profit.

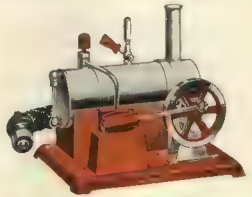
Two Fisted

Double Action

Empire Electric Steam Engine



NEW ENGINE ACCESSORY

Boys are always looking for something new in the way of engine accessories, preferably a miniature model of the *real thing*, which is fascinating to watch and operate.

This Empire Ferris Wheel stands 8" high—has eight swinging carriages—and is finished in bright red duco with nickel plated trimmings.

It runs like any big Ferris Wheel in an amusement park—and sells at a price which can give you a large volume of sales—at a substantial profit. Send the coupon.

THIS year Metal Ware adds an entirely new model to the famous Empire line of electric steam engines.

A new Double-Action engine with special cylinder design which applies power on both the outward and return stroke of the piston.

And like all other Empire Electric Steam Engines, it has a patented electric heating element to create steam, which operates on any standard light socket.

Send for the new folder showing the complete line of Empire Electric Steam, Battery, Magnetic, Turbine and Hot Air Engines. They're the finest, fastest selling engines on the market—and exceedingly profitable to handle.

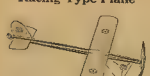
BABY DIMPLES

A NEW baby doll of Horsman quality. She's all smiles and dimples. Lovable from the tip of her dainty bonnet to the hem of her beautiful baby dress. Just the sort of doll to win the heart of any little girl.

Doll Buyers who appreciate quality and anticipate the great demand which consumer advertising will create are now placing their quantity order.

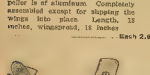
E. I. HORSMAN CO. INC.
MAKERS OF FINE DOLLS
200 FIFTH AVENUE, NEW YORK

Silver Arrow Racing Type Plane



NX8983—RACER—Made of selected Grade A Balsa Wood and braced throughout with aluminum. The propeller is made of shim stock and when wound will fly the plane across the room. Completely assembled except for slipping the wings into place. Length, 13 inches; wingspread, 18 inches..... Per doz. 16.00

NX8984—RACING SILVER ARROW—A bright silver bronze plane, attractively decorated and made of selected Balsa Wood, braced throughout with aluminum. Propeller is of aluminum. Completely assembled except for slipping the wings into place. Length, 13 inches, wingspread, 18 inches ..... Each 2.67

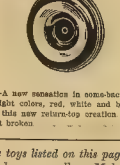


NX8985—SILVER ARROW PLANE—This big plane tears off the ground and soars through the air with all the ear marks of a life size plane. Very stable in the air and constant in its flight. A bright silver bronze plane made of Balsa wood and braced throughout with aluminum. Propeller is of aluminum. Equipped with dual rubber control. Length, 22 inches, wingspread 33 inches ..... Each 4.00

Parachute

NX8215—PARACHUTE—A toy that will prove fascinating to any boy. Silk body and celluloid ribs. Operates by means of a spring. The parachute is shot into the air and unfolds, lighting down gracefully like a real parachute. Size of parachute, 9½ inches..... Per doz. 7.50

"O-Hi-O" Musical Top



NX5761—MUSICAL TOP—A new sensation in some-buck tops. Made of metal enameled in three bright colors, red, white and blue. Spins to its own music. Capitalize on this new return-top creation. Diameter, 2½ inches. Packed two dozen, not broken ..... Per doz. 1.50

Flying Zeppelin

NX3962—ZEPPELIN—A smooth gold finish life-like model of the Graf Zeppelin. Four screw propellers that powerful motor driven it along the floor. Simply by the pressure of the front legs converts it into a glider. Its height from the floor as it runs gives it the appearance of floating through air. Length, 21 inches ..... Each 4.07

Silver Arrow Cabin Type Plane

NX8966—SILVER ARROW—A beautiful model plane with all metal body and propeller and wings of selected Balsa. Wings are bright gold with attractive red decorations. Body is gleaming silver. Patented features enable the packing of the plane completely assembled, ready to fly. When packed it is taken from the box. Length 21 inches, wingspread, 32 inches ..... Each 3.34

NX5967—ACE—Large Miniature reproduction of a man-made sky hawk. A model plane with the body and propeller entirely of metal. Wings are painted in gold with red decorations. The body is gleaming silver. Packed, it comes assembled, ready to fly. Length, 20 inches wingspread, 26 inches. ..... Each 4.34

Pop Gun

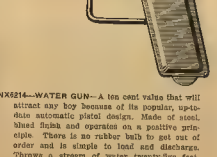
NX8210—BREAK ACTION POP GUN—Embodies all the recent improvements in pop guns. Operates with an easy break action and shoots a cork with a loud noise. Instead of a one-piece trigger, this gun has a separate trigger and trigger guard like the big gun. Stock is finished in bright red enamel. Length, 17 inches ..... Per doz. 4.00

All the toys listed on this page are good spring and summer sellers. Make a summer toy window display and watch your profits mount

Automatic Safety Pop Gun

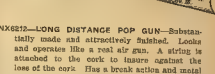
NX821—SAFETY POP GUN—An automatic break action with the metal parts of blued steel and the stock of walnut finish. This gun operates on an entirely new principle, using a spring controlled poppet valve at the muzzle end. Instead of a cork, a leather valve is used, providing longer life, positive action and extra loud noise. The gun loads automatically. Length, 18 inches ..... Per doz. 4.00

10-Cent Water Pistol



NX5214—WATER GUN—A ten cent value that will attract any boy because of its popular, up-to-date automatic pistol design. Made of steel, blued finish and operates on a positive principle. There is no rubber bulb to get out of order and is simple to load and discharge. Throws a stream of water twenty-five feet. Length, 6 inches. Packed one dozen, not broken ..... Per doz. 1.60

Long Distance Pop Gun



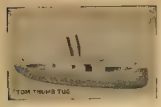
NX8213—LONG DISTANCE POP GUN—Substantially made and attractively finished. Looks and operates like a real air gun. A string is attached to the cork to insure against the loss of the cork. Has a break action and metal parts of blued steel. Handle is walnut finished. Length, 22 inches ..... Per doz. 8.00

Rapid Fire Pop Gun

NX8213—DOUBLE ACTION POP GUN—A delight to everybody because it is safe, sane and substantial. Loads automatically, explodes with both forward and backward movement of hand piece. No flying cork or any possible means of injury. Stock and hand piece are of beautiful walnut finish and the metal parts are of blued steel. Length, 27 inches ..... Per doz. 13.50

Speed Boats

Tug Boat



NX8587—**TOM THUMB TUG BOAT**—This model will float and has flat bottom so that it also may be used as a pull toy. It is finished in vermilion, yellow and black. Equipped with brass rails, portholes and brass chocks and also has a cast iron anchor. Length, 11¾ inches. Height, 6¾ inches ..... Per doz. 16.00

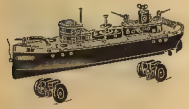
Airplane Carrier

NX8508—**LIBERTY AIRPLANE CARRIER**—The Libertator is an exact miniature of the big airplane carriers now afloat on the high seas. Cabins and gun turrets set to one side to allow airplane take-off space full length of deck. Four glider type planes may be actually released from deck by means of catapult. Scale model. Length, 24 inches. Equipped with "Liberty" launch, Sam's carriers, "Lexington" and "Saratoga." Has two spring motors, twin propellers and rudders, nickeled handrail, masts and periscope. Detachable wheels enabling boat to be used on land or water. Length 24 inches ..... Each 16.00

Mystery Ship

NX8793—**MYSTERY SHIP**—Because of its mysterious, thrilling, realistic action, the mystery boat is creating a sensational interest among every red blooded American boy. Just a glimpse of the motor reveals the secret. Powered by a real 2-cycle gas-gal ound of a big motor boat arouses the curiosity and interest of every youngster. There are no springs or parts in the mystery boat, the moving power being derived from a small boiler which uses canned heat (Sterno) for fuel. A teaspoonful of fuel will operate the mystery boat for 15 minutes. Ideal for use in the bath tub, indoors or out, summer or winter. It always brings amusement and instructive pleasure. The year-round sales features have made it the talk of the toy world. Attractively finished in bright enameled colors ..... Each 1.20

Fire Boat



NX8506—**NEW LIBERTY FIRE BOAT**—Closely follows the design of the powerful fire boats that guard the ships and buildings of our metropolitan harbors. A durable pumping mechanism, concealed in the hull and operated by the center plunger, draws in the water through a suction line and throws a stream a distance of 25 feet through the nozzle mounted on the front deck. This nozzle may be turned in any direction. Detachable wheels enabling boat to be used on land or water. Length, 22 in...Each 10.00

Destroyer

NX8505—**NEW LIBERTY DESTROYER**—The response to this "miniature watchdog of the seas" will be immediate and enthusiastic. A perfect replica of Uncle Sam's Submarine Destroyer. The long, low lines, the revolving gun turrets, the four funnels indicating great speed—these are appeals which no boy will be able to resist. A reel torpedo tube operated by a lever sends wooden missiles thru the water. Detachable wheels enabling boat to be used on land or water. Length, 26 inches ..... Each 13.32

Liberty Scooter

NX8191—**LIBERTY SEA SCOOTER**—This miniature scooter is full of fun and fast and has the appearance and gives the thrill of a large one going a mile a minute. It has a heavy motor that propels it through the water making it one of the speediest of model craft. Finished in bright red and blue colors. Length, 14½ inches. Packed one in a box. ..... Each 3.34

Liberty Tug and Scow

NX8902—**LIBERTY TUG AND SCOW**—The fruit of weatherproofed veneered wood and metal lithographed red, blue, and yellow. Scow is made of wood, enameled blue. Length of tug, 17 inches; of scow, 18 inches. Packed one in a carton ..... Each 4.66

Airplanes

Invader

NX8709—**INVADER**—Cabin type monoplane made of balsa wood with landing gears and wheels of celluloid. Decorated in bright colors. Length, 14 inches. Wing spread, 24 inches. Packed in individual boxes ..... Each 4.00

NX8721—Complete set of materials for making Invader model ..... Per doz. 16.00

Monarch

NX8713—**MONARCH**—A junker type plane with a cabin. Made of balsa wood with silk covered adjustable and demountable wings. Length, 24 inches. Wing spread, 36 inches. Packed in individual boxes ..... Each 13.32

NX8720—Complete set of materials for constructing the Monarch model ..... Each 8.66

Pacemaker

NX8715—**PACEMAKER CONSTRUCTION SET**—An airplane designed for indoor flying. Kit contains complete parts for building an indoor tractor type of plane. Parts are made light in weight in order to obtain the greatest possible duration. Only the finest materials are used. Complete instructions in every detail so that a boy can easily construct the entire plane correctly ..... Per doz. sets 16.00

Meteor

NX8711—**METEOR**—Built for duration with feather-weight twin propellers. Has wood frame and Japanese paper wings. Length, 42 inches. Wing spread, 39 inches. Packed in individual boxes ..... Each 10.00

NX8718—Complete set of materials for making the Meteor model ..... Each 3.34

Loafer

NX8717—**LOAFER CONSTRUCTION SET**—In making test of this model several of the test planes passed out of sight and were lost after being in the air over 21 minutes. All parts are die cut including the wheels, with large hubs, also formed propeller and each step of assembly is explained in the instruction book. Body is 24 inches long. Flying weight, including rubber, about 1¾ ounces. Kit contains formed wire parts, best wood propeller as well as propeller blank for carving in order to enter contests, large can of glue, dope, special paper for wing covering, rubber motor and winder. Each 4.66

HUBLEY

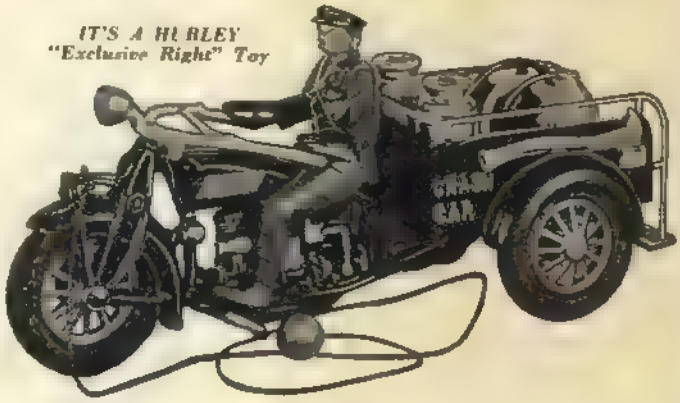
CAST IRON TOYS THAT SELL

THREE NEW HUBLEY TOYS THAT WILL HELP YOU DOUBLE YOUR TOY SALES

THE three toys shown here will be very fast makers because they enable you to make double sales of HUBLEY TOYS. Every boy who owns one of our famous "Exclusive Right" Harley Davidson or Indian Motorcycles will want these new motorcycle toys. Girls with auto toys will want the transport. They will sell singly or in units.

The Crash Car at the right—Hubley Toy No. 27—is 11½" long. Has rubber tires, steering suitable rider, and motor click. It carries a hose reel with hose and nozzle, gasoline can, first aid box and a removable axe on each side. The front part is a copy of the latest Indian model.

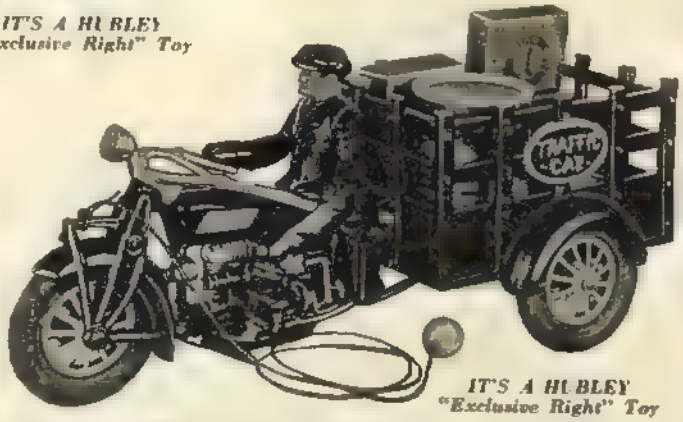
IT'S A HUBLEY "Exclusive Right" Toy



IT'S A HUBLEY "Exclusive Right" Toy

Hubley Toy No. 26—Traffic Car—is 12" long. Its front section is the newest Indian model. The car section is loaded with removable objects. Rubber tires, motor click, and demountable rider add to its realistic appearance.

Hubley Toy No. 776—Mecar Transport—is in two parts measuring 16" overall. Both car and trailer are rubber tired. Comes complete with a load of four cars as shown, all of which can be easily loaded and unloaded. You can sell other small toys with this toy and increase your profits.



IT'S A HUBLEY "Exclusive Right" Toy

These three "Exclusive Right" toys prove that HUBLEY TOYS are modern and up-to-the-minute in novelty. They are well made and brightly colored. Your jobber will be glad to tell you more about them. Ask him Today.

The $1.00 Tank

Each

G6760—Tank operates just like any other BIG-BANG except that it may be fired by stepping on the igniter. Finished in gray and black, total length 8 inches..... 1.34

Safety Noise Makers

Belching Flame and Curling Smoke

That's the BIG-BANG Toy—the Big Noise—loudest, most realistic shooting toys, yet absolutely harmless.

The gun can't explode. An over-charge merely gives a smaller report. A lighted match will not ignite Bangsite in ammunition case.

Navy Gun Boat

Each

G6752—NAVY GUN BOAT—A realistic miniature. Heavy metal finished in gray and black. Has two movable gun turrets of two guns each, the rear one of which covers the ammunition case. Fires through bow when firing rod in stern is removed, fitted with flangside, replaced, and turned. Length, 8 inches... 2.68

Per doz.

G6763 BANGSITE—The noisy ammunition in tubes. Set these extra tubes with each cannon. Packed one dozen in a box, not broken..... 2.40

Per doz.

G6754—SPARK PLUGS—The emery sparker that puts the guns in action. Packed one dozen in a box, not broken..... 1.60

Field Artillery

Each

G6735—NEW JUNIOR FIELD CANNON. An exact reproduction of regular field cannon. All metal barrel. Two red wheels. Length from end of barrel to firing 7½ inches..... 2.00

Heavy Artillery

Each

G6751—HEAVY ARTILLERY—A big noise maker, operating on the harmless Bangsite principle. An exactly proportioned black metal barrel, 10¾ inches long, is mounted on a heavy gun carriage with four red wheels, 3 inches in diameter. An ammunition case attached to the left side holds reserve Bangsite, a small amount of which is placed in the spoon rod attached to the breech block. The block is then replaced and turned—BANG! Length, 13 inches, height, 6 inches..... 4.00

G6750—JUNIOR FIELD CANNON—An exact reproduction of the guns used on the Western front. All metal barrel, 8 inches long, mounted on a carriage frame with two red wheels, diameter 4 inches. Ammunition case at the end of the drag hook holds a supply of Bangsite. The breech block contains the regular Bangsite firing mechanism. Length, 15 inches..... 3.00

G6759—MAJOR FIELD CANNON—Same as G6750 except length 17 inches..... 5.00

G6761—SIEGE FIELD GUN—Same as G6750 except length, 28 inches..... 7.34

Big Bang Pistol

Each

G6762—SAFETY PISTOL—A real pistol in appearance but perfectly safe. Black metal. Holster supplied. Length 8 inches..... 2.68

Breech Blocks

Per doz.

G6763—For G6760 Tank..... 2.00
G6764—For G6750 Cannon and G6753 Gun Boat.. 2.00
G6765—For G6759 Cannon and G6761 Cannon..... 2.00
G6766—For G6751 Cannon..... 2.00
G6767 For G6765 Plane..... 2.00
G6769—For G6762 Safety Pistol..... 2.00

Ro-To Top

NX8397—RO-TO TOPS—Colorful tops with various designs on cast iron disc. Operates with string like ordinary tops but spins much longer according to how hard the string is pulled. Three colors, red, blue and green in an assortment of one dozen, not broken..... Per doz. 2.40

Bombing Plane

Noise Maker

G6758—BOMBING PLANE—Another Big Bang toy sure to please. Body is of tan colored cast iron with maroon, carmine or green wing, propeller and tail. This toy can also be rolled around on the floor. Length, 15 inches..... Each 4.65

Ball Game

KAN-U-KATCH BALL GAME—A wire basket 4 inches wide holds the ball until released by the gun. A lively sport for two or more, indoors or out. Packed one gun and one ball in a lithographed box.

G6128..... Per doz. 4.00

Silver Eagle

NX8224—SILVER EAGLE PLANE—Flies in a wide circle when suspended by a string from the hand or when fastened to the ceiling. Made entirely of aluminum. Clock spring motor. Wing spread 9¼ inches. Length, 11¾ inches..... Per doz. 8.00

Graf Zeppelin Jr.

Per doz.

GRAF ZEPPELIN, JR.—This is the only Zeppelin on the market guaranteed to fly, and it will meet with instant success, as it is designed after the famous trans-atlantic air liner we read about daily. Of metal throughout, with a powerful clock spring motor, and flexible unbreakable propeller. It will fly in a wide circle when suspended by a string in the hand or from the ceiling. Packed in individual boxes.

NX8225—Length, 10 inches..... 6.00
NX8226—Length, 16 inches..... 16.00

Hydro Plane

NX8223—HYDRO PLANE—Runs only on water. Body is of polished aluminum with brass propeller. Has a wing spread of 13 inches. It has a tiller and steering wheel to guide it when used as a hydroplane and a very strong spring motor which will carry it 100 feet in the water. Length 13½ inches..... Per doz. 16.00

Beautiful black and gold setting for Horsman dolls

There's a distinctive artistry in doll display—Acy Lehman and Fred Stark saw that Horsman dolls secured a worthy setting in their recent Chicago Fair display at the Morrison Hotel

hair, karamu, velour and duvetyn are used as materials in their rabbits, cats, dogs elephants, etc.

FLORIDA PLAYTHINGS, INC.

Wood toys and lawn ornaments, with a price range from 25 cents to $3 are the products of this comparatively new concern in St. Petersburg, Florida. Painted wooden animals—either to pull or to push —would appeal to the small child. Miss Leora D. Lewis, representative

M. REDGRAVE'S NEW IMPROVED ORIGINAL

PARLOR BAGATELLE

Made in Seven Sizes

Pegatelle

Redgrave's Bagatelle is one of the few games that you played as a boy that continues to keep pace with today's best selling games. It is as necessary to the game department as sugar and coffee to the grocery store. Each game is individually packed in eye-catching display boxes and retails at prices well within the reach of everybody.

And an Entirely New Game Hit

"PEGATELLE"

To Retail at $3.00

Here is a new hilarious fun producer consisting of a large red, white and blue clown with an opening in his throat to admit balls skilfully tossed by the players. A series of wooden pegs down the entire front of the figure introduces the element of chance in determining the amount scored. Any number can play. Packed in individual display boxes.

Look Us Up When in New York During June Toy Week.

Lincoln Bricks Can Now Be Used with Construction Toys

During the Chicago Toy Fair Marshall Field & Company had a special display of toys. This coincided with their regular Spring vacation exhibit which has been conducted for many years. Among the items featured were Lincoln Logs and Lincoln Bricks as shown in the illustration herewith. This was the first showing of the new log and brick display racks which have been specially designed for counter use as they occupy only a small space on the counter and bring the various models to the height of the customers' eyes making them more conspicuous than if they were simply displayed on the counter.

Two additional uses have already been discovered for Lincoln Bricks during the short time they have been on the market. One is in connection with steel construction toys as illustrated herewith. This follows out the same plan used in modern skyscraper construction; that is, the steel framework is made first and the brick and stone work filled in later.

Another use is for making toy furniture. The same mortar which is used for fastening the bricks when building houses and walls is used to fasten them together in making the furniture. The mortar holds the bricks together securely but, if desired, they may be broken apart and placed in warm water which quickly dissolves the mortar, making the bricks available for further building operations.

J. L. Wright, Inc., who have originated both Lincoln Logs and Lincoln Bricks are now working on a set of logs and bricks combined in one package which will make possible even more extensive building operations than heretofore. The bricks are made of wood, covered with a waterproof paint so that no damage results when the mortar is washed off.

The home office of J. L. Wright, Inc., is now located at the west end of the 14th floor of the new Merchandise Mart in room 1443.

The sets were originally intended to make up cabins duplicating those in which Abraham Lincoln lived, but have expanded so that now a large number of toy items can be made. Some of these are corn cribs, fences, barns, bridges, light houses, log chairs, boats, etc. Non-toy items include waste baskets, plant hanging baskets, office desk stands and envelope holders and bird houses.

Showing how Lincoln Bricks make toy furniture

New display rack for Lincoln Logs and Bricks as it appeared in Marshall Field's toy department, Chicago

The Sturdy Corporation Takes Over Sturditoys

It was announced at Providence, Rhode Island, on May 23 that a new corporation had been formed to take over the manufacture of 'Sturditoys,' formerly made in Pawtucket, and "Prairie" Window Ventilators, made in Providence. The new corporation has also announced to the trade a radical decrease in the Sturditoy price schedule with new prices averaging about one-half previous quotations.

Sturditoys have been known for several years in the toy trade broadly and favorably for their rugged construction and realism. Their previous price range has been from $5 to $16. Their higher priced numbers include an American-LaFrance Water Tower—a most realistic reproduction of the original American-LaFrance fire-fighting apparatus and an extremely popular number in the line.

The new corporation will also engage in the manufacture and distribution of 'Prairie' Window Ventilators, which have been known for some years. The facilities and resources possessed by the new corporation are such as to make practical new manufacturing and distribution methods, which in turn account for the new price levels at which Sturditoys are to be sold.

Among the officials of the Sturdy Corporation is C. I. Bigney, president and director of the C. I. Bigney Construction Co. of Providence, director of the Apco Mossberg Corp. of Attleboro, Massachusetts treasurer and director of the California Housing Corp. of Rhode Island and former treasurer of the Prairie Window Ventilator Corp. Mr. Bigney is vice-president of the Sturdy Corporation.

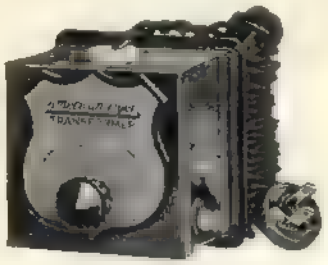
The Sturdy Corporation's secretary treasurer is Alexander R. Fritz, formerly vice president and general manager of the Lester W. Flint Oil Co. of Providence. The president is Victor C. Wetzel, former president and general manager of the Prairie Window Ventilator Corp.

Sturditoys will be exhibited at the New York Toy Show, June 9 to 14, in Suites 401 and 403, McAlpin Hotel, New York City. The complete line of Sturditoys, numbering more than fifteen models, will be exhibited, including their new models and new features.

New "Dyaltype" Transformers Introduce Many Distinctive Features

The American Flyer Manufacturing Co., Chicago, has originated a new type of transformers which operate similar to the turning knobs of a radio. The arrow on the dial knob points directly on the chart to the voltage that the transformer is giving. The speeds can be changed much easier than on the old fashioned switch lever transformers.

Incorporated in this design is the original American Flyer development of "fractional volt steps" by which it is pos-



sible to govern the operation of a train without the necessity of a rheostat. The taps or contacts, which on other types of transformers have always been exposed making them subject to a short circuit, are completely concealed. With the "Dyaltype," the contact points are actually pushed against each other rather than pulled away. This eliminates the possibility of a faulty or insecure electrical contact. They are approved and conform to all requirements of the National Board of Underwriters.

While especially made to operate American Flyer trains, they are equally as good in the operation of other toys. They are guaranteed to deliver full rated capacity, and will easily stand 25 per cent overload.

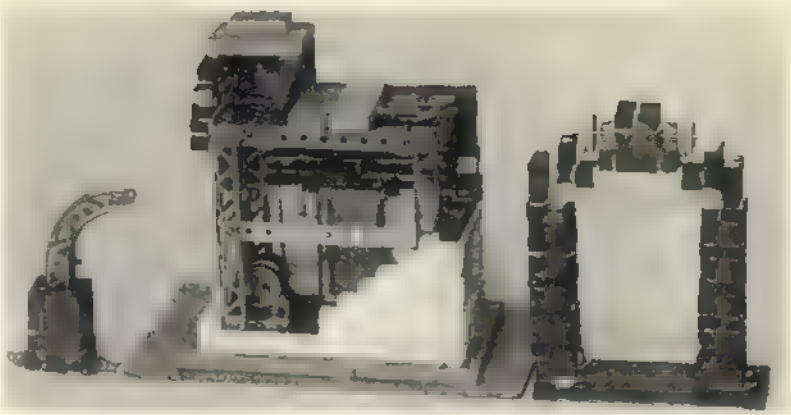
The assortment of transformers American Flyer offers comprises a line from the smallest to the largest, and in all ranges of voltages and cycles. There is no reason for using a transformer other than a "Dyaltype" American Flyer with American Flyer trains.

New Empire Miniature Electric Range That Sells in the Dollar Class

This new model brings Empire Miniature Electric Ranges within the reach of every little girl. It has an oven for baking—a shelf for cooking. And the patented Empire heating unit provides plenty of heat to boil water or do many types of cooking.

The stove is sturdily constructed and

Empire Electric Range



Showing how Lincoln Blocks can be used with construction toys

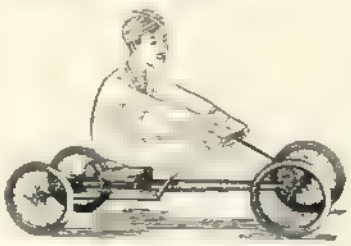
attractively finished with curved legs and white panels. Furnished with three cooking utensils.

They are made by the Metal Ware Corporation, Two Rivers, Wisconsin.

Two Popular New "Fairy" Vehicles

The 1930 Colson catalog of "Fairy" Children's Vehicles includes two new models that are proving decided favorites with younger open-air enthusiasts.

First is the "Fairy" Sport Racer which is claimed to be the world's speediest wheel toy. It is propelled by a hand-operated strap attached to an over-running clutch mounted on the rear axle. Steering is by foot pedals on the front axle. Propelling mechanism is equipped with ball bearings. Standard finish includes a willow green frame and axles with red wheels. An optional finish is red baked-on enamel.



Colson Sport Racer

Next comes the Fairy Chain Driven Velocipede. Its frame is of ¾-inch steel tubing with hand-brazed joints. Wide mud guard is held securely in position by steel braces. Sprockets are completely enclosed. All bright metal parts are finished in extra heavy nickel plate. Handle bar has rubber grips and is provided with a nickel plated bell. Standard finish is willow green with red wheels. Optional finish is a rich wine.

"Fairy" Chain-Driven Velocipede

Both finishes for these new "Fairy" models are beautifully striped with contrasting colors.

The mechanical perfection and beautiful colors of these and other "Fairy" outdoor pals are a constant source of delight. Style means much to modern boys and girls and, when combined with the added charm of durability, it appeals instantly to both parent and child.

New Sand Box Developed by Playskool

Playskool Institute of Milwaukee is offering a new, colorful sand box, built along scientific lines, and suitable for use either indoors or out.

"Playskool Sandie," as it is called, was designed as an educational product to aid in the child's pre-school training. It includes colored blocks and pegs in the shape of trees and houses, to be used in the sand. A cover, which comes with the sand box, converts it into a writing table or desk.

This product is finished with light green enamel and is easily kept clean. Sturdy, well braced legs are bolted on and the box is constructed so that it cannot leak.

Profit by MASON

THE Mason Play Yard, like many other items in your stock, is a modern improvement of an old idea. But if you have ever worked with the Mason name behind a product you will know what it means . . . sturdy construction . . . beautiful finish . . . practical design . . . excellent profit.

The Mason No. 648 Child's Play Yard is 24″ high by 40½″ square. The platform of slats folds up neatly inside when the frame is collapsed. Two finishes, equally attractive and colorful, are obtainable—either a restful green, which is suggested for outdoor use, or a rich ivory that harmonizes well with all furnishings. The beads, set in on two sides, are of various colors, stimulating to the child's imagination.

Packed one in a carton and priced to retail at about $8.00.

. . . this is only one of the many items in the 1930 Mason line. Write for your copy of our new illustrated catalog.

THE MASON MANUFACTURING COMPANY

South Paris, Maine

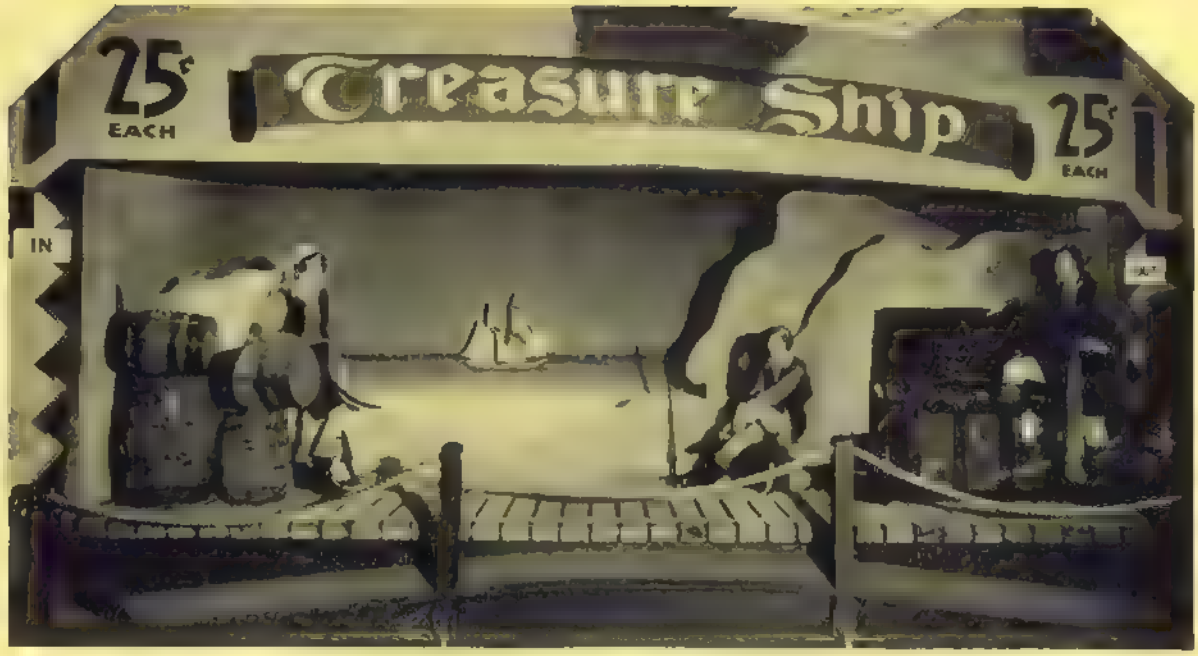
THE EMPORIUM, SAN FRANCISCO

That a touch of humor helps immensely to gain attention for a display was demonstrated very effectively by this toy window, one of a series installed by the Emporium, 835 Market Street, San Francisco. The center piece was a comic little figure with baggy "Charley Chaplin" suit. Its neck contracted and expanded in astonishing Jack-in-the-Box fashion and the accompanying jingle bemoaned his sad state in the language of Mother Goose



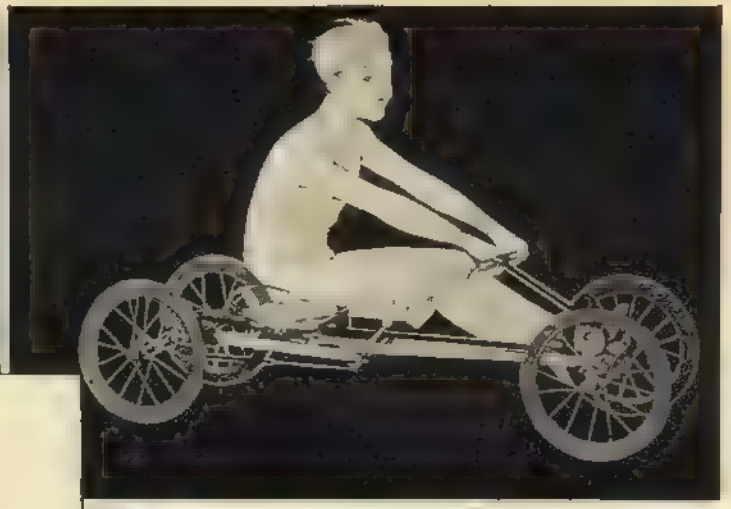
Robert Simpson & Co., Ltd., Toronto, Canada, give little visitors the chance to "walk the plank" and find out what a treasure ship really looks like. See the story in this issue

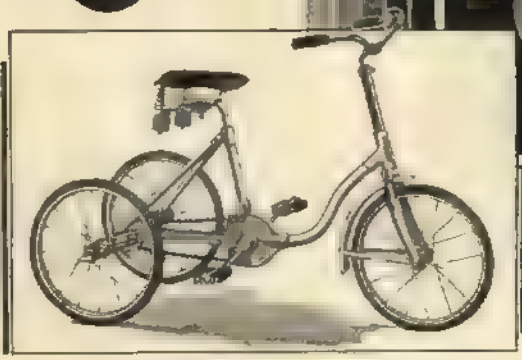
Where Santa held court at Simpson's in Toronto. A beautiful setting for the King of Toys. Note how cleverly the "houses" resemble faces and how they are lighted up by the "block" chandelier

Down the Aisle of Dolls at Robert Simpson & Co., Ltd. Color pictures and prose decorate the walls and the pillars are ornate and curious. This picture was taken of the Christmas Toy Town

Virtuous paths are narrow, but it must be admitted that the wide, long, straight aisles at Simpson's are ideal for the toy department that can afford the space

Fairy





The *Fairy Sport Racer*, illustrated above, is the world's speediest wheel toy. If you are not stocking this fast selling number, investigate it at once.

No. 1. Has been used extensively abroad and in this country for years. Best quality leather strengthened by double-stitched rawhide re-enforcing. Side irons held by bolts through mortise in ski. Tightening clamp on heel strap by which binding is quickly fastened or unfastened. Wt. pr. 2 lbs. .....Pair $3 00

No. 2. Made of black harness leather, with three buckles for adjustment, and side irons with bolts. Wt. pair, 1½ lbs. .....Pair $2 50

SKI WAX

A tube of ski wax should always be in your pocket when skiing. By applying it to the running surface it will stop soft snow from sticking

Ski Wax. Wt. doz., 1 lb. .....Each $0 30

TOBOGGANS

STRAND

Natural Color

Made of hardwood, finished in natural wood with one coat of shellac on top. As the cross section above the toboggan cut shows, the middle and two outside slats are thicker than the other four. This adds greatly to the strength of the toboggan, and as it decreases the running surface on an iced slide, it will increase the speed and also make it a great deal easier to steer in the snow. Note the long graceful bend, which enables it to take a bump without a jar and also makes it run easy in deep snow. They are supplied with heavy rope, fastened with leather loops.

6 Foot. Wt. ea. 16 lbs. .....Each $ 8 50
7 Foot. Wt. ea. 18 lbs. .....Each 10 50
8 Foot. Wt. ea. 20 lbs. .....Each 12 00

CROQUET SETS

TUDOR PLATE

GUARANTEED FOR 25 YEARS

"Tudor Plate" is made by the same designers and same manufacturers who make the world famous Community Plate Although not as heavily plated as Community Plate it is guaranteed for 25 years. The patterns as illustrated above express beauty and charm, and instantly create a desire of ownership.

Queen Bess *Duchess* *Mary Stuart*

QUEEN BESS

This truly popular pattern is a masterpiece of artistic designing, exquisitely beautiful in outline, ornamentation and finish. It is smart looking and wherever used expresses good taste and refinement. It's tremendously large past sales are evidence of the great desire for this lovable pattern.

DUCHESS PATTERN

For more than 6 years this unusually charming pattern has met the appeal of the most fastidious and discriminating public. The carefully balanced handles with their delicate yet attractive designing give to this ware an effect that makes it strikingly attractive and individual.

MARY STUART PATTERN

A masterpiece of artistic designing, beautiful in outline and ornamentation. Lovely as the queen after whom it was named, Mary Stuart. A pattern that ever possessor is happy to have. The slim tapered handles make the Mary Stuart a pattern of great popularity and delight.

VACUUM CLEANERS

UNIVERSAL SUPER-VAC

Different and Better. With Thread-Picking, Self-Cleaning Nozzle.

Gets all the dirt; gets none of the rug; the patented thread-picking, self-cleaning nozzle makes the Super-Vacuum the most efficient cleaner. Blunt projections on nozzle prevent sealing to the rug and easily remove all threads, lint and other surface litter while the powerful suction is getting all embedded dirt.

The Pistol Grip Handle may be firmly held without cramping fingers, eliminating awkwardness; switch control is placed at finger tips. 25 ft. of flexible tested cord gives ample radius for all rooms. Handle cord sets rigidly and is approved by National Board of Fire Underwriters. Positive, easily removed bag clamp secures end of bag through which dirt is emptied. Bag made of mercerized sunfast sateen, lined with close screened drilling, prevents escape of dirt. Inner sleeve acts as a valve, preventing dirt falling back into machine or on floor when emptying. Self-Locking Latch is released by the tip of the toe—easily allows the handle to become rigidly fixed to the machine. Used handily in cleaning stairs, carrying unusual classes of dirt. To hold the handle upright, simply rest it against an extended part of the fan case. No springs or wearing parts.

Hinged Handle Terminal eliminates exposed leads from motor to handle; positive wear-proof electric contact. Thumb screw above rear wheel permits raising and lowering of nozzle for cleaning various length rugs and carpets and bare floors. Two places to oil, marked on under side of motor. White vaseline used as lubricant. Wick feed to bearings insures constant, steady oiling. Permanent silver-like finish is due to use of alloy of nickel, silica, copper and aluminum cast in steel dies under 400 lbs. air pressure, instead of usual gravity casting by sand moulds.

No. 7201. Cleaner complete with attachments shown below Net wt., 16 lbs.; packed 30½ lbs...Each **$49 50**

ATTACHMENTS FOR No. 7201 VACUUM CLEANER

Set consists of the following units:

No. 1—8 foot Web Covered Hose.
No. 2—30 inch Extension Tube.
No. 3—7 inch Drapery Nozzle.
No. 4—Utility Nozzle Brush.
No. 5—Radiator Tool
No. 6—Circular Clothes Brush.

Attachments packed in a handy cretonne tool apron which adds greatly to convenience while using cleaner or storing tools.

VACUUM AUTO CLEANERS

UNIVERSAL

For closed cars, stores, offices, clubs, libraries, etc. Picks up threads, hairs, etc. Bristle bar, permanently attached, enables it to whisk up surface clinging debris along with the deeply embedded dust. Perfectly balanced—easy grip handle directly above motor minimizes wrist strain. Sleeve valve in bag prevents and dust from falling back into nozzle. Motor is turned on and off by touching the toggle switch located at the finger tips immediately below handle. Cast aluminum alloy motor case and nozzle. Blue dust-proof bag. 20 feet of connecting cord.

No. E115. Wt. pkd. ea. 8 lbs. Each **$13 50**
One in a carton.

ELECTRIC FANS

COOL SPOT JR

A small, inexpensive fan for home or office. Non-oscillating. All black except blades which are brass.

Cool Spot Jr. Weight packed, ea. 4 lbs. .....Each **$3 95**

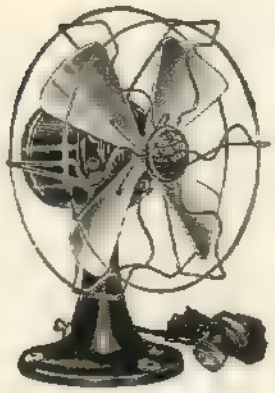
ESKIMO

Equipped with eight-inch blades, self aligning bearings, and swivel joint, but does not have on and off switch. It has a strong, sturdy little motor and the fan positively will not creep. Finished complete in black enamel, it offers for the trade a fan at a price that is within the reach of all. Operates on 110 Volts A. C. or D. C.

No. 5 .....Each **$5 00**

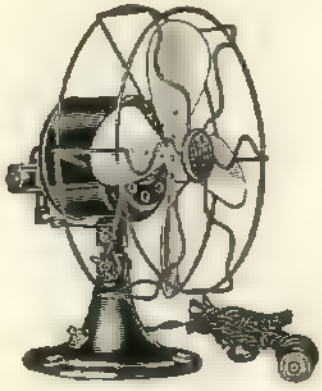
ELECTRIC FANS

ESKIMO



Has full nine-inch bronzed blades with on and off switch mounted in the base, self-aligning bearings and swivel joint and will not creep. It is priced to fill the big demand for a fan at a price everyone can afford. Operates on 110 volts A. C. or D. C.

No. 10 .....Each $6 00



Oscillating.

Two speed 10 inch oscillating. Has a very finished appearance, is guaranteed dependable, runs quietly and will not creep. There is a two-speed toggle switch in a heavy cast base. It has self-aligning bearings, swivel joint and is adjustable to any angle. Operates on 110 volts A. C. or D. C.

No. 20 .....Each $11 00

Oscillating.

Two speed 16 inch oscillating, hard rubber composition blades which overcomes the metallic sing, self-aligning shaft, tobin bronze socket ball bearing, encased in an oiling wick, fast and quiet and gives a large volume breeze. Operates on 110 volts A. C. or D. C.

No. 40 .....Each $17 00

WAGNER

Induction type motor, well insulated and ventilated; cast iron base provides solid and well balanced support; dull black satin "Duco" finish; with blades of polished brass; oscillation release automatically stops fan operation when fan strikes obstruction; gear case cover die cast, sealed in place with screws; worm gears of bronze, shafts of steel makes for small wear and long life; oscillating adjustment permits changing arc of oscillation; oscillation arm gives uniform and jerkless oscillation and oscillation collar permits changing air paths; tilting clamp permits choice of breeze elevation; 8 ft. cord made to rigid specifications and designed for long life; insulated bushing protects cord from sharp edges; rugged guard supports with outside end openings, guard easily removed; front bearings made of bronze; fan blade deliver large volume of air with minimum of buzz or wind noise; 3 speeds, controlled by convenient lever switch in base; tilts backward or forward or converted to wall mounting position; can be rotated 90 degrees at bracket joint.

GRASS SHEARS

—BLUE GRASS—

Forged from one piece of best quality crucible steel, carefully tempered, set and sharpened. Full polished. Blades and bow 13 gauge steel.

Per Doz

No. B615—Lgth blades 6½ ins; lgth over all 13 ins.... $22 05
Half doz in cardboard box; wt per doz 8 lbs.

—PINE KNOT—

Forged from one piece of steel; full polished; etched blades. Carefully tempered, set and sharpened. Per Doz

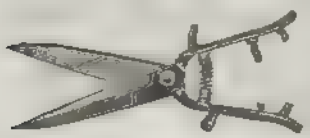
No. PK25—Length blades 5½ ins; length over all 12 ins $12 00
Half doz in cardboard box; wt per doz 8 lbs.

DOO-KLIP
Self-Tensioning and Self-Sharpening.

Heat treated, colored steel blades; green enameled steel handles.

As the blades are closed by pressure of the handles, the main pin projecting through the blades is thrown out of vertical line. A disc, riveted to the pin at the lower end, tips at the same angle, pulling the blades into cutting position. The blades clip with equal facility at all points small and large grass stalks. Per Doz

No. DK-5—Length blades 6 ins, over all 12 ins..... $33 00
One in carton; one doz in shipping carton wt doz 14 lbs.



Crucible steel blades, hardened and tempered; japanned malleable iron handles; tempered steel coil spring between handles; end latch for holding handles together when not in use. Per Doz

No. H9—Length blades 5½ ins; length over all 12 ins... $18 00
Half doz in carton; wt per doz 12 lbs.

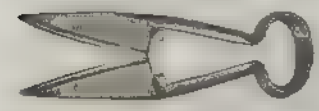
Polished crucible steel blades, hardened and tempered; japanned steel handles; tempered coil spring between handles; self opening spring latch that holds handles together when not in use. Per Doz

No. 09—Length blades 5½ ins; length over all 12½ ins.... $23 55
Half doz in carton; wt per doz 14 lbs.

DISSTON

Blades forged from Disston made steel, hardened, tempered, accurately ground, beveled and riveted to handles. Pressed steel offset handles with trowel shank, thumb and finger hold. The shears are closed by a two-way spring catch that acts as a positive lock and catch that releases automatically when handles are pressed together. Spring tension provided by valute type spring. Per Doz

No. 106—Length blades 6 ins; length over all 13½ ins.... $30 75
Half doz in cardboard box; wt per doz 13 lbs.



Straight blades, shanks and spring, stamped and forged from one piece of steel; shanks and cutting edges polished; spring natural finish.

Per Doz

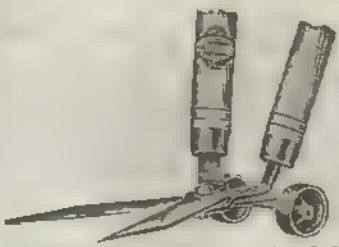
No. 16—Length blades 5½ ins; length over all 12 ins.... $8 70
Half doz in cardboard box; wt per doz 8½ lbs.

Straight blades, shanks and spring, stamped and forged from one piece of steel; natural finish.

Per Doz

No. 15½—Length blades 5½ ins; length over all 12 ins.... $7 95
Half doz in cardboard box; wt per doz 8 lbs.

LAWN TRIMMERS



—BLUE GRASS—

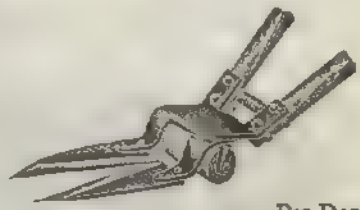
Shears are of steel, carefully ground and tempered, securely fitted into handles and mounted on two steel wheels; handles hardwood, varnished; bright steel ferrules.

Each

No. BG1062—Length blades 9 ins; length handles 36 ins..... $9 00
Packed loose, wrapped; wt each 10 lbs.

N. W.

Shears are of best quality steel, ground and tempered; malleable iron castings; hardwood handles bolted to shanks.



Per Doz

No. 1—Length blades 7 ins; length handles 48 ins..... $57 00
Quarter doz trimmers in wood box, handles loose; wt per doz 60 lbs.

HEDGE TRIMMERS

LITTLE WONDER, ELECTRIC

Steel cutter bar, blade and motor support; wood control grips; snap switch mounted on motor support.

Designed for cutting both top and sides of square, round top and fancy hedges. One person can easily operate the 30 or 40 inch size. The 60 inch requires two persons to operate.

Complete with ⅓₀ H. P. universal type motor, 100 feet of weather-proof extension cord and attachment plug.

Operates on 110 volt A. C. or D. C. where cord does not exceed 1000 feet in length.

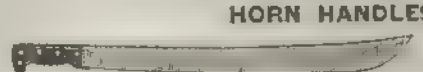
MACHETES

HORN HANDLES



Extra quality steel blade, hand forged; horn handle securely fastened with five iron rivets.

Per Doz

No. 460-24—Length 24 ins..... $54 00
Two doz in box.

✦F. O. B. Pennsylvania Factory Only.

Improved Class "F" Vertical Engine

This center crank vertical engine is well made throughout. The rods are of steel. The crank shaft of solid forged steel balanced, and the brasses are of phosphor bronze. It is very popular with the manufacturers of cement and concrete-mixers, the majority of mixers in the country being equipped with this engine.

A critical steam test of every Engine is made before it leaves our factory, and the necessary adjustments carefully made, so that the Engine is ready to run the moment it is placed in position and given steam.

The fittings and fixtures comprise: Fly-Wheel, Pulley, Oil Cups, Sight feed Lubricator, Throttle Valve and Nipples, Governor and Governor Belt. Foundation Bolts and Washers will be furnished when ordered, at an extra cost.

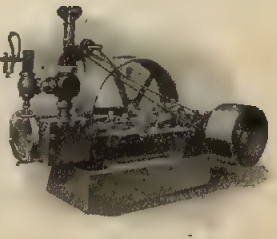
Class "L" Horizontal Engine



This engine is suitable for all kinds of work where high speed and smooth running is required. It is correctly proportioned, especial attention having been given to distributing the metal along the lines of strain.

The bed is made with solid bottom and arranged to catch all drippings which are conveyed to an exit which has been provided.

The crank shaft is cut from a solid forging of the best quality of steel and is equipped with counter-balancing weights. The main bearings of the crank shaft are made especially large and strong.

The connecting rod is equipped with extra heavy phosphor bronze boxes at each end. The crosshead end is of the solid end type, while the crank pin end is of the strap type. Both brasses are adjusted by means of wedges.

The crank pin and crosshead pin are long and of large diameter, giving very liberal wearing surfaces.

The fittings comprise. fly wheel, pulley, grease cups, sight-feed lubricator, throttle valve and nipples, automatic governor and governor belt. Foundation bolts and washers will be furnished, when ordered, at an extra cost.

The Venn-Severin Vertical Oil Engine

The Type "D" Model "M" Venn-Severin Oil Engine is the product of twenty years' experience devoted exclusively to the manufacture of oil engines. It has been most satisfactory in service. The principles upon which it is built are scientifically correct and practical. The design and construction leave nothing to be desired.

Clean Combustion

Combustion is perfect—the fuel is completely consumed—no residue or carbon—the exhaust is clear. That's the first essential of successful, lasting performance.

Low Compression

Operating conditions are the most practical of any oil engine. The cylinder pressures are moderate. The vibration and strains incident to high compression are absent—consequently the Type "D" Model "M" assures greater dependability, fewer repairs and longer life.

Special Construction

The Type "D" Model "M" incorporates the most modern ideas of engine design and refinement. Indeed, it is the only oil engine, without exception, having a rigid en-bloc frame construction, fully enclosed, yet quickly accessible and which permits inspection of all main bearings while the engine is running.

Nor has any other engine so many important refinements such as pressure-lubrication circulating system, forced-draft air-cooling of bearings, built-in lubricating oil filters and intake air cleaners, full floating piston, a 100% non-reacting governing system to maintain absolutely uniform speed and a leak-proof inflexible frame of the most attractive design, assuring permanent satisfaction.

Economy

The Venn-Severin Oil Engine is the most economical oil engine unit from all standpoints: First cost—maintenance—lubrication and fuel oil consumption—and ability to burn the low priced fuel oils. The fuel consumption guarantees average ½ pound of fuel oil per H.P. hour.

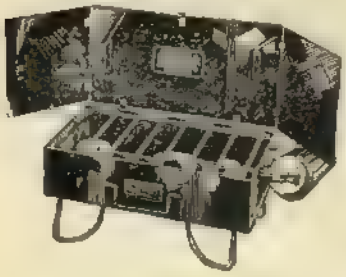
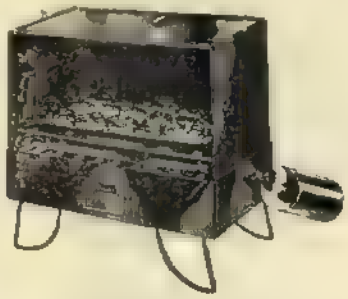
AMERICAN KAMPKOOK

THE IDEAL CAMP STOVE

Kampkook provides for camp life all the convenience, cleanliness and comfort of your kitchen range. In camp or on the road it is always ready, instantly, for any cooking job. Because of the easy, sure method of generation it lights quickly in any weather, set up and going full blast in two minutes. Only the master burner must be generated. When lighted it produces gas for the other burners which are turned on or off as wanted just like city gas. Kampkook does not require special fuel. It makes and burns its own gas from common roadside motor gasoline.



Kampkook Nos. 1-3



Kampkook No. 8

Kampkook No. 77

	Each
KAMPKOOK No. 1 Two burners, steel grate hinged to case, 10x17½ inch cooking surface, folding adjustable wind shield. Tank holds one quart—three hours supply for both burners. Folds to 3½x10x17½ inches. Weight 11 pounds	$ 6 30
KAMPKOOK No. 3 Two burners, steel grate, 8x14½ inch cooking surface folding adjustable wind shield. Tank holds one quart—three hours supply for both burners. Folds to 3½x8x14½ inches. Weight 9 pounds	5 50
KAMPKOOK No. 8 America's finest camp stove. Bakes, broils, roasts—in fact does everything you can do with your kitchen range. Two burners, 10½x19½ inch cooking surface, improved iron grate. Tank holds two quarts—six hours' supply for both burners, and has built-in air pump. Olive drab enamel finish. Size of oven, 19x10 inches. Folds to 4⅞x10⅞x19⅝ inches. Weight 21 pounds	11 00
KAMPKOOK No. 77 This is the most popular size and the most convenient if one does not require an oven. It is instant lighting, has two wind proof burners and 9½x10½ inch cooking top. The built-in adjustable wind shield may be folded back and supported by the end sections used as a back shelf which is even with the cooking top. The fuel capacity of the tank is two quarts which will supply both burners for six hours. Kampkook No. 77 is finished in durable olive drab baked enamel with red lacquered tank. It folds to 4¼x10½x19½ inches and weighs 15 pounds	9 00

Kampkook No. 10

KAMPKOOK No. 10. Same construction as No. 77, with three burners. Has 10½x26 inch cooking surface. Olive drab enamel finish. Tank holds two quarts—four and one-half hours' supply for all burners, and has built-in air pump. Folds to 4¼x10⅞x26 inches. Weight 20 pounds — 14 00

READYKOOK STOVE

The American Readykook is indeed the perfect stove for scores of uses for light housekeeping, summer cabins, house cars, home economics and laboratory work in schools, camping, etc. It is an ideal laundry stove.

The manifold, generator and burner assembly is the same as that of the famous American Kampkook. The design of these essential parts, and the materials used have been thoroughly tested and proved throughout the many years that American Kampkooks have been sold. The fuel tank is made of heavy gauge, special alloy coated rust resisting Toncan iron. All seams are electrically welded and every tank is tested to many times the small amount of pressure required in operation. Tank is fitted with the American Instant Lighter carburetor with regulating and cleaning needle which prevents flooding and insures perfect lighting and operation. Readykook has a heavy iron grate with all edges and corners rounded; easy to keep clean. The American Readykook is 9 inches high; width, 12 inches; length, 27½ inches, size of cooking grate, 9½ by 19 inches.

	Each

A. J. REACH CO.'S BASE BALLS

No. 0. This is the Reach "Official American League Ball." New construction. Cushioned Cork Center, devised and patented by us. Makes the life of the Reach ball exceed its former record of being "as good in the ninth as it was in the first." The new Cushioned Cork Center consists of a lathe turned perfect sphere of live cork, surrounded by a cover of black semi-vulcanized rubber, over which is vulcanized another cover of red rubber. This new construction insures absolute roundness of every core, which produces perfect balance and greater wearing and enduring qualities of the ball. Super quality wool yarns, spun in the Reach factory, perfected winding methods and the finest horsehide covers, combine in making the one perfect Base Ball

No. 0, each..... .....$2 00

No. 1C. New number. Made with the regular Reach patent Cork and Rubber Center. Highest grade Reach spun wool yarns. Selected horsehide covers, combined with extreme care in details of construction, make this superior to any rubber center ball. Before the invention of the Cushioned Cork Center ball this ball was the leader in the baseball field. Fully guaranteed. Strictly Official in all requirements.

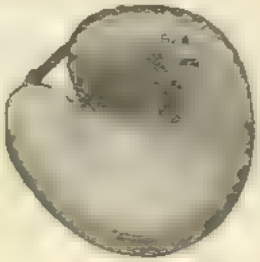
REACH CATCHER'S MITTS

No. 12A

No. 41



No. 8A

No. 33

No. 12A. THE PERFECT CATCHERS' MITT
DOUBLE FACE

Two faces each moulded from a single piece of leather, give double wearing quality and perfect catching ability to this Mitt. The outer face will retain the pocket so the ball will always stick when caught. The inner face is moulded to exactly the same shape as the outer one and is firmly sewed to the hand-made asbestos felt padding.

An additional feature is the King Patent Lacing Device which is affixed to the padding permitting the face and back lacing to pass through the eyelets on the pad and hold securely in place

The thumb and body of the Mitt are made adjustable by a strap and a buckle

This Mitt is made entirely of the most perfect selection of Reaco Dark Brown Horse Hide. All seams are double stitched and leather welted. Edges bound with rolled Black Leather. Strong leather lacing A specially prepared felt is used for the padding.

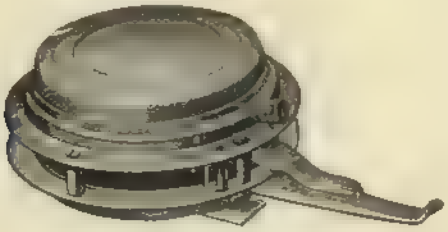
THE MARTIN LINE OF AUTOMATIC FISHING REELS

MODEL No. 1

This reel called a creek wh pper is especially adapted to trout fishing. It carries 75 ft. of "G" line and will carry a greater amount of finer line. This reel is intended for small fish but it is strong enough for heavier work if desired

	Each
Model No 1 Reel	$ 5 50



MODEL No. 2

This is the most popular Martin Automatic. It is like No. 1 except that it has a capac'ty of 90 ft. of "G" line or a greater amount of finer line Ideal for general fishing. Weighs slightly over seven ounces

	Each
Model No. 2 Reel	$ 6 00

MODEL No. 3

This reel is particularly adapted to bass and other game fish. The line carrying capacity is 150 ft. of "G" line. This greater length of line is a great advantage for heavier fishing. Good for all around service

	Each
Model No. 3 Reel	$ 6 50

MODEL No. 4

This is our largest regular Martin automatic reel. Holds 225 ft. of "G" line. Especially adapted to salmon and other large fish. Reliable and unusually strong, still it weighs only a fraction of an ounce more than our smallest reel.

	Each
Model No. 4 Reel	$ 7 00

Above prices on all models Martin Automatic Reels include Line Protector.
Models 1, 2, 3, 4 — without Line Protector — less $1 00 each list

MARTIN'S FLY-WATE

Martin's Latest

Here is the wonderful new Martin Automatic Fly-Wate —a marvel of speed, strength, compactness and lightness It's just the reel for the "sporty" fly-caster. It is made in three sizes that will satisfy every one interested in casting, regardless of the size and weight of line used. All models weigh about six ounces practically the only d'fference being in the size of spool

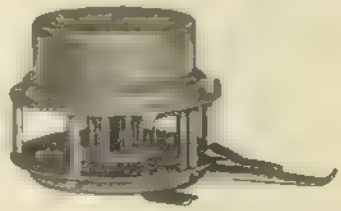
An extra large hardened steel line guide; a new spring tension throw-off; a large efficient brake system—these are just a few of the exclusive features of this remarkable Fly-Wate model. If you enjoy the thrill of light tackle, by all means treat yourself to a Fly-Wate.

The Fly-Wate in three sizes

Each Fly-Wate is equipped with line guide and enclosed in a neat leather pouch Shipped in individual cartons

	Each
Model 26. Has a line capacity of 75 feet "G" line	$ 8 00
Model 27. Line capacity 90 feet of "G" line or a full 30-yard HFH double tapered line. Will retrieve the full double tapered line or 80 feet of "G" line with one winding of spring	$10 00
Model 28. Carries 150 feet of "G" line; 100 feet of "C" line or a full 30-yard HCH double tapered line Will retrieve 80 feet of "G" line or the full double tapered line with one winding of the spring	12 00

MARTIN'S AUTOMATIC TROLLING REEL



This wonderful reel offers many advantages for the fisherman who prefers trolling. In addition to the regular Martin Automatic features, it has greater line capacity and greater winding power than a regular automatic

Equipped with a spring throw-off which releases all tension on the spool, allowing the line to reel off freely as the boat moves. Place troller in the water, lock the brake in its "off" pos'tion and allow the line to run out When suffic'ent line is out, the throw-off is allowed to fall back into place and the spring tension to develop. The line will continue to reel out for a few feet, until the spring tension equals the we ght of the dragging line. The line will continue to drag in this position, being held only by the spring

If the brake is kept locked in its "off" position, there will be no possibility of lines being snapped, lures lost on snags, or rods being jerked out of the boat. In case of a strike the line runs out freely and the fisherman will have plenty of time to take hold of the rod and line.

This reel is especially made for use with an extra long line. It has a capacity of 250 feet of light trolling line and will take in 150 feet at one winding of the spring. The construction and operation is the same as our other reels

	Each
Martin's Automatic Trolling Reel, equipped with Line Protector	$10 00

A Splendid Showing of Nationally Advertised "Verona" Aquariums, Andirons, Tree Lighters and Coffee Tables

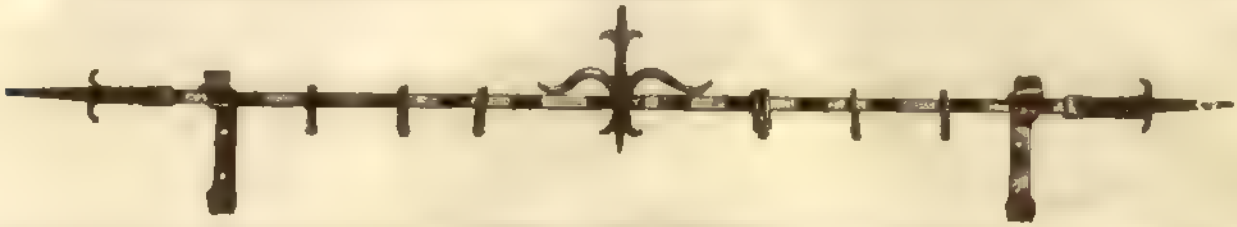
F. O. B. CHICAGO FACTORY

Create an Atmosphere of Dignity and Refinement to Your Living Room Furnishings

It is not the abundance of furnishings which expresses the individuality in the living room, but rather the strict adherence to vogue which reflects an unusual atmosphere of charm. And it is just a piece of WROUGHT IRON furnishing correctly placed which serves to accentuate the character so prevalent in the well appointed home.
This comprehensive showing permits you to choose from an unusual selection of articles of real merit at interesting low factory prices.



CHARMING SPANISH DRAPERY ROD

This artistic drapery rod of Spanish design will add just that needed touch of completeness to your room. You will be agreeably surprised at the effect obtained with such a beautiful rod as this. Solid cold-drawn bar iron is used for all. Howell rods to create a massive effect seldom attained through the use of hollow tubing. Your choice of either Swedish Iron or Dulbrite Brass, baked [illegible] the Swedish Iron as pictured with flame. The Dulbrite Brass is an imitation bronze finish obtained through a combination of black and brass. Both finishes give a very rich appearance and add refinement.

Complete rod consists of one four (4) foot rod, two ends, center ornament, two brackets and ten rings. The rod is of ½-inch solid cold-drawn bar iron, either full-twisted or straight, specify style and finish desired when ordering. If a rod longer than four-foot is desired additional rod footage may be purchased as quoted below. This also applies to other parts.

SOUTH BEND BAITS

SOUTH BEND BASS-ORENO

No. 973RH Bass-Oreno
(Illustration ½ actual size)

The Bass-Oreno is a wobbler type of bait, used for casting or trolling. Has a wonderful erratic action, irresistible to game fish. In motion it dives, dashes, darts and wiggles much like an injured fish. Not in motion, it floats. This bait while primarily designed for all species of fresh-water fish, has also proven effective for salt-water species such as Striped Bass, Channel Bass, Roballo, etc.

Body is 3½ inches long. Packed one in a box, one dozen in a container.

Style	Per Dozen
No. 973RH—red head and white body	$12 00

DOUBLE COLORADO SPINNERS

A popular and effective hook-up of Colorado Spinners. The arrangement of swivels and split rings insures free revolution of the blades and gives the lure a sinuous, fluttering motion. First blade is polished nickel convex and polished copper concave. Blade next to hook is polished copper convex and polished nickel concave. High grade treble hooks. Mounted one on a card, packed one dozen in a container. Hook sizes correspond to sizes on single Colorado spinners.

	Per Dozen
Style No. 191—Sizes 3-0, 1-0 and 2	$3 00

ORENO MINNOW HARNESS

No. 402 Minnow Harness
(Illustration approx. 2-3 actual size)

For the angler who uses live minnows the Oreno Minnow Harness will supply a long felt need. A perfect harness for either live or preserved minnows because it does not interfere with the action of the minnow in any way.

Built from substantially constructed, special double hooks. Individually mounted on attractive card, one dozen to a container. Weight, ¾ pound per container.

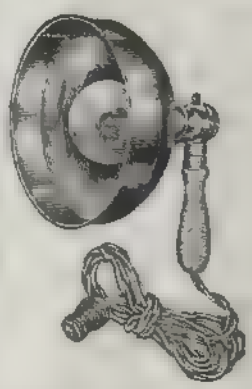
VIM RAY

THERAPEUTIC LAMP

For Beauty and Health Treatments.



Nickel plated and polished steel reflector with 6½ inch white enameled wood handle equipped with toggle switch, scientifically constructed to reproduce as nearly as possible the actual rays of the sun, so shaped that rays penetrate deeply without blistering or burning. Radiant light and heat for the treatment of rheumatism, neuritis, lumbago, sore throat, colds, cramps, bruises, etc., also used as a health restorer for invigorating the body, a real aid to beauty, opens the pores of skin, allows cleansing or tissue building cream to penetrate deeply, softening and removing unseen dirt leaving the skin exquisitely clean and firm. Complete with 260 watt bulb, 6 feet of white silk covered cord and separable attachment plug. Diameter 7⅝ inches.

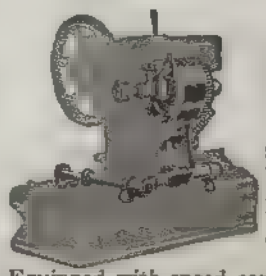
Universal Type, Operates on 110 A. C. or D. C.

No.	650
1 to 2, Each	$12 45
3 to 5, Each	13 05
6 or more, Each	11 70

One in cardboard box; wt each 2½ lbs.

SEWING MACHINE MOTORS

HOLDFAST SEW-E-Z



In construction and principle the Holdfast type is similar to the Jack Rabbit type, except that it is equipped with a bracket which fastens it permanently to the head of the sewing machine. The bracket is constructed so that it permits the motor to be turned in under the head of the sewing machine when it is closed. Will fit and operate any make or model of high head sewing machine.

Polished nickel plated finish. Equipped with speed control and operates on either direct or alternating current, 25 to 60 cycles. Complete with cord and attachment plug.

SEWING MACHINE MOTORS

CHAIN STITCH SEW-E-Z

For automatic sewing machines.

Polished nickel plated finish. Operates on direct or alternating current, 25 to 60 cycles. Complete with cord and attachment plug.

Nos.	E-CS-110-U	E-CS-220-U	E-CS-32-U
Voltage	110	220	32
Each	+53 25	+58 20	+58 20
	$21 00	$22 50	22 50

One in carton; wt each 6½ lbs.

JACK RABBIT TYPE—SEW-E-Z

Will operate any high-arm sewing machine (new or old) and immediately converts it into an electrically self-operated labor saver. No belt is necessary, requires neither screws, bolts, nor clamps to fasten, as the springs hold the pulley of the motor against the wheel and gives the firm friction drive.

The speed of the motor can be varied from 200 to 1800 revolutions per minute by pressing lightly on a treadle with the foot. A rheostat is operated by the treadle. It runs on direct or alternating current and on frequencies from 25 to 60 cycles.

Nos.	E-JR-110-U	E-JR-220-U	E-JR-32-U

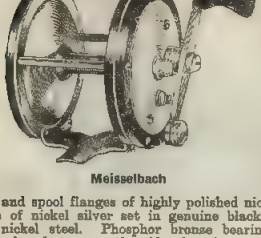
SALT WATER REELS

FREE-SPOOL—SURF

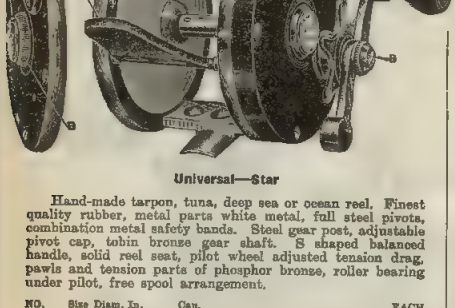


Meisselbach

Frame and spool flanges of highly polished nickel silver. End plates of nickel silver set in genuine black Bakelite. Pivots of nickel steel. Phosphor bronze bearings. Reel free-spools when button on the side plate is pressed, and a pull of the handle towards the center of the plate re-engages it. Quadruple multiplying.

NO.	Capacity	EACH
635	300 yds. No. 9	$10.00

VOM HOFE



Universal—Star

Hand-made tarpon, tuna, deep sea or ocean reel. Finest quality rubber, metal parts white metal, full steel pivots, combination metal safety bands. Steel gear post, adjustable pivot cap, tobin bronze gear shaft. S shaped balanced handle, solid reel seat, pilot wheel adjusted tension drag, pawls and tension parts of phosphor bronze, roller bearing under pilot, free spool arrangement.

NO.	Size	Diam. In.	Cap.	EACH
621	4/0	4	200 yds. No. 24	$80.00
621	6/0	4½	250 yds. No. 24	85.00
621	9/0	5	400 yds. No. 24	95.00

Advantages of This Reel

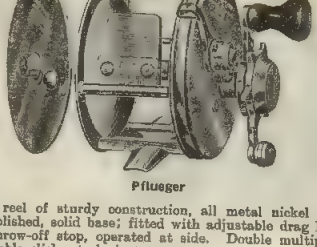
Under no circumstances can handle revolve backward; hence no injury to hands or fingers.

Bearings are all accessible for oiling without the use of tools or removing of any parts, danger of frozen pivots or gear post being entirely eliminated.

Free spool always at command of angler. Drag easily and instantly regulated.

Both drags being automatic, will release under pressure. Breaking of lines, rods and other tackle is thereby avoided.

OHIO



Pflueger

A reel of sturdy construction, all metal nickel plated and polished, solid base; fitted with adjustable drag handle and throw-off stop, operated at side. Double multiplying, adjustable click, steel pivots.

INTERNATIONAL SILVER CO.

Wise business experts have pointed out that women influence the purchase of 85% of all commodities. If it's 85% in all commodities . . . imagine what it must be in an ultra-feminine article like silverware. You can estimate it at 98% and never be accused of the slightest exaggeration. Therefore SILHOUETTE follows the most feminine slant in the world for its theme . . . fashion. SILHOUETTE brings, in silverware, the same basic Paris inspired lines women demand in frocks, hats, handbags, shoes . . . every article of fashion. For certain identical, right, true lines run through all things of beauty and good taste. Clean, stream lines. And these are the lines of fashion, and of SILHOUETTE.

THE NEW SILHOUETTE PATTERN

VIANDE . . the new knife

PATENT APPLIED FOR

The new dinner knife, the Viande, is of special interest. Short blade . . . long handle. Enabling one to press one's finger on the handle instead of the blade. It's the logical shape for a knife. However, to please your conservative prospects, we also make the regular conventional dinner and dessert knives in SILHOUETTE—thereby giving you the chance to give your customer the choice. We predict that Viande will be the regulation standard knife on tomorrow's tables... and it is ready for you today.

Create That Distinctive Appearance to Home Surroundings

Break the monotony of sameness which is prevalent in the average home today. These classic reproductions are clearly modeled attractively finished in harmoniously blended colors, and serve to enhance surroundings in the home. Admirably suited for gift purposes as these art subjects are not in the ordinary class of gift items

Make Your Gift Unusual

"THE WEDDING JOURNEY OF HIAWATHA AND MINNEHAHA" PLAQUE

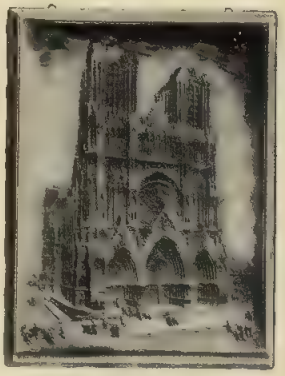
Finished in "Majolica" highly glazed, a finish thoroughly described on preceding pages. Artistically decorated in a combination of correct decorative colors. Very clearly modeled and defined. Size, 12x12 inches. This is a very popular plaque, of an usual assortment, both in detail and color variance. Adds charm to the home. It is also admirably suited for gift purposes owing to its small cost.
No. 8T 234 Each $5.25

"APPEAL TO THE GREAT SPIRIT" PLAQUE

Another popular plaque richly finished in "Majolica" (highly glazed), a finish thoroughly described on preceding pages. Artistically decorated in following colors: frame, graduated brown, background, brownish orange; horse somewhat dark yellow with cracks on which he stands are darkish brown with black bridling; the design and lighter red. Size, 9½x26 inches. Fine for hanging purposes.
No. 8T 214 Each $3.00

SAME AS ABOVE IN COMPANION SUBJECT ENTITLED "END OF THE TRAIL"
No. 8T 294 Each $3.00

Note—One of each mount letters a set apart, to which names they are very often used.



"CATHEDRAL OF RHEIMS" PLAQUE

A splendid and very historical reproduction. Exquisite in its architectural beauty. This Cathedral is very impressive for its architecture, one of the rare examples left from the Gothic era, was destroyed during the war and the quick rebuilding after the war has made it popular the world over. It is masterly modeled with utmost application devoted to even the smallest detail. Magnificently finished in "Majolica" highly glazed, a finish thoroughly described on preceding pages. Size, 13x10 inches.
No. 8T 254 Each $6.00

"WALKING LION" by BARYE

Reproductions of animals are very popular this year. It is a very appropriate ornament for the den or the library. It measures 15x8 inches and is richly finished in "Majolica" a finish thoroughly described on preceding pages. In addition to this exquisite finish, the Baryleaf has a greenish blue background, which contributes to relief of the figure, and, making it more lifelike as you stand a slight distance away. It is an unusual, regarded object as skilful hands can produce. Very finest workmanship and finish. Size, 9x11 inches.
No. 8T 274 Each $5.25

"MADONNA" PLAQUE

By Demetrelis

Size 18x7 inches. Richly finished in Polychrome and abundantly toned with burnished gold. Has utmost religious significance. Priced so low it should be in every home.
No. 8T/563 Each $5.25

"DOG" BOOK ENDS

A popular set reproduction of "Dog" Book Ends. Masterly modeled and clearly defined. Finished in "Majolica" ware, glazed and richly thoroughly described on preceding pages. Decorated in exquisite shaded combination of brown, black and green, softly blending colors. Size, 6x6 inches. Felt bottoms.
No. 8T/535 Per Pair $5.25

"ST. CECILIA" PLAQUE

There is such a beautiful array of colors, so tastefully executed, and correctly applied, we will dwell at length on this modern reproduction. The contrasting of the dark brown of the organ, to a bluish cast of the background and from a light green of the cloak to the pinkish orange of the cape, to the white faded blue of the clouds is a perfect and effective harmony of colors. It is beautifully modeled and richly finished in "Majolica Ware," glazed, a finish described on preceding pages. Size, 13x9 inches. Exceptional value. Attractively priced.
No. 8T/153 Each $5.25

"HARVESTING" by "DONATELLO"

This beautiful Baryleaf which measures 30x12½ inches, is very appropriate for the dining room, to be placed above the buffet, or as a living room decoration. It has religious significance and a deep love for all of spiritual minds. "Harvesting" has near sense by composers of all ages as it represents a meaning to all races. Appreciation for substantial crops, the custom centuries back expressed itself in song and wine, notwithstanding thanks. It is masterly modeled, faithfully executed and attractively finished in "Majolica" (highly glazed), a finish thoroughly described on preceding pages. It makes a distinctive and exclusive Wedding, Birthday or Anniversary Gift. The prevailing price is very low.
No. 8T/624 Each $22.50

Add That Necessary Touch of Charm and Beauty to the Home

The Masterstip embossing so clearly defined coupled with the most exquisite finish is delightfully charming and very prepossessing in appearance. Just such articles as these add refinement and individuality to the home. They lend charm to other furnishings and in appearance. Just such articles as these add refinement and individuality to the home. They lend charm to other furnishings and reflect an expression of thought and study exercised in the arrangement of living room or library quarters. For bridal, Birthday or Holiday gifts they win unusual admiration and favor on the part of the recipient. The quality is the best and these prices permit a substantial saving

PRACTICAL GIFTS THAT BRING HAPPINESS

STATUE "WALKING ELEPHANT"
Choice of two sizes

A very practical and attractive radio or table decora- tion. A subject which is very popular in the homes today. It is masterly executed very cleanly modeled and defined. Finished in a lovely Ma- rilen finish (highly glazed) a finish thoroughly described at right. Colors are soft and light beautifully blending green and gray. It makes a stunning Bridge or "500" prize. Ideal for gift purposes. Inexpensively priced and a splendid value. Excellent workmanship throughout.

No.	Size	Each
8T 315	Height 9 inches length 11 inches	$ 5.00
8T 325	Height 12 inches length 16 inches	7.50

BUST "LINCOLN"

A bust of the "GREAT EMANCIPATOR" in the home will lend an air of individuality and refinement. This model possesses an unusual likeness, is excellently modeled and finished in a most superb manner. Furnished in two sizes and finished in a deep Copper Bronze, described at length at left.

No.	Size	Each
No. 8T 221	Height 12 inches	$3.50
No. 8T 262	Height, 21 inches	8.25

CAN FURNISH SAME SUBJECT WITHOUT BEARD

Some prize this greatly and really prefer this design.

No.	Size	Each
No. 8T 201	Height 18 inches	$ 4.50
No. 8T 381	Height, 30 inches	13.00

STATUE "WALKING LION" (by Barye)

Makes a splendid piano, cabinet or table decoration. It is masterly executed and the subject very clearly defined. It is finished in a deep Copper Bronze described at left and offered in two sizes as quoted. It is one of the most popular animal subjects and his number especially as a fine reproduction.

No.	Size	Each
No. 8T 45	Size, 14x 9 inches	$ 6.75
No. 8T 65	Size, 26x14 inches	21.00

SAME STYLE AND SIZE AS NO. 8T45 EXCEPT IN "WALKING TIGER" DESIGN

The two constitute a set or pair and very frequently are sold in this manner. NO. 8T 55, Walking Tiger. Size 14 x 9 inches. Each 36.75

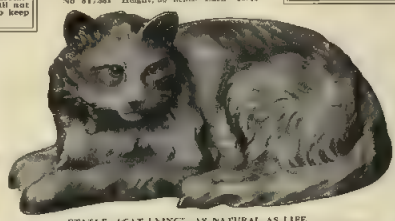
DESCRIPTION OF COPPER BRONZE FINISH

With this definition we aim to reproduce the effects true to the nature of a genuine Copper Bronze Statue that is, the fusion of brownish red to greenish gray and black, softly blended together, as one can see on any statue made of Copper Bronze.

As for its consistency, this coloring is so fast and metal-like that there is no need of washing, as dust will not stick to it and but simple dusting is sufficient to keep article clean.

DESCRIPTION OF "MAJOLICA" FINISH

Technically Majolica is any article made of poured clay highly burnt, polychromed glazed and relined. In other words it is a high glass Ceramic on the order of the Rookwood Ware of Cincinnati. In adopting this definition to some of our reproductions our aim is to imitate the Antique Florentine Majolica reproduced in Florence by the work of time. We believe that this finish of ours is true to nature of the Ceramic of that period for one can notice on our reproductions almost the same harmonious blending of those multi-tints fusing one another as you may see on any of the original pieces in the European Museums. This finish is absolutely washable.



STATUE "CAT LYING" AS NATURAL AS LIFE

Here's a subject of a cat lying and curled up in a realistic lazy fashion very modeled and clearly defined. Appropriate for a Doll or Dresser, as an ornament or for the mantel shelf. Never under such a price will you see this class of ware offered. Finished in Majolica (highly glazed) a finish thoroughly described here before. The colors designated to this model are white shaded realistic to gray, black and realistic white. Height 7 inches, length 15 inches. It makes an unusual and very exclusive gift article.

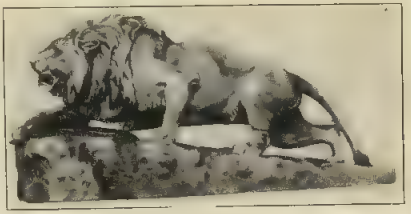
No. 8T/185 Each $7.50

ELECTRIC FIRESIDE LAMP

Indeed a quaint lamp which will arouse interest and admiration. Height 15 inches. Width 8 inches. Wired complete, with cord and plug, (state style). Nicely modelled and clearly defined. It is expertly finished in the "Majolica" (highly glazed) a finish fully described above. Colors are an exquisite shaded combination of brown, black and green, with a touch of pale red on hood to resemble the old Terra Cotta roofs. If you wish your gift to be exclusive and not duplicated consider this article. Finest workmanship and finish.

No. 8T/710 Each $10.50

No. 8T/710S Same as above except equipped with Electric Bulb. Each 12.00



STATUE—"CROUCHING LION"—(By Barye)

Peculiar as a radio ornament. Also furnished in a companion piece "THE CROUCHING LIONESS" described below. The two constitute a pair and when purchased in sets and placed as mantel or fireplace, they add dignity and charm to surroundings. Height 8 inches, length 19 inches. Finished in a rich and deep colorful Copper Bronze, described at length above. Unusually clearly modeled and defined. Attractively finished and priced very low. Makes a highly appreciated gift item.

No. 8T/75 The "Crouching Lion" (as shown). Each $6.75

No. 8T/85 The "Crouching Lioness." Each 6.75

GARGOYLE LAMP
Equipped with Red Electric Bulb

An unusual novelty. Very appropriate for the hall or mantel piece. It is furnished with an artistic red bulb, candelabra size, which makes a beautiful effect on this lovely Majolica (highly glazed) finish, which is described above. The coloring is a mixture of greenish bluish green and brown, with a little touch of black in the depths, to resemble the Gargoyles of the old cathedrals of Europe. Height 15 inches. Comes complete with cord and plug. It is just such an original article as this which creates unusual interest and radiates a feeling of Oriental atmosphere in the home. Very suggestive as an exclusive Wedding Anniversary gift. Expertly modeled and clearly defined.

No. 8T/197 Each .. $6.00

Classic Reproductions of Marvelous Beauty at Factory Prices

Interesting subjects which have historical connection. Executed by master hands, most exquisitely modeled and finished in rich and attractive colors such as Antique Majolica (highly glazed) and Polychrome finishes.

Such articles radiate pronounced individuality in the home. They permeate an atmosphere of dignity and charm which lend cheerfulness and elegance to surroundings. Immensely popular as Bridal, Birthday or Holiday Gifts which charm the recipient and satisfy the donor due to the unerring good judgment exercised in selection.

SHIP—"THE PINTA"

Complete with Electric Globe Cord and Plug

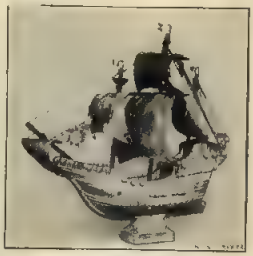
A true representation of the Columbus caravel "THE PINTA" which is an old Spanish Ship. Light wood. Artistic, the bottom of boat, if stained and polished, will show what enhances the grain and makes it more pronounced. The mast and cross piece are made of wood and the sails of tarnished steel brass. A small red miniature electric bulb is fitted on inside, which when illuminated, reflects its light upon the boat, giving one the impression of seeing a real boat at sea. Height to top of mast, 18 inches; length 16 inches; depth 4½ inches.

No. 8T/267 "The PINTA" Ship. Each $16.50

"OLD IRONSIDES" PLACQUE

Rich in historical America. A beautiful large oval placque, showing the ship "Old Ironsides" which is a correct and exact reproduction of this famous ship. This is a real work of art. It is not only correctly executed in all its details, but is very tastefully colored, combining soft, subdued tones of interest with absolute correctness. Back fitted with ring or hook for hanging purposes. Ship placques are very popular for this reason. This pleasing oval design, especially, is admirably suited for gift purposes. Very exclusive. Exceptionally low priced.

No. 8T 454 Each $15.00

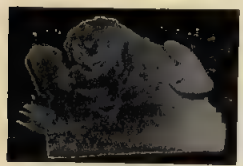


SHIP "THE NINA"

Complete with Electric Globe Cord and Plug

A companion ship to the "PINTA" shown at left. This model is the design of "The Pinta"—being 1 foot 4 inches long. Has one sail in front of the prow and measures 22 inches from stern to prow. For general description refer to "The Pinta" as described at left. Unusually skillfully executed in the Jacobite finish—a reproduction of the old wood showing the grains and the deterioration of time. Equipped with electric bulb, silk cord and plug. Very suitable as a radio or mantel decoration. It will be most graciously accepted and thankfully acknowledged as a Wedding, Birthday or Holiday gift. Very finest skilled workmanship. Priced very low.

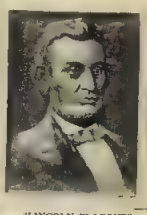
No. 8T/267 The "NINA" Ship. Each. . $19.50



"LION OF LUCERNE" BOOK ENDS

The most popular design of all book ends. This design is especially praiseworthy in its clear definition and excellent finish, even though price is very low. Finished in "Majolica" (highly glazed)—A finish thoroughly described on preceding page. Size 6½ inches high. Felt bottoms. Makes an ideal and inexpensive gift item.

No. 8T/505 Per Pair $5.25



"LINCOLN PLACQUE"

The "GREAT EMANCIPATOR"

This placque should be in every home. A natural likeness, distinctively defined, measuring 8x8 inches (square in shape). Highly glazed portrait in the Majolica finish, decorated in various colors to represent gold finishing, perfectly blended together. Has hook for hanging purposes. Decorative effect for room or den.

No. 8T/114 Each $3.00

PLACQUE—"OLD SPANISH SHIP"

Our first showing of the "Old Spanish Ship" in these platters. It is the most perfect design we have ever shown in such beautiful, distinctive, artistic and real lasting ware. Every detail is shown in the most perfect manner. Hand decorated in the most delightful colors. Very attractive for wall decoration. Will be much admired. Very suitable for gifts. Priced very low. Each piece has a hole in back for hanging purposes. Any one of these will make a most delightful gift for any lucky person. Priced very low for such high quality.

No. 8T 466 Each $16.50

ROMAN VASE by "Cellini"

A true reproduction of the original of which is in the National Museum of Florence, Italy, one other than the famous "Cellini" Vase representing a figure and finely executed decorations and panels. Majolica finish, highly glazed, in colors described in preceding pages. Height 12 inches. Priced unusually low for such a beautiful reproduction.

No. 8T 903 Each $4.75

PORTLAND VASE

This famous ancient vase is a reproduction. A copy of the original Portland Vase which is the pride of Portland of England and was purchased by the British Museum. Was excavated at Rome. Description: Height 10 inches. Made of Stoneware. Finished in Majolica finish. Stands on a highly decorated pedestal. An interesting piece. Superexceptionally decorated. Priced at a remarkably low price.

No. 8T 838 Each $6.00

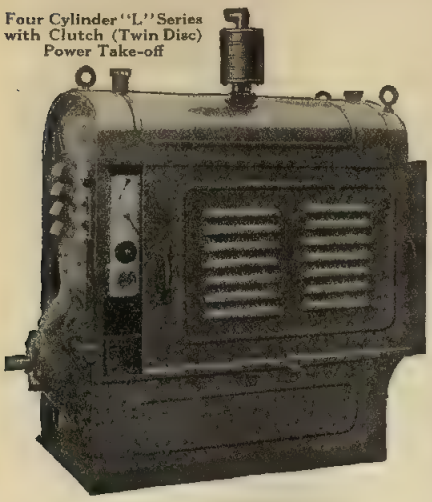
Waukesha Gasoline Engine Power Plant



Four Cylinder "L" Series with Clutch (Twin Disc) Power Take-off

Waukesha Industrial Engines are built in nine sizes, ranging from 25 horsepower to 90 horsepower, and are available in a great variety of combinations. Independent Power Units, both housed and open, are made for either outdoor or inside operation. Equipped with several types of power transmission to accommodate any kind of drive, there is no industrial application they will not suit.

With a range of nine sizes and a variety of drives and mountings, it is possible to select the most economical combination of engine or unit for any particular machine or job.

The rated horsepowers are, in general, separated by steps of ten horsepower each, but, owing to the superior performance of "Ricardo Head" Engines at light loads, great flexibility without sacrifice of fuel economy is possible.

Waukesha Features

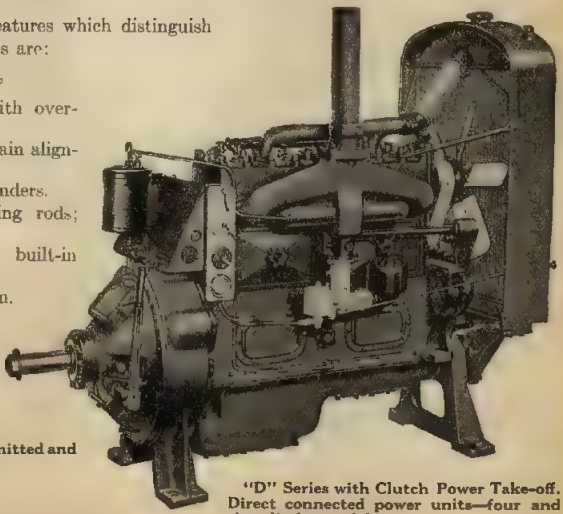
Outstanding among the features which distinguish Waukesha Industrial Engines are:

1—Genuine "Ricardo Head."
2—High-duty crankshaft with oversize center bearing.
3—Rigid crankcase to maintain alignments.
4—Long life nickel-iron cylinders.
5—Straight thrust connecting rods; not off-set.
6—Waukesha-designed and built-in governor.
7—Full-pressure oiling system.

Special Accessories

For operating on kerosene, fuel oil, distillates or on artificial or natural gas, etc. Can be furnished at additional cost.

Complete Specifications Submitted and Prices Quoted on Request



"D" Series with Clutch Power Take-off. Direct connected power units—four and six cylinder models.

CHAIN HOIST TRESTLES

E

Manley—Auto Service Work

The Manley Chain Hoist Trestle can be moved right to the job. This is superior to an overhead trolley, because it is sometimes quite difficult to get the job to the trolley.

The frame of the Manley Hoist is made from steel angles, thoroughly braced and trussed.

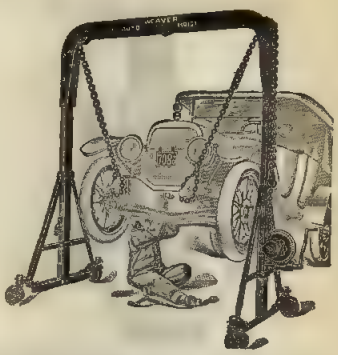
The legs are mounted on swiveling wheels so the Hoist can readily be moved with or without a load. The angles at the base of the legs tie the legs in position and prevent spreading.

The hook for the Chain Hoist is arranged so it can be moved back and forth across the top. Permitting the locating of the Hoist so a vertical pull is always obtained.

The Manley Chain Hoist Trestle has a clearance between the uprights of 7 ft. 6 in., and is 9 feet high, giving ample room for placing the Hoist over a car to take out the motor or to lift one end of the car, for removing axles, working under the chassis, changing springs, removing bodies, etc.

Not Complete with Chain Block

NO.	Capacity	Height	lb Ea.	EACH
86	4000 lb	9 ft.	313	$75.00



Weaver—Auto Hoists

Showing Double Suspension

This hoist can be operated in cramped quarters. It is easily run into position. Requires only 12 or 14 inches space on either side of car. Frame is designed to permit height of arch to be raised approximately 12 inches, enabling the hoist to raise the rear end of a limousine or touring car with the top up.

Single Suspension

One chain of hoist may be carried over pulley in center of frame for performing work which can be handled to better advantage by single suspension. The hoisting mechanism is operated by worm drive, which is absolutely safe and positive. There are no gears nor ratchets to slip or break and allow the load to fall. Hoist is carried upon four ball and roller bearing casters, 5 inches in diameter. Construction throughout is of steel.

NO.	Height	Shipping Wgt.	EACH
WG10	8 ft. 9 in.	500 lb	$200.00

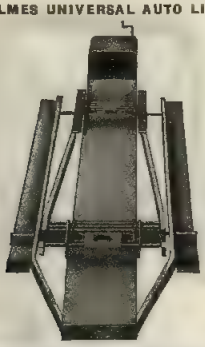
2812	2000	34	$7.50

E AUTO LIFTS

HOLMES UNIVERSAL AUTO LIFT



It is shipped completely assembled with only the guide rails detached. Can be installed and put in operation in 30 minutes or it can be moved from one location to another in approximately the same time. No pits to dig, no concrete work, no air connections, and no assembly of posts, bearings or pulleys. All that is necessary is to attach guide rails, connect the motor.

The Holmes has a maximum height of 4 feet 10 inches and can be raised or lowered instantly to any height for ideal working conditions. The height of lift when down is only 7 inches. Cars are driven over it instead of on it. The lifting cradle is of sufficient length to receive all passenger cars and light trucks. Cars do not have to be balanced, centered or blocked. The lift is absolutely rigid in all positions, and as there are no obstructing pits or posts, two or more men can perform several operations on the car at the same time.

Cars are raised by front and rear axles, leaving all wheels free. Steering gear and wheels being accessible for lubrication, adjustments or repairs, or for relining and adjusting brakes.

It is operated entirely by its own self-contained electric motor. Equipped with positive safety stops for both up and down positions. Entire mechanism is completely covered and protected from dirt. The unit occupies a minimum floor space and may be operated on any floor either indoors or out.

The gear end of the screw terminates in an oil-tight gear housing and is fitted with self-alignment ball bearings. All gears are completely enclosed and run in a bath of oil.

Capacity, 6,000 lbs. Lifting time, 1 min. 40 sec. Over-all width, including stop blocks, 5 ft. 4 in. Over-all length, 21 ft. 10 in. Height of motor box, 19 in.

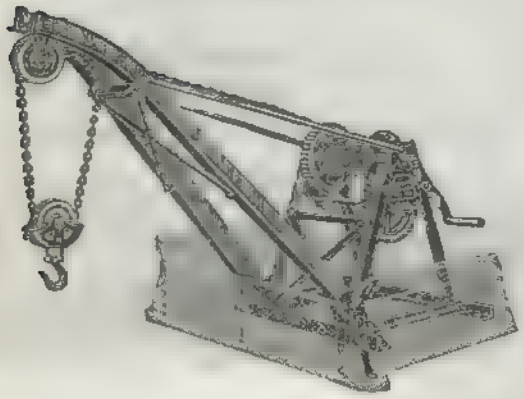
No. A-WL14—Length treads 14 ft; incline 12 ft; height rack 26 ins..... ✚$321 00

K. D.; shipping wt each 987 lbs.

AUTO CRANES

WEAVER MODEL W G



Angle steel frame and crane, substantially braced and trussed for a 2½ ton lifting capacity. Height of boom quickly adjusted to five different heights by inserting the support rods in the various openings. Compound drive gives two distinct leverages, one for a speedy adjustment of chains the other for maximum power in elevating the wreck.

When the upper power shaft is used, one pound pressure on crank will develop 70 pound lift on snatch block hook. Swivel wheel at end of boom permits a direct pull from the side without the chain binding roller bearing, drum sufficient in size to permit the use of cable or chain.

When disabled car is situated some distance from road where a straight pull is necessary, the drum of crane can be used as a winch. Drum will accommodate 100 feet of chain or 200 feet of cable. Furnished complete with 35 feet of ⅜ inch B chain. Base 36x29½ inches.

Each

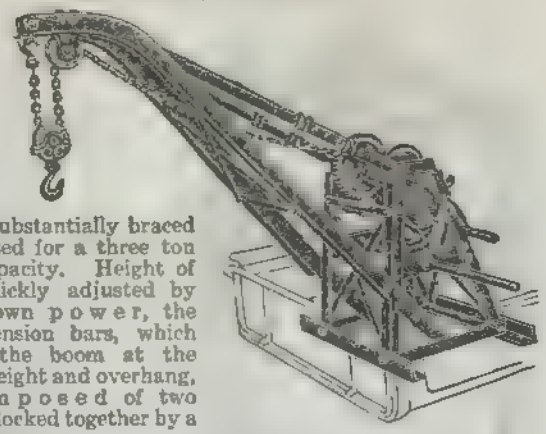
No. A-WG12—Complete as described..... ✚$280 50

Crated; wt each 400 lbs.

✚F. O. B. Illinois Factory Only.

AUTO CRANES

WEAVER, MODEL G



Steel, substantially braced and trussed for a three ton lifting capacity. Height of boom quickly adjusted by crane's own power, the spring tension bars, which support the boom at the desired height and overhang, are composed of two sections, locked together by a spring plunger.

The compound gears afford two distinct speeds and leverages and permits the crane to be operated conveniently from the ground or service car. The extreme leverage ratio of 114 to 1 enables the heaviest load to be lifted with ease. Drum mounted on roller bearings. Shaft is supported by two self-aligning bearings that prevent binding under severe side strain. Furnished complete with 35 feet of ⅜ inch chain amply strong to handle loads up to 6,000 lbs.

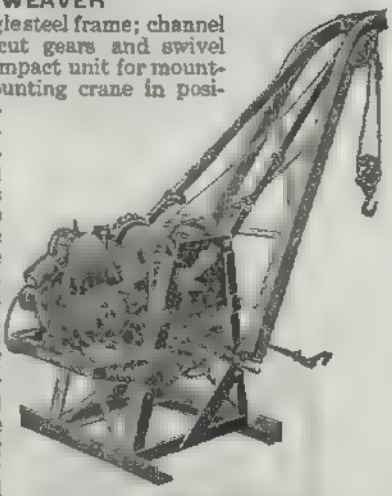
Each

No. A-WG—31 Complete as described above..... $348 00

Crated; wt each 499 lbs.

POWER WRECKING CRANES

WEAVER



Electrically welded angle steel frame; channel steel crane, accurately cut gears and swivel head. Self contained, compact unit for mounting on service car by mounting crane in position and connecting starter motor on crane to service car battery. Operated by air cooled motor that furnishes continuous power. Two large drums each capable of holding 300 feet of cable and operate singly or both at the same time by means of two gear shift levers on side of crane greatly facilitating the handling of difficult wrecks. Either or both drums can be used to get car on road, the upper drum for raising car to tow in. Easily operated upper and lower drums operated by means of gear shift levers and clutch. Load lowered by brake. Height of boom easily adjusted. Complete with 200 feet of 7/16 inch flexible steel cable 50 feet on upper drum and 150 feet on lower drum.

Each

No. A-WG15—Capacity 3½ tons; base 36x29½ ins.. ✚$1287 00

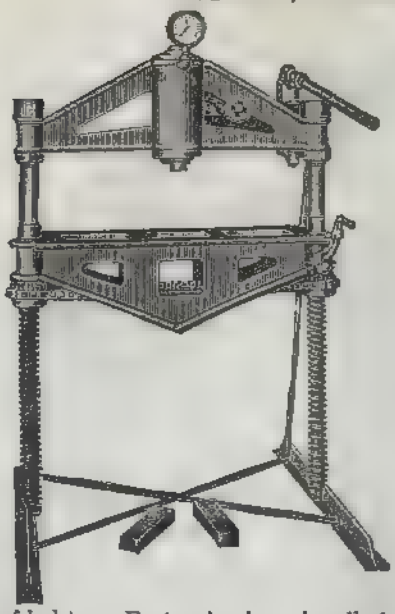
If you are interested in a line of quality tires and tubes at reasonable prices on which you can build a lasting business, put your efforts on the line of Flying Ebony Tires and Tubes.

PRESSES

WEAVER, HYDRAULIC



T steel base securely braced. Threaded cold rolled steel uprights on which hand operated bolster works to accommodate small and large jobs. Adjustable bolster and unobstructed space inside of frame makes it possible to handle bulky work. The work is raised quickly to ram by means of a hand crank and screw mechanism. Extreme adjustment between bolster and ram 51 inches. Bolster has oblong opening in center to allow work to pass through pocket on each side for extra parts, etc.

The large screws are accurately cut to insure easy adjustment of bolster. By turning lever handle four adjustments in leverage and length of stroke are quickly made. Extreme pressure developed quick and easy by a few strokes of lever, and easily released by release valve, drawing ram to its highest position by a heavy return spring inside of cylinder. Ram is provided with 2½ inch hardened steel thrust block and packed with leather packing, which can be expanded by turning plunger. Undercut near lower end of plunger prevents any leakage past the packing from running down on ram or work, draining it into drip ring. Oil in ring is drawn back into pump reservoir when pump is operated.

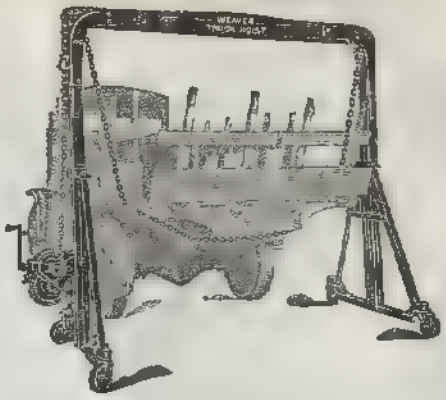
HOISTS



WEAVER'S

Heavy channel steel, with arch reinforced on sides by heavy steel plates.

Hoisting mechanism is of worm drive type which supplies an enormous leverage for raising load, and makes it impossible for load to be accidently released. No ratchets or dogs to break or slip. Load is held securely elevated in any desired position.

Has a compound leverage giving a lifting leverage of 400 to 1. An auxiliary lever operated directly onto the drum enables the chain to be adjusted to the load very rapidly.

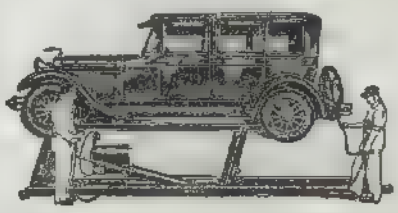
Each

No. A-WG11—Lifting capacity 6000 lbs for double suspension and 4000 lbs for single suspension; width between frame 8 ft 4 ins; minimum height, 8 ft 4 ins; maximum height 10 ft..... ✚$645 00
Ship wt 900 lbs.

DRIVE OVER LIFTS

WEAVER

Lifts Car By Front Axle and Differential.



Combination channel and I beam steel construction throughout. An equipment for raising cars quickly, easily and safely to the most convenient height for complete lubrication, washing and under chassis repairs.

Permits driving straight ahead off of lift after car has been serviced. Frame supporting car raised and lowered hydraulically by piston operating under oil pressure driven by motor. Handles various types of cars. Can be stopped at any desired height, always level. Can be placed inside or outside service station. Power automatically cuts off when lift raises to full height. Side plates are depressed to receive wheels and locate differential over grating. Complete with motor, necessary bolts, nuts and diagram for installing.

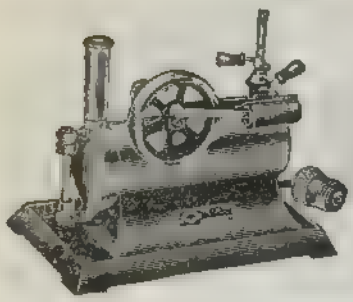
One in carton; wt each 8 lbs.

ELECTRIC TOY STEAM ENGINES

EMPIRE

ELECTRIC, Horizontal Type.



A practical power plant for driving mechanical toys. Heavy cast iron base, red enameled; seamless drawn copper boiler with electrical heating element that creates steam and operates same as a regular steam engine, fitted with throttle, whistle, safety valve and water gauge; strong brass running parts and steel connections all accurately machined and highly nickel plated. Complete with 6 feet of cord with separable attachment plug and instructions for operating.

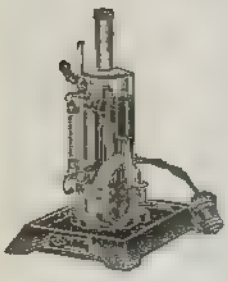
Each

No. M30—Operates on 110 volts, A. C. or D. C., 300 watts; size 9¼x5¾x7½ ins.....$25 50

One in carton; wt each 6¾ lbs.

EMPIRE

ELECTRIC, Vertical Type.



A miniature model of the high powered vertical steam engine.

Heavy cast iron base, red enameled; seamless drawn copper boiler with electrical heating element that creates steam and operates same as a regular steam engine, fitted with throttle, whistle, safety valve and water gauge; strong brass running parts and steel connections all accurately machined and highly nickel plated. Complete with 6 feet of cord with separable attachment plug and instructions for operating.

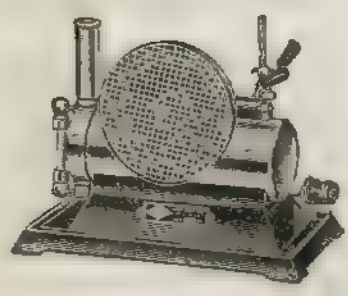
Each

No. M31—Operates on 110 volts, A. C. or D. C., 350 watts; size 7x6x10 ins.....$25 50

One in carton; wt each 5¾ lbs.

EMPIRE

ELECTRIC, Turbine Type.



A miniature duplicate of the large single phase steam turbines, the latest development in steam power plants. Heavy cast iron base; red enameled; seamless drawn copper boiler with electrical heating element that creates steam and operates same as a regular steam engine, fitted with throttle, whistle, safety valve and water gauge; strong brass running parts and steel connections all accurately machined and highly nickel plated. Complete with 6 feet of cord with separable attachment plug and instructions for operating.

Each

No. M35—Operates on 110 volts, A. C. or D. C., 400 watts; size 9¼x5¾x7¼ ins.....$21 00

One in carton; wt each 6½ lbs.

TINKER TOYS

BUILDER

Each set contains 73 wood parts composed of round sticks and spools with holes around the edge and one hole in the center. A book of simple instructions also comes with each set, enabling even the younger children to develop remarkable models easily.

Each set put up in a strong, laminated mailing tube.

Per Doz

No. 75—Size tube 3x12 ins.....19 50 $9 00

One doz in carton; wt per doz 1¼ lbs.

DOUBLE TINKERS

Each set contains 156 wood parts, composed of round sticks and spools with holes around edge and in center. Cardboard wind blades are furnished for building aeroplane, windmills, etc.

A book of instructions showing 42 completed models is contained in each set.

Each set put up in a strong, laminated mailing tube.

Per Doz

No. 175—Size tube 4x12 ins.....39 00 $18 00

One doz in carton; wt per doz 28¼ lbs.

TINKER BEADS

In Screw Top Glass Jars.

Hardwood; assorted sizes and colors; complete with polished cord and safety needle for stringing.

Per Doz

No. 135—Jar contains 28 beads, making string 22 ins long.....6 45

One doz jars in carton; wt per doz 7 lbs. $3 00

TINKER JUMP ROPE

Genuine interwoven sash cord on which are strung 21, one inch oval beads, stained and polished, each separately pinned through rope. Hardwood polished hand grips.

Per Doz

No. 200—Length over all 6½ ft.....12 75 $6 00

One doz in carton; wt per doz 3½ lbs.

An Additional Showing of Excellent Models in Banjo-Ukuleles, Cases and Bags

These instruments instill merriment in all outdoor activities. A crowd without one has no life, no joy, no contentment. Easy to learn and easy to play. And the music an accomplished musician can render, will enchrall you—hold you virtually spellbound. These articles are accurately built, expertly finished and priced very low. Ideal as Holiday or Anniversary Gifts.

No. 7F15
A FINE LOW-PRICED BANJO-UKULELE
A real bargain. Finished in deep maroon, olive green or natural white. Perfect workmanship. 10-nickel brackets. White celluloid head. Pearoid pegs. Veneered 7-inch shell. Rosewood fingerboard. Length of instrument, 26 inches. Specify Color wanted.
No. 7F15 Each $11.50

SAME INSTRUMENT IN HIGHER GRADE
Practically the same instrument as No. 7F15. Has a brass 7-inch wood shell genuine calfskin head, 10 nickel plated brackets and heavy nickel top hoop. Equipped with a nine curved resonator beautifully celluloid with "Pearl" holes. Very attractive instrument correctly adjusted in either Maroon, Olive Green or Natural White.
No. 7F16 (Specify Color wanted)
Each $13.50

"LE DOMINO" BANJO-UKULELE
This is the most attractive Banjo-Ukulele ever designed. The tone is an outstanding feature. Has 7-inch Wood Shell Artistic Wood Resonator. Finished in a rich Black throughout. To use seeking a high grade instrument, which possesses an unusual rich tone and high-class appearance, should consider this attractive number. It is priced reasonably low in this selling. Would make a most pleasing gift for any occasion.
No. 7F575 Each $20.70

BANJO-UKULELE NO. 7F44
An outstanding value in Banjo Ukulele. Charming in style and finish. Possesses a fine tone and will give the utmost of service and satisfaction. It makes an ideal Christmas, Birthday or Graduation gift. Specifications:—7-inch shell, made of genuine Mahogany fitted with genuine mahogany neck and fine overlapping resonator. 12 nickel-plated flat top professional brackets. Fine nickel plated flange. Black edge of resonator and bars of head bound with white celluloid. Correctly fitted bush fingerboard, high-grade non-slip patent pegs. Fine white calfskin head. One of the new and very popular styles.
No. 7F44 Each $16.70

"Utility" Case

CASES FOR BANJO-UKULELE

No. 7F5 Canvas covered straight-board body bound with black leather cloth, flannel lined, end opening, for 7-in. instrument. Each $2.70

No. 7F5½ Same as No. 7F5, but for 8-in. instrument. Each $2.80

No. 7F5¾ Same as No. 7F5, but large enough to accommodate 8-in. instrument with overlapping resonator. Each $3.10

No. 7F105 Heavy case made of stiff chip board covered with black leather cloth, flannel lining, nickel plated catches, strong handle. Opens like a violin case for 7-in. instrument. Each $4.10

No. 7F105½ Same as No. 7F105, but to fit 8-in. instrument. Each $6.30

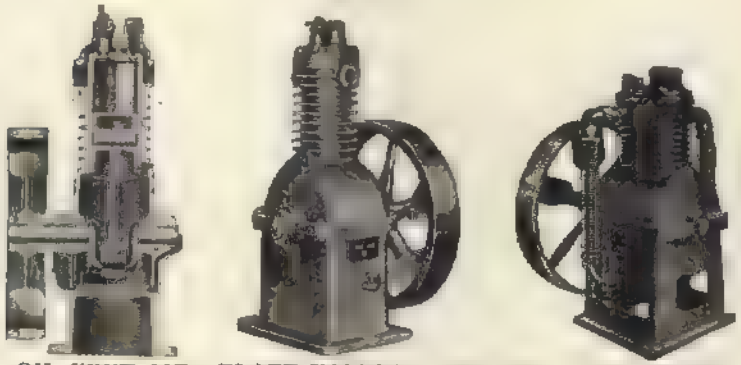
AIR COMPRESSORS

CURTIS



OIL FREE AIR. PLATE VALVES. INCLOSED CRANKCASE.

We suggest that compressors with the centrifugal unloaders be used on all automatic installations, the centrifugal unloaders insure easy starting and protection in case of low voltage or a loose belt. The No. 4 compressor is the most popular when used with gas engine. Use single stage compressors for pressures up to 125 pounds, two stages for higher pressures. We can also supply water cooled machines of any capacity.

Beach Buoy....

The New, Safe and Practical Water Toy

The Beach Buoy has a canoe shaped frame, mounted on an especially designed and strengthened tire tube. The child sits in a seat suspended from the frame, and being in the center of the tube, he has full freedom of his arms and legs, enabling him to paddle in any direction with perfect safety. All parts of the frame are ducoed, preventing rusting or disintegration from the effects of salt water. The big feature about the BEACH BUOY, aside from its tremendous novelty appeal, is its perfect safety—the child cannot possibly upset it or fall out. Get ready for the Summer Season—write for details now.

CHAIN

American—Bull Dog Link

Luminized, weldless steel chain leather covered. Has two rings, one of which is passed through other, so that chain can be drawn up as tight as desired, or arranged to encircle two tires.

NO.	Length	Wgt. Doz.	EACH
3B	36 in.	6 lb.	$0.70
2B	42 in.	7 lb.	.90

Ten in a carton.

SPARE TIRE LOCKS

Hok

The last word in spare tire protection—to install threaded lock—simply remove original nut on tire carrier, replace with cylinder locking nut, using socket rim wrench, open end wrench or any similar wrench.

To install disc wheel lock—simply push cylinder locking nut over blank stud, dropping pin through stud hole. Both locks—slip locking unit over cylinder nut, remove key and turn locking unit right or left to set combination No. 2 as shown in cuts. If threaded bolt on the carrier or blank stud is over 1 inch long, cut off to that length.

Type T has threaded cylinder nut and will also fit other cars not listed above having same size tire carrier bolts.

NO.	Threads	EACH
T-1	⅞ S.A.E.	$2.50
T-3	⅞ U.S.S.	2.50

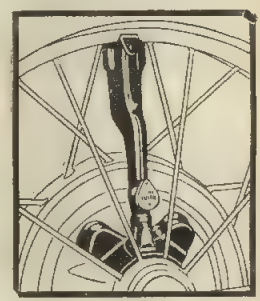
FORD SPARE TIRE LOCK



Fulton

This lock fits the new Model A Ford cars. Two special nuts are furnished to replace the regular nuts on spare tire carrier. A casting fits snugly over these nuts and a lock is pressed into opening in casting and when locked it is impossible to remove wheel from carrier.

NO	EACH
FA	$3.00

FULTON SNAP LOCK

For Chevrolet and Essex

Has the well known Fulton locking principle, "locks as it snaps into place." And once locked can be opened only by the owner's key. It gives protection against tire theft. And it is unusually good looking, with its black enamel and chrome finish.

The heavy housing fits on carrier bracket in place of the regular toe-plate, enclosing the carrier nut. When the lock cover is snapped into place it seals the housing and entirely covers the carrier nut. This prevents tampering or removal of tire until the cover is unlocked by owner's key, and removed. Housing is finished in black enamel. Cover is chrome plated.

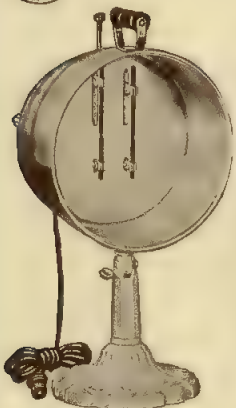
The Famous "White Cross" Ultra Violet Sunshine Lamps

Choice of Table or Wall type or Floor Stand type, as shown

KEEP FIT—HEALTH IS HAPPINESS



MODEL 7C/1750C
Adjustable Table and Wall Type
Diameter of lamp 10½ inches, depth 8 inches, height 20½ inches. Shipping weight 13 lbs.

You cannot make a more profitable investment than one which will promote your health and that of your family. Without good health, real success in your daily work, in school or at play is impossible and happiness unknown.

Long ago medical science discovered that it was these so-called "ULTRA VIOLET" RAYS that were responsible for the great health giving and curative powers of the sun. As science has overcome most of the perplexing problems, it has also solved the problem of furnishing Ultra Violet Rays artificially by means of carbon arc light utilizing specially compounded carbons.

The medical profession has quickly recognized the marvelous healing and health giving power of ultra violet rays produced by the carbon arc. Today, all hospitals, exclusive health resorts, prominent sanitariums, athletic clubs and in thousands of homes, are installed this famous WHITE CROSS Ultra Violet Ray Equipment, fighting disease, restoring the sick to health and keeping fit the healthy alike.

Mechanical Details

The "WHITE CROSS" lamp is made in two styles: Model 7C/1750C—the table or wall type (shown at left) and Model No. 7C/2100D the floor stand type, illustrated at right. They differ, only in the matter of the stands, all other features being identical.

They are of the twin arc type recognized by leading authorities as the most efficient type of carbon arc lamp. The double arc assuring maximum radiation and Ultra Violet output with a minimum of current.

The mechanism is of our own design concealed behind the reflector and absolutely trouble proof. The calibrated timing mechanism automatically cuts off the current and rays at the end of a period of approximately six minutes, being the approximate exposure for general treatments. For longer exposures or treatments, simply repeat by pressing starter button—very simple and efficient.

Each WHITE CROSS Lamp comes complete with carbons and goggles for protection of the eyes, and complete operating directions.

White Cross Lamps operate on 105 to 125 volt circuits, either A.C. or D.C.

PRICES

HEALTH AND BEAUTY IN A FEW MINUTES

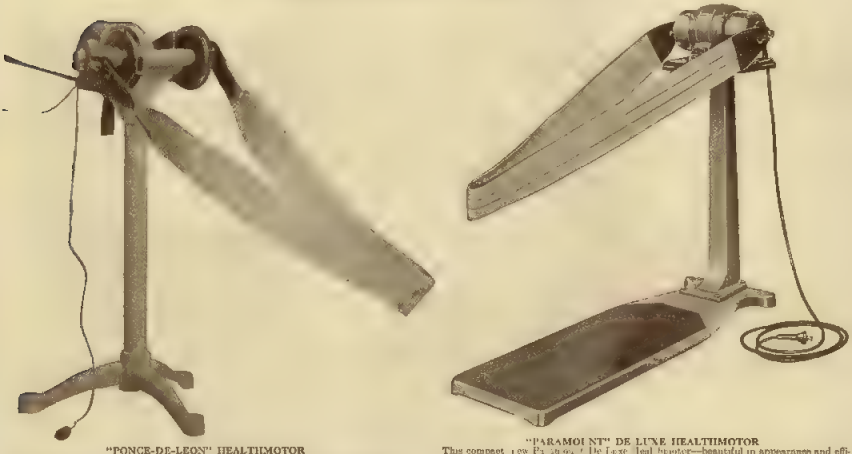
Get All the Benefits of Vigorous Exercise Without the Tiresome Effort

Radiant, youthful vigor and a supple attractive figure, the true characteristics of a healthy woman. Alert, Dominant energy with a pleasure and an endurance that belie the years. The requisites of every successful man.

Ten to Fifteen Minutes Daily Rejuvenates Every Woman or Man

Walking, setting-up drills, and other forms of exertion are tiresome, and consume time and energy needed for more important matters. These Mechanical Masseurs solve the problem. With only ten to fifteen minutes of pleasant, invigorating massage daily, it supplies the needed physical stimulation—which also means mental stimulation. Sluggish circulation is enlivened. Flabby muscles are strengthened. Dormant organs are massaged into their proper activity. Fatigue toxins are eliminated. Relaxation and the sound sleep of youth returned. Your whole physical, nervous and mental system is kept in healthy condition practically without effort on your part.

CHOICE OF TWO NATIONALLY ADVERTISED MODELS



"PONCE-DE-LEON" HEALTHMOTOR
"The Mechanical Fountain of Youth"

The Ponce-de-Leon provides a form of massage that is more effective than can be had with a vibrator or a massage alone. A vibration of movement that provides either a soothing massage or vigorous muscles.

This sturdy mechanical masseur is easily installed in a closet, in your bathroom, boudoir, office or gymnasium and requires very little space. The attention-free, one-fourth horsepower motor operates quietly and is current from any light socket or electrical connection. Fully guaranteed. Furnished complete with cord and plug.

No. 9Y/3350 "Ponce-de-Leon" Healthmotor Complete $65.80

"PARAMOUNT" DE LUXE HEALTHMOTOR

This compact new Paramount De Luxe Healthmotor—beautiful in appearance and efficient in operation—is meeting with wonderful consumer acceptance. It is a wonderful health and recreative aid and is suitable for all ordinary use—as for that end as well to a wonderful advantage by the entire family.

It comes complete, equipped with two belts—one wide and one narrow—pins for adjusting motor vibration and instruction card.

Paramount Health Exercisers are equipped with GENERAL ELECTRIC motors, which insure continued satisfactory service.

Has rubber-covered roller massage unit.

CARBON STEEL

Unfinished.

These new wrenches make it possible because of the narrow jaws, to work in the closest corners, yet all the strength of the round head type has been retained. The new holder is an all-metal, side-hinged, positive locking container.

Set No. 2153. Fitz-All. Set of six wrenches as above. Carbon steel, unfinished. Wt. ea. 2½ lbs. .....Set **$1 00**

CHROME-MOLYBDENUM STEEL

Nickel Plated.

The new Parabolic type Chrome-Molybdenum steel electro alloy wrenches are not only more advanced in principle, but they inaugurate an entirely new idea in wrench design. For the first time a wrench has been produced that has the durability of the round head type open end wrench and the convenience of the newest pear shaped design. The thickness of the heads, depth of the openings, and the size of the bar are scientifically and practically correct in their relations of one to the other, making the strongest wrench on the market. In a new all metal, side-hinged, positive locking container.

Set No. 2152. Set of six wrenches as above. Chrome-Molybdenum Steel, nickel plated. Wt. set, 2½ lbs.....Set **$2 50**

VLCHEK TAPPET

Vlchek Chrome-Molybenum tappet wrenches are electric lly heat treated to insure uniform hardness; exceptionally strong and yet of thin design; very tough and accurate as to milled openings.

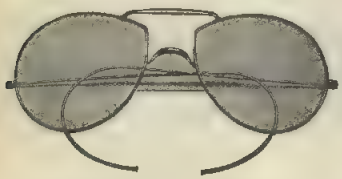
EYETECTS



Buckeye—Autoists and Sport Wear

This goggle, without the use of side shields, provides ample protection from danger in front. It is a very wide goggle and fits the curvature of the head and protects the eye orbit well down to the cheek of the wearer. The lenses are shaped so that nothing can enter between them, and the nose bridge is formed to set the lenses outward from the eye, so that the lashes do not touch. This goggle is guaranteed optically perfect, tough, clear glass lenses, and for special purposes with amber, green smoke and welding lenses.

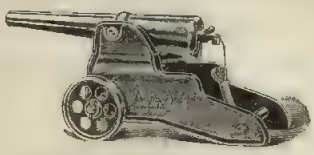
CANNONS

WINCHESTER BREECH LOADING CANNON



10-Gauge—For Saluting and Celebrations

Designed to supply demand for a low-priced breech-loading cannon possessing safety, simplicity of construction, and ease of manipulation.

Description—Twelve-inch tapered, rolled steel barrel, cylinder bored, mounted on a cast iron carriage, heavy wheels 3½ inches diameter. The barrel and breech closure are proved and tested to withstand a much greater pressure than can be developed by any charge of black powder that can be loaded in a 10-gauge shell. The carriage and wheels are nicely japanned, the barrel blued, and breech closure hardened black, giving the gun a very neat appearance. The length of the cannon over all is 17 inches, its height 7¼ inches, and its width 7 inches.

NO.	Gauge	EACH
10W	10	$12.50

J

REPEATING

Stevens—Visible Loading—16 Shots—22 Caliber

22 caliber, rim fire, shoots 22 short, long and long rifle cartridges and will also handle C. B. caps; 22 inch round blued steel barrel, fitted with Rocky Mountain front and sporting rear sights; varnished walnut stock and slide handle; blued frame; blued trigger guard; steel butt plate. The magazine holds 15 short cartridges; the visible loading feature is entirely new, the cartridge always in sight while being fed into chamber. Strong double extractors make extraction of the empty shell absolutely positive. The breech block and hammer have positive locks. Carefully bored and rifled and finely finished. Full length of rifle 35 inches.

NO.	Lgth. Bar.	lb Each	EACH
7022	36	4½	$13.50

STEVENS HAMMERLESS REPEATING RIFLE

Specifications—24 in., round tapered barrel, fitted with genuine Lyman Ivory Bead Front Sight and sporting rear sight. Selected American walnut straight grip stock; regulation steel butt plate. Tubular magazine. All metal parts nicely polished and blued.

Action—simple, two part takedown (no loose parts). Usually rugged, simple construction with extremely short movement of breech block. Side ejection. Cylindrical safety behind trigger. Magazine holds fifteen 22 long rifle, seventeen 22 long, or twenty 22 short cartridges.

NO.	Lgth. In.	lb Ea.	EACH
7522	41	5¾	$17 50

WINCHESTER TRAP GUN

WITH VENTILATED RIB

Model 12 with Ventilated Rib and Extension Slide Action Handle

Here are the perfect balance and the efficient operation, accuracy, strength and lightness of the famous Winchester Model 12 plus a recent finally perfect ventilated rib. The Winchester Ventilated Rib is designed to give greater speed and accuracy in aiming. Its elevation above the gun barrel is such that it correctly orders the area of heat waves and thus gives a guide in aiming that has the highest possible visibility. The Ventilated Rib gun is made in 12 gauge only with 30 inch full choke barrel and soft rubber recoil pad. Furnished with extension action slide handle as shown in illustration.

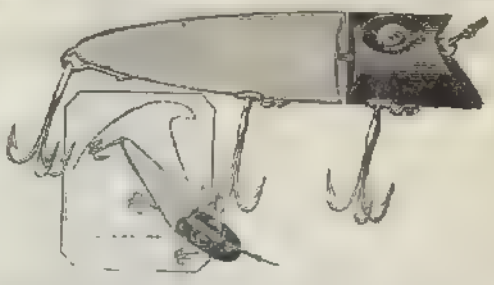
One in cardboard box; wt each ⅝ oz.

WOOD MINNOWS

HEDDON'S DOWAGIAC HEDDON'S ZIG-WAG, MARVELOUS ACTION



Three treble hooks and non-rotating fastener and eyes. This new lure has a unique duplex movement, a wide erratic sweeping action, cutting the water in unexpected angles and zigzags that seem to hunt out the hiding places of the fish. The tail section keeps up its fish like fanning movement in sinuous curves as if alive. Length body 4¼ inches.

	Per Doz
No. 8302—White body, red head	$33 00

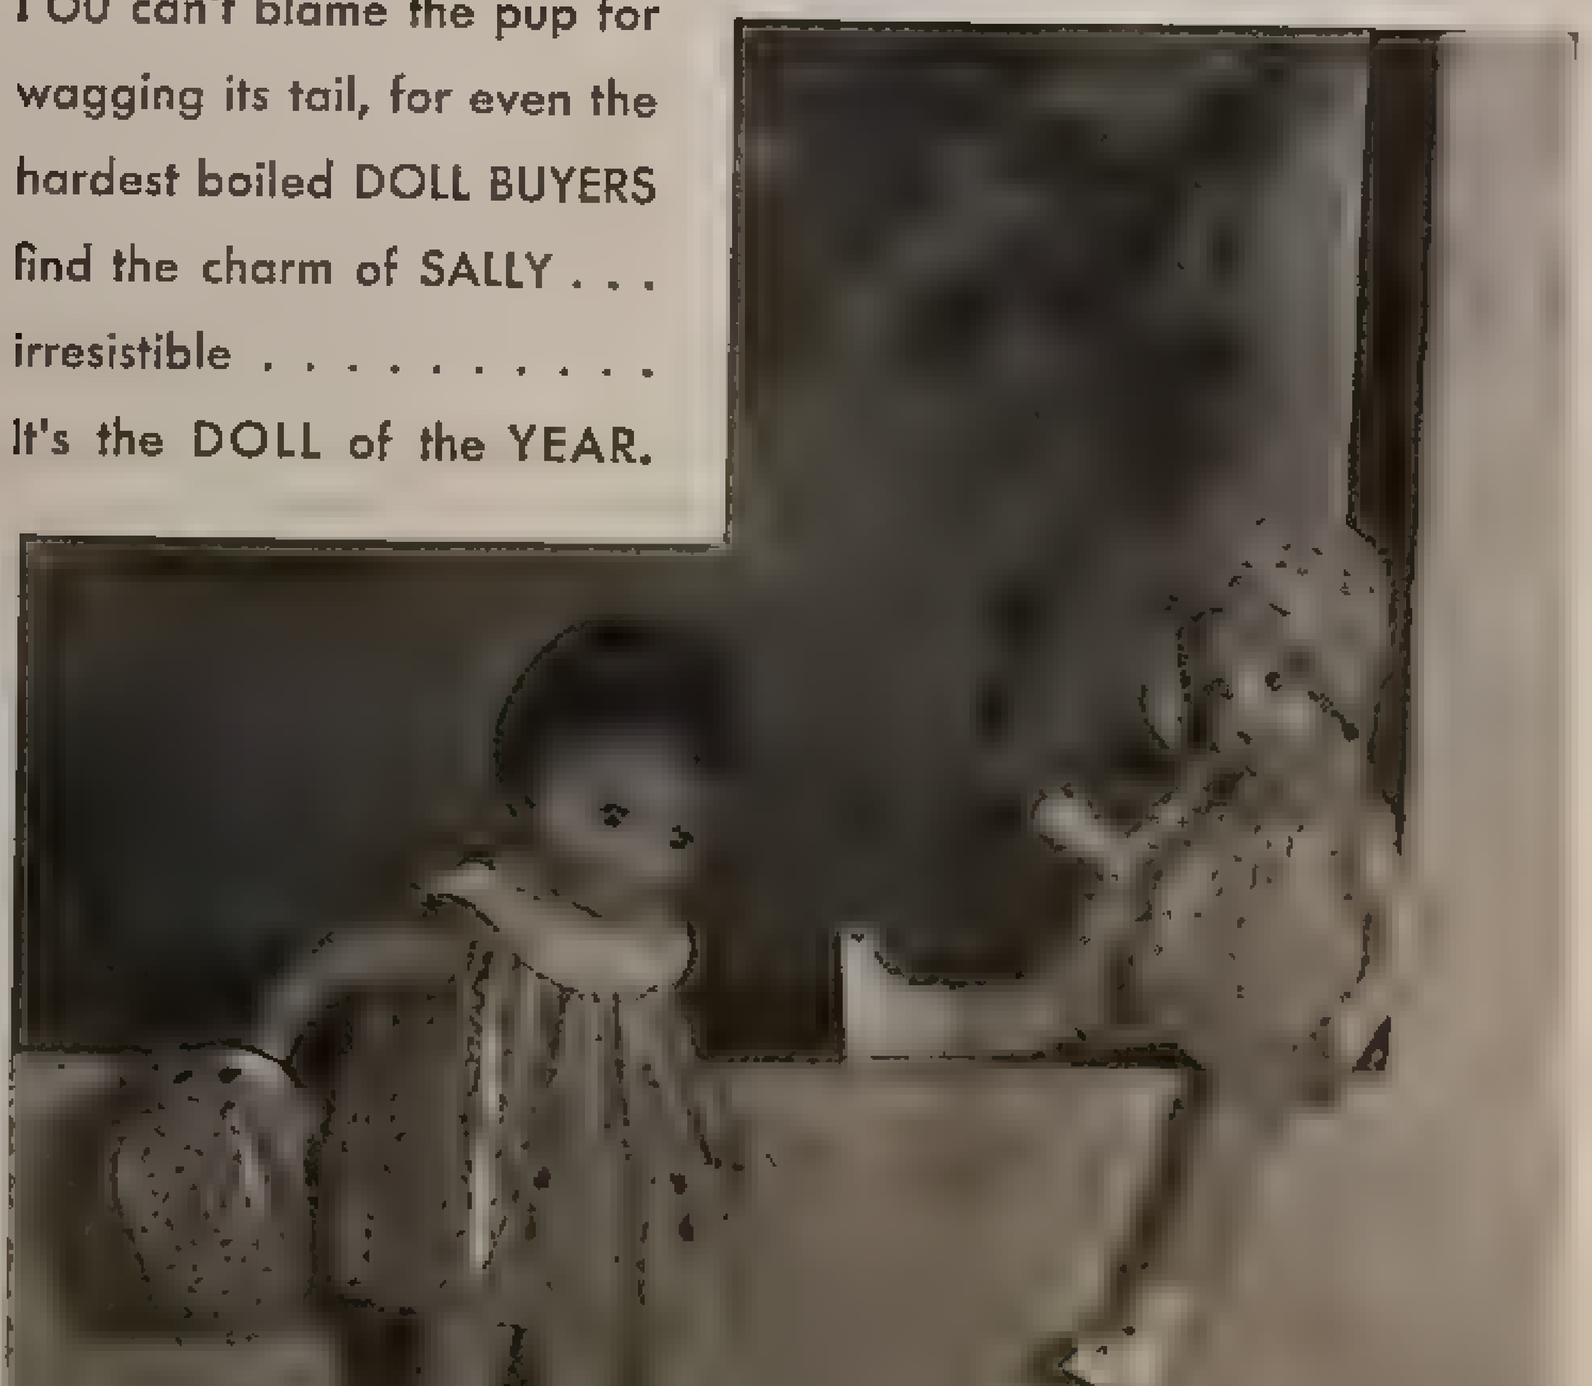
EVERYBODY WANTS TO BE FRIENDS WITH SALLY

YOU can't blame the pup for wagging its tail, for even the hardest boiled DOLL BUYERS find the charm of SALLY . . . irresistible . . . . . It's the DOLL of the YEAR.



AMERICAN CHARACTER DOLL CO., inc.

20 EAST 17TH STREET **NEW YORK CITY**

SALLY

is teaching retailers how easy it is to sell this clever

PETITE DOLL

Just as surely as 2 plus 2 are four, Sally is creating a furore among doll buyers.

She's a modern doll for modern children!

Sally has won all health and beauty prizes of the season —she stands alone, is non-breakable, and by far the best-dressed doll in town . . . And above all she's PRICED for easy selling.

Make sure it's a Lionel, boys, if you want the best. They're real trains—the swiftest, handsomest, most powerful model electric railroads in the world

LIONEL
ELECTRIC TRAINS

NEW *American Flyer* Trains!

—years ahead in remarkable new features

NOW! A model line of new American Flyers, including new steam and electric type locomotives that will not pull all others—nine hi-speed trains—nicely designed and larger cars—new railroad equipment items—and many other features never put in miniature trains before. These new American Flyer Trains and Equipment add tremendously to the fun possibilities of miniature railroading.

Just Like The Big Trains

American Flyers are actual reproductions of modern American Trains—European design has never been used. American Flyers are *real* in every detail of design, appearance and thrilling performance. They are sturdily constructed and will furnish fun for years. With American Flyer Trains and Equipment it is now possible for you to duplicate actual operating conditions of real railroads.

Choice of 7½ Million Boys

Over 7½ million proud and happy owners testify to American Flyer leadership. These alert and discriminating boys have chosen the American Flyer because of some of the following exclusive features:

1—The most powerful ... motors ... both steam and electric types.
2—Triple Action reverse on all ... locomotives.
3—Automatic stopping by ... buttons.
4—Last coach of each ... with ... lamps ... window frames and ... lamps.
5—The longest, heaviest and the fastest tracking freight cars ...
6—High speed car trucks.
7—Remote-control track switches.
8—More realistic bridges, stations, tunnels and action for equipment.

Only American Flyer gives you all these features at no extra cost.

More For Your Money

You get more for your money in features, size, detail, and in lot of number of pieces included in a train set, when you buy an American Flyer. Be sure you get one this Christmas. Your Dad, too, will enjoy railroading.

Send Coupon—Compare

Get the big free 48 page American Flyer Record Train Book and compare. You too, will agree that American Flyers lead in fine working features and are years ahead of all other trains. This fascinating catalog is not only a textbook of railroading, a treasure of suggestions, but also the newest and finest of Electrical and Wind-up Trains, Equipment, Accessories and the famous Structo Steel Toys. Automobiles and Tractors in actual colors.

Don't wait—mail the coupon now.

SKF
JOURNAL BEARINGS

Heavy Tenders Ride Easily On SKF Journal Bearings

LONG runs have forced the rapid development of locomotive tenders. Modern tenders carry 20 tons of coal and 21,000 gallons of water—a tremendous increase in load.

Even before the burden was increased, tender journal bearings presented a problem in lubrication. This has now become acute and is being met by progressive railroads by the application of SKF Journal Bearings for dependability and freedom from bearing troubles.

Heavy loads and severe lateral thrusts are familiar problems to SKF.

Because of its two rows of rollers the SKF Journal Bearing provides the maximum bearing capacity in a given space.

Since SKF Bearings are completely self-aligning, they distribute the load equally at all times over two rows of rollers.

SKF Journal Bearings run cool and dependably because the rolling elements are not constrained and therefore are free to take the proper rolling position.

Bearing trouble cannot become acute when SKF serves the equipment.

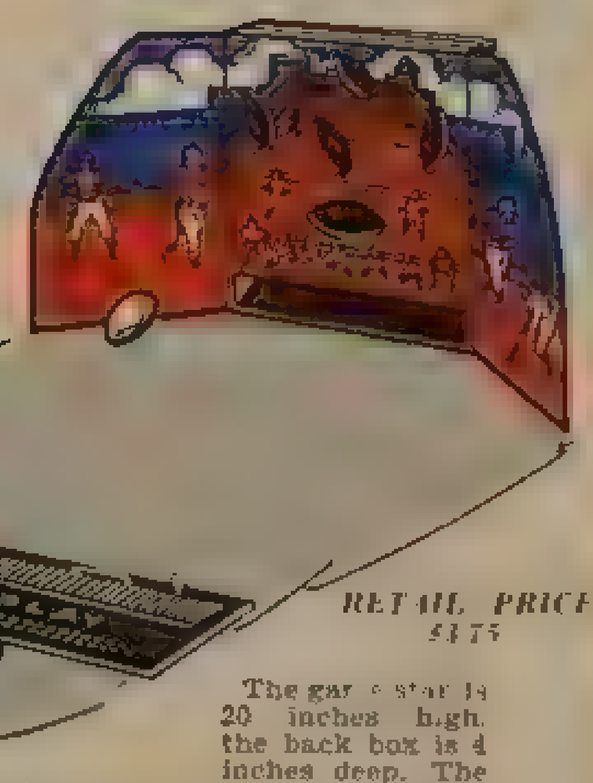
THE BIG THREE
IN THE TOY WORLD

Woolsey's Football Game

Woolsey's Football—the great indoor game for outdoor people. Everything indicates that this intensely fascinating game will be the outstanding selling sensation of the year. It teems with the action of a real game—it has the same element of chance, the same opportunities for thrills that pack millions of sport lovers into the university stadiums every year

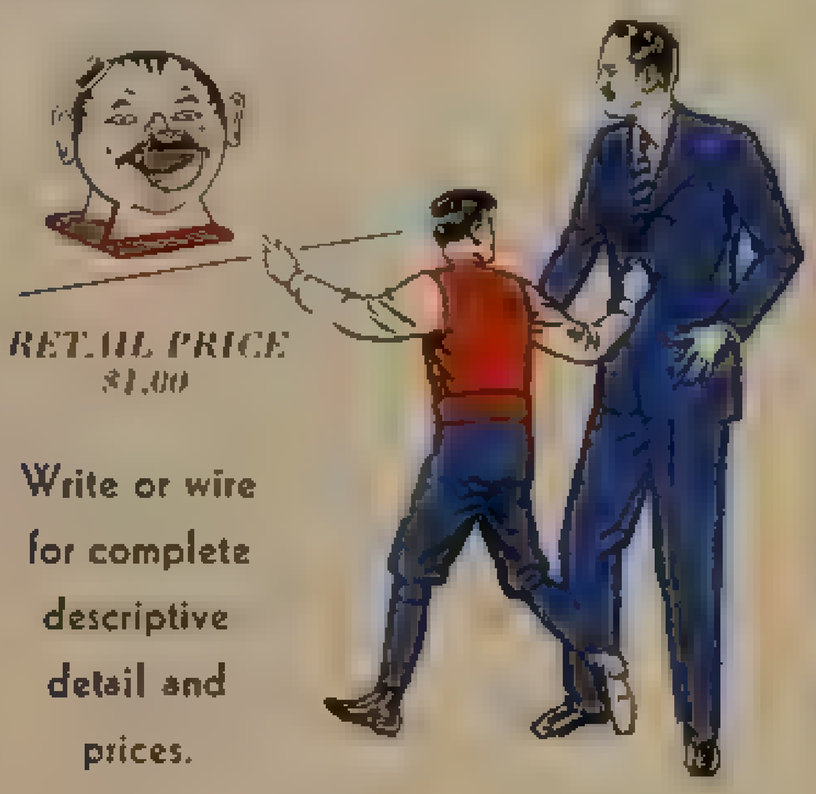
Press the lever and the kicker kicks the ball into the hole or out—a gain or a loss, according to your skill. For there is skill to this game. The tee is moveable and the ball can be placed for high or low kicks. Veteran toy buyers are keen for Woolsey's Football. The kids aren't the only ones that like this game. The grown-ups take to it, too.

Here's action, skill and chance. And a set up with a flash that will win many, many sales.



RETAIL PRICE
$3.75

The game stand is 20 inches high, the back box is 4 inches deep. The playing surface is 16 inches wide—the wings 14 inches wide. The player is made of cast iron and steel construction, stands 7 inches high on an 8-inch base. The game is beautifully finished in full colors. The player is colorful and modeled faithfully. Packed complete in shipping carton. Play it and convince yourself that this is going to be a big seller during the football season. Send sample order today



RETAIL PRICE
$1.00

Write or wire for complete descriptive detail and prices.

RING · A · NOSE!

Flip the ring over his nose—he makes outlandish faces—he wiggles his eyes and ears, and he shows his teeth. But there's more to Ring-A-Nose than funny faces—it's a game to see who can ring his nose most often. You'll say it's the best popular priced number you ever featured.

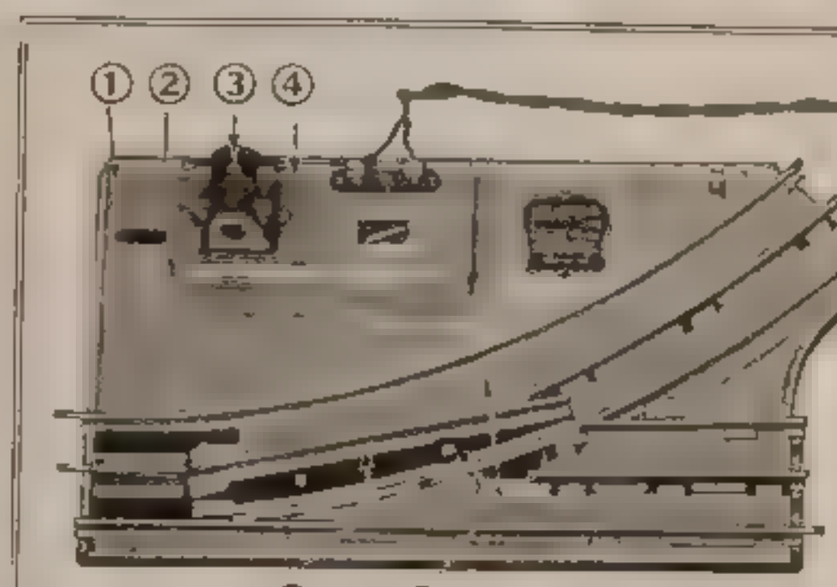
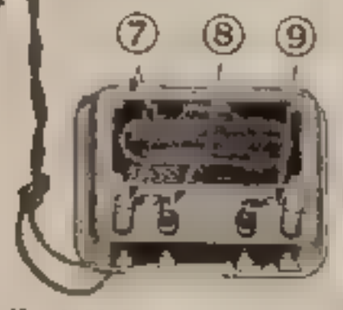
"American Flyer"
Toy Railroads Electric Trains Mechanical Trains

AMERICA'S FINEST REMOTE CONTROL TRACK SWITCHES



Left Switch Is Illustrated

Protected by U. S. Patents 1,353,367 and 1,384,518 and others pending. Only American Flyer Can Use this Advanced Switch



No. 4180 Control Switch

THE American Flyer *Remote Control Track Switches* are the result of three years of costly research work. There is nothing experimental about them. Scientifically perfect and built entirely "fool proof"—they are marvels of mechanical efficiency. The fascinating action of switching a train from one track to another is controlled 100% by electricity through the Track-Switch-Control which may be located at any distant position.

Each switch is equipped with a red and green light, which when lighted, denotes the operating position of the switch—with American Flyer Switches there is no guess work which results in train wrecks. Prices are as follows:

No. 488 Pair Narrow Gauge, Retail Each . . . $10.00
No. 4488 Pair Wide Gauge, Retail Each $12.00

With each *pair* of these switches, Model 4180 "four button" Track Switch Control is included.

NEW
AUTOMATIC TRAIN CONTROLLING SEMAPHORE

With this unit the operator can control a train from a distant position. Has die cast housing for lamps and controlling mechanism. Its red and green lights are so arranged that they synchronize with the light system of the Remote Control Track Switches. A feature is the new patented track connection which allows the signal to be fastened to either wide or narrow gauge track

Controlling Switch No. 4181, is included, which has two buttons, one red and one green, which in turn control the action of the Semaphore

Model 2043 for either narrow or wide gauge. Retail, Ea. $6.00

9 POINTS OF SUPERIORITY

1. Twin Lamps. Two lamps are used. A red and a green one in each switch. Green shows for the straight track and red for the curve track

2. Lamp Housing. This is of durable die cast construction, giving full protection to the lamp. It is a big advance over the old style sheet metal cap which is often lost or improperly placed in position. There are no moving parts to get out of order. Has fine enamel finish

3. Control Housing. All working parts are fully protected in this beautiful die cast housing finished in automobile enamel

4. Roadbeds. This embossed base is firmly secured to the superstructure by eyelets, not nibs, and has no large openings under the rails which oft'times cause trouble

5. Simplified Rails. Rail guards, and a third rail in the frog, or other obstructions that have a tendency to derail trains, are eliminated in American Flyer "Remote Control" switches. The current is carried through the rails of the frog-rail itself thus making an unbroken electrical contact at all times.

6. Frog Design. (The frog is the unit with the rails that shift). In ordinary switches a third rail *within* the frog is the frequent cause of train derailment as the car and locomotive trolleys have difficulty in traveling over these units. In American Flyer Switches, the frog is mounted on an insulated base, and with the current being carried through the frog-rails, *the necessity for a troublesome third rail is eliminated.* This is an exclusive American Flyer feature. The frog in American Flyer Switches is thrown by a rack and pinion action, which is completely concealed, and automatically locks when in position.

7. Switch Control. This die cast housing combines all the controls necessary to operate a pair of track switches and it can be located *at* instead *anywhere*

8. Control Buttons. This fool-proof design is insurance against burning out coils commonly experienced on other types of control. Two pairs of buttons, one button is red and the other green

9. Control Indicator. Only in American Flyer controls do you know at all times the position of the frog on the track switch. The indicator pointing toward the red or green push button tells the whole story. Only with American Flyer Track Switch-Controls can you operate both switches with only two fingers. Use of both hands is not required

A comparison is invited, send for samples and Illustrated Price List

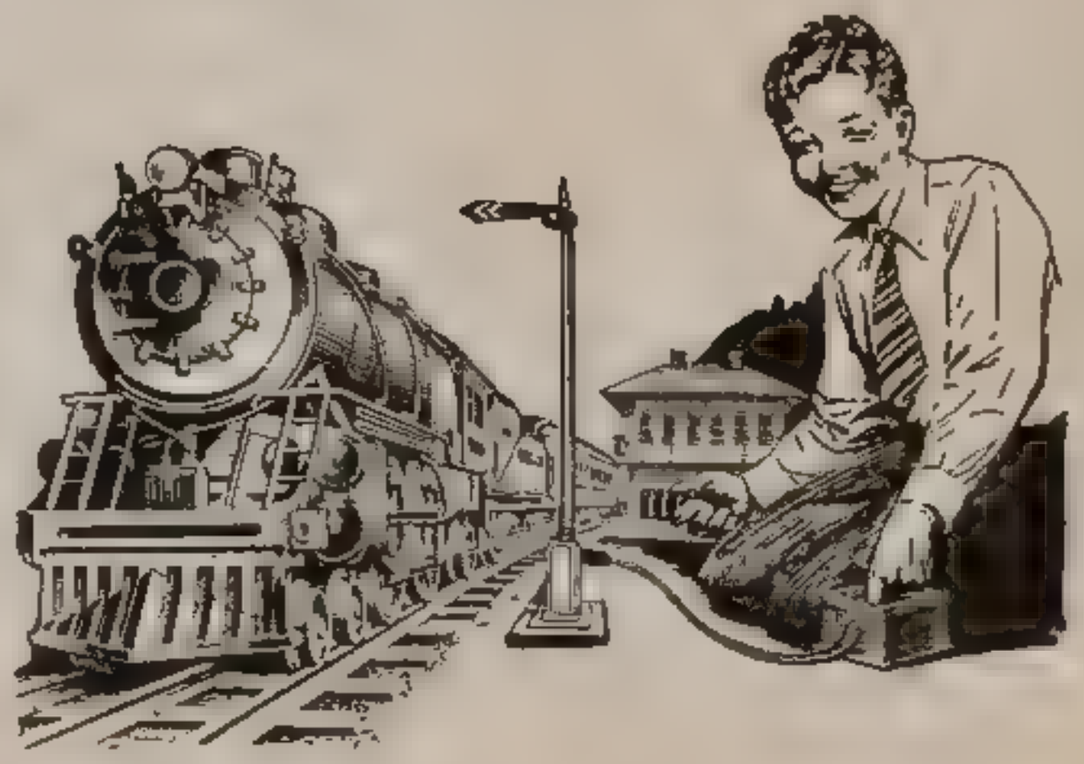
A complete railroad system. Four car train is 45" long. Powerful locomotive has *reversal to motor.* Includes Water Tank, Semaphore, Flashing Signal Station, 12" Tunnel and twelve feet of track. Ea. $17.50



AMERICAN Flyer sales are actually ahead of all previous years. Our many new dealers are now buying American Flyer because of one or more of the following facts:

1. DEALERS MAKE MORE MONEY; American Flyer's sound sales policy has resulted in an *unusual degree of consumer price stability.* Dealers easily sell American Flyer Products at their *full list prices.*
2. UNPARALLELED VALUES; In size, realism, detail, superior construction and in the number of pieces included in a train set, the consumer actually gets more for his money when he buys American Flyer.
3. REAL AMERICAN DESIGN; For years American Flyers have been noted for their faithful reproductions of *American* Trains—European design has never been followed.
4. CONSUMER DEMAND; There will be a total of over 31 million sales compelling messages appearing in the leading magazines and newspapers. They will be seen and acted upon by thousands.
5. DEALER SERVICE; American Flyer offers complete merchandising service to help you establish yourself as Train Headquarters. This includes Demonstration Display Stands, Equipment Panels, Window Display Pieces, Window Streamers, Truck Banners, Envelope Enclosures and full color 48-page Catalogs and Merchandise Folders.

A Comparison Is Invited. Send for Samples and Profit Making Dealer Proposition

THE KIRCHHOF PATENT COMPANY

60-64 Union Street — Dietze Building — Newark, N. J.

NOWADAYS there is just as much attention paid to equipping a child's room as to furnishing the rest of the house. And it's worth while for the dealer to recognize this fact and include in his stock sturdily-built, well-finished furniture for children . . . furniture which is within the accepted price range.

The Mason line is designed and constructed on the basis of this knowledge. Take, for example, the Mason Child's Dresser No. 664, illustrated above. Two beautiful finishes are available — a charming two-tone green and a golden maple — with drawers daintily decorated in appropriate colors.

The Dresser, fitted out with a real 8" x 12" mirror, stands 42½" high and has a top which is 10" wide and 22" long. And in spite of its sturdy construction and delightful finish it is priced to retail at about $12.

. . . we hope you have received a copy of the 1930 Mason catalog, showing 39 additional Mason values.

. . . if not, let us know, and we'll see that you are supplied.

Complete unit includes Kodatoy with one 100-foot metal spool and one Kodaplay Theater with "silvered" screen surface

EASTMAN
Announces
KODATOY

A new 16 mm. toy movie projector that throws sharp pictures on its own silvered screen . . .

ANY experienced buyer will quickly appreciate the possibilities of a reliable toy projector.

Kodatoy throws a brilliant image... crystal clear...steady and flickerless That's because its design embraces the same principles as those found on costly equipment.

Kodatoy is styled to appeal to youthful tastes. Maroon in color... crystalline finish. Mechanically, it performs with amazing precision. Yet a youngster can thread and operate it with ease.

Your customers will be asking for Kodatoy when the magazine advertising starts in November. Be ready for them. Put a demonstrator on the counter with its own special screen. Youngsters will buzz about it to parents. Parents will be led to your store.

Write for quantity prices...and other information about this new projector that Eastman now offers.

Details on KODATOY

ONLY ONE MODEL

SIZE: 12⅞" by 9¾" by 5⅞".

WEIGHT: 5 lbs. Kodatoy is small and light enough to be easily portable. Requires only small space for counter demonstration

FOOTAGE: 100 feet of 16 mm film which is equivalent to 350 feet of standard 35 mm stock.

LENS: 31 mm projection lens. Kodatoy's optical system is superior to anything in the toy class. It has a dependable pull-down and three blade shutter that permits steady flickerless pictures. No framing necessary.

FOCUS: Sharp focus is easy by sliding the lens barrel in its mount.

ILLUMINATION: No. 1130 double filament 6-8 volt headlight lamp. Available everywhere at small cost. Metallic reflector. Transformer mounted in lamp house. 105-125 volts 60 cycle AC only.

REWIND: By hand with crank on rewind spindle.

FINISH: Maroon crystalline. Finger-print and scratch-proof.

THEATER: Made of heavy cardboard with holes to permit daylight showings. Silvered screen surface is 8 x 11. Shipped folded in Kodatoy carton.

SHIPPING CARTON: Fiberoid box. Size 14 by 12 by 8½.

Every Kodatoy owner will be a month-to-month buyer of Kodaplays . . .

KODAPLAYS are 16 mm. movies made especially for juvenile spectators. There is a wide choice of subjects—comedy, educational, drama and animated cartoons. They are all on safety stock

Kodaplays are available in three lengths ranging in price from 30 to 90 cents. For the Kodatoy dealer they represent a big repeat item—a source of steady year 'round profit Your customers will be back for new releases.

This Season *you'll need these proved sales makers!*

Liberty Playboats

THE very reason which has prompted many toy departments to mark Liberty Playboats "sold" before the season's first purchases is the reason why Liberty Playboats should be among your first choices for the season.

Liberty Playboats sell — buyers from Atlantic to Pacific have discovered that to their profit. Nor is the reason for Playboats' excellent sales punch hard to analyze.

Youngsters have always been boat minded — and susceptible to color. Liberty Playboats meet these boy characteristics by building a complete line of powerful boats and seaplanes — faithful reproductions of naval, commercial, pleasure boats and planes, all finished in brilliant color combinations to catch the youngster's eye.

With all-wood hulls, they cannot sink. With their quick-detachable undercarriage and wheels, they are equally at home on land and water. And they possess intriguing, novel play features not equalled by any other boat toy and are ever seen. Indoors and outdoors, they rank high among the toy favorites of any model-boat-set boy.

And with their wide range of styles, sizes and prices, they fulfill every requirement of the gift-giver's preference and pocketbook. You can bank upon Liberty Playboats to make good for your toy department. Ask us for complete literature and prices.

One of the twenty-five 4-8-2 type locomotives recently delivered to the Wabash by The Baldwin Locomotive Works, photographed near Ivesdale, Ill.

Forgings Castings Springs of VANADIUM STEELS

on High-Speed Freight Locomotives for the WABASH . . . . . .

TWENTY-FIVE Mountain type locomotives, built by The Baldwin Locomotive Works and recently delivered to the Wabash Railway Company, are now engaged in fast freight service between Decatur, Illinois, and Montpelier, Ohio, a run of 272 miles, with maximum grades eastbound of 0.6% and 0.9% westbound. At high speed, the new locomotives have an increased capacity of approximately 25% more than the locomotives formerly used in the same service.

In compliance with the Railway Company's specifications, and following its past practice, the twenty-five new Mountain type locomotives are equipped with Vanadium Steels in many vital units.

Among the important forgings of Vanadium Steel are driving axles, main rods, side rods, connecting rods, knuckle pins, piston rods and valve yokes. Main engine frames and driving wheel centers are Vanadium Cast Steel, while back engine truck and tender springs are made of Chrome-Vanadium Steel.

With their higher strength, greater toughness and superior durability, Vanadium Steels are important factors in safeguarding operating dependability and continuity of locomotive service. May we send you complete data on Vanadium Steels in locomotive construction? Write us.

VANCORAM

FERRO-ALLOYS of vanadium, silicon, chromium and titanium; silico-manganese, tungsten and molybdenum, produced by the Vanadium Corporation of America, are used by steel makers in the production of high-quality steels.

PERFECTED TO REDUCE *Wrist Fatigue*

Those shots that you miss toward the end of the round — shots that ought to be easy — are the penalties exacted by wrist-fatigue ▾▾ penalties that hurt the crack golfer as well as the rank and file of the "once a week" army. ▾▾ Wilson has the cure. Entirely new. Entirely exclusive. Steel-shafted, matched irons — with blades of stainless steel or rustless chromium plate ▾▾ graded to the ultimate fraction of correct pitch — perfectly matched in weight and balance. ▾▾ But to the known advantages of steel-shafted clubs, Wilson has added an ultra-modern improvement. It is a marvelous method of cushioning that keeps the wrists comfortable right through to the 36th hole. An exclusive Wilson feature does it—an original method of anchoring the shaft in the hosel through a protective bushing of balata. ▾▾ Ask your pro or dealer to show you.

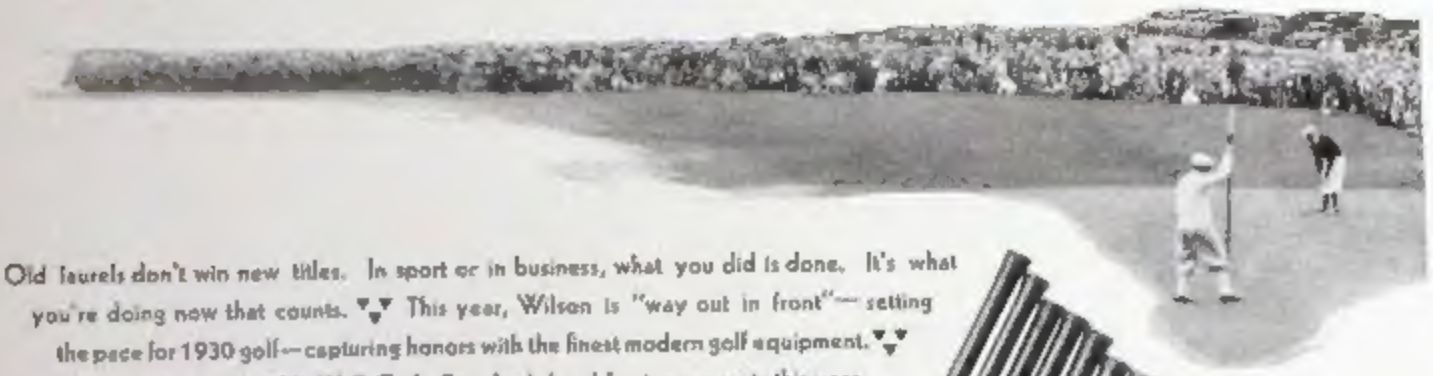
'WAY OUT IN FRONT!



Old laurels don't win new titles. In sport or in business, what you did is done. It's what you're doing now that counts. ▼▼ This year, Wilson is "way out in front"—setting the pace for 1930 golf—capturing honors with the finest modern golf equipment. ▼▼ The new 1.68 Hol-Hi (U.S.G.A. Standard, legal for tournaments this year—obligatory in 1931) meets every requirement for the sportsman golfer ▼▼ legal size ▼▼ amazing distance ▼▼ durability ▼▼ and steadiness around the greens. It performs like a thoroughbred for the expert. It saves the average golfer many strokes. ▼▼ And this year, too, an exclusive Wilson feature brings steel-shafted irons to the peak of perfection. With shafts anchored in the hosel through a balata bushing, every shot is cushioned ▼▼ wrist fatigue is reduced to the minimum. Incidentally, these irons have the necessary depth of face needed for best results with the new larger ball. Ask your pro or dealer.

Westinghouse Pioneers!

The Erie Railroad Places in Service the First Double Power Plant Oil-Electric Rail Car in America.

THIS car, propelled by two Westinghouse 300-hp. oil engine generator units, is entering revenue service on the Kent Division of the Erie Railroad, between Youngstown and Dayton, Ohio.

Its ability to travel smoothly at a free running speed of 60 mph. hauling two trailers as well as its ability to make more than three trips on a scheduled run of 242 miles without refueling, permits a fast, accurate, and economical schedule to be maintained.

These are just a few of the many advantages of oil electric rail cars for branch line and light local main-line passenger service.

Service, prompt and efficient, by a coast-to-coast chain of well-equipped shops
